(202) 887-1500 Kenneth A. Siegel Jesse S. Gillespie Morrison & Foerster LLP Shin-Marunouchi Building, 29th Floor 5-1, Marunouchi 1-Chome Chiyoda-ku, Tokyo, Japan 100-6529 +81-3 3214 6522 Richard D. Truesdell, Jr. Derek J. Dostal Davis

Polk & Wardwell LLP 450 Lexington Avenue New York, New York 10017 +1 (212) 450-4000 Approximate date of commencement of proposed sale to public: As soon as practicable after this registration statement becomes effective. If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the

Securities Act of 1933, check the following box. If this Form is filed to register additional securities for an offering

pursuant to Rule 462(b) under the Securities Act, check the following box and list the Securities Act regist ration statement number of the earlier effective registration statement for the same offering. If this Form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the

Securities Act registration statement number of the earlier effective registration statement for the same off ering. If

this Form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same

offering. Indicate by check mark whether the registrant is an emerging growth company as defined in Rul e 405 of the

Securities Act. Emerging growth company If an emerging growth company that prepares its financial stat ements in accordance with U.S. GAAP, indicate by check mark if the registrant has

elected not to use the extended transition period for complying with any new or revised financial accountin g standards† provided pursuant to Section 7(a)(2)(B) of the Securities Act. The registrant hereby amend s this registration statement on such date or dates as may be necessary to delay its effective date until the

registrant shall file a further amendment which specifically states that this registration statement shall ther eafter become effective in accordance with Section 8(a) of the Securities Act of 1933, as amended, or until the registration

statement shall become effective on such date as the Commission, acting pursuant to such Section 8(a), shall determine. † The term "new or revised financial accounting standard" refers to any update issued by the Financial

Accounting Standards Board to its Accounting Standards Codification after April 5, 2012. 1 Arm Holdings Limited, a company with limited liability incorporated under the laws of England and Wales, will

become the holding company of Arm Limited and will be the Registrant. We intend to alter the legal status of the Registrant under English law from a private limited company by re-registering as a public

limited company and changing the name of the Registrant from Arm Holdings Limited to Arm Holdings plc prior to the completion of this offering. See the section titled "Corporate Reorganization" in the prospectus which forms a part of this

registration statement. Table of Contents The information contained in this prospectus is not complete an d may be changed. The

selling shareholder may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and the sellin

g shareholder is not soliciting

offers to buy these securities in any jurisdiction where the offer or sale is not permitted. Subject to Comple tion Preliminary Prospectus dated August 21, 2023. American Depositary Shares (Representing

Ordinary Shares) This is an initial offering of American depositary shares ("ADSs") representing ordinary s hares of Arm Holdings plc. All of the ADSs to be sold in this offering are currently held by the selling share holder identified in this prospectus. We are not selling

any of the ADSs in this offering and will not receive any proceeds from the sale of the ADSs by the selling shareholder in this offering. Each ADS represents the right to receive one ordinary share, nominal value £0.001 per share, and may be

evidenced by American depositary receipts ("ADRs"). Prior to this offering, there has been no public mark et for the ADSs or our

ordinary shares. The initial public offering price per ADS is estimated to be between \$ and \$. We have applied to list our ADSs on the Nasdaq Global

Select Market ("Nasdaq") under the symbol "ARM". We are a "foreign private issuer" as defined under the U.S. federal securities laws and, as such, will be subject to reduced public company reporting and stock e xchange governance requirements. See "Management and Executive Remuneration—Foreign Private Iss uer Exemption" for additional

information. SoftBank Group Corp. ("SoftBank Group") is expected to beneficially own approximately % of

our outstanding ordinary shares following the completion of this offering (or approximately % if the underwriters exercise in full their option to purchase additional ADSs from the selling shareholder). As a result of

SoftBank Group's ownership, after the completion of this offering, we will be a "controlled company" within the meaning of Nasdaq rules. See "Management and Executive Remuneration—Controlled Company St atus." Investing in our ADSs involves a high degree of risk. Before buying any ADSs, you should carefully read the discussion of material risks of

investing in our ADSs in "Risk Factors" beginning on page 21 of this prospectus. PER ADS TOTAL Initial public offering price \$\$ Underwriting discounts and commissions Proceeds, before expenses, to the selling shareholder The underwriters may also exercise their option to purchase up to an additional

ADSs from the selling shareholder at the initial public offering price, less the underwriting discount s and commissions, for 30 days after the date of the final prospectus. We

will not receive any proceeds from the sale of such additional ADSs by the selling shareholder. Raine Sec urities LLC is acting as our

financial advisor in connection with this offering. The underwriters expect to deliver the ADSs against pay ment in U.S. dollars to

purchasers on or about , 2023. Neither the Securities and Exchange Commission nor any U.S. state securities commission has approved or disapproved of these securities or

passed upon the accuracy or adequacy of this prospectus. Any representation to the contrary is a criminal offense. Barclays Goldman Sachs & Co. LLC J.P. provide you with information that is different from that contained in this prospectus or in any free writing pr ospectus we may authorize to be delivered or made available to you. Neither we, the selling shareholder nor the underwriters take any

responsibility for, or provide any assurance as to the reliability of, any other information that others may gi ve you. We, the selling shareholder and the underwriters are offering to sell ADSs and seeking offers to p urchase ADSs only in the U.S.

and certain other jurisdictions where offers and sales are permitted. The information contained in this prospectus is accurate only as of the date on the cover page of this prospectus, regardless of the time of delivery of this prospectus or any

sale of ADSs. For investors outside the U.S.: Neither we, the selling shareholder nor any of the underwrite rs have taken any action

to permit this offering or possession or distribution of this prospectus in any jurisdiction where action for th at purpose is required, other than in the U.S. You are required to inform yourselves about and to observe any restrictions relating to

this offering and the distribution of this prospectus. We are incorporated under the laws of England and W ales and a majority of our

outstanding securities is owned by non-U.S. residents. Under the rules of the U.S. Securities and Exchange Commission (the "SEC"), we are eligible for treatment as a "foreign private

issuer." As a foreign private issuer, we will not be required to file periodic reports and financial statements with the SEC as frequently or as promptly as domestic registrants whose securities are registered under the Securities Exchange Act

of 1934, as amended (the "Exchange Act"). ABOUT THIS PROSPECTUS Prior to the completion of this of fering, we underwent a corporate reorganization described under the section titled "Corporate"

Reorganization," pursuant to which Arm Limited became a wholly owned subsidiary of Arm Holdings Limit ed, a holding company with nominal assets and no liabilities, contingencies or commitments, which has n ot conducted any operations prior to

this offering other than acquiring the entire issued share capital of Arm Limited. Prior to the completion of t his offering, we intend to re-register Arm Holdings Limited as a public limited company and to

change its name from Arm Holdings Limited to Arm Holdings plc. Unless otherwise indicated or the context otherwise requires, in this

prospectus, "Arm," the "Company," "we," "us" and "our" refer to (i) Arm Limited and its consolidated subsidiaries prior to the completion of our corporate reorganization, (ii) Arm Holdings

Limited and its consolidated subsidiaries after the completion of our corporate reorganization and prior to the re-registration of Arm Holdings Limited as a public limited company and (iii) Arm Holdings

plc and its consolidated subsidiaries after the re-registration of Arm Holdings Limited as a public limited co mpany. See "Corporate Reorganization" and "Description of Share Capital and Articles

of Association." NOTE REGARDING TRADEMARKS, TRADENAMES AND SERVICE MARKS This prosp ectus includes trademarks, tradenames and service marks, certain of which belong to us and others that are the property of other

organizations. Solely for convenience, trademarks, tradenames and service marks referred to in this prospectus appear without the $\[mathbb{R}\]$, TM and SM symbols, but the absence of those symbols is not intended to in dicate, in any way, that we will not assert our rights or that the applicable owner will not assert its rights to these

trademarks, tradenames and service marks to the fullest extent under applicable law. We do not intend our use or display of other parties' trademarks, tradenames or service marks to imply, and such use or display should not be construed to

imply, a relationship with, or endorsement or sponsorship of us by, these other parties. ii Table of Content s PRESENTATION OF FINANCIAL AND OTHER INFORMATION Our fiscal year ends on March 31 of each year. We prepare our consolidated financial statements in accordance with generally accepted

accounting principles in the U.S. ("GAAP"). We present our consolidated financial statements in U.S. dollars ("USD"). We have historically conducted our business through Arm Limited, and therefore, our historical consolidated financial statements included in

this prospectus present the consolidated results of operations of Arm Limited and its subsidiaries. The consolidated financial statements included in this prospectus do not give effect to our corporate reorganization described in the section titled

"Corporate Reorganization." The financial information contained in this prospectus does not amount to statutory accounts within

the meaning of section 434(3) of the U.K. Companies Act 2006 (the "Companies Act"). NON-GAAP FINA NCIAL MEASURES This prospectus contains certain financial measures that are not

presented in accordance with GAAP, including Non-GAAP operating income, Non-GAAP net income from continuing operations and Non-GAAP free cash flow, that are not required by, or prepared in accordance with, GAAP. We refer to these measures as "non-GAAP financial measures." See

"Management's Discussion and Analysis of Financial Condition and Results of Operations—Key Financial and Operating Metrics—Non-GAAP Financial Measures" for our definitions of these non-GAAP financial measures, information about how and why we use these non-GAAP financial measures and a reconciliati on of each of these non-GAAP financial measures to its most directly comparable financial measure calculated in accordance with GAAP. INDUSTRY AND MARKET DATA This prospectus contains estimates, projections and other information concerning our industry, our business and the markets for our products, including, but not limited to, our general expectations and market position, market opportunity and market size. Information that is based on estimates, forecasts, projections, market research or similar methodologies is inherently subject to

uncertainties, and actual events or circumstances may differ materially from events and circumstances th at are assumed in this information. Unless otherwise expressly stated, we obtained this industry, business, market and other data from our own

internal estimates and research as well as from reports, research surveys, studies and similar data prepar ed by market research firms and other third parties, industry and general publications, government data a nd similar sources. While we are

responsible for the accuracy of such information and believe our internal company research as to such m atters is reliable and the market definitions are appropriate, neither such research nor these definitions have been verified by any independent

source. In addition, assumptions and estimates of our and our industry's future performance are necessarily subject to a high degree

of uncertainty and risk due to a variety of factors, including those described in the section titled "Risk Fact ors." These and other factors could cause our future performance to differ materially from our assumption s and estimates. See

"Special Note Regarding Forward-Looking Statements." GLOSSARY OF CERTAIN TERMS The following are abbreviations, acronyms and definitions of certain terms used in this document: • "ADAS" means adv anced driver assistance systems. iii Table of Contents • "AI" means artificial intelligence. • "Arm China" me ans Arm Technology (China) Co. Ltd, an entity that operates independently of us and is

our single largest customer. Acetone Limited, an entity controlled by SoftBank Group and in which we ow n a 10% non-voting interest, owns approximately 48% of Arm China. Our 10% non-voting interest in Aceto ne Limited represents an approximate 4.8%

indirect ownership interest in Arm China. • "Armv9" means the ninth version of the Arm instruction set arc hitecture. • "Articles" means our articles of association to be in place upon completion of this offering. • "A SP" means average selling price. • "CE" means consumer electronics. • "Citibank" means Citibank, N.A., which will serve as the depositary for the ADSs. • "CPU" means a central processing unit, which executes the instructions of a computer program. • "CSP" means cloud service provider. • "design win" means a cus tomer has chosen to use Arm products in a certain future chip design, including

future chip designs under existing license agreements. • "EDA" means electronic design automation, a cat egory of software tools for designing electronic systems

such as integrated circuits and printed circuit boards. • "embedded" means embedded processors, which are processors used in embedded systems such as industrial

automation, sensors, signage and transportation, and home appliances, among other things. • "GPU" means a graphics processing unit, which is used to accelerate the display of complex graphics

onto a screen and can also be used for other mathematical applications. • "IC" means integrated circuit. • "IoT" means Internet of Things. • "IP" means intellectual property. • "IPLA" means our intellectual property license agreement with Arm China, pursuant to which, among other

things, we granted Arm China certain exclusive rights to sublicense our IP to PRC customers. • "ISA" mea ns instruction set architecture, which specifies how software running on a CPU will behave. • "IVI" means invehicle-infotainment. • "ML" means machine learning. • "NFC" means near field communication. • "NPU" means a neural processing unit, which specializes in the acceleration of ML algorithms. • "OEM" means a noriginal equipment manufacturer. • "open-source" means software or hardware design that is released under a license in which the copyright

holder grants users the rights to use, study, modify or distribute the computer software or hardware desig n and its source code on the condition that other software using, incorporating, linking, integrating or bund ling with such software be

disclosed or distributed in source code form, licensed for the purpose of making derivative works or redistr ibutable at no charge. • "Physical IP" means the physical IP components used in the process of translating a design of complex

SoC integrated circuits into a manufactured chip. iv Table of Contents • "PRC" means, for the purpose of this prospectus, the People's Republic of China, including the

Hong Kong Special Administrative Region and the Macau Special Administrative Region, but excluding T aiwan. • "RAND" means reasonable and non-discriminatory, which typically

is used to describe a voluntary licensing commitment that standards-setting organizations often request from the owner of an IP right that is, or may become, essential to practice a technical standard. • "RISC" means reduced instruction set computer. • "SmartNICs" means smart network interface cards. • "System IP" means components used in an SoC design, other than the CPU, GPU, etc., such as

interfaces to external components and on-chip interconnects that bridge functional components within the SoC. • "System on Chip" or "SoC" means an integrated circuit that combines multiple functional

blocks together in a single chip. • "TLA" means Technology License Agreement. • "x86" means the x86 fa mily of complex ISAs. v Table of Contents PROSPECTUS SUMMARY This summary highlights certain inf ormation contained elsewhere in this prospectus. This summary may not, and does not purport to, contain all

the information that may be important to you, and we urge you to read this entire prospectus carefully, including the "Risk Factors," "Special Note Regarding Forward-Looking Statements," "Business" and "Management's Discussion and Applysic of Financial Condition and Regults of Operations" acctions and to

"Management's Discussion and Analysis of Financial Condition and Results of Operations" sections and the consolidated financial statements of Arm Limited and the notes to those statements, included elsewher e in this prospectus, before

deciding to invest in the ADSs. Our North Star Building the future of computing, on Arm. Together. For everyone. Our Company Arm is defining the future

of computing. Semiconductor technology has become one of the world's most critical resources, as it ena bles all electronic devices today. At the heart of these devices is the CPU, and Arm is the industry leader of CPUs. We architect, develop,

and license high-performance, low-cost, and energy-efficient CPU products and related technology, on which many of the world's leading semiconductor companies and OEMs rely to develop their products. Our energy-efficient CPUs have enabled advanced computing in greater than 99% of the world's smartphones, for the year ended December 31, 2022, and more than 250 billion chips, cumulatively, powering everything from the tiniest of sensors to

the most powerful supercomputers. Today, Arm CPUs run the vast majority of the world's software, including the operating systems and applications for smartphones, tablets and personal computers, data centers and networking equipment, and

vehicles, as well as the embedded operating systems in devices such as smartwatches, thermostats, dron es and industrial robotics. We estimate that approximately 70% of the world's population uses Arm-based products, and the scale of Arm's reach continues to expand, with more than 30 billion Arm-based chips reported as shipped in the fiscal year ended

March 31, 2023 alone, representing an approximately 70% increase since the fiscal year ended March 31, 2016. Today, any company can

make a modern computer chip through the unique combination of our energy-efficient CPU IP and related technologies and our unmatched ecosystem of technology partners, and do it cost effectively due to our fl

exible business model. Each CPU product

can be licensed to multiple companies, leading to economies of scale that allow us to charge each license e only a fraction of what it would cost them to develop internally, while minimizing their risk and time-to-m arket. With the complexity of CPU design increasing exponentially, over the past decade no company has successfully designed a modern CPU from scratch. We have been innovating at the forefront of

compute technology for decades and have established important relationships with the companies driving the future of computing across multiple industries. More than 260 companies reported that they had shipp ed Arm-based chips in the fiscal year

ended March 31, 2023, including the largest technology companies globally (such as Amazon.com, Inc. a nd Alphabet Inc.), major semiconductor chip vendors (such as Advanced Micro Devices, Inc., Intel Corpor ation, NVIDIA Corporation, Qualcomm Inc. and

Samsung Electronics Co., Ltd.), automotive industry incumbents, leading auto suppliers, IoT innovators, a nd more. The exponential rise in

smart devices in both consumer and enterprise markets has increased the demand for chips that provide more computational capability while optimizing energy efficiency. Thirty years ago, the PC was the only computer with which most people would

interact at home, work, or school. Then, mobile phones became computers in our pockets and digital TVs became computers in our living rooms. Now, vehicles are effectively computers on wheels, and servers a nd networking equipment are the computers

that connect all these devices and services together. Additionally, there are billions of tiny low-cost device s—from sensors to electric motor controllers—that are now functionally computers, as

well. Each of these computers needs at least one CPU, and in many cases more than one. This trend has driven the dramatic growth of Arm-based chips over the past several years. 1 Table of Contents Our crea tion of the Arm CPU architecture, the world's most widely used CPU

architecture, has resulted in the proliferation and evolution of computers as people know them today, adv ancing a paradigm of increasing compute performance coupled with industry-leading power efficiency. We enabled the mobile phone and smartphone

revolution, and through our focus on energy efficiency and our history of continuous innovation, we have e nabled new categories of "smart" consumer electronics. Today, we are redefining what is possible in indu stries such as cloud

computing, automotive, and IoT. Energy efficiency is not only important for business, but it is also a critical component in achieving sustainability for our planet. This makes Arm CPU technology ideal for current and future computing applications

as the demands for compute performance are growing exponentially while the need for low power remain s critical. Every CPU has an ISA,

which defines the software instructions that can be executed by the CPU, essentially a common language for software developers to use. The ISA sets the foundation for a large library of compatible software whi ch runs on those CPUs. As the Arm CPU is

the most popular and pervasive CPU in history, the Arm ISA is also the most popular and pervasive ISA in history. This means that Arm-based chips have a global community of software developers familiar with how to program the CPU. Chip designers

utilizing the Arm CPU can add desired functionality (Wi-Fi connectivity, image processing, video processing, etc.) to create an SoC to meet the needs of any end market. Our primary product offerings are leading CPU products that address diverse performance, power, and cost requirements. Complementary products such as GPUs, System IP, and compute platforms are also available and enable high-performance, efficient, reliable, system-level creation for a wide range of increasingly sophisticated devices and applications. Our development tools and robust

software ecosystem have further solidified our position as the world's most widely adopted processor arch itecture and have created a virtuous cycle of adoption, which means that software developers write software for Arm-based devices because

it offers the biggest market for their products, and chip designers choose Arm processors because they h ave the broadest support of software applications. This combination of pervasiveness and ease of portability has resulted in our CPU designs having the world's richest software ecosystem,

built in partnership with the leading operating systems providers (including Google Android, Microsoft Win dows and all major Linux distributions), software tools and game engine vendors (such as Electronic Arts I

nc., Unity Software Inc. and Epic

Games, Inc.), and application developers. We also support a flourishing ecosystem of third-party tool ven dors for embedded software and a vibrant IoT ecosystem. Open-source software plays a vital role in the s uccess of Arm-based chips, and we are committed to contributing to open-source software and tools to en sure our offerings are optimized for the latest technologies. As the world moves increasingly towards AI- a nd ML-enabled computing, Arm will be central to this transition. Arm CPUs already run AI and ML workloads in billions of devices, including smartphones, cameras, digital TVs, cars and cloud data centers . The CPU is vital in all AI systems, whether it is handling the AI workload entirely or in combination with a co-processor, such as a GPU or an NPU. In the emerging area of large language models, generative AI and autonomous driving, there will be a heightened emphasis on the low power acceleration of these algorithms. In our latest ISA, CPUs, and GPUs, we have added new functionality and instructions to accelerate future AI and ML algorithms. We are working with leading companies such as Alphabet, Cruise LLC, Mercedes-Benz, Meta and NVIDIA to deploy

Arm technology to run Al workloads. Arm had 5,963 full-time employees across North America, Europe and Asia as of March 31, 2023. We

are an engineering-first company, with approximately 80% of our global employees, as of March 31, 2023, focused on research, design, and technical innovation, and we have global operations and research and development ("R&D")

centers in the U.K., Europe, North America, India, and Asia-Pacific. Our headquarters are located in Cambridge, U.K. For the fiscal year

ended March 31, 2023, our total revenue was relatively flat at \$2,679 million, as compared to \$2,703 million in the fiscal year ended March 31, 2022. In the fiscal year ended March 31, 2023, as a 2 Table of Contents percentage of total revenue our gross profit margin was 96% and operating income margin was 25%. In the fiscal year ended March 31, 2023, we generated net income from continuing operations of \$524 million (Non-GAAP net income from continuing operations of \$657 million), compared to \$676 million

n (Non-GAAP net income from continuing operations of \$663 million) in the fiscal year ended March 31, 2 022. For the fiscal year ended

March 31, 2022, our total revenue grew by 33%, to \$2,703 million, from \$2,027 million in the fiscal year en ded March 31, 2021. In the fiscal year ended March 31, 2022, as a percentage of total revenue our gross profit margin was

95% and operating income margin was 23% compared to 93% and 12%, respectively, in the fiscal year e nded March 31, 2021. In the fiscal year ended March 31, 2022, we generated net income from continuing operations of \$676 million (Non-GAAP net income from continuing operations of \$663 million), compared to \$544 million (Non-GAAP net income from continuing operations of \$207 million) in the fiscal year ended March 31, 2021. Our Journey History Established in 1990, Arm began as a joint venture between Acorn C omputers, Apple Computer, and VLSI Technology. We were publicly listed on the

London Stock Exchange and the Nasdaq Stock Market from 1998 until 2016, when we were taken private by SoftBank Group, our controlling shareholder. The original joint venture set out to develop a processor that was high performance, power efficient, easy to program, and readily

scalable—a goal that continues to define Arm today. Our CPUs initially gained significant traction in mobil e phones in the mid-1990s because our energy-efficient processors provided an appropriate level of performance while consuming little power, which was critical for these smaller form factor devices. Over time, mobile phones, and the chips they used, became more advanced and ultimately evolved into the s martphones that are prevalent today. The

Arm CPU proved to be critical in enabling the smartphone revolution. The mobile phone was one of the fir st consumer electronic devices to

evolve into an intelligent, connected, digital device that needed a smart processor to run a growing library of software. With the help of Arm technology, many more devices such as televisions, watches, washing machines, cameras, factory equipment,

and others are undergoing the same revolution. Strategic Evolution Since becoming a private company in 2016, we have made significant investments to further develop and market our products to build on our success in powering the world's smartphones and other consumer electronic devices. We have focused in recent years on making Arm the ubiquitous provider of compute technology in all market segments by expanding into new markets, including cloud

computing, networking, automotive, and IoT, most of which have strong secular tailwinds. Our investment

s have resulted in a diversified business with more durable growth. Key elements of our evolution include d: • Creating a Market-Led Business with Products Optimized for Specific

Verticals. We have developed multiple product families, each optimized for markets such as smartphones, cloud computing, networking, automotive and IoT. • Building the New Armv9 Architecture. Leveraging the progress made by previous generations of our

products, we embarked on the development of the Armv9 architecture, the ninth version of the Arm ISA. T oday, the Armv9 architecture powers CPUs that offer improved security and performance across various applications. Consequently, the Armv9

architecture has the potential to drive our royalty opportunity per device even higher. 3 Table of Contents

• Broadening our Compute Platforms. We have curated, integrated, and optimized our CPU and

system-design components together into foundational compute platforms to deliver best-in-class performa nce and energy efficiency for our customers. • Expanding our Value Proposition for Customers. As building chips using the most advanced

manufacturing processes became more complex and more costly, the opportunity to expand our product offerings to our customers increased. As a result, we have created more advanced and optimized CPU products that enable us to provide more value to

our customers by giving their devices more functionality and more performance while using less power an d at lower cost. • Introducing New Licensing Models with Increased Focus on Maximizing Royalty Opportunities. By

licensing a portfolio of Arm products (rather than licensing a single CPU product or other technology desig n), we have made it easier and more compelling for customers to access and utilize more Arm products, f urther broadening our potential

customer base and end market penetration. Our licensing models provide greater flexibility to our custom ers and maximize our opportunities to secure more design wins for our products, which results in greater opportunities to increase our recurring

royalty revenue. • Diversifying and Deepening our Relationships with Market Leaders . We have establish ed close

partnerships with leading companies across all of our target markets, including, among others, Guangdon g OPPO Mobile Telecommunications Corp., Ltd., Samsung, vivo Mobile Communication Co., Ltd. and Xia omi Communications Co., Ltd. in mobile

computing, Amazon and Alibaba Group Holding Limited in cloud compute, Cruise and Mercedes-Benz in advanced automotive, and Raspberry Pi Ltd, Schneider Electric SE and Siemens AG in industrial IoT. Industry Background Semiconductors are

indispensable to everyday life. In today's technology-driven world, semiconductors are the enablers of the devices and infrastructure that facilitate virtually everything people do, such as making a phone call, send ing an email, storing files

in the cloud, streaming videos, or traveling by car, train, or plane. Almost all of the products and services people use every day rely on semiconductors. Manufacturing, logistics, city infrastructure, and building management also increasingly build

their processes and services around semiconductor-enabled devices. As consumers and enterprises continue to demand more from their devices, the pervasiveness of high-performance and energy-efficient semi conductors will continue to expand. We believe

there are several key trends driving the growth and evolution of the semiconductor industry. Proliferation of Smart, Connected Devices Supporting

an Increasingly Digital World The world is becoming increasingly digital with the proliferation of smart, connected devices, such

as smartphones, wearables, PCs, tablets, and other electronic devices. Even everyday products like wash ing machines, thermostats, and utility meters are becoming more advanced. According to Deloitte's 2022 Connectivity and Mobile Trends Survey,

the average U.S. household had 22 connected devices in 2022, doubling from 11 devices in 2019. The m arket trend to make nearly all products smart and connected is not just limited to consumer electronics, but is also driving a wave of innovation

across a broad range of end markets and use cases. Increased Need for High-Performance, Power-Effici ent Compute The massive expansion of data, advanced software applications, and AI are driving the nee d for high-performance compute capabilities. To address increasingly complex workloads, a key approach

has been to increase the speed of a CPU and expand the number of processor cores per chip. For instance, the

number of cores per "high end" Arm-based chip has increased from 8 in 2016 to 192 in 2023. Solely running an existing chip faster may deliver more compute performance, but increasing performance results in higher energy 4 Table of Contents costs, which may cause thermal limits to be exceeded. Collectively, these considerations result in the need for innovation in chip design to address market demands for an optimal balance of

performance, efficiency, size, and cost across end markets. Increasing Complexity and Cost of Designing Leading-Edge Solutions The resources required to develop leading-edge products are significant and con tinue to increase exponentially as manufacturing process nodes

shrink. According to the International Business Strategy, Inc. ("IBS"), IC design costs were approximately \$249 million for a 7nm chip and approximately \$725 million for a 2nm chip, representing approximately a t hree-times increase in design cost as compared to a 7nm chip. Design partners play an increasingly valua ble role in the chip design process by providing specialized capabilities and expertise that enable semiconductor suppliers to focus on their core product differentiation, while keeping pace with market inn ovation. Design partners facilitate innovation and enhance customers' competitive positioning by reducing the complexity, risk, and cost

of a significant part of the development cycle. For example, to design a 2nm chip, IBS estimates that the s oftware development, verification, and IP qualification is 71% of the overall cost. In addition, design partners, like Arm, that can

demonstrate a deep understanding of their customers' workloads are better positioned to integrate thems elves into their customers' workflows, further expanding their value proposition over time. Growth of In-Ho use Development and Custom Silicon Chips Many OEMs today utilize "off-the-shelf," or

"merchant," semiconductors when building their product offerings. However, this approach can introduce c ompromises. For example, an OEM may use a chip that includes features that are irrelevant for its use case, at the expense of

performance and cost efficiency. Similarly, an OEM may need a chip that incorporates features not otherw ise available from a merchant supplier. As a result, leading OEMs are increasingly looking to build custom chips in-house that deliver greater

performance and greater efficiency at an equal or better price for a particular use case. The success of Ar m-based products such as Amazon's Graviton, deployed across Amazon data centers globally, have demonstrated the opportunity to create a sustainable competitive advantage through this approach. For e xample, Amazon claims that Graviton delivers up to 40% better price performance over comparable x86-b ased systems. This trend of increasing use of

in-house developed solutions has significantly expanded the opportunity for Arm. Our Solution We provide the most pervasive CPU architecture in the world. The key elements of our solution include: • Arm CPUs. The foundation of our product offerings is our market-leading CPU products. Our CPU

products leverage our common scalable ISA and address the widest range of performance, power, and co st requirements. • Other Design Offerings . We have a portfolio of products that are deployed alongside o

CPUs, including: • Graphics Processing Units. We offer a family of GPU products providing an optimal visual experience

across a wide range of devices. • System IP. Complementary design components that enable designers to create high performance,

power-efficient, reliable, and secure chips. • Compute Platform Products. Arm's CPU, GPU, and System I P products integrate into a

foundational compute platform optimized for a specific end market. • Development Tools and Software. O ur tools and software support the development and deployment of

our offerings. We continue to expand the scope of our product offerings, investing in more holistic, end-market

optimized designs, expanding beyond individual design IP to providing subsystem designs. Given the complexities of 5 Table of Contents developing chips using the most advanced manufacturing processes, we are making significant investments to better support the increasing number of OEMs looking to develop their own customized

chips. In addition, we have cultivated a broad ecosystem of third-party hardware and software partners to

support our customers. Our

partners include leading semiconductor technology suppliers, including foundries (such as GlobalFoundrie s Inc., Intel's Foundry Services business, Taiwan Semiconductor Manufacturing Company Limited and Un ited Microelectronics Corporation) and

EDA vendors (such as Cadence Design Systems, Inc., Synopsys, Inc. and Siemens). We also invest in o ur software ecosystem and work closely with firmware and operating system vendors (such as Amazon Li nux, Canonical Ltd., Google LLC, Microsoft, Red

Hat, Inc., VMware, Inc. and Wind River Systems, Inc.), game engine vendors (such as Unity and Epic Games), software tool providers (such as Green Hills Software LLC, IAR Systems AB and Lauterbach GmbH), and application software developers (such as

Adobe Inc., EA, King.com Ltd. and Microsoft). Our solution, combined with the breadth of our software ec osystem and the millions of chip

design engineers and software developers that utilize it, has created a virtuous cycle of adoption, which means that software developers write software for Arm-based devices because it offers the biggest market for their products, and chip designers choose Arm processors because they have the broadest support of software applications. We

believe that the primary customer benefits of our solution include: • Ability to Optimize for Performance, P ower and Area . Arm's flexible and modular design

IP enables customers to build chips optimized for the PPA requirements for a specific use case or end ma rket. A battery-powered device such as a smartphone has a different PPA requirement versus a high-perf ormance cloud server or an IoT sensor. By developing a wide range of CPU and related technologies, Ar m can provide a CPU optimized for various use cases to reduce both energy consumption and area (with area being a key driver of the ultimate cost of a chip). • Alignment with the Semiconductor Industry's Technology Roadmap . As leading-edge

manufacturing processes continue to progress towards smaller transistors, developing chips is becoming harder and more costly, requiring more engineering time and effort. To further reduce our customers' cost s and to help de-risk their product development efforts, we combine our CPU products and SoC knowledg e with our deep understanding of our ecosystem partners' design tools and manufacturing processes to provide processor

products that not only optimize for power and performance, but also accelerate time to market for our cust omers. In addition, through our deep customer and partner relationships, we have unique visibility into the future requirements of end markets

as far as 10 years out, which informs the development of our products to ensure that our products meet or exceed future market needs. • Reduced Design Risk and Cost. Our solution allows customers to build opt imized chips, while

reducing their design execution risk and their internal development costs. We generally expect to license our products to multiple customers, enabling us to completely cover the cost of developing new Arm products by charging each licensee only a

portion of the total development costs. We invest significant time, resources and effort in the design and v erification of each processor and work closely with our partners to ensure a standard of excellence in the processor products we deliver to

our customers. • Incorporation of AI and ML Acceleration in Every Processor We Design. Using an AI or ML algorithm

is just another way of programming the software needed to run a chip, and we expect that AI and ML algo rithms will complement the software used by most chips in the future, from high-end super computers to tiny, remote sensors. Arm processors run AI and ML workloads, and every smartphone currently in the m arket efficiently runs AI inference applications, such as voice recognition and applying filters to digital ima ges. To ensure that software

developers can efficiently run the AI and ML workloads, each generation of our processors is designed to accelerate key parts of algorithms that will be used in future applications. 6 Table of Contents Our Market Opportunity We define our total addressable market ("TAM") to include all chips that can contain a proces sor and, therefore, our TAM includes the

main controller chips in smartphones, PCs, digital TVs, servers, vehicles and networking equipment. Our TAM excludes chips that are unlikely to contain a processor, such as memory and analog chips. For the c alendar year ended December 31, 2022, we estimate that our TAM was approximately \$202.5 billion and

we forecast that our

TAM will grow at a 6.8% compound annual growth rate ("CAGR") to approximately \$246.6 billion by the e nd of the calendar year ending December 31, 2025. We estimate that the aggregate value of chips containing Arm technology was

approximately \$98.9 billion in the calendar year ended December 31, 2022, representing an approximate 48.9% market share as compared to an approximate 42.3% market share as of December 31, 2020. We estimate that our royalty revenue as of

December 31, 2022 represented approximately 1.7% of the industry TAM containing Arm-based chips. We expect that the cost and complexity of chip design will continue to increase, and that we will be able to contribute a greater proportion of the technology included in each chip, resulting in our royalties comprising a greater proportion of each chip's total value. Our calculation of TAM is based on a combination of third-party sources, customer

reports and our own internal assessments and judgment. Mobile Applications Processor The mobile applications processor is the primary chip in a smartphone, and runs the operating system and applications in addition to

controlling many of the device functions, including gaming, music, video, and any other applications. While high compute performance is required for today's applications, processors also must be highly energy efficient so that the

smartphone's battery will last all day without needing to be recharged. We expect the mobile applications processor market to grow from approximately \$29.9 billion in the calendar year ended December 31, 2022 to approximately

\$36.0 billion in the calendar year ending December 31, 2025, representing a CAGR of 6.4% over that peri od. We have maintained market share in the mobile applications processor market of greater than 99% for many years, by virtue of all key

mobile operating systems depending on Arm processors. We expect the value of the market for mobile applications processors to continue to

grow, particularly in light of several smartphone usage trends that are increasing the need for high-perfor mance processing capabilities, including the shift to 5G, growth in mobile gaming, and emergence of Al a nd ML workloads. Other Mobile Chips Mobile phones

contain many chips beyond the main applications processor, including the modem, Wi-Fi, Bluetooth and N FC connectivity chips, GPS chips, touchscreen controllers, power management chips, camera chips, audi o

chips and more, which we refer to collectively as the "other mobile chips market." We expect the other mobile chips market to remain relatively flat at approximately \$17.6 billion in the calendar year ended December 31, 2022 and

approximately \$17.5 billion in the calendar year ending December 31, 2025, representing a CAGR of (0.2) % over that period. Consumer

Electronics CE includes products found in the home, such as digital TVs, tablets, laptops, extended reality ("XR")

headsets and wearables. The market share of Arm-based chips in consumer electronics is increasing as new product categories, such as smart speakers, XR headsets and laptops, adopt Arm products to achiev e high

performance without sacrificing efficiency. We expect the CE chip market to grow from approximately \$46. 9 billion in the calendar year ended December 31, 2022 to approximately \$53.2 billion in the calendar year ending

December 31, 2025, representing a CAGR of 4.3% over that period. 7 Table of Contents Industrial IoT and Embedded The industrial IoT and embedded semiconductor TAM includes chips used by a wide range of goods, including washing machines, thermostats,

digital cameras, drones, sensors, surveillance cameras, manufacturing equipment, robotics, electric motor controllers and city infrastructure and building management equipment. We expect the industrial IoT and embedded chip market to grow from

approximately \$41.5 billion in the calendar year ended December 31, 2022 to \$50.5 billion in the calendar year ending December 31, 2025, representing a CAGR of 6.7% over that period. Our market share in the IoT and embedded chip

market has grown from 58.4% as of December 31, 2020 to 64.5% as of December 31, 2022. Networking

Equipment Our networking equipment TAM includes chips deployed into wireless networking such as bas e-station equipment, enterprise Wi-Fi, and wired networking equipment such as routers and switches. The market is growing as more wired and wireless infrastructure is deployed, as much of the data consumed in the cloud is created at the edge and

needs to be transmitted over networks to the data center for processing. We expect the networking equip ment chip market to grow from approximately \$17.2 billion in the calendar year ended December 31, 2022 to approximately

\$18.2 billion in the calendar year ending December 31, 2025, representing a CAGR of 1.8% over that period. Our market share in the networking equipment market has increased from 18.8% as of December 31, 2020 to 25.5% as of December 31,

2022. Arm is poised to accelerate market-share gains resulting from the deployment of 5G networks, as in frastructure scales from fewer large cell towers covering a wide area to a large number of small cells providing high-speed coverage, with a

single architecture across both large and small cells to allow for flexible deployment of software and workl oads. Cloud Compute The cloud compute market includes the main server chips, data processing units (D PUs), and smart network interface cards (SmartNICs) used by

CSPs to run their operations. The increase in cloud computing has been driven by the rapid increase in d ata traffic generated by consumers and enterprises globally and by the migration of enterprise workloads t o the cloud. We expect the cloud

compute market to grow from approximately \$17.9 billion in the calendar year ended December 31, 2022 to approximately \$28.4 billion in the calendar year ending December 31, 2025, representing a CAGR of 16 .6% over that period. Arm-based chips have been gaining market share as CSPs have started to deploy A rm products in

their own in-house designed chips used in their data centers, and as other CSPs start to deploy chips designed by Arm licensees. As a result, we expect our market share of cloud compute to grow significantly faster than the overall cloud compute market. Our market share in the cloud compute market has grown from 7.2% as of December 31, 2020 to 10.1% as of December 31, 2022. Other Infrastructure Other Infrastructure refers to the technological components and systems that support various aspects of computing, networking, and data processing and include chips deployed into high-performance computing (HPC) systems, enterprise servers, and edge

networking equipment. We expect the other infrastructure market to grow from approximately \$12.7 billion in the calendar year ended December 31, 2022 to approximately \$13.7 billion in the calendar year ending December 31, 2025,

representing a CAGR of 2.7% over that period. Our market share in the other infrastructure market has gr own from 9.1% as of December 31, 2020 to 16.2% as of December 31, 2022. Automotive Our automotive TAM

includes all chips with processors within vehicles. This includes chips used for IVI, ADAS, engine manage ment, and body and chassis control. The automotive TAM is expected to increase as ADAS, electrification, IVI, and eventually autonomous driving,

accelerate requirements for higher compute performance in newly manufactured vehicles. We expect the automotive chip market to grow from 8 Table of Contents approximately \$18.8 billion in the calendar year ended December 31, 2022 to approximately \$29.1 billion in the calendar year ending December 31, 2025, representing a CAGR of

15.7% over that period. Today, our market share in the automotive market is highest in more technologica lly advanced functional areas such as IVI and ADAS. Our market share in the automotive market has grown from 33.0% as of December 31, 2020 to

40.8% as of December 31, 2022. As automotive electronics continue to transition from hardware-defined to software-defined architecture and compute, a trend that mirrors evolution of the smartphone, we believe we are well-positioned to outpace the growth of the overall automotive market. Our Business Model and Customers Our open and flexible business model provides access to high-quality CPU products for a wide range of potential customer

types and end markets. We license our products to semiconductor companies, OEMs, and other organiza tions to design their chips. Our customers license our products for a fee, which gives them access to our d esigns and enables them to create Arm-based chips. Once a chip has been designed and manufactured with our products, we receive a per-unit royalty on substantially all chips shipped. The royalty has typically

been based on a percentage of the ASP of

the chip or a fixed fee per unit, and it typically increases as more Arm products are included in the chip. O ur business model enables the widest range of customers to access Arm products through an agreement best suited to their particular business

needs. Competitive Strengths We

have enjoyed success for more than 30 years by providing market-leading technology, adapting our soluti on to changing market needs and building a software developer ecosystem unlike any other in history. Our competitive strengths include: • Technology Leadership with Proven Capabilities Across Markets . Arm's CPU technology has

been an industry leader for many years and continues to be the most widely deployed architecture globall y. We estimate that Arm had an approximate 48.9% market share by value in the calendar year ended De cember 31, 2022, up from approximately

39.7% in the calendar year ended December 31, 2014. Our products are used in virtually all smartphones, a majority of tablets and digital TVs, and a significant proportion of all chips with embedded processors. We have an established presence

in the cloud market, working with many of the largest hyperscalers, and in the automotive market, we work with leading OEMs and suppliers. • World's Most Extensive Ecosystem of Third-Party Software and Hardware Partners. Arm has

the world's largest ecosystem of third-party software and hardware partners, including chip design and ver ification tools vendors, advanced fabrication, operating system and application vendors, software tools pro viders, and training and

support services companies. As of March 31, 2023, more than 1,000 partner companies were invested in developing products that complement Arm's technology and there were more than 8 million apps running on Arm-based devices built by more than 15 million developers designing software for Arm-based system s. We estimate that, Arm's engineers invested more than 10 million

hours in creating the base software and tools for chips containing Armv8 processors, and that the develop ers have then spent another 1.5 billion hours creating their apps and software. We also estimate that Arm will be investing more than 30 million

hours creating the base software and tools for Armv9 processors, which will enable the next generation of apps and software for Arm-based chips. The breadth of our ecosystem creates a virtuous cycle that bene fits our customers and deeply integrates

us into the design cycle because it is difficult to create a commercial product or service for a particular end market until all elements of the hardware and supporting software and tools ecosystem are available. • D eep Integration with Customers and Ecosystem Partners. We work closely with our customers

and ecosystem partners to understand future industry trends and the evolution of end markets. We have 9 Table of Contents worked in partnership with our top 10 customers by royalty revenue, for the fiscal year ended March 31, 2023, for an average of over 20 years. When a major semiconductor company

licenses Arm products to deploy in their product roadmap, they are committing to use Arm products in mul tiple generations of their future chips. This requires us to not only work closely with our direct customers, but also with other elements of the

ecosystem to understand and align product plans. Our collaborative relationships with partners in our exte nsive ecosystem, including companies that contribute design tools, manufacturing capabilities, software a nd other components, provide us with

unique insights across the entire semiconductor industry, enabling us to invest in developing new product s years, and sometimes up to a decade, before the products are deployed to end-users. • Efficient Model and Long-Term Visibility Enables Investment in Future Products. Our business

model provides significant flexibility to fund long-term investments in future products. We have a capital-lig ht and people-focused model, with most of our investments directed at hiring and retaining engineers und ertaking advanced research and

development. In the fiscal year ended March 31, 2023, we generated \$2,573 million gross profit, allowing us to fund extensive investments in research and development for products that will be licensed in the future, with royalty fees to follow

for years, and often decades, beyond that. We focus our investments on leading-edge products, and we I everage our underlying technology across multiple derivative products targeting different markets and ext ending into new applications over time. We

are able to make significant upfront investments due to our alignment with customer roadmaps and the re sulting visibility from long-term royalty streams. Some products continue to generate royalty revenue even after 25 years following their initial

development. • We Satisfy our Customers' Processor Design Needs in a Mutually Beneficial Way. We invest extensively in creating leading products that can be used across a wide range of end markets and c ustomers. As we expect to license our products to multiple customers, we can typically cover the entire co st of developing new Arm products by

charging each customer only a portion of the total development costs. This lowers the costs for each semi conductor designer to license Arm products, versus developing the technology in-house, and enables customers to focus resources on differentiation. In addition, by licensing Arm CPU technology, the license e immediately gains access to the vast Arm ecosystem, which would be impossible to leverage if they dev eloped their own CPU in house. • World-Class R&D Team with a Proven Track Record of Innovation. We are an engineering-first

company, with 4,753 of our employees, or approximately 80% of our global employees, as of March 31, 2 023, focused on research, design, and technical innovation. Our customers rely on us to deliver advanced technology, leveraging our extensive

capabilities and scale across our CPU, GPU, systems, and platform products. Our culture encourages cro ss collaboration between teams and individuals, and we highly value collective effort. As a result of our un ique reach and impact, we are able to

attract and retain some of the brightest semiconductor engineers in the world. Our research and develop ment team is prolific at developing new inventions, for which we seek patents to the greatest extent possible. As of March 31, 2023, we owned

or co-owned a portfolio of approximately 6,800 issued patents and had approximately 2,700 patent applic ations pending worldwide, many of which are relevant to the key technologies used in many of the chips manufactured today. Our Growth Strategies We assess our investments through the lens of sustainable g rowth. Our research and development and new business initiatives are often tied to revenue streams five to ten years in the future, while our historical investments drive revenue and enable profitability and c ash flow generation today. Key levers of our growth strategy are: • Gain or Maintain Share in Long-Term Growth Markets. We already have significant market share in

some high-value markets, such as mobile applications processors, which enables us to invest in other 10 Table of Contents growth opportunities. As of December 31, 2022, our market share in growth markets, in cluding cloud computing, networking equipment, automotive and consumer electronics, was 10.1%, 25.5 %,

40.8% and 32.3%, respectively. We believe that the increasing need for high-powered and energy-efficien t computing, as well as our continued investments, will enable us to grow our market share in these segments. • Increase the Value of Arm Processors in Every Smart Device . As chip designs become more advanced

and complex, we believe that our investments in additional functionality, higher performance, higher efficie ncy, and more specialized designs will allow us to deliver more value to our customers. These innovations enable us to license more advanced

Arm products, and for our customers to implement Arm-based chips with multiple CPUs and more cores, all of which allow us to capture more value per chip. • Expand our System IP and SoC Offerings . To enable further improvements in performance and

efficiency, we continue to develop a broader set of configurable systems IP offerings, including proven onchip interconnect, security IP, memory controllers, and other design IP to be used with our

processors, including the integration of multiple IP technologies into a subsystem and additional informati on to assist in fabrication. More recently, we have invested in a holistic, solution-focused approach to desi gn, expanding beyond individual

design IP elements to providing a more complete system. By delivering SoC solutions optimized for specific use cases, we can ensure that the entire system works together seamlessly to provide maximum performance and efficiency. At the same time, by

designing an increasingly greater portion of the overall chip design, we are further reducing incremental d evelopment investment and risk borne by our customers while also enabling us to capture more value per device. • Invest in Next-Generation Technologies. We continuously evaluate emerging markets and technologies

that may enable us to create more advanced products that bring more value to our customers and ecosys tem. For example, we are leading the way in integrating AI and ML capabilities across all devices through our highly scalable architecture. All

modern smartphones are AI and ML capable by virtue of their Arm processors, and we are increasingly w orking with companies in other markets, such as consumer electronics and automotive, to deploy AI-base d solutions. For the networking, cloud and data center markets, we continue to add AI-specific features to our CPUs to enable market-leading performance. • Benefit from the Flexibility of Arm Products . Each Arm processor provides a certain compute

capability within a power budget and, as such, can be used in multiple different devices that have similar c ompute requirements. An Arm customer who may have designed a processor for one application may, in t he future, find additional applications

that can utilize this technology. Consequently, Arm products may be used in new products for new end m arkets for many years or, in some cases, decades. For example, a processor originally licensed to go into a chip for a smartphone can also be used

in a chip for a tablet, digital TV, or smart speaker. We expect this trend to continue with the growing prolife ration of devices and use cases. • Expand Access to Arm Products Through our Flexible Business Model. We are focused on making

Arm products as easy as possible to access and to integrate into a chip design. We continuously assess ways to expand our flexible engagement model to provide all companies with easy access to Arm product s, including low- and no-cost offerings for startups. In recent years and with a growing portfolio of new products, we have started to move customers onto product portfolio licenses, where each customer will gain access to a broad

portfolio of Arm products. Our business model makes licensing our products much easier by allowing our customers to quickly gain access to Arm products. We believe our business model will encourage custom er experimentation and result in a broader

range of Arm features being used. Our business model is also designed to provide better alignment betwe en pricing and the value delivered by us across low- and high-end devices. 11 Table of Contents Corporat e Information Arm Holdings plc was incorporated as a private limited company with the legal name Arm Holdings Limited under the laws of England and Wales on

April 9, 2018, with the company number 11299879. Arm Holdings Limited re-registered as a public limited company under the laws of England and Wales on

, 2023 and changed its name to Arm Holdings plc. Arm Limited

was incorporated as a private limited company with the legal name Widelogic Limited under the laws of E ngland and Wales on November 12, 1990 with the company number 02557590. On December 3, 1990, W idelogic Limited changed its company name

to Advanced RISC Machines Limited, and, on May 21, 1998, it changed its company name to Arm Limited (at which time it was a wholly owned subsidiary of Arm Holdings plc with the company number 02548782). Our business was initially operated

through Arm Holdings plc with the company number 02548782, which was previously an independent publicly traded corporation until its acquisition in September 2016 by SoftBank Group. On March 19, 2018, as a part of a reorganization, Arm Holdings

plc with the company number 02548782 re-registered as a private limited company and was renamed SV F HoldCo (UK) Limited, which became a subsidiary of SoftBank Vision Fund L.P. ("SoftBank Vision Fund"), which retained an approximate 25% interest in our company with the remainder beneficially held by SoftBank Group. In August 2023, a subsidiary of SoftBank Group acquired substantially all of SoftBank Vision Fund's interest in Arm

Limited at a purchase price of approximately \$16.1 billion, with the associated payments to be made in ins tallments over a two-year period. The purchase price was established by reference to the terms of a prior contractual arrangement between the

parties. Accordingly, prior to this offering, SoftBank Group beneficially owns substantially all of our outstanding shares. Our registered office is 110 Fulbourn Road, Cambridge, Cambridgeshire, CB1 9NJ, U.K., and the telephone number at that office

is +44 (1223) 400 400. The principal office for Arm Inc., our U.S. subsidiary, is located at 120 Rose Orcha rd Way, San Jose, CA 95134,

and our telephone number at that office is +1 (408) 576-1500. Our website address is www.arm.com. We

have included our website address in

this prospectus solely as an inactive textual reference. Information contained on, or that can be accessed through, our website is not incorporated by reference into this prospectus, and you should not consider information on our website to be part

of this prospectus. Our agent for service of process in the United States is Arm, Inc. Corporate Reorganiz ation Prior to the completion of this offering, we undertook a corporate reorganization pursuant to which A rm Holdings Limited acquired all the

issued ordinary shares of Arm Limited. In connection with the corporate reorganization, the shareholders of Arm Limited exchanged each of the ordinary shares held by them in Arm Limited for newly issued ordin ary shares of Arm Holdings Limited of the

same class and in the same proportions as their previous shareholdings in Arm Limited. As a result, Arm Limited became a wholly-owned subsidiary of Arm Holdings Limited. On

2023, Arm Holdings Limited re-registered as a public limited company under the laws of England and Wal es and changed its name from Arm Holdings Limited to Arm Holdings plc. The consolidated financial statements included in this prospectus do not show the effect of the corporate reorganization. See "Corpo rate Reorganization" for more information. Risk Factors Summary Our business is

subject to a number of risks of which you should be aware before making an investment decision. You should carefully consider all of the information set forth in this prospectus and, in particular, should evaluate the specific factors set forth in

the section titled "Risk Factors" before deciding whether to invest in our ADSs. Among these important ris ks are the following: Risks Relating to Our Business and Industry • Demand for our products and services primarily depends on trends in the semiconductor and electronics industries

and the demand for the products of our customers and our customers' customers. 12 Table of Contents • Demand for our products and services depends on their acceptance by semiconductor and systems companies and their

compatibility with, and the costs of, the design and manufacturing processes of our customers. • We face i ntense competition and could lose market share to our competitors. • If we are unable to attract new custo mers and sell additional products to our existing customers, our business,

results of operations, financial condition and prospects may be materially and adversely affected. • We rely on third parties to market and sell products incorporating our products and to enhance the value of our licensed products. • Our results of operations, particularly our licensing and royalty revenues, can vary significantly between

periods and may be unpredictable. • Customers may decide to license our architecture and develop their own processors based on our architecture,

rather than utilize our processor products pursuant to an implementation license. • A significant portion of our total revenue comes from a limited number of customers, which exposes us to greater

risks than if our customer base were more diversified. • Consolidation in the semiconductor and electronic s industries could have a material adverse effect on our

business, results of operations, financial condition and prospects. • Our revenues predominantly come from a limited number of end markets. • If we fail to develop new products in response to, or in anticipation of , rapid technological changes in our

industry or the industries we serve, our business may be materially and adversely affected. • Our concentr ation of revenue from the PRC market makes us particularly susceptible to economic and political risks affecting the PRC, which could be exacerbated by tensions between (on the one hand) the U.S. or the U.K. and (on the other hand) the PRC with respect to trade and national security. • Developing new products requires us to expend significant resources without assurances that we will generate

revenue in the amounts we anticipate, on the expected timeline or at all. • We depend on our commercial relationship with Arm China to access the PRC market. If that commercial relationship

no longer existed or deteriorates, our ability to compete in the PRC market could be materially and advers ely affected. • Neither we nor SoftBank Group control the operations of Arm China, which operates independently of us. • Our business and future operating results may be materially and adversely affected by global economic conditions

and other events outside of our control. • The semiconductor industry relies on a limited number of manuf acturers whose operations tend to be concentrated

in certain geographic regions to manufacture chips and other products, and developments that adversely

affect such regions could have a material adverse effect on our business, results of operations, financial c ondition and prospects. • If our products do not conform to, or are not compatible with, existing or emergin q industry standards, demand

for our products may decrease. • Failure to obtain, maintain, protect, defend or enforce our IP rights could impair our ability to protect our

proprietary products and our brand, and the costs of obtaining, maintaining, protecting, defending and enforcing such IP rights, particularly as a result of litigation, may adversely and materially affect our results of operations. 13 Table of Contents • We may be sued by third parties for alleged infringement, misappropriation or other violation of their IP rights

or proprietary rights and our defense against these claims can be costly. • Errors, defects, bugs or securit y vulnerabilities in or associated with our products could expose us to liability

and damage our brand and reputation, which could harm our competitive position and result in a loss of m arket share. • We have identified a material weakness in our internal control over financial reporting and may identify material

weaknesses in the future or otherwise fail to maintain proper and effective internal controls. If we fail to es tablish and maintain proper internal controls, our ability to produce accurate financial statements or comply with applicable regulations

could be impaired. As a result, shareholders could lose confidence in our financial and other public reporting, which would harm our business and the trading price of our ADSs. Risks Relating to Government Regulation and Legal Compliance • Our international operations expose us to risks in international jurisdiction s and we may be negatively impacted

by export restrictions and trade barriers. Risks Relating to Our Status as a Controlled Company and Forei gn Private Issuer • We will be a "controlled company" within the meaning of the Nasdaq corporate govern ance rules and, as a

result, be eligible to rely on exemptions from certain corporate governance requirements that provide prot ection to stockholders of companies that are not controlled companies. • As long as SoftBank Group controls us, other holders of our ordinary shares and ADSs will have limited ability to

influence matters requiring stockholder approval or the composition of our Board of Directors. • SoftBank Group's interests may conflict with our own interests and those of holders of our ADSs. • While we are a foreign private issuer, we may opt out of certain Nasdaq corporate governance rules applicable to

public companies organized in the U.S. • We may lose our foreign private issuer status, which would then require us to comply with the Exchange Act's

domestic reporting regime and cause us to incur significant legal, accounting and other expenses. Implications of Being a Foreign

Private Issuer Our status as a foreign private issuer exempts us from compliance with certain laws and rul es of the SEC and certain

regulations of Nasdaq. Consequently, we are not subject to all the disclosure requirements applicable to U.S. public companies. For example, we are exempt from certain rules under the Exchange Act that regul ate disclosure obligations and procedural

requirements related to the solicitation of proxies, consents or authorizations applicable to a security regis tered under the Exchange Act. In addition, our executive officers and directors are exempt from the reporting and "short-swing"

profit recovery provisions of Section 16 of the Exchange Act and related rules with respect to their purcha ses and sales of our securities. Moreover, we are not required to file periodic reports and financial statem ents with the SEC as

frequently or as promptly as U.S. public companies. Accordingly, there may be less publicly available infor mation concerning us than there is for U.S. public companies. In addition, foreign private issuers are not required to file their annual report on Form 20-F until

four months after the end of each fiscal year, while U.S. domestic issuers that are accelerated filers are required to file their annual report on Form 10-K within 75 days after the end of each fiscal year.

Foreign private issuers are also exempt from Regulation FD (Fair Disclosure), which is aimed at preventin g issuers from making selective disclosures of material information. 14 Table of Contents We may take ad vantage of these exemptions until such time as we no longer qualify as a

foreign private issuer. In order to maintain our current status as a foreign private issuer, either a majority of our outstanding voting securities must be directly or indirectly held of record by non-residents of the U.S.

, or, if a majority of our outstanding voting securities are directly or indirectly held of record by U.S. reside nts, a majority of our executive officers or directors may not be U.S.

citizens or residents, more than 50% of our assets cannot be located in the U.S. and our business must be administered principally outside the U.S. We have taken advantage of certain of these reduced reporting and other requirements in this prospectus. Accordingly, the information

contained herein may be different from the information you receive from other public companies in which you hold equity securities. In addition, as a foreign private issuer we intend to rely on and comply with cert ain home country governance

requirements and exemptions thereunder rather than complying with Nasdaq corporate governance stand ards. See "Risk

Factors—Risks Relating to Our Status as a Controlled Company and Foreign Private Issuer" and "Manag ement and Executive Remuneration—Foreign Private Issuer Exemption." Implications of Being a Controll ed Company SoftBank Group is expected to beneficially own approximately % of our outstanding ordin ary shares following the

completion of this offering (or approximately % if the underwriters exercise in full their option to purchas e additional ADSs from the selling shareholder). As a result of SoftBank Group's ownership, we will be a "controlled company" within the meaning of the corporate governance rules of Nasdaq. Under these rules, a listed company of which a majority of the voting power is held by an individual, group or another company is a "controlled"

company" and may elect not to comply with certain corporate governance requirements applicable to mos t Nasdaq-listed companies. As a controlled company, we have elected not to comply with certain corporat e governance requirements applicable to

most Nasdaq-listed companies. Accordingly, you will not have the same protections afforded to sharehold ers of companies that are subject to all of these corporate governance requirements. See "Risk Factors—Risks Relating to Our Status as a Controlled Company and Foreign Private Issuer" and "Management and Executive Remuneration—Controlled Company Status." 15 Table of Contents THE OFFERING ADSs offe red by the selling shareholder, with each ADS representing one ordinary share. Ordinary shares to be out standing upon completion of this offering ordinary shares. American depositary shares Each ADS represe nts one ordinary share, nominal value £0.001 per ordinary share, of Arm Holdings plc. As a holder of ADS s, you will not be treated as one of our shareholders and you will not have shareholder rights. Rather, you will have

the rights of an ADS holder or beneficial owner of ADSs (as applicable) as provided in the deposit agreem ent among us, the depositary and holders and beneficial owners of ADSs from time to time. To better und erstand the terms of our ADSs, see

"Description of American Depositary Shares" elsewhere in this prospectus. We also encourage you to rea d the deposit agreement, the form of which is filed as an exhibit to the registration statement of which this prospectus forms a part. Depositary Citibank, N.A. Use of proceeds We will not receive any of the proceeds from the sale of ADSs by the selling shareholder in this offering (including any proceeds from any sale of ADSs pursuant to the underwriters' option to purchase additional ADSs). All net proceeds from

the sale of ADSs in this offering will go to the selling shareholder. Controlled company SoftBank Group wil I beneficially own approximately % of our outstanding ordinary shares following the completion of this of fering (or approximately % if the underwriters exercise in full their

option to purchase additional ADSs from the selling shareholder). As a result of SoftBank Group's owners hip, after the completion of this offering, we will be a "controlled company" within the meaning of Nasdaq r ules and, therefore,

will qualify for exemptions from certain corporate governance requirements of Nasdaq. In the event that we elect to use the controlled company exemptions, holders of our ADSs will not have the same protections afforded to stockholders of companies

that are subject to these corporate governance requirements. As long as SoftBank Group beneficially own s a majority of the voting power of our outstanding ordinary shares, SoftBank Group will generally be able to control the outcome of matters submitted to our shareholders for

approval, including the election of directors, without the approval of our other shareholders. See "Risk Fac tors—Risks Relating to Our Status as a Controlled Company and Foreign Private Issuer—As long as Soft Bank Group controls us,

other holders of our ordinary shares and ADSs will have limited ability to influence matters requiring stock

holder approval or the composition of our Board of Directors." 16 Table of Contents Dividend policy We cu rrently do not intend to pay dividends on our ordinary shares or ADSs. See the section titled "Dividend Policy" for more information. Risk factors See "Risk Factors" and the other information included in this prospe ctus for a discussion of factors you should carefully consider before deciding to invest in our ADSs. Propo sed Nasdaq symbol "ARM" The number of ordinary shares, including ordinary shares represented by ADSs, that will be outstanding

upon completion of this offering is based on ordinary shares outstanding as of , 2023, and (i) gives effect to our corporate reorganization described under the section titled "Corporate Re organization" and (ii) includes

ordinary shares issuable upon the completion of this offering, assuming an initial public offering price of

\$ per ADS, which is the midpoint of the price range set forth on the cover page of this prospectus, in connection with the vesting of restricted share unit ("RSU") awards and Executive Awards (as described under "Management and Executive Remuneration—Equity Incentive Plans—2022 RSU Pla n"), and excludes: • ordinary shares issuable upon the vesting of RSU awards issued under The Arm Limit ed All-Employee Plan 2019 (the "2019 AEP"), which will vest on the first trading day that is more than 180 days following the date on which our ADSs are admitted to trading on Nasdaq, subject to earlier vesting in certain circumstances; • ordinary shares issuable upon the vesting of the RSU awards and the Executive Awards that were issued under The

Arm Limited RSU Award Plan (the "2022 RSU Plan"), to the extent that they have not vested as of the dat e of this prospectus and will not vest upon the completion of this offering; and • ordinary shares issuable u pon the vesting of the RSU awards that were issued under The Arm Non-Executive Directors RSU Award Plan (the "NED Plan"), to the extent that they have not vested as of the date of this prospectus, which coll ectively will increase by a number equal to % of our total ordinary shares outstanding after the completi on of this

offering. Except as otherwise noted, the information in this prospectus assumes: • the completion of the transactions described in the section titled "Corporate Reorganization" prior to

the completion of this offering; • the adoption of the Articles prior to the completion of this offering; • an init ial public offering price of \$ per ADS, which is the

midpoint of the price range set forth on the cover page of this prospectus; and • no exercise by the under writers of their option to purchase up to an additional

ADSs from the selling shareholder in this offering. 17 Table of Contents SUMMARY FINANCIAL DATA The following summary consolidated financial data for the fiscal years ended March 31, 2023, 2022 and 2021 have been derived from our

audited financial statements included elsewhere in this prospectus. The following summary financial data f or the fiscal quarters ended June 30, 2023 and 2022 have been derived from our unaudited consolidated interim condensed financial

statements included elsewhere in this prospectus. In the opinion of management, the unaudited condense d consolidated financial statements reflect all adjustments, consisting of normal recurring adjustments, which are necessary for the fair statement

of the condensed consolidated balance sheets, income statements and cash flows for these interim perio ds. Our historical results are not necessarily indicative of the results that may be expected in the future. Y ou should read the following summary financial data in conjunction with "Management's Discussion and A nalysis of Financial Condition

and Results of Operations" and our consolidated financial statements and related notes included elsewher e in this prospectus. For the Fiscal Year Ended March 31, For the Fiscal Quarter Ended June 30, (in millio ns, except share and per share amounts) 2023 2022 2021 2023 2022 Consolidated Income Statements D ata: Total revenue \$ 2,679 \$ 2,703 \$ 2,027 \$ 675 \$ 692 Gross profit 2,573 2,572 1,882 644 667 Operating income 671 633 239 111 294 Net income 524 549 388 105 225 Net income per share attributable to ordinary shareholders - Basic 0.51 0.54 0.38 0.10 0.22 - Diluted 0.51 0.54 0.38 0.10 0.22 Weighted average ordinary shares outstanding - Basic 1,025,234,000 1,025,234,000 1,025,234,000 1,025,234,000 1,025,234,000 1,025,234,000 1,025,234,000 1,025,234,000 1,025,902,205 Pro forma net loss per share attributable to ordinary shareholders (1)(2) - Basic - Diluted Weighted-average shares used to compute pro forma net loss per share attributable to ordinary

shareholders (1)(2) - Basic - Diluted Consolidated Balance Sheets Data: Cash, cash equivalents and shor

t-term investments \$ 2,215 \$ 1,635 \$ 2,049 \$ 1,354 Total assets 6,866 6,510 6,700 6,213 Total sharehold ers' equity 4,051 3,548 4,221 3,748 18 Table of Contents (in millions) For the Fiscal Year Ended March 3 1, 2023 For the Fiscal Quarter Ended June 30, 2023 Actual Actual Pro Forma (1) (3) Consolidated Balanc e Sheets Data: Cash, cash equivalents and short-term investments 2,215 2,049 Total assets 6,866 6,700 Total liabilities 2,815 2,479 Total shareholders' equity 4,051 4,221 (1) The pro forma information consider s the anticipated corporate reorganization as described in the section titled

"Corporate Reorganization," which is expected to result in the issuance of ordinary shares of Arm Holding s Limited to shareholders in the same class and number as their previous shareholding in Arm Limited. Therefore, the corporate

reorganization will neither result in a material change in outstanding shares nor affect the pro forma earnings per share or balance sheet information. (2) The pro forma earnings per share presented above reflects the effect of (a) executive awards of

approximately \$55 million that will partially vest upon the occurrence of an initial public offering (including t his offering) and are expected to be settled in ordinary shares of Arm Holdings Limited, (b) the estimated f air value of the

special cash award to our Chief Executive Officer that will vest upon completion of this offering and (c) the accelerated vesting and settlement of liability classified awards granted to employees and executives of Arm Limited under the 2019

AEP, Executive IPO Plan 2019 ("2019 EIP"), and 2022 RSU Plan, which will be settled in ordinary shares of Arm Holdings Limited. Estimates of the fair value of the share-based compensation charges and the number of ordinary shares of Arm

Limited to be issued in connection with the settlement of these awards assume an initial public offering price of per share, which is the midpoint of the

price range set forth on the cover of this prospectus. 19 Table of Contents The following table sets forth the computation of the Company's unaudited pro forma, as adjusted, basic

and diluted net profit/(loss) per share (in millions, except per share data) for the year ended March 31, 20 23 and fiscal quarter ended June 30, 2023: For the Fiscal Year Ended March 31, 2023 For the Fiscal Quarter Ended June 30, 2023 Net income attributable to ordinary shareholders Estimated accelerated expens e related to vesting and settlement of executive awards under the 2019

EIP and 2022 RSU Plan Estimated accelerated expense related to special cash award to our Chief Execu tive Officer Estimated incremental expense related to accelerated vesting under the 2019 AEP, 2019 EIP, and 2022 RSU Plan Pro forma net income / loss attributable to ordinary shares Weighted average ordinary shares outstanding—basic Weighted average ordinary shares to be issued in connection with settlement of executive awards and

settlement of liability classified awards pursuant to the 2019 AEP, 2019 EIP, and 2022 RSU Plan Pro form a weighted average ordinary shares outstanding – basic Pro forma weighted average ordinary shares out standing – diluted (3) The pro forma balance sheet presented above reflects the effect of the settlement of liability classified

awards with the expected issuance of ordinary shares of Arm Holdings Limited in connection with the closi ng of this offering. The pro forma adjustments reflect the elimination of \$ of liabilities as of June 30, 2023, the effect on ordinary shares and additional paid in capital of \$ based on their estimat

ed fair value at closing of this offering offset by the estimated reduction of

n avnanaga dagarihad in

to retained earnings related to the incremental share-based compensation expenses described in Note (2) above. 20 Table of Contents RISK FACTORS Investing in our ADSs involves a high degree of ris k. You should carefully consider the risks described below, as well as the other

information in this prospectus, including our consolidated financial statements and the related notes and "Management's Discussion and Analysis of Financial Condition and Results of Operations," before deciding whether to invest in

our ADSs. The occurrence of any of the events or developments described below could materially harm o ur business, financial condition, results of operations and prospects. In such an event, the market price of our ADSs could decline and you may lose

all or part of your investment. Additional risks and uncertainties not presently known to us or that we curre ntly deem immaterial also may materially impair our business operations. Risks Relating to Our Business and Industry Demand

for our products and services primarily depends on trends in the semiconductor and electronics industries

and the demand for the products of our customers and our customers' customers. Demand for our products and services is largely dependent on the semiconductor and electronics industries, which are volatile, in tensely

competitive and generally characterized by declining ASPs over the life of a generation of chips. The effect of these price decreases is compounded by the fact that our royalty rates generally decrease as the volume of sales increases, subject to an

agreed minimum royalty per chip. Additionally, demand for our products and services could decrease if gr owth in the semiconductor or electronics industries slows or declines. The revenue we generate from licen sing activities is also largely dependent on the rate at which systems companies develop and adopt new product generations, which, in turn, is affected by the level of demand for their ICs and other products. De creasing demand from systems companies for chips based on our products would directly and adversely affect the amount of royalties we

receive. As a result of our dependence on demand from systems companies, we are subject to several ris ks affecting these systems companies, any one of which may influence the success or failure of a particul ar systems company. These risks include,

among others: • competition faced by the systems company in its particular industry; • the engineering an d marketing capabilities of the systems company; • market acceptance of the systems company's product s; • adverse developments in the economic and political conditions of the region(s) in which the systems c ompany

operates, particularly to the extent that such developments create an unfavorable business environment; • supply constraints and inventory correction affecting the systems company; • technical challenges unrelat ed to our products faced by the systems company in developing its products; and • the financial and other resources of the systems company. These risks and others which are outside of our control could advers ely affect any number of systems companies upon which our success depends,

which could, in turn, have a material adverse effect on our business, results of operations, financial condition and prospects. Demand for our

products and services depends substantially on their acceptance by semiconductor and systems compani es and their compatibility with, and the costs of, the design and manufacturing processes of our customer s. Our success depends substantially on the acceptance of our products and services by semiconductor a nd systems companies, particularly those

that develop and market chips for high-volume electronic devices in the 21 Table of Contents automotive, embedded and IoT, enterprise electronics, and mobile and consumer electronics markets. There are competing microprocessor architectures in the market and there is no certainty that

the market will continue to accept our products to the same or greater extent than it does today. Demand f rom large, global systems

companies, including OEMs, drive much of the development of silicon chips and computer systems. Accordingly, acceptance of our products by these companies as well as semiconductor and other companies for use in a variety of end-market applications

is critical for our continued success. The semiconductor and electronics industries have also become increasingly complex and subject to

increasing design and manufacturing costs. Many of our customers utilize third-party vendors for EDA tool s and also outsource the manufacture of their semiconductor designs to foundries. We work closely with major EDA vendors and foundries to ensure

that our products are compatible with their design tools and manufacturing processes. However, if we fail to optimize our products for use with major EDA vendors' tools and foundries' manufacturing processes, or if our access to such tools

and processes is hampered, then our products may become less desirable to our customers. Similarly, for customers that do not outsource design and manufacturing processes, if our products are unsuitable for the customers' internal processes,

then our products may not be acceptable to those customers. Additionally, there are risks inherent in the manufacturing of

next-generation process technologies, including production timing delays, lower-than-anticipated manufac turing yields, and product defects and errata. If foundries are unable to successfully or efficiently manufact ure future generations of chips

based on our products, demand for our products could be materially adversely affected along with our bus

iness, results of operations, financial condition and prospects. We face intense competition and could lose market share to our competitors. The market for our products is intensely competitive and characterized by rapid changes in design and manufacturing technologies, end-user

requirements, industry standards, and frequent new product introductions and improvements. We anticipa te continued challenges from current and new competitors, including established technologies such as the x86 architecture, as well as by free,

open-source technologies, including the RISC-V architecture. Many of our customers are also major supp orters of the RISC-V architecture and related technologies. If RISC-V-related technology continues to be d eveloped and market support for RISC-V increases, our customers may choose to utilize this free, open-s ource architecture instead of

our products. Additionally, many of our direct and indirect competitors, including some of our semiconduct or customers, are major corporations with substantially greater technical, financial and marketing resource s and name recognition than we have.

Some of these competitors have a much larger application software base and a much larger installed cust omer base than we do, and there can be no assurance that we will have the financial resources, technical expertise, and marketing, distribution

and support capabilities to compete successfully with them in the future. In markets where we are establis hed already and new markets we

have entered or intend to enter, our primary competitors may have greater financial, technical, marketing, distribution, support or other resources and capabilities, greater brand recognition, lower labor and development costs, different regulatory

restrictions or a larger customer base than we do. In these markets, we may have to invest substantial res ources into developing an ecosystem of software and tools to create a competitive ecosystem that allows us to compete with alternative

architectures such as x86 and RISC-V, which have business models that are different from ours and may be more attractive to some of our customers. Our competitors may devote greater resources to the development, promotion and sale of products and services, they may offer lower pricing and different cust omer engagement models, and their performance, features and product quality may be more desirable th an those of our company. Our current and

potential competitors may also establish cooperative relationships among themselves or with third parties that may further enhance their resources or strengthen their positions within these markets, or may be su bject to more favorable regulatory

regimes. For example, in August 2023, a group of our customers and 22 Table of Contents other competit ors announced a joint venture aimed at accelerating the adoption of RISC-V. Although the development of alternative architectures and technology is a time-intensive process, if our

competitors establish cooperative relationships or consolidate with each other or third parties, such as the recently announced joint venture focused on RISC-V, they may have additional resources that would allow them to more quickly develop

architectures and other technology that directly compete with our products. Such cooperative relationship s or consolidations may also allow competitors to anticipate or respond more quickly and effectively than we can to new or changing

opportunities, technologies, standards or customer requirements. If we are unable to anticipate or react to these competitive challenges, our competitive position could weaken and we could experience a decline in revenue and profitability. Some semiconductor companies have developed their own proprietary architecture for specific markets or applications. These companies may

utilize their proprietary architecture to penetrate markets where we are currently the architecture of choice , or where our products may be utilized, making it more difficult for us to penetrate such markets in the fut ure. Some semiconductor

companies have proprietary architectures in applications, including, but not limited to, automotive, data ce nter equipment, networking equipment, electronic storage, microcontrollers, smart sensors, servers and w ireless communications. These

companies may be significantly entrenched in their markets. If these companies are successful in displacing our products, or if we are unable to penetrate or grow our market share in these areas, licensing opportunities and potential royalties could

be harmed, negatively affecting our business, results of operations, financial condition and prospects. Our

development systems tools business also faces significant competition from both the open-source community and third-party tools and software

suppliers. While our customers likely would incur significant costs in switching to competitors' architecture, our competitors

(including new market entrants) may offer greater incentives to customers through rebates, marketing funds, similar programs and other commercial arrangements to induce them to use their architecture in lieu of our products. Additionally, our

competitors with multiple products or services may bundle their architecture, products and services to offe r a broader product portfolio (which may include products or services we do not offer), which may make it difficult for us to gain or maintain

market share. Our Physical IP business also faces significant competition from third parties, including the internal design groups of IC

manufacturers that have expanded their internal design capabilities and portfolio of Physical IP componen ts. Physical IP components developed internally by our customers may be designed specifically to utilize the unique qualities of their own

manufacturing processes, and may benefit from capacity, informational, cost and technical advantages rel ative to our Physical IP components, and we may be unable to compete effectively with such internal desi gn groups. If we are unable to attract new customers and sell additional products to our existing customers, our business, results of operations, financial

condition and prospects may be materially and adversely affected. Adding new customers while maintaining our existing customers,

selling additional products to our existing customers and increasing the price we charge to existing custo mers represent our principal opportunities to increase revenue (particularly licensing revenue). We genera te a significant portion of our

revenues from customers who incorporate our products into chips used in smartphones, consumer electro nics and other embedded chips. If growth in these markets declines (including in the smartphone market, in which growth has declined in recent

years), our business, financial condition, results of operations and cash flows could be negatively affected, and we would become more dependent on new growth areas to increase revenue and improve our financial condition. We are currently focused on

growing our business in key areas such as infrastructure, automotive, IoT, AI and 5G. Numerous factors, however, may impede our ability to grow our business in these key areas, add new customers and sell ad ditional products to our existing

customers. Those factors include, among others: • failure to develop new products that are attractive to current and prospective customers; 23 Table of Contents • slow adoption of our new products in key areas s uch as infrastructure, automotive, IoT, AI and 5G; • failure to develop or expand relationships with channel partners; • failure to develop new distribution channels appropriate for such new technology areas; • failure to successfully provide quality technical support once deployed; and • failure to retain new customers and failure to ensure the effectiveness of our marketing programs. In addition, if prospective customers do not perceive our products to be of sufficiently high value and quality or they

do not believe the costs of our products relative to competing technology can be passed along to their cus tomers, we may not be able to effectively attract new customers, which would materially and adversely aff ect our business, results of

operations, financial condition and prospects. We rely on third parties to market and sell chips incorporatin g our products and to enhance the

value of our licensed products. We rely on our customers to design, manufacture and sell chips incorporat ing our products in order

to generate royalty revenue. A substantial portion of our revenue depends upon the commencement of ne w design projects by semiconductor companies and their ability to provide complete chips based on our products to meet the specific application

needs of their customers. However, our customers are not contractually obligated to design, manufacture or sell chips using our products on an exclusive basis or at all. Some of our existing customers design, manufacture and sell chips based on

competing technology, including their own, and other existing or potential customers may do so in the future. To the extent that our customers elect to license technology from competitors, our competitive position

could be adversely affected and we

could lose market share. Furthermore, under many of our arrangements with customers, there is generall y no minimum purchase obligation or guaranteed revenue stream. We are also subject to risks related to the competition faced by our customers in their particular industries, the engineering and marketing capabilities of our customers, the technical challenges unrelated to our products faced by our customers in developing their chips, and the financial and other resources of our customers. We cannot assure you that our customers and other partners

will dedicate the resources necessary to promote and further develop chips incorporating our products, the at they will manufacture chips containing our products in quantities sufficient to meet demand, that we will be successful in developing,

expanding or maintaining our relationships with current or prospective customers or other partners, or that such customers will effectively and successfully promote and sell chips using our products. In addition, if their chips that incorporate our

products are faulty, we may suffer reputational harm whether or not any fault results from our products. S ee "—Errors, defects, bugs or security vulnerabilities in or associated with our products could expose us to liability and damage our

brand and reputation, which could harm our competitive position and result in a loss of market share." Our results of operations, particularly

our licensing and royalty revenues, can vary significantly between periods and may be unpredictable. We have experienced, and may

in the future experience, significant fluctuations in our period-to-period results of operations. Our results m ay fluctuate and be unpredictable because of a variety of factors, including, among others: • the timing of entry into high-value agreements of which we historically have signed only a limited number each

quarter; • the mixture of license fees, royalties, and fees for software and services; • our ability to correctly accrue royalty revenue; 24 Table of Contents • the financial terms and delivery and revenue recognition s chedules of our agreements with customers; • the timing of license renewals and license extensions; • the demand for chips and end products that incorporate our products or expected future demand for such chips and

end products; • seasonal effects on demand for end products that incorporate our products; • product and sales cycles; • the introduction of new technology by us, our customers or our competitors, or other action s taken by our

competitors; • the timing of orders from, and shipments to, technology companies of chips based on our products from our

semiconductor partners and customers; • the financial results of Arm China and its ability to make payme nts to us in a timely manner, or at all; • new litigation or developments in current litigation, including, but n ot limited to, a lawsuit with Qualcomm and

Nuvia (each as defined below), as described under "—We are currently involved in pending litigation"; • the timing of new employees joining the Company; • the timing of bonuses and other remuneration to employees, including for retention purposes; • any strategic investments, acquisitions or divestitures that we might undertake, and the timing thereof; • supply chain constraints and inventory correction in or affecting the semiconductor industry; • cyclical fluctuations in the semiconductor market and the markets of our custom ers' end customers; • sudden technological or other changes in the semiconductor industry, including con solidation among our customers; • changes in the global economy (such as inflation, rising interest rates or a recession), disruptions in the

global supply chain (including shortages of critical semiconductor components and chips) or regulatory changes that impact the semiconductor industry; • changes in political, regulatory, legal or economic conditions or geopolitical turmoil (including PRC-Taiwan relations), including terrorism, war (including the war in Ukraine) or political or military coups, state-sponsored or politically motivated cyberattacks, or foreign and domestic civil disturbances or

political instability; and • changes to accounting policies and accounting standards applicable to us, and c hanges to key accounting estimates

and judgments applied by us. Accurate prediction of the timing of inception of new licenses and renewals of existing

licenses is difficult because the development of a business relationship with a potential customer may freq uently span a year or more. The fiscal quarter in which a new or renewed license agreement will be enter

ed into, if at all, is difficult to

predict, as are the financial terms of any such agreement. Our license and royalty revenues are also affected by market conditions in the

industries in which our customers operate, particularly in the semiconductor industry, which is cyclical by nature and impacted by broad economic factors, such as worldwide gross domestic product and consume r spending. The semiconductor industry has

experienced significant and sometimes sudden and prolonged downturns in the past, including in recent y ears as a result of supply chain constraints. As a result of these factors and others, many of which are out side of our control, it may be difficult for us to provide accurate forecasts of

our revenues and results of operations for future periods, and such factors and others could have a materi al adverse effect on our business, competitive position, results of operations, financial condition and prosp ects. 25 Table of Contents Customers may decide to license our architecture and develop their own proce ssors based on our

architecture, rather than utilize our processor products pursuant to an implementation license. Our custom ers may decide to

license our ISA and develop their own processors based on our ISA, rather than utilize our predeveloped products through an implementation license, resulting in less fees paid to us. Customers may choose to d evelop their own processors if they

believe they can do so more effectively than us or if supply and capacity constraints within the semicondu ctor industry further incentivize vertical integration in an effort to secure additional control over their supply chains. Some of these

customers may have greater name recognition and substantially greater financial, management, marketin g, service, support, technical, distribution and other resources than we do. If our customers, and particular ly one or more key customers from whom

we generate a significant portion of our total revenues, elect to develop their own processors based on our ISA, the market for our developed processor portfolio would decline, which could have a material advers e effect on our business, results of

operations, financial condition and prospects. A significant portion of our total revenue comes from a limite d number of customers, which exposes

us to greater risks than if our customer base were more diversified. A significant portion of our total revenue is generated from

a limited number of key customers. In particular, our top five customers (including Arm China) collectively accounted for approximately 57% and 56% of our total revenue for the fiscal years ended March 31, 2023 and 2022, respectively, and our

largest customer individually, Arm China, accounted for approximately 24% and 18% of our total revenue, respectively, during those fiscal years. As a result of this customer concentration, we are particularly susc eptible to adverse developments

affecting our key customers and their respective businesses, including industry downturns, decreased de mand for their products, increased competition, changes in trade protection and other government policies, financial hardship and changes in their

business model, purchasing behavior and strategic priorities, among other factors, many of which are bey ond our control. In particular, developments in our key customers' respective businesses that adversely af fect their ability to satisfy

their payment obligations to us or result in their determination not to continue or expand their use of our pr oducts would have a material adverse impact on our revenue and results of operations to a greater extent than if our customer base were

more diversified. Our customer concentration also has afforded certain customers significant bargaining p ower, which has, in some cases, resulted in pricing or other contractual terms that are less favorable to us . For example, subject to certain

limitations, certain of our contracts with key customers contain provisions allowing such customers to obta in licenses to our latest products as soon as they are made available to any other customer. If we were to lose one or more of our key

customers or if our business with one or more key customers were to decrease significantly, whether as a result of external impacts on the business of those customers, or, for example, as a result of disputes with such customers with respect to

pricing models, there are no assurances that we would be successful in identifying and contracting with o ne or more customers to replace any lost revenue, which would materially and adversely affect our busine ss, results of operations, financial

condition and prospects. Consolidation in the semiconductor and electronics industries could have a mate rial adverse effect on our business,

results of operations, financial condition and prospects. A number of business combinations, including me rgers, asset acquisitions

and strategic partnerships, have been consummated among our customers in the semiconductor and elec tronics industries, and more could occur in the future. Consolidation among our customers could lead to a loss of customers, increased customer

bargaining power, or reduced customer spending on our products, each of which could have a material ad verse effect on our business, results of operations, financial condition and prospects. For example, in the past, some of our larger customers who

have negotiated lower pricing models have acquired customers with higher pricing models. In some cases , we have been, and in the future may be, required to renegotiate the pricing model with the acquired company or to honor the lower pricing model

applicable for the acquiring customer while providing the same products prior to the acquisition by the larg er company. 26 Table of Contents Our revenues predominantly come from a limited number of end marke ts. Royalties from smartphones and consumer electronics comprised greater than 50% of our royalty revenue for the fiscal year ended March 31,

2023. In these end markets, our substantial existing market share may limit opportunities for future growth . Additionally, demand in these markets may be adversely impacted if consumers reduce their purchases of smartphones and consumer electronics

as a result of changes in consumer behavior. If these end markets do not expand, we may be unable to c ontinue to grow our revenues significantly from these markets, if at all. Additionally, circumstances outside of our control, such as the invention

of new technologies, could adversely affect the smartphone and consumer electronics markets as a whole , which would have a material adverse impact on our revenue, profitability, and ability to attract new custo mers. Our products are extensible and have been licensed and used in various other target end markets. While these new target markets represent a

meaningful opportunity for us, they may not grow or develop as quickly as we expect them to. Furthermor e, it could take years to reach a market share similar to our position in smartphones and consumer electro nics. Other microprocessor architectures such as x86 and RISC-V may already exist across all of these markets, or may be developed for applications within these markets. For applications in markets such as c omputing, data centers, networking and servers, competing microprocessor architectures, such as x86, al ready have a large, well-established customer base and are supported by a broad base of related softwar e and development tools. These markets represent a significant portion of our revenue growth opportunity, and they also introduce

new sources of competition, including, in some cases, incumbent competitors with established technologi es, ecosystems, and customer bases, lower prices or costs, and greater brand recognition. These new m arkets may not grow as projected or at all,

and we may not realize an adequate return on our investments. Due to the interdependence of various components in the products in which our architecture and our competitors' architectures are used, customer s are unlikely to change to another

product, once adopted, until the next generation of a technology. As a result, even if our products are sup erior to alternative offerings, it may be difficult for our products to displace alternative technologies as a re sult of high switching costs

to change to our products, including the need for potential customers to make significant investments in a dditional training and development tools and to convert software for existing devices. Additionally, to the extent our competitors have done

business with prospective customers for a long period of time and have established relationships, our competitors may have information regarding future trends and requirements of such prospective customers that may not be available to us. If any of

these markets do not develop as we currently anticipate or we fail to establish ourselves in these new markets, we could suffer a material adverse effect on our competitive position and business prospects. Fragm

entation of the global semiconductor market could have a material adverse effect on our business, results of operations, financial condition and

prospects. We sell our products across the semiconductor industry globally and rely on various markets a cross the world to

generate revenue. The global market for our products, both where we are already established and new m arkets we intend to enter, may be impacted by geopolitical factors. A shift towards geopolitical rivalry coul d lead to the fragmentation of the

global semiconductor market, as certain countries want more end-to-end control over architecture, leading to increased architectural fragmentation and a reduced role for

a global architecture. Countries may take political decisions to enforce the use of an alternative architectur e, or locally generated implementations for certain use cases, to make their country more resilient in the c ase of trade barriers or for

national security reasons. For us, this could lead to increased costs to support region specific products, re duced revenue as a result of lost investment in territories that no longer use our products and potential ma rket loss and loss of future

licensing opportunities, all of which could have a material adverse effect on our business, results of operat ions, financial condition and prospects. 27 Table of Contents If we fail to develop new products in respons e to, or in anticipation of, rapid technological changes

in our industry or the industries we serve, our business may be materially and adversely affected. The market for our products is

characterized by rapidly changing technology and end-user needs. For example, improvements are rapidly being made in AI, cloud computing, data centers, image sensors, ML and the metaverse, among other technologies. Furthermore, the once-rapid improvements in semiconductor transistor density, with consequent reductions in cost and power consumption, are decelerating, and further innovation will become incrementally more difficult and expensive to

achieve. As a result of these rapid technological changes and others currently unknown, the future market for our products is difficult to predict. These risks are further exacerbated by the fact that our products oft en use a common architecture for

multiple end markets and our new architecture products often are based on legacy products. Therefore, if our architecture were rendered uncompetitive, obsolete, or otherwise unmarketable it may impact multiple products and may cause us to expend

significant resources and incur significant expenses to develop a new architecture. Our business, reputati on and relationships with our

third-party partners could be adversely affected if we cannot develop technological improvements or adap t our products to technological changes on a timely basis. Whether we will be able to compete in the futur e will substantially depend on our

ability to advance our products to meet these changing market and end-user needs and to anticipate succ essfully or respond to technological changes in hardware, software and architecture standards on a cost-effective and timely basis. Developing new products requires us to expend significant resources with out assurances that we will generate

revenue in the amounts we anticipate, on the expected timeline or at all. We will have to make significant expenditures to

continue developing our semiconductor products and other products. The long development time of gener ally five or more years from the initial design of our semiconductor products until its incorporation into new end-user applications can place significant strain on our financial resources and personnel. Despite these investments, there can be no assurances that we will realize the financial benefits of our development efforts in the amounts we anticipate, on the expected timeline or at all. For instance, in the past we have e xperienced delays in the development of certain of our products, which then delayed product deployment and the associated revenues. We may be unable to predict the timing or development of trends in our targ et markets with any accuracy. If we fail to accurately predict

market requirements or market demand for our products in our target markets, our business will suffer. A market shift towards an industry standard that we do not currently support and for which we are not currently developing new products could

significantly decrease the demand for our products. Despite these uncertainties, we devote substantial fin ancial and other resources, including design, engineering, sales, marketing, and management efforts, to d

eveloping and marketing our products

in anticipation of incorporation into new end-user applications. Additionally, our competitors may have a competitive advantage if their assessments relating to market adoption of new technologies prove to be more accurate than our assessments. Our failure to anticipate or timely develop new or enhanced product s in response to changing market demand could result in the loss of customers and decreased revenue and have a material and adverse effect on our

business, cash flows, results of operations and prospects. As we develop and introduce new products, we face the risk that customers may

not value or be willing to bear the cost of incorporating these newer products into their chips, including inc reases in royalty rates for such new products (as compared to existing products), particularly if they believ e their customers are

satisfied with the current products or unwilling to pay for improved products. Regardless of the improved f eatures or superior performance of the newer products we develop, customers may be unwilling to adopt our new products for a variety of

reasons, including design or pricing constraints. Moreover, the complexity and expense associated with o ur products generally requires a lengthy customer education, evaluation and approval process. Further, e conomic conditions, including economic

downturns and rising rates of inflation, may adversely impact our ability to license products by making it di fficult for our customers to plan future business activities, which could cause customers to limit spending o r delay decision-making. 28 Table of Contents We may not be successful in developing and licensing new products and may experience

difficulties or delays that would prevent the successful development, introduction and marketing of new products, and any new products that we may introduce may not achieve market acceptance and generate royalties and profits in the amounts we

anticipate, on the expected timeline or at all, which could materially and adversely affect our business, cas h flows, results of operations and prospects. These risks are further exacerbated by our focus on developing and marketing high-value

products, which naturally require more resources to develop. Our concentration of revenue from the PRC market makes us particularly susceptible to

economic and political risks affecting the PRC, which could be exacerbated by tensions between (on the one hand) the U.S. or the U.K. and (on the other hand) the PRC with respect to trade and national security. For the fiscal years ended March 31, 2023, 2022 and 2021, revenues from the PRC accounted for approximately 25%, 18% and 20% of our total

revenue, respectively, including both direct revenues and revenues derived from our relationship with Arm China. Our revenues in the PRC are derived from PRC semiconductor companies and OEMs, and from n on-PRC semiconductor companies and OEMs that utilize our products in chips and end products they sell into the PRC, which, by country, has the largest number of smartphone users in the world. Our failure to maintain PRC-sourced revenues, access new and existing markets in the PRC or gain traction for new bu siness areas in the PRC, or our loss of market share to competition in the PRC, could materially and adversely affect

our results of operations and competitive position. In the past decade, the PRC has been a significant sou rce of semiconductor industry

revenues and growth. However, the near-term growth prospects of the PRC semiconductor industry and r elated industries are unclear due to the uncertain effects of ongoing economic stress caused by policies t o contain the COVID-19 pandemic, trade and national security policies, and the elevated levels of private and public indebtedness. For the fiscal year ended March 31, 2023, although our total revenues derived fr om the PRC

increased as compared to the prior fiscal year, the growth in our royalty revenues derived from the PRC slowed for the same period primarily as a result of economic issues in the PRC and factors related to export control and national security

matters. Furthermore, in light of these issues, we expect to continue to see declining royalty revenues, an d we could see a decline in licensing revenues, derived from the PRC. A prolonged downturn in the PRC semiconductor industry or the PRC

economy generally could materially and adversely affect our results of operations and competitive position . Political actions, including

trade and national security policies of the U.S. and PRC governments, such as tariffs, placing companies on restricted lists, export controls or new end-use controls, have in the past, currently do and could in the f uture limit or prevent us,

directly or through our commercial relationship with Arm China, from transacting business with certain PR C customers or suppliers, limit, prevent or discourage certain PRC customers or suppliers from transacting business with us or Arm China, or

make it more expensive to do so, which could adversely affect demand for our products. Given our revenu e concentration in the PRC, if, due to actual, threatened or potential U.S., U.K. or PRC government action s or policies: Arm China is further

limited in, or prohibited from, licensing our products to PRC semiconductor companies and OEMs; our no n-PRC semiconductor companies and OEM customers were limited in, or prohibited from, selling devices into

the PRC that incorporate our products; PRC semiconductor companies and OEMs develop and use their own technology or use our competitors' technology in some or all of their devices; or our PRC customers delay or cease making payments of license

fees owed, our business, revenues, results of operations, cash flows and financial condition could be mat erially harmed. The U.S. and

U.K. have trade and national security policies regarding exports to the PRC of technology with potential m ilitary uses that would require us to obtain export licenses for certain processors, which can be difficult to obtain. For example, the highest

performance processor in our Neoverse series of processors meets or exceeds performance thresholds u nder U.S. and U.K. export control regimes and thereby triggers U.S. and U.K. export license requirements prior to export and delivery to customers in

the PRC. Given that national security concerns are higher for HPC technologies destined for the PRC and government response timelines are not defined, it can be challenging and unpredictable to obtain such export licenses. Combined with customer

need for 29 Table of Contents certainty, we have been able to address customer demand by licensing oth er CPU cores that do not exceed the HPC performance export control thresholds but yet still present a compelling solution.

Although our inability to sell such Neoverse processor into the PRC has not had a material impact on our business to date, future restrictions on sales of our products into the PRC could have a material adverse i mpact on our business. On August 9, 2023, President Biden issued an executive order addressing invest ments by U.S. persons in companies located in the PRC that

engage with certain categories of sensitive technology and products, including semiconductors and micro electronics, quantum information technologies and artificial intelligence. The executive order requires regulations that would implement limits on

such investments and was accompanied by an advance notice of proposed rulemaking that outlines prop osed regulations; however, the proposed regulations do not have immediate effect, are subject to public c omment and a further rulemaking process and

will not become effective until the rulemaking process is complete at some time in the future. While we bel ieve it is possible that such regulations may impact our PRC customers, our suppliers, Arm China, or our business with respect to China, given

the uncertainties with respect to the timing and ultimate requirements of these regulations, we are unable to assess the extent of any such impact. Finally, government policies in the PRC that regulate the amount and timing of funds that may flow out of the country have impacted and may

continue to impact the timing and/or ability to receive funds generated from PRC-related revenues, which may negatively affect our cash flows. We depend on our commercial relationship with Arm China to acces s the PRC market. If that commercial relationship no longer existed or deteriorates, our

ability to compete in the PRC market could be materially and adversely affected. Substantially all of our P RC-related revenue is earned through the IPLA, pursuant to which, among other things, we granted Arm China certain exclusive rights to sublicense our IP to PRC customers. We expect that our licensing relationship

with Arm China will continue to account for substantially all of our total revenues from the PRC and represent a significant portion of our revenues for the foreseeable future. It would be difficult for us to replace any lost PRC-sourced revenue in the event that our commercial relationship with Arm China were to termina

te or deteriorate. Accordingly, we expect that Arm China will continue to provide our primary access to the PRC market

for the foreseeable future. If we fail to maintain our commercial relationship with Arm China, our access to the PRC market could be materially diminished and our business, results of operations, financial condition and prospects for growth could be

materially and adversely affected. Neither we nor SoftBank Group control the operations of Arm China, w hich operates independently of us. Despite our significant reliance on Arm China through our commercial relationship with them, both as a source of revenue and as a

conduit to the important PRC market, Arm China operates independently of us. On March 28, 2022, we transferred our entire equity interest in Arm China to a subsidiary of SoftBank Group. As of the date of this prospectus, approximately 48% of

the equity interest in Arm China is owned by Acetone Limited, which is controlled by SoftBank Group and in which we own a 10% non-voting interest, approximately 35% is indirectly owned by HOPU Investment Management Company, and approximately 17% is

directly and indirectly owned by other Chinese parties. Our 10% non-voting interest in Acetone Limited re presents an approximate 4.8% indirect ownership interest in Arm China. Furthermore, we do not have any direct management rights with respect to Arm China, such as a right to representation on Arm China's board of directors, although Mr. Haas continues to serve on the board as an appointee of the SoftBank Gr oup affiliate holding Arm's former equity interest in Arm China. Following the transfer of our interest in Arm China to a subsidiary of

SoftBank Group, under the terms of the Arm China arrangement, the SoftBank Group affiliate holding Arm 's former equity interest in Arm China is entitled to appoint a minority of the directors of the board of Arm China, and SoftBank Group's

appointees are unable to unilaterally implement certain measures that require action by all of or a superm ajority of the directors of Arm China. 30 Table of Contents The fact that Arm China operates independently of us exposes us to significant risks. Arm

China's value to us as a customer is dependent on Arm China's business results, which are, in turn, subject to substantial risks that are outside of our control. For example, Arm China may not commit the necessary resources to market and

sell our products to PRC end-users of our semiconductor IP products. Arm China also may fail to comply with the laws and regulatory requirements applicable to its business, which could limit its ability to market or sell our products in the PRC. In

addition, Arm China may fail to attract, train, retain and motivate highly skilled managerial and technical p ersonnel necessary for its business. Arm China may also have difficulties accessing funding or enforcing contractual relationships. The

realization of these or other risks related to Arm China's business may have a material adverse effect on Arm China's business, results of operations, financial condition and prospects and, by extension, our own. Since Arm China operates

independently of us and we do not control Arm China, our ability to take measures to address the various risks facing Arm China is limited. If any of such risks related to Arm China's business are realized, our revenue could materially decline

and our results of operations could be materially adversely affected. Under the IPLA with Arm China, Arm China's payments due to us

are determined based on the financial information that Arm China provides to us. Accordingly, similar to o ur other royalty customers, we are dependent on Arm China providing us with reliable and timely informati on. We perform various procedures to

assess the reasonableness of Arm China's data, and the IPLA includes rights for us to audit Arm China's activities to ensure compliance with the IPLA. In the past, we have had issues obtaining timely and accura te information from Arm

China. We believe the underlying problems causing our past inability to obtain such information have bee n resolved, but we can provide no assurances that our access to Arm China's records will not be inhibited again in the future. If Arm China

does not provide us with timely and accurate information, our revenue could materially decline and our results of operations could be materially adversely affected. We are also dependent on Arm China paying us the amounts that it owes us in a timely

manner and in full. In the past, we have received late payments from Arm China and have had to expend company resources to obtain payments from Arm China. Although these historical issues did not have a material impact on our operations, any future

failure to pay us the amounts we are owed under the IPLA could have a material adverse effect on our bu siness, results of operations, cash flows and financial condition. Furthermore, Arm China has possession of or access to certain material IP and customer data pursuant to the IPLA and other commercial arrangements with us. Although Arm China is contractually obligated to protect this IP and data, we are li mited in our ability to monitor or influence the manner in which Arm China protects our IP and data from the eft. loss or misuse. Arm China

operates its own separate information technology infrastructure. Aside from customary audit rights and protections under the IPLA, we are therefore unable to independently assure the adequacy of protections that Arm China implements with respect to

its possession and/or access to our IP and data. In addition, under the IPLA with Arm China, we are contractually obligated to indemnify

both Arm China and its PRC customers that sublicense our IP in the event that either Arm China or such c ustomers incur damages or costs in lawsuits, administrative proceedings or similar actions based upon a claim that our IP infringes the IP of a

third party. The liability that we incur to Arm China or its PRC customers under such provisions could be si gnificant and have a material adverse effect on our results of operations and liquidity. Additionally, since A pril 2022, Allen Wu, the former chief executive officer of Arm China, and certain entities under his effective control,

have initiated several lawsuits in the courts of the PRC seeking to challenge certain aspects of Arm China's corporate governance and the actions of Arm China's board of directors. To date, all cases that have be en resolved at the trial

court level have been resolved favorably to Arm China but are subject to appeal. In the event that certain of these cases were to be decided adversely to Arm China, it could result in further changes to Arm China 's corporate governance and

management structure, which could reduce SoftBank Group's ability to conduct effective oversight of Arm China and result in a material adverse effect on our business, results of operations, financial condition an d prospects. 31 Table of Contents We may face increasing competition with PRC companies that develop their own IP. Due to various factors, including pressure, encouragement or incentives from, as well as the policies of, the PRC government (whose "Made").

in China 2025" campaign targets 70% semiconductor self-sufficiency by 2025), concerns over actual, thre atened or potential U.S., U.K. or PRC government actions or policies, including trade or national security policies, or other reasons, PRC

semiconductor companies and OEMs may increasingly develop their own technology and use such technology in their devices, or use our competitors' technology in their devices. Specifically, the PRC government's 14th Five-Year Plan and

related initiatives have identified the development of globally competitive PRC companies in "core technol ogies" such as semiconductors as a key policy focus. As part of a government-wide effort to encourage in vestment and development of

domestic semiconductor capabilities, the PRC government could encourage financing opportunities to our competitors in the PRC on favorable terms, or influence major PRC customers to favor adoption of IP of our competitors in the PRC over our own IP. With respect to Arm China, although the terms of the IPLA with Arm China prohibit Arm China from developing microprocessor cores and only

allow Arm China to develop derivative products using Arm IP with our consent, Arm China may independe ntly develop competitive products other than microprocessor cores and could divert customer interest from our products to increase its market share

to our detriment. The realization of any such risks could materially harm our business, results of operation s, cash flows and financial condition. Our business and future operating results may be materially and adversely affected by global economic conditions and other events outside of our

control. In early 2023, the World Bank warned that the global economy is close to a recession with global growth sharply declining

due to, among other things, high inflation, deteriorating financial conditions, and rising geopolitical tension s. We are subject to risks arising from adverse changes in global economic conditions. In particular, due t

o economic uncertainties in

many of our key markets, our customers and their customers may delay, suspend or reduce technology p urchases and investments and/or delay their payments to us. Economic conditions could continue to deter iorate in the future, and, in particular, the semiconductor and electronics industries could fail

to grow, including as a result of the effects of, among other things, rising inflation and interest rates, a sust ained global semiconductor shortage, supply chain disruptions, the COVID-19 pandemic and any

disruption of international trade relationships such as tariffs, export licenses or other government trade res trictions. In addition, adverse economic conditions affect demand for devices that our products help create, such as smartphones,

automobiles and servers. Longer-term reduced demand for these or other devices could result in reduced demand for our products and significant decreases in our licensing fees and royalties over time. In addition, if our customers or distributors

build elevated inventory levels, we could experience a decrease in short-term and/or long-term demand fo r our products. If any of these events or disruptions were to occur, the demand for our products could be materially adversely affected along

with our business, results of operations, financial condition and prospects. Our business and operating results are also vulnerable to

interruption by other events outside of our control, such as earthquakes, fire, extreme weather events, po wer loss, telecommunications failures, political instability, geopolitical turmoil, such as the war in Ukraine a nd any sanctions, export

controls or restrictions on doing business with Russia and Belarus, as well as any resulting disruption, inst ability or volatility in the global markets and industries resulting from such conflict, pandemics, military con flict and uncertainties

arising out of terrorist attacks, including a global economic slowdown, the economic consequences of a re surgence and escalation of the trade war between the U.S. and the PRC, the potential for conflict in Taiwa n and the associated disruptions to,

or effects on, the semiconductor industry, uncertainties resulting from the U.K.'s withdrawal from the Euro pean Union, commonly referred to as Brexit, military action or terrorist activities and associated political in stability. Economic or

political instability may undermine consumer confidence and/or cause current or potential customers, including the end customers of our customers or

potential customers, to reduce or delay their 32 Table of Contents technology purchases and investments. Such events could also materially adversely affect our ability to operate and supply our products to our cu stomers. Brexit has caused, and may continue to cause, uncertainty with respect to the future of the U.K.'s economic and political relationship

with the European Union, which could increase taxes and costs of business and cause heightened volatilit y in currency exchange rates and interest rates. Continued uncertainty and events related to Brexit could have a negative impact on consumer

confidence and wages, leading to a decrease in the gross domestic product of the U.K. Brexit could also a dversely affect the political, regulatory, economic or market conditions in the U.K., the European Union and worldwide, and could contribute to

instability in political institutions, regulatory agencies and financial markets. We regularly maintain cash balances at third-party

financial institutions in excess of government-insured limits. The U.S. Federal Deposit Insurance Corporati on took control and was appointed receiver of Silicon Valley Bank, New York Signature Bank and First Republic Bank on March 10, 2023,

March 12, 2023 and May 1, 2023, respectively. We do not have any direct exposure to Silicon Valley Bank, New York Signature Bank or First Republic Bank. However, if other banks and financial institutions, including financial institutions

at which we maintain deposits, enter receivership or become insolvent in the future in response to financial conditions affecting the banking system and financial markets or otherwise, our ability and our customers 'ability to access cash, cash

equivalents and investments may be threatened. These factors could cause customers to delay, decrease or cancel the licensing of our

products and could expose us to increased credit risk on customer obligations owed to us, each of which

could have a material adverse effect on our business, results of operations, financial condition and prospe cts. Our operating results and revenue could be adversely affected by customer payment delays, custome r bankruptcies and defaults or modifications of

contractual commitments. Certain of our customers have and may continue to, and others in the future may, face challenging

financial or operating conditions, including due to macroeconomic conditions or catastrophic events or oth er factors, and delay or default on their payment commitments to us, request to modify contract terms, or modify or cancel plans to license our

products. Our customers' inability to fulfill payment commitments, in turn, could adversely affect our reven ue, operating expenses and cash flow. Additionally, certain of our customers have in the past sought, and customers may in the future

seek, to renegotiate pre-existing contractual commitments. Payment defaults by our customers or signific ant reductions in existing contractual commitments could have a material adverse effect on our financial condition and results of operations. Sustained inflation could have a material adverse effect on our busine ss, results of operations, financial

condition and prospects. Inflation rates in the markets in which we operate have increased and may continue to rise. Sustained or

increasing inflation could increase our operating expenses, including labor costs and research and develo pment expenditures, or result in employee attrition to the extent our remuneration does not keep pace with inflation, particularly if our

competitors' remuneration does. Further, inflationary pressures may increase costs for our customers and reduce demand for our products or our customers' products due to increased prices. In addition, some of our long-term licenses include

an annual increase in license fees. However, these annual increases may fall below the then-current rate of inflation, which could make maintaining these licenses less profitable than we had anticipated when we originally signed the license. To the

extent inflation results in rising interest rates and has other adverse effects on the market, it may further a dversely affect our business, results of operations, financial condition and prospects. 33 Table of Contents An epidemic, pandemic or other health crisis could materially and adversely affect our business,

results of operations, financial condition and prospects Public health crises, including the COVID-19 pand emic and the emergence and spread of COVID-19 variants, have previously resulted in significant econo mic uncertainty, significant volatility in business and

consumer confidence and global consumer demand, and a global economic slowdown. Government polici es and other preventive and precautionary measures that governments and businesses have implemente d in the past to limit the spread of an epidemic,

pandemic or other health crisis, including, but not limited to, travel bans and restrictions, quarantines, shel ter-in-place and social distancing orders, declarations of

states of emergency and shutdowns, have exacerbated these issues. Although restrictions may from time to time ease in certain

jurisdictions, there is continued uncertainty regarding the duration, scope and severity of the COVID-19 pa ndemic, particularly with the emergence of new variants of COVID-19 and periodic spikes in COVID-19 ca ses in various geographic regions. In particular, the recent resurgence of the pandemic in the PRC, one of our most

significant markets, after the government abandoned its zero-tolerance policy for COVID-19, may cause the reinstatement of restrictions across various jurisdictions and

could adversely affect many industries in the PRC and globally. The pandemic in the PRC has resulted fro m time to time in widespread lockdowns in various areas of the country and has had, and may continue to have, a significant adverse effect on the

PRC economy and, in turn, demand for our products. The COVID-19 pandemic has also contributed to volatility in the financial markets and may increase the possibility of an extended global economic downtur n and extended periods of high inflation, which could continue to affect demand for our products, demand for end products that incorporate our

products and our ability to collect payments from our customers. We are unable to accurately predict the i mpact that COVID-19 will continue to have on our business, results of operations, financial condition and prospects due to uncertainties, including the existence, severity and duration of future outbreaks and addit

ional

actions that may be taken by businesses and governmental authorities. Nevertheless, to the extent the C OVID-19 pandemic or an unrelated epidemic, pandemic or other health crisis adversely affects our busine ss,

it may also have the effect of heightening many of the other risks described in these risk factors relating to our business and industry, such as those relating to demand for end products incorporating our products.

The cumulative effects of these

developments could have a material adverse effect on our business, results of operations, financial condition and prospects. Failure to adequately

fund our research and development efforts may materially impair our ability to compete effectively. To rem ain competitive, we must

continue to develop new products, applications and enhancements to our existing products and services, particularly as next-generation technology is adopted by market participants. Allocating and maintaining a dequate research and development

resources, such as the appropriate personnel and development technology, to meet the evolving demand s of the market is essential to our continued success, but our allocations may be inadequate or we may p ursue research and development initiatives

based on assumptions about future demand that prove to be incorrect. Our competitors may expend consi derably greater resources to support their respective research and development programs than we do, wh ich may give our competitors a competitive

advantage. Our ability to fund research and development expenditures depends on generating sufficient r evenue and cash flow from

operations and the availability of external financing, if necessary. Our research and development expendit ures, together with other ongoing operating expenses, is a substantial drain on cash flow and may decrea se cash balances, which may limit our

ability to pursue other potentially attractive initiatives. On the other hand, if we allocate our resources to su ch other potentially attractive initiatives or pay dividends to our shareholders, our research and developme nt efforts may be harmed or

we may need to seek external financing in 34 Table of Contents order to fund our efforts. If new competitors, technological advances by existing competitors, other competitive factors or market changes require us to invest significantly greater resources

than anticipated in research and development efforts, total operating expenses would increase. If we are r equired to invest significantly greater resources than anticipated in research and development efforts with out an associated increase in

revenue, our operating results could decline. Additionally, our processors often run software created by in dependent software vendors or

through open-source communities. Each end market has its own ecosystem of software and tools provide rs, including from open-source communities. These ecosystems need to be supported by our engineers a nd

resources, and by our customers, including, from time to time, through direct monetary investment. In som e circumstances, we may also need to subsidize or fund our customers' research and development efforts . Insufficient investment may result

in the ecosystems and/or customers providing better support for end products not based on our products I eading to systems companies not choosing chips based on our products, which would result in a reduction in our revenues. The semiconductor industry relies on a limited number of manufacturers whose operations tend to be concentrated in certain geographic regions to

manufacture chips and other products, and developments that adversely affect such regions could have a material adverse effect on our business, results of operations, financial condition and prospects. The sem iconductor industry relies on a limited number of companies to manufacture chips and related products. The chip manufacturing operations

of these companies are concentrated in certain geographic regions, including Taiwan and other parts of E ast Asia, which makes us susceptible to adverse developments in these regions' economic and political c onditions, particularly to the extent

that such developments create an unfavorable business environment that significantly affects our and our customers' operations. These manufacturers or the geographic regions in which they operate may be imp

acted by events outside of our or

their control, including, among other things, company-specific operational issues, trade conflicts and military action or terrorist activities and associated political instability, any of which could have a

material adverse effect on our business, results of operations, financial condition and prospects. Although the governments of certain countries, including the U.S., have taken actions to make their countries more attractive for chip manufacturing

operations, there can be no assurances that the current geographic concentration of chip manufacturing will be meaningfully changed in the near term or at all. Any escalation in geopolitical tensions in Asia, particularly between the PRC and Taiwan, could significantly disrupt semiconductor chip

manufacturing and interrupt the global semiconductor chip supply chain. A significant portion of the world's semiconductor manufacturing is in Taiwan, and increased geopolitical tensions there could exacerbate supply chain disruptions. In

addition, the war in Ukraine could lead to market disruptions and exacerbate current supply chain constraints, including with respect to certain materials and metals, which are essential in semiconductor manufact uring. New technologies, such as AI and ML, may use algorithms that are not suitable for a general purpose CPU, such as our processors, and the failure to

successfully implement new technologies in our processors could have a material adverse effect on our b usiness, competitive position, results of operations, financial condition and prospects. New technologies, s uch as AI and ML, may use algorithms that are not suitable for a general purpose CPU, such as our proce ssors. Consequently,

our processors may become less important in a chip based on our products, thus eroding its value to the customer and resulting in lower revenue for us. If we are unable to develop and commercialize processors that are compatible with new

technologies or competitors are successful in developing compatible technologies more quickly or efficient ly than we can, our business, competitive position, results of operations, financial condition and prospects may be materially and adversely

affected. In addition, the introduction of new technologies, such as AI and ML, into our processors may inc rease IP, cybersecurity, 35 Table of Contents operational, data protection and technological risks and res ult in new or enhanced governmental or regulatory scrutiny, litigation, ethical concerns, or other complications that could materially

and adversely affect our business. As a result of the complexity and rapid development of new technologi es, it is not possible to predict all of the legal, operational or technological risks related to use of such technologies. Furthermore, new

technologies, such as AI and ML, are the subject of evolving review by various governmental and regulato ry bodies and agencies, and changes in laws, rules, directives and regulations governing the use of such t echnologies may adversely affect the

ability of our business to develop and use such technologies. We rely on our management team and will need additional personnel to grow our

business, and the loss of one or more key employees or our inability to attract and retain qualified person nel could harm our business. Our future success is substantially dependent on our ability to attract, integr ate, retain and motivate our management team and other key

personnel and we are particularly dependent on our senior management team, including Mr. Haas, our Chief Executive Officer, Mr. Child, our Chief Financial Officer, Mr. Collins, our Chief Legal Officer, Mr. Grisen thwaite, our Chief

Architect, and other key employees. Competition for highly skilled personnel, and particularly engineers, c an be intense. Other companies may be successful in recruiting and hiring members of our management t eam or other key employees, and it may be

difficult for us to find suitable replacements on a timely basis, on competitive terms or at all. We experienc e voluntary attrition on an ongoing basis, and we reduced overall headcount as part of a restructuring that was completed in June 2022 to

address duplicative work functions and deprioritize certain initiatives within the Company. Circumstances may require a further reduction in the overall size of our organization, which may present challenges in m anaging and growing our business. If

we lose the services of any of our senior management personnel, other key personnel or a significant number of our engineers or sales and marketing personnel, our development efforts or business relationship

s could be disrupted, which could have a

material adverse effect on our business, results of operations, financial condition and prospects. Our futur e success significantly depends on our ability to identify, attract, motivate and retain qualified engineers with the requisite educational

background and industry experience. Competition for such qualified engineers is intense and the cost of a ttracting and retaining qualified employees may increase without a corresponding increase in the prices we charge our customers, which could

materially and adversely affect our profitability. In certain geographic regions, there is also intense compet ition for sales and marketing personnel, which may adversely affect our ability to expand into new markets . Particularly, changes to the

U.K.'s border and immigration policy could occur as a result of Brexit, potentially affecting our ability to rec ruit and retain employees from outside the U.K. If we are unsuccessful in attracting and retaining qualified personnel to fulfill

our current or future needs, our business, results of operations, financial condition and prospects could be materially and adversely affected. Competitive pressures or market opportunities may necessitate reducti ons in our pricing or change our business terms or business model, which could

materially and adversely affect our business, results of operations, financial condition and prospects. In or der to remain

competitive in the highly competitive markets in which we do business, we may need to reduce the prices of our products or services or otherwise change the structure and terms of our customer relationships or o ur business model. If our competitors

offer significant discounts on certain products in an effort to recapture or gain market share or to sell other software or hardware products, we may need to lower our prices or offer other favorable terms to compet e successfully. Any such changes

would likely reduce our profit margins and could have a material adverse effect on our business, results of operations, financial condition and prospects. Any substantial changes to our other commercial arrangem ents with our customers or our

business model could cause revenues to decline or be delayed as our sales force implements and our cu stomers adjust to the commercial arrangements or business model. Changes to our business model could also necessitate changes in our product mix,

which could cause revenues or profitability to decline, particularly if such changes in our product mix result in an increased reliance on lower margin offerings. If we cannot offset price reductions with a corresponding increase in sales volume or

by reducing our costs, then the reduced revenues resulting from lower prices could have a material adver se effect on our business, results of operations, financial condition and prospects. 36 Table of Contents A dditionally, in the future, in response to market opportunities and pressures, we are

likely to offer new products or services that may directly compete with the products and services of some of our customers or partners. This may create real or perceived competitive conflicts with companies that are important to our business, and as

a result of such competition, such customers or partners may terminate or materially reduce their relations hip with us. If development tools,

systems software, EDA tools and operating systems that are compatible with our products cease to be available or are inadequate to satisfy customer needs, then our business, results of operations, financial condition and prospects may be materially

and adversely affected. We believe that it is crucial for the market acceptance of our products to have available development

tools, systems software, EDA software and operating systems that are compatible with our products. Alth ough we currently work with other third-party partners to offer such tools and software compatible with our products, we cannot assure you that

such tools and software are or will continue to be sufficient to support customers' needs, that our existing partners will continue to offer such tools, software and operating systems compatible with our products, or that we will continue to

attract additional tools, software and operating systems partners. If development tools, systems software, EDA tools and operating systems that are compatible with our products cease to be available or are inade quate to satisfy customer needs, then

our business, results of operations, financial condition and prospects may be materially and adversely affected. Participation in standards-setting

organizations may subject us to IP licensing requirements or limitations that could adversely affect our bu siness and prospects. Our participation in standards-setting organizations or with other industry initiatives may require us to license our patents or products to

companies that adopt industry-standard specifications. Depending on the rules of the organization, govern ment regulations, or court decisions, we may be required to grant to all other participants licenses to our p atents or products that are

essential to the practice of those standards for little or no cost, or otherwise on RAND terms, which could I imit our control over the use of these patents and products. If we fail to limit to whom we license our patents or products, or fail to

limit the terms of any such licenses, we may be required to license our patents or other IP to others in the future, which could limit the effectiveness of our patents against competitors. In these situations, the royalt y rates we charge could be

limited for these products, and we may be unable to limit to whom we license such products or to restrict many terms of the license. As a result, we may be unable to enforce certain patents against others, our co sts of enforcing our licenses or

protecting our patents may increase, and the value of our IP rights may be impaired. We may in the future be subject to claims that our licensing of industry standard technologies may not conform to the requirem ents of the standards-setting

organization. Allegations such as these could be asserted in private actions seeking monetary damages a nd injunctive relief, or in regulatory actions. Claimants in such cases could seek to restrict or change our li censing practices or our ability to

license our products. Any of the foregoing could have a material adverse effect on our business, results of operations, financial condition and prospects. If our products do not conform to, or are not compatible wit h, existing or emerging industry standards, demand for our products may decrease. We design certain of our products to conform to industry standards. Some industry standards may not be widely adopted or implemented uniformly, and competing standards may emerge that may be preferred by our customers or by our third-party suppliers. In addition, existing standards may be superseded by new innovations or standards. Because our products often use a

common architecture and our new architecture products often are based on legacy products, obsolescenc e of components or features of our products may have a more significant effect on our results of operation s, financial condition and prospects than

if our products were less interrelated. See "—Developing new products requires us to expend significant r esources without assurances that we will generate revenue in the amounts we anticipate, on the expected timeline or at all." 37 Table of Contents We use certain software governed by open-source licenses and we contribute to certain open-source

projects, which under certain circumstances could materially adversely affect our business, results of oper ations, financial condition and prospects. Certain of our software, as well as that of our customers, third-p arty partners and vendors, may be derived from "open-source"

software that is generally made available to the public by its authors or other third parties. Open-source so ftware is made available under licenses that impose certain obligations on us in the event we were to distribute derivative works of the

open-source software. These obligations may require us to make source code for the derivative works av ailable to the public and/or license such derivative works under a particular type of license, rather than the forms of license we customarily use

to protect our IP. In the event that the copyright holder of any open-source software were to successfully e stablish in court that we had not complied with the terms of a license for a particular work, we could be required to release the source code

of that work to the public or stop distribution of that work if the license is terminated, which could adversel y affect our business, results of operations, financial condition and prospects. While we take steps to moni tor the use of all open-source software in our products and try to ensure that no open-source software is u sed in

such a way as to require us to disclose the source code to the related products when we do not wish to do so, such use could inadvertently occur. Additionally, if a third-party software provider has incorporated ce

rtain types of open-source software

into software we license from such third party for our products, we could, under certain circumstances, be required to disclose the source code to our products. This could harm our IP position and have a material adverse effect on our business,

results of operations, financial condition and prospects. Further, although some open-source vendors provide warranty and support

agreements, it is common for such software to be available "as-is" with no warranty, indemnity or support. Some of our products use open-source libraries that

could contain vulnerabilities, and these may be discovered at any time. These vulnerabilities are often dis closed publicly without forewarning to the users of the software. Accordingly, our products may contain vulnerabilities originating from

open-source software without our knowledge, and we may not have the opportunity to address such vulne rabilities before they are disclosed to the public. Although we monitor our use of open-source software to avoid subjecting our products to

unintended conditions or vulnerabilities, such use, under certain circumstances, could materially adversel y affect our business, results of operations, financial condition, prospects and reputation, including if we are required to take remedial

action that may divert resources away from our development efforts. Finally, from time to time we contribute software source code to

open-source projects under open-source licenses. Any source code we contribute to open-source projects is publicly available. As such, our ability to protect our IP rights with respect to such software source code may be limited or lost entirely,

and we may be unable to prevent our competitors or others from using such contributed software source c ode. Any of these risks could be difficult to eliminate or manage, and could harm our IP position and have a material adverse effect on our

business, results of operations, financial condition and prospects. It may be difficult for us to verify custom er data, including royalty amounts

owed to us under our licensing agreements, and this may cause us to lose revenues. We seek to ensure that our customers adhere to

the terms of our license agreements, including their obligation to provide certain data to us. We perform v arious procedures to assess customer data related to royalties for reasonableness, and our license agree ments generally include rights for us

to audit the books and records of our customers to verify certain types of customer data. However, audits can be expensive and time-consuming, and even after conducting an audit, it may still be challenging for us to verify the accuracy of

information contained in customer royalty reports, or a customer could potentially object to the results of s uch audit. We can provide no assurances that our procedures to assess customer data and any audits that we undertake to verify the accuracy

of our customers data will be successful. As a result, we may not always receive complete or accurate inf ormation (financial or otherwise) from our customers or obtain all royalty payments to which we 38 Table of Contents are legally entitled, which could have a material adverse effect on our business, results of ope rations, financial condition and prospects. Changes in our business model could have a material adverse effect on our business, results of operations, financial condition and prospects. We have in the past made and may in the future make changes to our business model. We can provide no assurances that customer s

will accept these changes, which could result in lower revenues, particularly in the period immediately foll owing the initial introduction of a new business model. In such case, we may not realize the anticipated fin ancial benefits of such changes

in the amounts we anticipate, on the expected timeline or at all. For example, we recently introduced new approaches to licensing certain of our products to our customers. As a result of introducing a relatively sm all annual fee under one new

licensing model, for example, the payment by customers of fees under this new licensing model will be collected based on the negotiated annual fee leading to a deferral of upfront license fees that we have historically received under a TLA. This

deferral of such licensing fees is expected to continue to have an adverse effect on our licensing revenue

in the short term. In

addition, increases in the number or value of licenses signed in the future may not materialize in the same way or at all under a new business model and, therefore, licensing revenue and royalty revenue may be I ower than expected. Further, the use

of a new business model may have unexpected consequences for our company, including making our products less attractive to current and prospective customers, which could have a material adverse effect on our business, competitive position, results

of operations, financial condition and prospects. If we are engaged to design custom chips for one or mor e customers, we could be subject to a

variety of risks, any of which could have a material adverse effect on our business, results of operations, fi nancial condition and prospects. In the future, we may be engaged to supply custom chip designs for cert ain existing customers and other third parties, including affiliates of

SoftBank Group, across a variety of use cases and end markets. To the extent that we were in fact engag ed to design custom chips for one or more customers, we would expect to partner with third parties, which may include affiliates of SoftBank

Group, for technical expertise, financial support or other purposes to supplement our existing resources. A ccordingly, we may need to rely on third parties over which we would exercise little or no control. In such c ircumstances, we could provide no

assurances that any third parties with which we worked to design custom chips would dedicate the resour ces, or have the requisite technical or other capabilities, necessary to achieve our and our customers' chip design expectations. In addition, we can provide no assurances that customers would engage us to supply custom chip designs or, even if one or more customers were

to engage us, that we would be successful in designing chips for our customers' intended use cases. Cust omizing our chip designs for one or more customers may necessitate substantial investments in technolog y and human capital, and it could

take several years for us to realize any associated benefits, if ever. This may reduce our cash available for operations and other uses, which could hurt our ability to grow our business. In addition, any efforts to design custom chips may require

substantial time and attention from our executives, engineers and other employees, which could distract t hem from operating our business, and divert attention and resources away from our core business. Furthe rmore, any decision to design custom chips for customers may create real or perceived competitive conflicts with companies that are

important to our business, and as a result of such competition, such companies might terminate or materially reduce their relationship with us, particularly if we agreed to design chips exclusively for certain custo mers. If our relationships with

existing customers deteriorated or terminated as a result of any opportunistic expansion into custom chip designs, our business, results of operations and prospects could be materially and adversely affected. 39 Table of Contents We may be unable to make acquisitions and investments, or successfully integrate the m into our

business, and we may be unable to divest businesses on acceptable terms or at all. As part of our busine ss strategy, we consider a

wide array of potential strategic transactions, including acquisitions of businesses, new technologies, servi ces and other assets, joint ventures and strategic investments that complement our business. We may be unable to identify or complete

prospective transactions for many reasons, including increasing competition from other potential acquirers or investors, the effects of consolidation in our industries or potentially high valuations of acquisition or in vestment candidates. Certain

agreements to which we are subject from time to time may also contractually restrict our ability to make ac quisitions and investments in some circumstances. In addition, applicable antitrust, national security (including with respect to the U.K.

National Security and Investment Act 2021 or the Committee on Foreign Investment in the United States) or other laws or regulations may limit our ability to acquire, invest in or integrate targets, or may force us to divest an acquired business or

impose restrictions on an investment. If we are unable to identify suitable targets or complete or successfully integrate acquisitions, our growth prospects may suffer, and we may not be able to realize sufficient s

cale and technological advantages

to compete effectively in all markets. Acquisitions involve numerous risks, any of which could negatively af fect our business, results of operations, financial condition and prospects, including with respect to timing or delays, diversion of

financial and management resources from existing operations or alternative acquisition opportunities, sub sequent litigation, retention of key employees or business partners, and theft of information disclosed during the transaction. If we fail to

address the foregoing risks or other problems encountered in connection with past or future acquisitions of businesses, new technologies, services and other assets and strategic investments, or if we fail to succe safully integrate such acquisitions

or investments to realize anticipated benefits or synergies, our business, results of operations, financial co ndition and prospects could be adversely affected. In addition, we have in the past divested and reduced, and may in the future divest or reduce, our investment in certain businesses or product

lines from time to time. Such divestitures involve risks, such as the difficulty of identifying and separating o ut specific assets within a business, distracting employees, incurring potential loss of revenue and cash flow, negatively impacting

margins, and potentially disrupting customer and employee relationships. We may also incur significant co sts associated with exit or disposal activities, related impairment charges, or both. There may be risks ass ociated with organic growth or growth from strategic investments or acquisitions we make, and we may fail I to effectively manage

our growth. We could experience rapid growth in our headcount and operations through acquisitions, strat egic investments and

organic growth. This growth can place significant demands on our management and our operational and financial infrastructure. Our ability to manage our growth effectively and to integrate new technologies, businesses and personnel into our existing

business may require us to expand our operational and financial infrastructure and to address the retentio n, attraction, training, motivation and management of employees across a broader geographical and oper ational footprint. Such growth could

strain our ability to develop and improve our operational, financial and management controls, enhance our reporting systems and procedures, recruit, train and retain highly skilled personnel, implement systems, policies, benefits and compliance

programs across different jurisdictions, maintain our culture and maintain customer and brand satisfaction . Additionally, if we do not effectively manage the growth of our business and operations, the quality of our products and services could

suffer, which could negatively affect our brand, operating results and overall business. The failure to effect ively manage the growth of our strategic investments could also cause the value of such investments to d ecline. If we fail to achieve the

necessary level of efficiency in our organization as it grows, our business, results of operations, financial c ondition and prospects could be materially and adversely affected. 40 Table of Contents Our financial stat ements include significant amounts of goodwill and other intangible assets. The

impairment of a significant portion of these assets would adversely affect our reported results of operation s and financial position. The goodwill and other intangible assets recognized in our financial statements re presented 23.6% and 2.0%, respectively, of our total assets

as of March 31, 2023 (25.1% and 3.1%, respectively, as of March 31, 2022). Within other intangible asset s, our principal assets are our patents and licenses (6.5% of total other intangible assets as of March 31, 2023) and software or

software assets under construction (90.6% of total other intangible assets as of March 31, 2023). Any furt her acquisitions may result in our recognition of additional goodwill or other intangible assets. We evaluat e on a regular basis whether

all or a portion of our goodwill and other intangible assets may be impaired. Under current accounting rule s, any determination that impairment has occurred would require us to record an impairment charge, which would negatively affect our results

of operations. We recognized impairments for the fiscal year ended March 31, 2022 in relation to specific historically acquired or

developed products that were no longer being licensed, and we have also recognized impairments in the

past. In addition, we capitalize

and amortize the qualifying costs of internally developed software for its operating platforms and related b ack-office systems over the estimated useful lives of these intangible assets (generally between three and five years). If projects fail to

deliver anticipated results in line with our estimates and assumptions, then we may be required to write-do wn the intangible asset costs, which could adversely affect our financial condition, results of operations and the trading price of our

securities. An impairment or write-down of a significant portion of goodwill, other intangible assets or capit alized development costs

could have a material adverse effect on our reported results of operations and our financial position. Our financial and operational flexibility

may be restricted by covenants contained in loan agreements we may enter into in the future, and we may be unable to comply with the restrictions and financial and operational covenants imposed by such agre ements. We do not currently have any debt, but we may incur debt in the future. Future creditors may subject us to certain restrictions on our business

and future financing activities as well as certain financial and operational covenants. Such restrictions and covenants may prevent us from taking actions that otherwise might be deemed to be in the best interest of us and holders of our ADSs. Debt

service obligations may require us in the future to dedicate a substantial portion of our cash flows from op erations to payments of principal and interest on our interest-bearing debt, which could limit our ability to o btain additional financing,

make capital expenditures and acquisitions and carry out other general corporate activities in the future. A ny such obligations may also limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we

operate or detract from our ability to successfully withstand a downturn in our business or the economy in general. Failure to obtain, maintain,

protect, defend or enforce our IP rights could impair our ability to protect our proprietary products and our brand, and the costs of obtaining, maintaining, protecting, defending and enforcing such IP rights, particul arly as a result of litigation,

may adversely and materially affect our results of operations. Our success and ability to compete depend significantly on

protecting our IP rights. We primarily rely on patent, copyright, trade secret and trademark laws, trade sec ret protection and contractual protections, such as confidentiality, invention assignment and license agree ments with our employees,

customers, third-party partners and others, to protect our IP rights. The steps we take to protect our IP rights may be inadequate. We also may not be able to obtain desired patents, and our pending (of which we currently have approximately 2,700)

or future 41 Table of Contents patent applications, whether or not being currently challenged, may not result in the issuance of patents with the scope of protection we seek, including in jurisdictions of strategic importance

and, if issued, may not provide any meaningful protection or competitive advantage. The scope of our pat ent protections may be adversely affected by changes in legal precedent and patent office interpretation of these precedents. Further, patents

directed to particular subject matter associated with our business (e.g., CPU architecture) may be difficult to obtain and enforce in many jurisdictions and there may also be limits on recovery for damages in those jurisdictions. Any of our existing

patents, and any future patents, may be challenged, narrowed, invalidated or circumvented. Further, we may be unsuccessful in executing adequate invention assignment agreements with all employees, contra ctors or other third parties involved in the

development of our IP portfolio. In certain jurisdictions, rights to IP developed by our employees or contra ctors or other third parties may not automatically vest in us, and our employees or contractors or other third parties may claim ownership in

IP that we believe is owned by us. We may also be required to spend significant resources to establish, m onitor and protect our IP rights, particularly as we expand our operations globally. Our exposure to differe nt legal jurisdictions also may impact our ability to exercise our contractual and other rights around IP in s

uch

jurisdictions, in particular in countries whose laws regarding the protection of IP are less rigorous or more difficult to enforce than in the U.K., the U.S. and the European Union. In jurisdictions where effective IP protection is unavailable or

limited, our IP rights may be vulnerable to unauthorized disclosure, infringement, misappropriation or othe r violation by employees, third-party partners, suppliers, customers and other entities or individuals, even t hough our customers and partners

are contractually restricted from using our IP outside of the agreed-upon licensing arrangements. Policing unauthorized use of our IP is difficult and expensive, and we may not be able, or may lack the resources, to prevent infringement,

misappropriation or other violation of our IP rights, including increased difficulty as a foreign entity in certain international locations, particularly outside the U.K., the U.S. and the European Union. In addition, our a bility to monitor and

control theft, misappropriation or infringement is uncertain, particularly in countries outside of the U.K., the U.S. and the European Union, as the laws of some countries do not provide the same level of protection of our proprietary and

confidential information as do the laws of the U.K., the U.S. and the European Union. Moreover, because we deliver our products to our customers in a source form, we have limited ability to trace the source of mi sappropriation of our IP and there

are limited technological barriers (e.g., remote authorization requirements) we can put in place to protect our products from use by unauthorized parties. Additionally, theft of our IP or proprietary business information (including our trade

secrets) could require substantial expenditures and resources to remedy. If we, our employees or our thir d-party partners, consultants, contractors, vendors or service providers were to suffer an attack or breach, for example, that results in the

unauthorized access to, or use, theft, disclosure, misappropriation or sale of, our IP by any unauthorized t hird parties, we may have to notify consumers, partners or governmental authorities, and may be subject t o investigations, civil penalties,

administrative and enforcement actions and litigation, any of which could be costly and distracting or other wise harm our business and reputation. We may be unable to successfully obtain, maintain, protect and e nforce our IP rights (including defending against counterfeit, knock-off, grey-market, infringing or otherwis e unauthorized goods). Specifically, third parties may distribute, license and sell counterfeit or grey-market versions of our products, which may be inferior or pose

safety risks and could confuse consumers or customers, which could cause them to refrain from purchasi ng our brands in the future or otherwise damage our reputation. The presence of counterfeit versions of o ur products and technology in the market

could also dilute the value of our brands, force us and our customers to compete with heavily discounted products and technology, cause us to be in breach of contract (including license agreements), impact our compliance with distribution and

competition laws in jurisdictions including the U.K., the U.S., the European Union and the PRC, or otherwise have a negative impact on our reputation and business, prospects, financial condition or results of oper ations. Further, we may not be able

to detect all violations of our IP rights and, even if we do become aware of any such violations, we may no t be able to adequately enforce our IP rights in certain domestic and foreign jurisdictions. If we are unable to successfully navigate the

relevant legal and regulatory environment and/or enforce our IP rights and/or contractual rights in 42 Tabl e of Contents relevant jurisdictions, our business, results of operations, financial condition and prospects could be materially and adversely impacted. Litigation may be necessary in the future to enforce our pate nts and other IP rights, to protect our trade secrets, to determine the validity

and scope of the proprietary rights of others, or to defend against claims of infringement, misappropriation or invalidity. Any such litigation, whether or not determined in our favor or settled by us, could be costly a nd would divert the efforts

and attention of our management and technical personnel from normal business operations, which could have a material adverse effect on our business, results of operations, financial condition and prospects. Furthermore, our efforts to enforce our IP

rights may be met with defenses, counterclaims and countersuits attacking the validity and enforceability of our IP rights. In addition, counterparties in litigation may have greater resources that they can dedicate to litigation-related matters

than we can. Moreover, litigation against current or former customers and partners may adversely impact existing relationships. Accordingly, we may not be able to prevent third parties from infringing, misappropri ating or otherwise violating our IP

rights. See also "—We may be sued by third parties for alleged infringement, misappropriation or other vio lation of their IP rights or proprietary rights and our defense against these claims can be costly." In any pot ential dispute involving our patents or other IP, our licensees or the customers of our licensees could also become the target of

litigation and we may be bound to indemnify such parties under the terms of our license agreements. Alth ough our indemnification obligations are generally subject to a maximum amount, such obligations could nevertheless result in substantial

expenses to us. See "Business—Legal Proceedings." In addition to the time and expense required for us to indemnify our licensees or the customers of our licensees, such parties' development, marketing and sales of chips and end

products utilizing our products could be severely disrupted or discontinued as a result of litigation, which, in turn, could have a material adverse effect on our business, results of operations, financial condition and prospects. Moreover, the semiconductor industry is generally subject to high turnover of employees, so the risk of trade secret misappropriation may be

amplified. If any of our trade secrets are subject to unauthorized disclosure or are otherwise misappropriat ed by third parties, our competitive position may be materially and adversely affected. Any adverse deter minations in litigation could result in the loss of our IP rights or proprietary rights, subject us to significant liabilities, require us to seek licenses from third parties or prevent us from licensing our products, any of w hich could have a material adverse effect on our business, results of operations, financial condition and pr ospects. Our failure to

obtain, maintain, protect, defend and enforce our IP rights could have a material adverse effect on our bra nd or our business, results of operations, financial condition and prospects. Furthermore, because our pro ducts are often based on a common

architecture and our new products are often based on legacy products, adverse events related to our IP m ay have a more significant impact on us than if our products were less related. We may be sued by third p arties for alleged infringement, misappropriation or other violation of their IP rights or proprietary rights an d our defense

against these claims can be costly. We have in the past been and may in the future be subject to claims by third parties alleging

our infringement, misappropriation or other violation of third-party IP rights, including patent rights, or misu se of third-party confidential information. Under our customer agreements, we agree in some cases to ind emnify our customers if a third

party files a claim in court or another venue asserting that our products infringe such third party's IP rights. Although we do not agree to indemnify our customers' end customers, such end customers may be subject to infringement claims

and may initiate claims against us as a result. Claims alleging infringement, misappropriation or other viol ation of third-party IP rights can result in costly and time-consuming litigation (regardless of their validity or merit), require us to

enter into royalty or licensing arrangements, subject us to damages or injunctions restricting the sale of our products, result in the invalidation of a patent or family of patents, require us to refund license fees to our customers or to forgo

future payments or require us to redesign or 43 Table of Contents rebrand certain of our products, any on e of which could have a material adverse effect on our business, results of operations, financial condition and prospects. In addition to the time and expense required for us to satisfy our support and indemnificati on obligations to our customers and partners, any

litigation could severely disrupt or shut down the business of our customers and partners, which in turn co uld damage our relations with them and have a material adverse effect on our business, reputation, result s of operations, financial condition

and prospects. We are currently involved in pending litigation. From time to time, we are involved in variou

s legal, administrative and regulatory proceedings, claims, demands and investigations relating to our business, which may include claims with respect to commercial, product liability, IP, cybersecurity, pri vacy, data protection, antitrust, breach of contract, labor and employment, whistleblower, mergers and ac quisitions and other matters. We are

involved in pending litigation, including, but not limited to, a lawsuit with Qualcomm Inc. and Qualcomm T echnologies, Inc. (together "Qualcomm") and Nuvia, Inc. ("Nuvia"). In addition, our products are involved in pending

litigation to which we are not a party. We cannot provide you any assurances regarding how any such litig ation will be resolved, what benefits we will obtain or what losses we might incur. On August 31, 2022, we sued Qualcomm and Nuvia in the U.S. District Court for the District of Delaware, on the basis that Qualcomm and

Nuvia: (i) breached the termination provisions of Nuvia's Architecture License Agreement (the "Nuvia ALA") with us by failing to destroy technology Nuvia developed under the Nuvia ALA, which we terminated in March 2022 based on

Nuvia's failure to obtain our consent to the assignment of the Nuvia ALA to Qualcomm; and (ii) will infring e our trademarks when Qualcomm uses them in connection with the Nuvia technology subject to destruction under the Nuvia ALA. Our

complaint seeks, among other things, specific performance of the Nuvia ALA termination provisions to require Qualcomm and Nuvia to stop using and to destroy the relevant Nuvia technology and to stop their improper use of our trademarks with their

related products. We also seek declaratory judgment, injunctive relief and damages relating to Qualcomm's and Nuvia's breach of contract and infringement of our trademarks in connection with the relevant Nuvia technology. Qualcomm has

responded and brought a counterclaim against us seeking a declaratory judgment that after Qualcomm's acquisition of Nuvia, Qualcomm's proposed products are fully licensed from us under its separate license agreements with us and that it

has complied with its contractual obligations to us and Nuvia did not breach the Nuvia ALA. We and Qualc omm can amend our respective claims to seek additional or different relief as the proceedings progress. We can provide no assurances regarding

the outcome of the litigation or how the litigation will affect our relationship with Qualcomm, which is curre ntly a major customer of ours and accounted for 11% of our total revenue for the fiscal year ended March 31, 2023. This case is currently

in the discovery phase, with trial set for September 2024, and will likely require significant legal expenditur es going forward. It may also require substantial time and attention from our executives or employees, whi ch could distract them from

operating our business. In addition, our involvement in such litigation could cause us to incur significant re putational damage in the industry, in our relationship with Qualcomm or in our relationship with other third-party partners. These matters can be time-consuming, divert management's attention and

resources, cause us to incur significant expenses and lead to attempts on the part of other parties to purs ue similar claims. Allegations made in the course of regulatory or legal proceedings may also harm our re putation, regardless of whether there

is merit to such claims. Furthermore, because litigation and the outcome of regulatory proceedings are inh erently unpredictable, our business, results of operations, financial condition and prospects could be mate rially adversely affected by an

unfavorable resolution of one or more of these proceedings, claims, demands or investigations. 44 Table of Contents Errors, defects, bugs or security vulnerabilities in or associated with our products could expose us

to liability and damage our brand and reputation, which could harm our competitive position and result in a loss of market share. Our products have in the past and could have a substantial technical flaw or an und etected design error, which could result in unanticipated

costs. Our products are used in billions of consumer and enterprise products across a wide range of indus tries, and many of these products are depended on by individuals and businesses. The discovery of any d esign defect, fault or bug associated

with our products, as well as any ensuing litigation or claims for indemnification could adversely affect our reputation and our relationships with partners, thereby having a material adverse effect on our business, r

esults of operations, financial

condition and prospects. Any such defects, faults or bugs could cause us to lose customers, increase our service costs, subject us to liability for damages or divert our resources from other tasks, any one of which could materially and adversely

affect our business, results of operations, financial condition and prospects. The ramifications of a design defect, fault, or bug may be further exacerbated by the fact that many of our products are based on a common architecture and our new

architecture products often are based on legacy products. Accordingly, a design defect, fault, or bug may affect multiple end products that are based on the same products, thereby potentially exposing us to additional liability and requiring

additional resources to remedy the error. In addition, our software could contain errors, defects or bugs, e specially when first

introduced or when new versions are released. Product errors, including those resulting from third-party s uppliers and open-source vendors, could affect the performance or interoperability of our products, could delay the development or release of

new products or new versions of products and could adversely affect market acceptance or perception of t he quality and attractiveness of our products. Any such errors or delays in releasing new products or new versions of products, or allegations of

unsatisfactory performance, could cause us to lose customers, increase our service costs, subject us to li ability for damages or divert our resources from other tasks, any one of which could materially and advers ely affect our business, results of

operations, financial condition and prospects. Security vulnerabilities may be identified in our products, an d it is possible that

vulnerabilities may not be mitigated before they become known. Publicity related to any such security vuln erabilities, whether accurate or inaccurate, and any attempted or successful exploitation of such vulnerabil ities, may cause increased

third-party attempts to identify additional security vulnerabilities or could result in litigation, indemnification or other regulatory actions or inquiries, which could harm our brand and have an adverse effect on our bu siness and results of

operations and financial performance. Additionally, our products are used, and may be used in the future, in a variety of safety critical

systems and equipment, including, but not limited to, autonomous vehicles, robotics, drones and medical equipment. Faults, security vulnerabilities or errors in such systems can result in harm to individuals, including loss of life. Any such fault,

security vulnerability, or errors that may be attributed to our products, regardless of merit, could result in lit igation, indemnification obligations or regulatory actions or inquiries, which could harm our brand and have a material adverse effect

on our business, results of operations and financial performance. Actual or perceived security vulnerabilities in our information technology

systems, including cyberattacks, security breaches or other similar incidents with respect to our or our thir d-party partners' information technology systems, or any unauthorized access to our data or our third-part y partners' and our

customers' data, could harm our reputation, business and operating results. We collect, store and otherwise process certain

personal, confidential and proprietary information in the operation of our business, including trade secrets, employee data and other sensitive data. Further, our third-party partners and customers regularly provide us with highly sensitive

information, including details about their future product plans and roadmaps. Any unauthorized access to or disclosure of this information, whether inadvertent, malicious or as the result of a cyberattack, security breach or other similar incident.

could have a material adverse effect on our third-party partners and customers, which may in turn result in significant damage to our reputation, business and operating results. 45 Table of Contents Cyberattacks, including, but not limited to, ransomware events, computer viruses or other

malware, phishing attacks, denial of service attacks, illegal hacking and credential stuffing, or other malicious attempts to compromise and/or interrupt the operation of information technology systems continue to i

ncrease in frequency, magnitude

and sophistication. These increasing threats are being driven by a variety of sources, including nation-stat e sponsored espionage and hacking activities, industrial espionage, organized crime, sophisticated organizations and hacking by groups and individuals. These sources can also implement social engineering techniques to induce our third-party partners, users, employees or customers to disclose passwords or other sensitive information or take other

actions to gain access to our or our third-party partners' data or our users' data. Techniques used to obtain unauthorized access to, or to sabotage, systems or networks are constantly evolving and may not be recognized until launched

against a target. Therefore, we may be unable to anticipate these techniques, react in a timely manner, or implement adequate preventive measures, and we may face delays in our detection or remediation of, or other responses to, such cyberattacks,

security breaches and other similar incidents. Geopolitical instability, such as the war between Russia and Ukraine, may increase the likelihood that we or our third-party partners and customers could experience direct or collateral consequences

from cyber conflicts between nation-states or other politically motivated actors targeting critical technology infrastructure. As we increase our customer base and our brand becomes more widely known and recognized, and as our products are used in

more heavily regulated industries where there may be a greater concentration of sensitive and protected d ata, such as healthcare, government, life sciences and financial services, we and our third-party partners may become more of a target for these

malicious third parties. Cyberattacks, security breaches or other similar incidents with respect to our information technology systems or

those of our third-party partners could result in unauthorized access to, or misappropriation, disclosure, m odification, misuse, loss, destruction or theft of, personal, confidential and proprietary information belongin g to us or our employees,

third-party partners, customers or suppliers, or cause a significant disruptive effect on our services, which could result in us, our third-party partners or our customers suffering significant financial or reputational da mage and potential

third-party legal action. If our security measures are, or are believed to be, inadequate or breached as a r esult of third-party action, employee negligence, error or malfeasance, fraud, product defects, accidental t echnological failure, social

engineering techniques, improper user configuration or otherwise, and this results in, or is believed to result in, actual disruption of the confidentiality, integrity or availability of our data or our third-party partners' and customers'

data, or otherwise causes a significant disruptive effect on our services, we could incur significant liability to various parties, including our third-party partners and customers, and to individuals or organizations who se information is being

stored by us, our third-party partners or our customers. Further, such information and data being stored in foreign jurisdictions, could lead to us being required to disclose or provide access to data or IP to a foreign government pursuant to

national security or other laws of such foreign jurisdiction. Any perceived or actual violation of security, dat a protection and/or reporting obligations under relevant privacy and data protection laws, regulations, rule s, standards and other

obligations could also result in regulatory inquiries, investigations and enforcement actions, fines and/or le gal action. We incur significant costs in an effort to detect and prevent cyberattacks, security breaches an d other similar incidents, and

we may face increased costs and be required to expend substantial resources in the event of an actual or perceived cyberattack, security breach or other similar incident. While we and our third-party partners and customers have experienced

cyberattacks, including attempts to breach our information technology systems, and may experience cybe rattacks in the future, as of the date of this prospectus, there have been no material breaches of our information technology systems. We can

provide no assurances that we will not experience material breaches of our information technology syste ms in the future or that our third-party partners and customers will not experience breaches of their inform

ation technology systems in the future

that are material to us. Additionally, our vendors or service providers may suffer, or be perceived to suffer, cyberattacks, security

breaches or other similar incidents that may compromise data stored or processed for us, which may also give rise to any of the foregoing. Our ability to monitor our vendors' and service providers' data security is limited, and, in any

event, third parties may be able to circumvent those security measures, resulting in the unauthorized acce ss to, or misuse, disclosure, loss, acquisition, modification, unavailability, destruction or other processing of, 46 Table of Contents our and our customers' data. If our vendors or service providers suffer cyberattac ks, security breaches or other incidents, we may be unable to perform essential functions to operate our business. Moreover, to the extent any of our IP is compromised as a result of a security breach and we ar e not promptly made aware of such breach, we may incorporate compromised IP in our products, thereby making our products vulnerable to future

cyberattacks, security breaches or other similar incidents. We cannot ensure that any limitations of liability in our agreements with

customers, third-party partners, service providers and other third parties with which we do business would be enforceable or adequate or would otherwise protect us from any liabilities or damages with respect to any particular claim in connection

with a cyberattack, security breach or other similar incident. Additionally, we cannot be certain that our ins urance coverage will be adequate for cybersecurity liabilities actually incurred, that insurance will continue to be available to us on

economically reasonable terms, or at all, or that our insurer will not deny coverage as to any future claim. Any of the foregoing may cause our business to suffer and our reputation or competitive position to be da maged, which may have a material

adverse effect on our business, results of operations, financial condition and prospects. Any failure, interruption, disruption, damage or outage

with respect to our information technology systems, including or due to an inability to operate our disaster recovery plans to adequately mitigate the effects of such, could adversely affect our reputation, operations and financial condition. Our business depends on the efficient and uninterrupted operation of our comput er and communications software and hardware systems

and other information technology. If such information technology systems were to fail for any reason or if we were to experience any unscheduled downtimes, even for only a short period, our reputation, operations and financial results could be

adversely affected. Our information technology systems could be damaged or interrupted by earthquakes, fire, floods, hurricanes, power loss, telecommunications failure, break-ins, acts of vandalism or similar events. In addition, our information technology systems could be damaged or interrupted as a result of pot ential cyberattacks, such as ransomware events, malware, phishing attacks, insider threats, viruses, or an y other malicious attempts to

compromise and/or interrupt the operation of our information technology systems, or security breaches an d other similar incidents. In addition, certain types of attacks could harm us even if our systems are left un disturbed. For example, certain

threats are designed to remain dormant or undetectable, sometimes for extended periods of time, or until I aunched against a target, and we may not be able to implement adequate preventative measures. The for mal disaster recovery plans we have in place may not be successful in preventing delays or other complic ations that could arise from

information technology systems failure and, if they are not successful, our business interruption insurance may not adequately compensate us for all losses that may occur and have a material adverse effect on o ur business, results of operations,

financial condition and prospects. Claims may be made for which we do not have adequate insurance, which could have a material adverse effect on

our results of operations, cash flows and financial condition. In recent years, the insurance industry has faced unprecedented and

escalating global events compounded by international economic uncertainty. As a result of these and othe r pressures, many insurers have withdrawn from certain market sectors and certain available insurance h as become costly to procure, renew or

maintain. We currently have global insurance policies, including coverage for the following significant risks (all of which are subject to certain important scope limitations, exceptions and company/deductible arrang ements): property damage,

business interruption, employee liability, public and products liability, directors' and officers' liability, and c ybersecurity and technology-related losses. We do not insure against claims concerning patent litigation or other IP

infringement claims and potential related indemnification obligations, because we are of the view that any limited coverage that could be obtained would be prohibitively expensive. Our business, results of operations, financial condition and

prospects could be materially adversely affected by the occurrence of a catastrophic event, to the extent t hat any resulting loss or claim was not covered under the terms of our then existing insurance policies. 47 Table of Contents Foreign exchange fluctuations could have a material adverse effect on our business, r esults of

operations, financial condition and prospects. Although a substantial majority of our revenues, as well as a significant

proportion of our assets and liabilities, are denominated in U.S. dollars, certain of our costs are denominat ed in British pounds sterling and a number of other currencies, such as the euro and Indian rupee. Conse quently, our results of operations

have been, and are likely to continue to be, affected by changes in the relative value of the various curren cies in which our revenues, costs, assets and liabilities are denominated, and especially the U.S. dollar to British pound sterling exchange

rate, as well as the exchange rates to the euro and Indian rupee, may have a material impact on our repor ted results of operations and financial condition. To manage our exposure, we may engage in the use of financial derivatives or currency hedging

transactions, although such activities may not cover all of our exposure, may be costly and may also expose us to counterparty risk. Despite hedging and other mitigating techniques implemented by us, fluctuations in exchange rates have in the past

and may in the future have a material adverse effect on our business, results of operations, financial condition and prospects. We could suffer

significant damage to our brand and reputation, which could harm our competitive position, results of oper ations and prospects. Our brand and reputation are critical factors in our relationships with customers, employees, governments, suppliers, and other stakeholders.

Our failure to address, or the appearance of our failure to address, issues that give rise to reputational risk , including those described throughout this "Risk Factors" section, could significantly harm our brand and r eputation. Our

reputation can be impacted by catastrophic events, incidents involving unethical behavior or misconduct, product quality, security, or safety issues, allegations of legal noncompliance, internal control failures, cor porate governance issues, data

breaches, workplace safety incidents, environmental issues, the use of our products for illegal or objection able applications, including AI and ML or military applications that present ethical, regulatory, or other issu es, marketing practices, media

statements, the conduct of our suppliers or representatives, and other issues, incidents, or statements that, whether actual or perceived, result in adverse publicity. To the extent we fail to respond quickly and effectively to address corporate

crises and other threats to our brand and reputation, the ensuing negative public reaction could significant ly harm our brand and reputation, which could result in loss of trust from our customers, third-party partner s and employees and could lead

to an increase in litigation claims and asserted damages or subject us to regulatory actions or restrictions. In addition, our brand and

reputation may be damaged by the actions of third parties that are imputed to us. For example, although Arm China operates independently of us, Arm China uses our trademarks in its marketing and branding. To the extent that Arm China's actions

are imputed to us due to Arm China's use of our trademarks, our own brand and reputation may suffer sig nificant damage. Damage to

our brand and reputation could reduce demand for our products and adversely affect our business, operat

ing environment and the trading price of our securities. Damage to our reputation may also make us less attractive to current and prospective

employees relative to our competitors, particularly given the intensely competitive market for highly skilled employees. Moreover, repairing our brand and reputation may be difficult, time-consuming, and expensive. The heightened competitive

pressures could result in a loss of customers or a reduction in revenues or revenue growth rates, all of whi ch could adversely affect our business, results of operations, financial condition and prospects. Increasing scrutiny and evolving expectations from customers, partners, regulators, investors, and other stakeholder s with respect to our environmental,

social and governance ("ESG") practices may impose additional costs on us, expose us to new or addition al risks, or harm our reputation. Companies are facing increasing scrutiny from customers, partners, regul ators, investors, and other stakeholders related to ESG practices and

disclosure, including environmental stewardship, social responsibility, 48 Table of Contents diversity and i nclusion, racial justice and workplace conduct. In addition, organizations that provide information to invest ors on corporate governance and related matters have developed ratings

processes for evaluating companies on their approach to ESG matters. Such ratings are used by some in vestors to inform their investment and voting decisions. Unfavorable ESG ratings may lead to negative investor sentiment toward us, which could have

a negative impact on the trading price of our securities and our access to and costs of capital. Increased ESG-related compliance costs could result in increases to our overall operational costs. Failure to adapt to or comply with regulatory

requirements or investor or stakeholder expectations and standards could negatively impact our reputatio n, ability to do business with certain partners, and the trading price of our securities. New government reg ulations could also result in new or

more stringent forms of ESG oversight and expanding mandatory and voluntary reporting, diligence, and disclosure. We have established

corporate social responsibility programs aligned with sound ESG principles. These programs reflect our c urrent initiatives and are not guarantees that we will be able to achieve them. Our ability to successfully ex ecute these initiatives and

accurately report our progress presents numerous operational, financial, legal, reputational and other risk s, many of which are outside our control, and all of which could have a material negative impact on our bu siness. Additionally, the

implementation of these initiatives imposes additional costs on us. If our ESG initiatives fail to satisfy inve stors, customers, partners and our other stakeholders, our reputation, our ability to license our products to customers, our ability to

attract or retain employees, and our attractiveness as an investment, business partner or acquirer could be negatively impacted. Similarly, our failure or perceived failure to pursue or fulfil our goals, targets and objectives or to satisfy various

reporting standards within the timelines we announce, or at all, could also have similar negative impacts a nd expose us to government enforcement actions and private litigation. See "Business—Environmental, S ocial and Governance" for

additional information regarding our corporate social responsibility programs. We have identified a materia I weakness in our internal control over

financial reporting and may identify material weaknesses in the future or otherwise fail to maintain proper and effective internal controls. If we fail to establish and maintain proper internal controls, our ability to pro duce accurate financial

statements or comply with applicable regulations could be impaired. As a result, shareholders could lose c onfidence in our financial and other public reporting, which would harm our business and the trading price of our ADSs. We will be required to comply with the management certification requirements of Section 40 4 of the Sarbanes-Oxley Act of 2002 (the

"Sarbanes-Oxley Act") in our annual report on Form 20-F for our first annual report that is filed with the SE C (subject to any change in applicable SEC rules). We will be required to comply with

Section 404 in full (including an auditor attestation on management's internal controls report) in our annual report on Form 20-F for the year following our first annual report required to be filed

with the SEC (subject to any change in applicable SEC rules). As a public company, we will be required to

report, among other things, control deficiencies that constitute a "material weakness" or changes in internal controls that, or that

are reasonably likely to, materially affect internal controls over financial reporting. A "material weakness" is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable

possibility that a material misstatement of our annual or interim financial statements will not be prevented or detected on a timely basis. A "significant deficiency" is a deficiency, or a combination of deficiencies, in internal control

over financial reporting that is less severe than a material weakness, yet important enough to merit attenti on by those responsible for oversight of our financial reporting. The material weakness identified for the fis cal years ended March 31, 2022 and 2021 relates to information technology general controls

over information systems that are necessary for preparation of our financial statements, specifically (i) ins ufficient controls over user access rights and segregation of duties within our information systems, (ii) insufficient controls

over change management of our information systems and (iii) insufficient controls over monitoring of batc h processes. To address the material weakness, in the fiscal year ended March 31, 2023, we developed a nd began a remediation plan that

includes the following activities: (i) improving controls over access rights management, including reviews of current access rights, user roles and access management procedures, (ii) the removal of excessive access rights to ensure that we

adequately restrict user access to our financial applications to appropriate company personnel, (iii) expanding change management 49 Table of Contents control procedures for our information systems, and (iv) engaging external experts to support the evaluation, testing and enhancement of our internal controls relating to our information

technology systems. We will not be able to fully remediate this material weakness until these steps have been completed and have been operating effectively for a sufficient period of time. The actions that we are taking are subject to ongoing review

by our executive management and will be subject to the oversight of our audit committee. Although we int end to complete this remediation process as quickly as practicable, we provide no assurances with respect to the timeline for implementing

effective remedial measures, and our initiatives may not prove to be successful in remediating the materia I weakness or preventing additional material weaknesses or significant deficiencies in our internal control over financial reporting in the

future. The costs of the remediation efforts to date have not been material, and we do not currently anticip ate any material cash requirements in connection with future remediation efforts. To comply with the requirements of being a public company, we have undertaken various actions, and may need to take additional actions, such

as implementing and enhancing our internal controls and procedures and hiring additional accounting or i nternal audit staff. Additionally, when evaluating our internal control over financial reporting, we may identify material weaknesses that we may

not be able to remediate in time to meet the applicable deadline imposed upon us for compliance with the requirements of Section 404. If we identify any material weaknesses in our internal control over financial r eporting or are unable to

comply with the requirements of Section 404 in a timely manner or assert that our internal control over fin ancial reporting is effective, if we are required to make restatements of our financial statements, or if our independent registered

public accounting firm is unable to express an opinion as to the effectiveness of our internal control over fi nancial reporting, investors may lose confidence in our operating results, the price of our ADSs could decli ne and we may be subject to

litigation or regulatory enforcement actions. In addition, if we are unable to meet the requirements of Secti on 404, we may not be able to remain listed on Nasdaq. Risks Relating to Government Regulation and Le gal Compliance Our international operations expose us to risks in international jurisdictions and we may be negatively impacted by export restrictions and trade

barriers. Our headquarters are in the U.K., and we currently also have operations in various jurisdictions a round the world.

including the U.S., the PRC, India, Canada, South Africa and Europe. We may in the future expand our op erations either within these jurisdictions or to new jurisdictions. Risks associated with these international operations include exposure to

political, economic and financial conditions and expected and unexpected changes in legal and regulatory environments. We may, from time to time, enter into strategic partnerships, joint ventures or similar busin ess relationships with entities in

foreign jurisdictions, including governmental or quasi-governmental entities, pursuant to which we may be required to license or transfer certain of our IP rights to such entities. Such relationships could

expose us to increased risks inherent in such activities, such as protection of our IP, economic and politic al risks, and contractual enforcement issues. In addition, we could face potentially adverse tax consequences from our international

expansion, changes in our international operations or changes in tax laws in any of the multiple jurisdictions in which we operate. Managing operations in multiple jurisdictions also places further strain on manage ment's time and our ability to

manage overall growth. These risks could have a material adverse effect on our business, results of oper ations, financial condition and prospects. We are subject to governmental export and import requirements that could subject us to liability or restrict our ability to license our

products. If the U.S. Department of Commerce were to broaden U.S. export restrictions on foreign-origin it ems, whether through changes to the level of de minimis U.S.-origin content that would make a non-U.S.-made product subject to the U.S. Export Administration Regulations ("EAR"), known as the de minimis rule, or through changes to the foreign direct product rules under the EAR,

these expanded restrictions would subject more of our products to U.S. export controls and impose export restrictions on the licensing and delivery of impacted items to certain customers and trading partners. Fur thermore, if the U.S. Government

implemented expanded economic sanctions on specific countries or regions, that could impact our 50 Tab le of Contents portfolio. For instance, the U.S. has published significant changes to export sanctions regul ations with respect to Russia and the PRC, and we anticipate additional changes to such regulations in the future. In October 2022, the U.S. Government implemented export controls on advanced computing c hips, computer commodities that contain such chips, and certain semiconductor manufacturing items, as well as controls on transactions involving

items for supercomputer and semiconductor manufacturing end-uses. The new controls expand the scope of items subject to license requirements for certain entities on the U.S. Government's Entity List (as defined below). As a result, our freedom to license our products to designated countries or entities could be reduced, and our commercial relationships could be further harmed by limiting the ability of certain of our customers and partners from

freely shipping chips and end products incorporating certain of our products. For instance, given U.S. and U.K. trade and national security policies regarding exports of technology with potential military uses, it is unlikely that we would be able

to obtain a U.S. or U.K. export license for certain high performance compute cores in the Neoverse series processor family. This and any similar limitations could also reduce our revenues and cause significant un certainty in our products roadmap,

which could have an adverse effect on our business, results of operations, financial condition and prospec ts. In addition, if other

countries, particularly the U.K., were to adopt export control rules similar to the U.S., or make existing rule s more onerous, this could have a material adverse effect on our business, results of operations, financial condition and prospects. In addition, trade relations between countries where we do business or where our customers have end customers has recently been volatile. For

example, the U.S. Government has imposed export sanctions on certain trading partners and entities which impact the cross-border transfer of technology and software products and announced new licensing requirements which impact exports of some of

our customer's ICs and certain related items. These measures may increase costs and/or reduce distributi on in key markets. This in turn could require us to increase prices to our customers which may reduce de mand, or, if we are unable to

increase prices to adequately address any restrictions, it could result in lower margins on products sold or fewer products sold, which would reduce royalties. Changes in U.S. trade policy have resulted in, and co

uld result in more, U.S. trading

partners adopting responsive trade policies, including imposition of increased tariffs, quotas or duties, or i mposition of technology or financial sanctions or controls, making it more difficult or costly for us to export our products to those

countries. The implementation of a border tax, tariff or higher customs duties on products of our customers or their end customers manufactured outside of the U.S. or components that our customers or their end customers import into the U.S., or any

potential corresponding actions by other countries in which our customers or their end customers do busin ess, could negatively impact our financial performance and/or ability to protect our IP. Such developments could also result in a decrease in

the demand for or injunctions on the products of our customers or their end customers, which would reduc e our royalties and have an adverse effect on our revenues and profitability and thereby on or business, r esults of operations, financial

condition and prospects. See "—Risks Relating to Our Business and Industry—Our concentration of reve nue from the PRC market makes us particularly susceptible to economic and political risks affecting the PRC, which could be

exacerbated by tensions between the U.S. and the PRC with respect to trade and national security." Failure to comply with, and changes in,

governmental laws and regulations could harm our business. Our business is subject to regulation by various governmental agencies,

including, but not limited to, such agencies in the U.K., the European Union, the U.S. and the PRC. These laws and regulations affect our activities in areas including, but not limited to, labor, telecommunications, IP ownership and

infringement, tax, economic sanctions, import and export requirements and controls, anti-corruption, natio nal security and foreign investment, foreign exchange controls and cash repatriation restrictions, privacy a nd data protection (such as the

European Union General Data Protection Regulation ("GDPR"), the U.K. General Data Protection Regulat ion ("U.K. GDPR"), and the California Consumer Privacy Act as amended by the California Privacy Rights Act (collectively,

"CCPA")), security and cybersecurity, and anti-competition, environmental, health and safety, financial reporting and the certification requirements associated with public sector contracts. These laws, regulations and orders are complex,

may change frequently and with limited notice, and many have become more stringent and have intensifie d over time, especially in light of continuing tensions between the U.S. and the PRC and sanctions on Rus sia and individual Russians as a result of

the ongoing war in Ukraine. 51 Table of Contents The Retained EU Law (Revocation and Reform) Act 20 23, enacted on June 29, 2023 has the

effect that certain rights derived from European Union law will by default (that is, absent the exercise of a r egulation-making power to restate or reproduce such rights in U.K. domestic law) cease to be recognized after December 31, 2023. As a

result, rights derived from European Union law would cease to restrict the application of the rules providin g for the 1.5% U.K. stamp duty or SDRT charge which may impact on the issue or transfer of our ordinary shares to, or appropriation of our

ordinary shares by, a depositary receipt system (such as that operated by the depositary) or a clearance s ervice (such as that operated by DTC). The extent to which rights derived from European Union law will b e restated or reproduced in U.K.

domestic law before that date is currently unclear. Any divergence between U.K. law and European Union law (as a result of the Retained EU Law (Revocation and Reform) Act 2023) may increase the burden of our associated compliance costs. Compliance with these laws, regulations and similar requirements may be onerous, expensive and time consuming. Laws and regulations are often

inconsistent from jurisdiction to jurisdiction, further increasing the cost and complexity of compliance. We have implemented policies and procedures designed to ensure compliance with applicable laws and regul ations, but there can be no assurance

that our employees, contractors, or agents will not violate such laws and regulations or our policies and procedures. In addition, inadequate systems and processes have in the past and could in the future result in

non-compliance with applicable laws and regulations (and this can be particularly challenging in complex areas such as licensing and export controls). We may be required to incur significant expense to remedy violations of these laws and regulations. In addition, if our customers fail to comply with these regulations, we may be required to

suspend sales to these customers, which could damage our reputation and negatively impact our results of operations. For example, the Bureau of Industry and Security ("BIS"), of the U.S. Department of Commerce, maintains and frequently

updates the "Entity List," which limits our ability to deliver products and services to these entities, some of which are our customers. On May 16, 2019, the BIS added Huawei Technologies Co., Ltd. and certain of its affiliated

entities to BIS's Entity List, which imposes limitations on the supply of certain U.S. items and product supp ort to Huawei and certain of its affiliated entities. Huawei remains on the Entity List, and in the absence of a license from BIS, we

may be unable to work with Huawei and certain of its affiliated entities on certain U.S. items and technolo gy, which may have a negative effect on our ability to sell those U.S. items and technology in the future. A nticipated or actual changes in

trade restrictions could also affect customer purchasing behaviors. Non-compliance with

applicable laws, regulations or requirements could subject us to investigations, sanctions, enforcement ac tions, disgorgement of profits, fines, damages, civil and criminal penalties, or injunctions. If any governme ntal sanctions are imposed, or if

we do not prevail in any possible civil or criminal litigation, our business, results of operations, financial condition and prospects could be materially adversely affected and our reputation and brand could be damaged. In addition, responding to

any action will likely result in a significant diversion of management's attention and resources and an incre ase in professional fees. Actual

or perceived failures to satisfy data protection, security, privacy or other laws, regulations, rules, standard s and other government- and industry-specific obligations could adversely affect our business, results of o perations, financial condition

and reputation. Privacy and data protection has become a significant issue in the U.K., the U.S., the Euro pean Union and in many

other jurisdictions where we operate and where the chips and end products incorporating our products are offered. The regulatory framework for privacy and data protection issues worldwide is rapidly evolving an d is likely to remain uncertain for the

foreseeable future, which could expose us to further regulatory burdens. Many government bodies and ag encies, including in the U.K., the European Union and the U.S., have adopted or are considering adopting or modifying laws and regulations

addressing privacy and data protection, including the collection, storage, transfer, use and other processin g of personal information. In some cases, privacy and data protection laws, regulations and rules impose obligations directly on us as both a

data controller and a data processor (or the equivalents thereof), as well as on many of our customers. Ce rtain jurisdictions have also 52 Table of Contents enacted data localization laws mandating that certain ty pes of data collected in a particular country be stored and/or processed primarily within that country. Laws , regulations and rules

relating to privacy and data protection continue to evolve in various jurisdictions, with existing laws, regula tions and rules subject to new and differing interpretations and new laws, regulations and rules being proposed and adopted. It is

possible that our practices may be deemed not to comply with those privacy and data protection legal requirements that apply to us now or in the future. In the European Union and in the U.K., we are subject to the GDPR and the U.K. GDPR, respectively, which impose stringent obligations

regarding the collection, control, use, sharing, disclosure and other processing of personal data. Failure to comply with the GDPR or the U.K. GDPR can result in significant fines and other liability, including fines of up to €20 million

(or £17.5 million under the U.K. GDPR) or 4% of annual global revenue, whichever is greater. European d ata protection authorities have already imposed fines for GDPR violations up to, in some cases, hundreds of millions of euros. While

the U.K. GDPR currently imposes substantially the same obligations as the GDPR, the U.K. GDPR will no t automatically incorporate changes to the GDPR going forward (which would need to be specifically incorporated by the U.K. government), which

creates a risk of divergent parallel regimes and related uncertainty. For example, in 2021, the European C ommission announced an adequacy decision concluding that the U.K. ensures an equivalent level of data protection to the GDPR, which provides

some relief regarding the legality of continued personal data flows from the European Economic Area ("E EA") to the U.K. This adequacy determination will automatically expire in June 2025 unless the European Commission renews or extends it

and may be modified or revoked in the interim. We cannot predict how the U.K. GDPR and other U.K. priv acy and data protection laws, regulations or rules may develop, including as compared to the GDPR, nor can we predict the effects of divergent laws

and related guidance. Moreover, the U.K. government has publicly announced plans to reform the U.K. G DPR in ways that, if formalized, are likely to create a risk of divergent parallel regimes and related uncertainty, along with the potential for

increased compliance costs and risks for affected business. In addition, ongoing legal challenges in Europ e to the mechanisms allowing

companies to transfer personal information from the EEA to outside the EEA (including the U.S.) could result in further limitations on the ability to transfer data across borders, particularly if governments are unable or unwilling to reach new

agreements that support cross-border data transfers. While the European Commission adopted on July 1 0, 2023 an adequacy decision for the EU-U.S. Data Privacy Framework, enabling U.S. companies who ce rtify to the EU-U.S. Data Privacy Framework to rely on it as a valid data transfer mechanism, such adequa cy decision is likely to face challenge at the Court of Justice of the European Union. While the EU-U.S. Data Privacy

Framework does not apply to the U.K., the U.K. and U.S. governments announced on June 8, 2023 a commitment in principle to establish a data bridge for the U.K. Extension to the EU-U.S. Data Privacy Framework, to facilitate transfers of personal data

from the U.K. to the U.S. Further, our business may be affected by laws, regulations, rules and standards aimed at regulating the use of

personal information for marketing purposes, the tracking of the online activities of individuals and the regulation of machine-to-machine communications. For example,

the European Union's proposed ePrivacy Regulation, which is still being negotiated, may impose burdens ome requirements around obtaining consent and impose fines for violations that are materially higher than those imposed under the European

Union's current ePrivacy Directive and related EU member state legislation. Compliance with these laws, r egulations, rules and standards may limit the effectiveness of our marketing activities and subject us to lia bilities. In the U.S., we are subject to various federal, state and local privacy and data protection laws, rule s, and regulations governing the

collection, sharing, use, retention, disclosure, security, transfer, storage and other processing of personal in nformation. For example, at the state level, we are subject to the CCPA, which broadly defines personal in formation and gives California

residents expanded privacy rights and protections, such as affording them the right to access and request deletion of their information and to opt out of certain sharing and sales of personal information. The CCP A provides for severe civil penalties

and statutory damages for violations and a private right of action for certain data breaches that result in the loss of unencrypted personal information. Numerous other states also have enacted, or are in the process of enacting or considering.

comprehensive 53 Table of Contents state-level privacy and data protection laws, rules and regulations th at share similarities with the CCPA, with at least four such laws (in Virginia,

Colorado, Connecticut and Utah) having taken effect, or scheduled to take effect, in 2023. Additionally, la ws in all 50 U.S. states require businesses to provide notice to residents whose personal information has been disclosed as a result of a data

breach. Moreover, there is discussion in Congress of a new comprehensive federal privacy and data prote ction law to which we would become subject if it is enacted. Moreover, we make public statements about

our collection, use, disclosure and other processing of personal information through our privacy policies and information on our website. Although we endeavor to comply with our public statements and documentation, we may at times fail to do so or be alleged to have failed to do so. The publication of our p rivacy policies and other statements

that provide promises and assurances about privacy and data protection can subject us to potential gover nment or legal action if they are found to be deceptive, unfair or misrepresentative of our actual practices. Any concerns about our privacy and

data protection practices, even if unfounded, could damage our reputation and adversely affect our busine ss. Although we monitor the

regulatory environment and have invested in addressing new developments, we may be required to make additional changes to our services and business practices to enable us and our customers to comply with applicable laws, regulations, rules,

standards and other obligations. Evolving regulatory and legal obligations may also increase our potential liability exposure through higher potential penalties for non-compliance. Laws, regulations, rules,

standards and other obligations relating to privacy and data protection are subject to differing interpretations and may be inconsistent among jurisdictions, thereby making compliance with such obligations challenging. Revising our services and

business practices to comply with these requirements could reduce demand for our services, require us to take on more onerous obligations in our contracts, or restrict our ability to store, transfer and otherwise process data or, in some cases,

impact our ability or our customers' ability to offer our services in certain locations, to deploy our products, to reach current and prospective customers, or to derive insights from customer data globally. We cannot assure you that any third-party partners with access to our employees' personally identifiable and other s ensitive or

confidential information in relation to which we are responsible will not breach contractual obligations imposed by us, or that they will not experience data security breaches or attempts thereof, which could have a corresponding effect on our

business, including putting us in breach of our obligations under privacy and data protection laws, regulati ons, rules, standards and other obligations, which could in turn adversely affect our business, results of o perations and financial

condition. We cannot assure you that our contractual measures and our own privacy and data protection-r elated safeguards will protect us from the risks associated with the third-party processing, storage and transmission of such information.

Increasing use of social media could also give rise to liability, breaches of data security or reputational da mage. Our failure or

perceived failure to comply with any applicable privacy or data protection laws, regulations, rules, standar ds or other obligations could result in increased costs for our products, monetary penalties, damage to our reputation, government and

regulatory inquiries, investigations and enforcement actions, fines or legal action. Additionally, if our custo mers, third-party partners, vendors or developers violate applicable laws, regulations, rules or standards, or our policies or other

privacy or security-related obligations, such violations may also put the information of our customers, sup pliers, third-party partners or employees at risk and could in turn have an adverse effect on our business. Furthermore, the uncertain and shifting regulatory environment and trust climate may cause concerns reg arding privacy and data protection and

may cause our customers or their customers to resist providing the data necessary to allow our customers to use our services effectively. Even the perception that the privacy of personal information is not satisfac torily protected or does not meet

regulatory requirements could inhibit sales of our products or services and could limit adoption of our products. Any of the foregoing could have a material adverse effect on our business, results of operations, fina ncial condition and prospects. 54 Table of Contents We are subject to anti-corruption laws and other laws governing our operations. If we fail to comply

with these laws, we could be subject to civil or criminal penalties, other remedial measures and legal expenses, which could adversely affect our business, results of operations and financial condition. Our operations are subject to the U.K. Bribery Act 2010 (the "Bribery Act"), the U.S. Foreign Corrupt Practices Act (the

"FCPA"), and other applicable anti-corruption laws in countries where we do business and may do busine ss in the future. These anti-corruption laws generally prohibit us, our officers, our employees, affiliates, ag ents and intermediaries

from offering or paying bribes, requesting or accepting bribes, or making other prohibited payments to gov ernment officials or other persons to obtain or retain business or gain some other business advantage. Un der the Bribery Act, we may also be

liable for failing to prevent a person associated with us from committing a bribery offense. We have operat ions in countries considered high risk for corruption, such as China and India, agreements and collaborations with third parties, interactions

with government officials, and other business activities that could expose us to corruption risk. While we have compliance safeguards in place, it is possible that these safeguards prove insufficient, or that our employees, intermediaries, or other third-party business partners may engage in activities that subject us to liability under the Bribery Act, FCPA, or other anti-corruption laws. In addition, we cannot predict the nature, scope or effect of future

regulatory requirements to which our international operations might be subject or the manner in which existing laws might be administered or interpreted. If we further expand our operations internationally, we will need to dedicate additional

resources to comply with numerous laws and regulations in each jurisdiction in which we plan to operate. There is no assurance that we

will be completely effective in ensuring our compliance with all applicable anti-corruption laws, including the Bribery Act, the FCPA, or other legal requirements. If we are not in compliance with the Bribery Act, the FCPA and other anti-corruption

laws, we may be subject to criminal and civil penalties, disgorgement and other sanctions and remedial m easures and legal expenses, which could have an adverse impact on our business, financial condition, re sults of operations and liquidity. The SEC

also may suspend or bar issuers from trading securities on U.S. exchanges for violations of the FCPA's a ccounting provisions. Any investigation of any potential violations of the Bribery Act, the FCPA, other anti-corruption laws or trade

control laws by U.K., U.S. or other authorities could also have an adverse impact on our reputation, our bu siness, results of operations and financial condition. We are subject to risks related to government contracts and related procurement regulations. A small portion of our revenue is derived from contracts with gove rnmental entities, governmental subcontractors and public universities. Our

contracts with such entities, including in the U.K., the European Union and the U.S., are subject to various regulations and other requirements relating to their formation, administration and performance. We may be subject to audits and

investigations relating to government contracts, and any violations could result in various civil and criminal penalties and administrative sanctions, including termination of the contract, payment of fines or suspensi on or debarment from future

government business. If we were to lose a significant number of government contracts, it would have an a dverse impact on our results of operations. Our employees, independent contractors, consultants and ven dors may engage in misconduct or other improper activities, including non-compliance with regulatory sta ndards and requirements and insider trading laws, which could cause significant liability for us and harm o ur reputation. We are exposed to the risk of fraud or other misconduct by our employees, independent contractors, consultants and vendors. Misconduct by these

partners could include intentional failures to comply with laws, standards, regulations, guidance or codes of conduct, provide accurate information to regulatory authorities, comply with manufacturing standards, r eport financial information or data

accurately or disclose unauthorized activities to us. We may also be exposed to risks in connection with a ny insider trading violations by employees or others affiliated with us. It is not always possible to identify a nd deter employee misconduct,

and the 55 Table of Contents precautions we take to detect and prevent this activity may not be effective in controlling unknown or unmanaged risks or losses or in protecting us from governmental investigations or other

actions or lawsuits stemming from a failure to be in compliance with such laws, standards, regulations, gui

dance or codes of conduct. If any such actions are instituted against us, and we are not successful in defending ourselves or asserting our

rights, those actions could have a significant impact on our business and results of operations and prospe cts, including the imposition of significant fines or other sanctions and damage to our reputation. Risks Rel ating to Our Status as a Controlled Company and Foreign Private Issuer We will be a "controlled company" within the meaning of the Nasdaq corporate governance rules and, as a result, be eligible to rely on exemptions from certain corporate governance requirements that provide protection to stockholders of companies that are not controlled companies. Immediately after the completion of this offering, SoftBank Group is expected to beneficially own approximately % of

our outstanding ordinary shares (or % if the underwriters exercise in full their option to purchase additional ADSs from the selling shareholder) and thus a majority of the total voting power of our ordinary shares. As a

result of SoftBank Group's ownership, after the completion of this offering, we will be a "controlled compa ny" under the Nasdaq corporate governance standards. Because we will qualify to be treated as a controll ed company, we will have the option not to comply with certain requirements to which

companies that are not controlled companies are subject, including the requirement that a majority of the Board of Directors consists of independent directors, the requirement that a majority of the independent directors select or recommend its

director nominees, the requirement that the remuneration committee be responsible for determining or recommending the compensation of executive officers other than our Chief Executive Officer and the requirement that its remuneration committee be

composed entirely of independent directors. Since we have elected to use certain of the controlled compa ny exemptions, holders of our ADSs will not have the same protections afforded to stockholders of compa nies that are subject to these corporate

governance requirements. As long as SoftBank Group controls us and/or is entitled to certain rights under the Shareholder Governance Agreement,

other holders of our ordinary shares and ADSs will have limited ability to influence matters requiring stock holder approval or the composition of our Board of Directors. Immediately after the completion of this offer ing, SoftBank Group is expected to beneficially own approximately % of

our total issued and outstanding share capital (or % if the underwriters exercise in full their option to pur chase additional ADSs from the selling shareholder). As a result, for so long as SoftBank Group and its controlled

affiliates hold shares representing a majority of the votes entitled to be cast by the holders of our outstanding ordinary shares at a shareholder meeting, SoftBank Group will generally have the ability to control the outcome of any matter submitted

for the vote of our shareholders, except in certain limited circumstances as set forth in the Articles and the Companies Act. In

addition, so long as SoftBank Group and its controlled affiliates hold ordinary shares representing at least a majority of the votes entitled to be cast by the holders of our ordinary shares at a shareholder meeting, SoftBank Group will have the

ability to control the election of all of the members of our Board of Directors. The directors elected by Soft Bank Group will have the authority to make important decisions regarding our business, including decisions affecting our capital structure.

such as the issuance of equity, the incurrence of indebtedness, the implementation of stock repurchase pr ograms and the declaration of dividends. Pursuant to the shareholder governance agreement we will enter into with SoftBank Group upon the completion of this offering (the

"Shareholder Governance Agreement"), SoftBank Group will have the right to designate a number of cand idates for election to our Board of Directors depending on its and its controlled affiliates' level of ownership of our outstanding

ordinary shares. SoftBank Group's designation rights will range from the ability to designate seven candid ates so long as they own more than 70% of our outstanding ordinary 56 Table of Contents shares down to the ability to designate one candidate so long as they own more than 5% of our outstanding ordinary shares. Additionally, effective upon completion of this offering and for so long

as SoftBank Group and its controlled affiliates own more than 70% of our outstanding ordinary shares, So ftBank Group will have the right to increase the size of our Board of Directors to nine directors and appoint

a director, who need not be

independent, to the board to fill the newly created vacancy. If such right is exercised, SoftBank Group will have the right to nominate up to eight candidates for election to our Board of Directors for as long as it and its controlled affiliates

hold more than 70% of our outstanding ordinary shares. The Shareholder Governance Agreement also gives SoftBank Group certain rights with respect to committees of our Board of Directors, approvals of related party transactions, pre-emptive rights,

registration rights, information and other rights, consultation rights and a consent right, among others, including during periods in which SoftBank Group beneficially owns less than a majority of our outstanding or dinary shares. Accordingly,

SoftBank Group will maintain significant control over our corporate and business activities until such rights terminate. See "Related Party Transactions—Transactions with SoftBank Group—Shareholder Governan ce Agreement—Rights

Relating to Our Board of Directors." SoftBank Group's interests may conflict with our own interests and th ose of holders of our ADSs. The interests of SoftBank Group may not coincide with our own interests or the interests of holders of our ADSs. Because SoftBank

Group will generally have the ability, subject to limitations in the Articles and the Companies Act, to contro I all matters submitted to our shareholders for approval, including the election of all of the members of our Board of Directors, and will

have certain enhanced rights pursuant to the Shareholder Governance Agreement, other shareholders will have limited ability to influence corporate matters. As a result, SoftBank Group may cause us to take corporate actions, including engaging in

transactions with SoftBank Group or affiliates of SoftBank Group, that members of our management or ot her shareholders do not view as beneficial, or that provide SoftBank Group with benefits at our expense. Such actions could have a material and

adverse effect on our business, results of operations and the trading price of our ADSs. From time to time we have, and in the future we

expect to, advise SoftBank Group with respect to certain of its proposed investments or acquisitions in, or commercial arrangements or strategic partnerships with, businesses in or adjacent to our industry. For ex ample, we are a party to a

consulting agreement with SoftBank Group pursuant to which we provide to SoftBank Group and its affiliat es certain technical consultancy and advisory services relating to potential transactions, strategic partners hips, commercial arrangements or

other arrangements involving SoftBank Group or its affiliates. See "Related Party Transactions—Transactions with SoftBank Group—Consulting Agreement." Our efforts to advise SoftBank Group may require substantial time and

attention from our executives, engineers and other employees, which could divert attention and resources away from our business. We can provide no assurances that SoftBank Group will not acquire, invest in or partner with businesses that compete

with us, and we will have no control over SoftBank Group's acquisition, investment or strategic partnership activities, including any investments in, acquisitions of or strategic partnerships with businesses that compete with us or our

customers, or any other actions that SoftBank Group may take to compete with us or our customers. Any SoftBank Group investments in, or acquisitions of, or strategic partnerships with, businesses that compete with us or our customers could have a

material adverse effect on us and our relationships with affected customers and cause those customers to seek alternatives to our products and invest in the ecosystems of our competitors like RISC-V, which could have a material adverse effect on our

business, results of operations, reputation, financial condition and/or prospects. In connection with the per formance of services under the consulting agreement or otherwise, we may enter into strategic partnerships, licensing agreements or other

commercial arrangements involving businesses or other assets owned by SoftBank Group or its affiliates, business or assets in which SoftBank Group or its affiliates have a controlling interest, or businesses with which SoftBank Group or its

affiliates have a commercial arrangement or partnership. In addition, although we are not actively pursuin

g any investments in, or acquisitions of any such businesses, we may in the future pursue acquisitions of or investments in entities affiliated

with SoftBank Group or with whom SoftBank Group or its affiliates have a commercial relationship. 57 Tab le of Contents Disputes may arise between us and SoftBank Group or its affiliates in a number of areas, including relating to arrangements with third parties that are exclusionary to us or SoftBank Group or its affiliates and business opportunities that may be attractive to both us and SoftBank Group or its affiliates. F urthermore, disputes may arise

between us and SoftBank Group or its affiliates with respect to Arm China. As of the date hereof, approxi mately 48% of the equity interest in Arm China is owned by Acetone Limited, which SoftBank Group controls and in which we own a 10% non-voting interest (representing an approximate 4.8% indirect interest). We may not be able to resolve any potential conflicts with SoftBank Group and, even if we do, the resolution may be less favorable than if we

were dealing with an unaffiliated party, which could have an adverse effect on our business, results of ope rations and the trading price of our ADSs. In addition, any disputes between us and SoftBank Group could distract our management. In addition, some of our directors and officers currently, and in the future may, directly or indirectly own equity interests in SoftBank

Group, and Mr. Son is also the Chairman and Chief Executive Officer of SoftBank Group and Mr. Haas is a director of SoftBank Group. In addition, Mr. Haas is party to an agreement pursuant to which he provide s certain advisory and

consulting services to SoftBank Group. Ownership of such equity interests by our directors and officers and the presence of Messrs. Son and Haas, as the chair of our Board of Directors and our Chief Executive Officer and a director, respectively,

could create, or appear to create, conflicts of interest with respect to matters involving both us and any on e of them, or involving us and SoftBank Group. Provisions of the Articles address corporate opportunities t hat are presented to our

directors that are also directors or officers of SoftBank Group. We cannot assure you that the Articles will adequately address potential conflicts of interest or that potential conflicts of interest will be resolved in our favor or that we will be

able to take advantage of corporate opportunities presented to individuals who are directors of both us an d SoftBank Group. As a result, we may be precluded from pursuing certain advantageous transactions or growth initiatives. Moreover, under the terms of the Shareholder Governance Agreement to be entered int o with SoftBank Group upon the completion of this offering,

SoftBank Group has a contractual pre-emptive right. Specifically, under the terms of the Shareholder Gov ernance Agreement, if we propose to allot or issue any ordinary or preferred shares or options, warrants or other securities convertible into or

exercisable for ordinary or preferred shares (including ADSs) (other than: (i) pursuant to an offer made to all ordinary shareholders on the same terms; or (ii) in connection with any incentive plan or share scheme otherwise approved by SoftBank

Group to the extent such approval is required under the Shareholder Governance Agreement), SoftBank Group will be entitled (but will not be obligated) to purchase up to an amount of the securities we propose to allot or issue such that it can

maintain its proportional legal and economic interests in our share capital prior to such allotment or issuan ce. As a result, while other holders of our ADSs would risk suffering a reduction in percentage ownership in connection with a new issuance

of securities by us, SoftBank Group will have the opportunity to avoid a reduction in its legal and economic interests. See "Related Party Transactions—Transactions with SoftBank Group—Shareholder Governance Agreement—Pre-emptive

Rights." Furthermore, regardless of the performance of our own business, SoftBank Group's business, results of operations and

the trading price of SoftBank Group's securities or other matters affecting SoftBank Group or actions that SoftBank Group may take may adversely affect the trading price of our ADSs. In addition, SoftBank Group is not restricted from competing

with us or otherwise taking for itself or its other affiliates certain corporate opportunities that may be attract ive to us. SoftBank

Group's ability to control all matters submitted to our shareholders may have the effect of delaying, preven

ting or deterring a change of control, which could deprive holders of our ADSs of an opportunity to receive a premium for their ADSs as

part of a change of control, and might ultimately affect the fair market value of our ADSs. SoftBank Group has engaged, and may in the future

engage, in financing transactions whereby our shares are pledged as security. SoftBank Group has engaged, and may from time to

time engage, in financing transactions involving our shares (including ADSs representing our shares), such as loans whereby our shares are pledged as security. We 58 Table of Contents may be unable to influence the timing or terms of financing transactions by SoftBank Group involving our securities. For example, certain subsidiaries of SoftBank Group are parties to a term loan

facility described further under "Certain Relationships and Related Party Transactions" pursuant to which we have certain obligations. SoftBank Group has informed us that (i) it intends to repay the term loan facility prior to, or

substantially concurrently with, the pricing of this offering, and (ii) at the time of such repayment, our sprin ging guarantee and indemnity will be terminated. The repayment of the term loan facility and the release of our obligations thereunder is

a condition to the closing of this offering. If SoftBank Group does not repay this facility, this offering will no t close. In addition,

certain subsidiaries of SoftBank Group have entered into a margin loan facility, with certain of the underwr iters or their affiliates being agents and/or lenders (which include Barclays Capital Inc., BNP Paribas Securities Corp., Citigroup Global

Markets Inc., Credit Agricole Securities (USA) Inc., Deutsche Bank Securities Inc., Goldman Sachs & Co. LLC, HSBC Securities (USA) Inc., J.P. Morgan Securities LLC, Mizuho Securities USA LLC, MUFG Securities Americas Inc., Natixis Securities

Americas LLC, Santander US Capital Markets LLC and SMBC Nikko Securities America, Inc. or their affili ates), to be secured by our outstanding ordinary shares and to be funded following, or substantially concurrently with, the closing of this

offering, but in any event after the Existing SoftBank Group Facility is repaid (the "New SoftBank Group Facility"). We have no material obligations with respect to the New SoftBank Group Facility. The New SoftBank Group Facility will

initially be secured by a pledge of 769,029,000 of our ordinary shares representing a 75.01% equity intere st in us (before giving effect to the issuance of ordinary shares issuable upon the completion of this offering in connection with the vesting

of RSUs and Executive Awards) pursuant to certain exceptions to the lock-up agreements. See "Ordinary Shares and ADSs Eligible for Future Sale—Lock-up Agreements." We face various risks in connection with such transactions. The New

SoftBank Group Facility contains, and such other financing transactions may contain, provisions that, subject to their terms, require prepayment if certain events or circumstances occur, including certain change of control transactions or in the

event the trading price of our ADSs declines below certain thresholds. From time to time, subject to certain requirements under the terms of the New SoftBank Group Facility and any other such financing transactions, SoftBank Group or the relevant

subsidiary of SoftBank Group, as applicable, may consider it advisable to sell shares in order to finance the prepayment or repayment of such financings, which number of shares may, individually or in the aggregate, be significant. In addition, in

connection with the New SoftBank Group Facility and any other such financings, if the price of our ADSs d eclines to certain levels, absent a repayment of the applicable financing, SoftBank Group may be required to provide additional collateral. For

instance, the New SoftBank Group Facility could be subject to a "margin call" by the providers of the facilit y if, among other events, the loan-to-value (LTV) exceeds a certain threshold. In the event of such a margin call, the relevant

subsidiary of SoftBank Group would need to deposit additional funds with the providers of the facility and may decide to sell some of the pledged shares to provide such funds. In the case of non-payment at maturity or another event of default, the

providers of the New SoftBank Group Facility and any other such financing may, in addition to other reme

dies, exercise their rights to foreclose on and sell or cause the sale of our shares that may be pledged as collateral. The foreclosure on our

shares that are initially pledged as collateral for the New SoftBank Group Facility could cause a change of control of us and if such shares are sold, such sales could cause the trading price of our ADSs to decline. Sales of our securities in

connection with the New SoftBank Group Facility and any other such financing transactions, whether by S oftBank Group or upon enforcement against collateral, could have a material and adverse effect on our bu siness, results of operations, access to

equity capital and the trading price of our ADSs. If SoftBank Group sells a controlling equity interest in our company to a third party in a

private transaction, you may not realize any change-of-control premium on your ADSs and we may become subject to the control of a currently unknown third party. For so long as the U.K. City Code on Takeovers and Mergers (the "Takeover Code") does not apply to us, SoftBank Group

will have the ability, should it choose to do so, to sell some or all of its shares in a privately negotiated tran saction, which, if sufficient in size, could result in a change of control of us. The ability of SoftBank Group to privately sell its

shares, with no requirement for a concurrent offer to be made to acquire all 59 Table of Contents of the A DSs that will be publicly traded following the completion of this offering, could prevent you from realizing a ny change-of-control premium on your ADSs that may otherwise accrue to SoftBank Group on its private sale of shares. In addition, if SoftBank Group privately sells its

controlling equity interest or if a lender forecloses on a controlling interest pledged by SoftBank Group, inc luding in connection with enforcement under the New SoftBank Group Facility, we may become subject to the control of a currently unknown

third party. The interests of this third party may not be the same as, or may conflict with, the interests of o ur other shareholders. Furthermore, if SoftBank Group sells a controlling equity interest in our company to a third party or a lender

forecloses on a pledged controlling equity interest in our company, our future indebtedness may be subjec t to acceleration, and our other commercial agreements and relationships, including any remaining agree ments with SoftBank Group, could be

impacted. The occurrence of any of these events could adversely affect our business, results of operation s, financial condition and prospects. SoftBank Group's ability to control our Board of Directors may make it difficult for us to recruit independent directors. For so long as SoftBank Group and its controlled affiliates hold our ordinary shares representing at least a majority of the votes entitled to

be cast by the holders of our ordinary shares at a shareholder meeting, SoftBank Group will be able to ele ct all of the members of our Board of Directors. Additionally, pursuant to the Shareholder Governance Agr eement, SoftBank Group will have the

right to designate a number of candidates for election to our Board of Directors depending on its and its af filiates' level of ownership of our outstanding ordinary shares. SoftBank Group's designation rights will ran ge from the ability to

designate seven candidates so long as they own more than 70% of our outstanding ordinary shares (or up to eight if SoftBank Group exercises the right granted to it to increase the size of our Board of Directors and appoint an additional

non-independent director to fill the resulting vacancy) down to the ability to designate one candidate so long as they own more than 5% of our outstanding ordinary shares. The Shareholder Governance Agreement also provides SoftBank Group with

proportional rights to representation on the committees of our Board of Directors, subject to applicable res trictions. See "Related Party Transactions—Transactions with SoftBank Group—Shareholder Governance Agreement—Rights

Relating to Our Board of Directors." Under these circumstances, qualified and experienced persons who might otherwise accept an invitation to join our Board of Directors may decline, which means that we would not be able to benefit from their

qualifications and expertise in service as members of our Board of Directors. As a foreign private issuer, we are exempt from a number of rules

under the U.S. securities laws and are permitted to file less information with the SEC than U.S. public companies. We are a

"foreign private issuer," as defined in the SEC rules and regulations, and, consequently, we are not subject to all the disclosure requirements applicable to companies organized within the U.S. For example, we are exempt from certain rules

under the Exchange Act that regulate disclosure obligations and procedural requirements related to the so licitation of proxies, consents or authorizations applicable to a security registered under the Exchange Act. In addition, our officers and

directors are exempt from the reporting and "short-swing" profit recovery provisions of Section 16 of the E xchange Act and related rules with respect to their purchases and sales of our securities. Moreover, we are not required to

file periodic reports and financial statements with the SEC as frequently or as promptly as U.S. public companies. Accordingly, there may be less publicly available information concerning our company than there is for U.S. public companies. As a foreign private issuer, we will file an annual report on Form 20-F within four months of the

close of each fiscal year ended March 31 and reports on Form 6-K relating to certain material events pro mptly after we publicly announce these events. However, because of the above exemptions for foreign private issuers, our shareholders will not be afforded the same protections or information generally availa ble to investors holding shares in public companies organized in the U.S. 60 Table of Contents While we are a foreign private issuer, we may opt out of certain Nasdaq corporate governance rules

applicable to public companies organized in the U.S. We are entitled to rely on a provision in Nasdaq's co rporate governance

rules that allows us to follow English corporate law with regard to certain aspects of corporate governance . This allows us to follow certain corporate governance practices that differ in significant respects from the corporate governance

requirements applicable to domestic issuers listed on Nasdaq, which may provide less protection to our s hareholders than what is accorded to investors under the Nasdaq rules applicable to domestic issuers. Fo r example, we are exempt from Nasdaq regulations that require a listed U.S. company to: • disclose within four business days of any determination to grant a waiver of the Code of Conduct to directors and officers; • obtain shareholder approval for certain issuances of securities, including shareholder approval of share option

plans; • give the audit committee review and oversight responsibilities over all "related party transactions"; • hold regularly scheduled meetings of only the independent directors at least twice a year; • solicit proxie s and provide proxy statements for all meetings of shareholders; and • provide in the company's bylaws or articles of association that a quorum for the shareholders' meeting

consists of at least 33 1/3% of the outstanding shares of the company's voting common shares. In accord ance with

Nasdaq listing rules, our audit committee is required to comply with the provisions of Section 301 of the S arbanes-Oxley Act and Rule 10A-3 of the Exchange Act, both of which are also applicable to

Nasdaq-listed U.S. companies. Because we are a foreign private issuer, however, our audit committee is not subject to additional requirements applicable to Nasdaq-listed U.S. companies, including an affirmative determination that all members of the

audit committee are "independent," using more stringent criteria than those applicable to us as a foreign p rivate issuer, subject to certain phase-in requirements permitted by Rule 10A-3 of the Exchange Act. See "Management and Executive Remuneration—Foreign Private Issuer Exemption." We may lose our foreign private issuer status, which would then require us to comply with the Exchange Act's domestic reporting r egime and cause us

to incur significant legal, accounting and other expenses. We are required to test our foreign private issuer status at the end of

our second fiscal quarter in each fiscal year after the completion of this offering. If we were no longer a for eign private issuer, we would be required to comply with all of the periodic disclosure and current reporting requirements of the Exchange

Act applicable to U.S. domestic issuers as of April 1, 2025. In order to maintain our current status as a for eign private issuer, either (a) a majority of our securities must be either directly or indirectly owned of record by nonresidents

of the U.S. or (b)(i) a majority of our executive officers or directors cannot be U.S. citizens or residents, (ii) more than 50% of our assets must be located outside the U.S. and (iii) our business must be administere

d principally outside

the U.S. If SoftBank Group or its affiliates do not continue to hold a majority of our ordinary shares, we would likely fail to maintain our status as foreign private issuer. If we lose our status as a foreign private issuer, we would be required to

comply with the Exchange Act reporting and other requirements applicable to U.S. domestic issuers, which are more detailed and extensive than the requirements for foreign private issuers. We may also be required to make changes in our corporate

governance practices in accordance with various SEC and Nasdaq rules. The regulatory and compliance costs to us under U.S. securities laws if we are required to comply with the reporting requirements applicable to a U.S. domestic issuer may be

significantly higher than the cost we would incur as a foreign private issuer. As a result, we expect that a loss of foreign private issuer status would increase our legal and financial compliance costs and is likely to make some activities highly

time-consuming and costly. We also expect that if we were required to comply with the rules and regulatio ns applicable to U.S. domestic issuers, it would make it more difficult and expensive for us to obtain direct or and officer liability insurance,

and we may be required to accept reduced coverage or incur substantially higher costs to obtain coverag e. These rules and regulations could also make it more difficult for us to attract and retain qualified memb ers of our Board of Directors. 61 Table of Contents The rights of our shareholders may differ from the right s typically offered to shareholders of a U.S.

corporation. We are incorporated under the laws of England and Wales. The rights of holders of ordinary shares and, therefore,

certain of the rights of holders of ADSs, are governed by English law, including the provisions of the Companies Act and by the Articles. These rights differ in certain respects from the rights of shareholders in typical U.S. corporations. See

"Description of Share Capital and Articles of Association—Differences in Corporate Law" in this prospectus for a description of the principal differences between the provisions of the Companies Act applicable to us and, for example,

the Delaware General Corporation Law relating to shareholders' rights and protections. The principal differences include the following: • under English law, subject to certain exceptions and disapplications, each shareholder generally has preemptive

rights to subscribe on a proportionate basis to any issuance of ordinary shares or rights to subscribe for, o r to convert securities into, ordinary shares for cash. Under U.S. law, shareholders generally do not have preemptive rights unless

specifically granted in the certificate of incorporation or otherwise; • under English law, certain matters require the approval of not less than 75% of the shareholders who vote (in

person or by proxy) on the relevant resolution (or on a poll of shareholders, by shareholders representing not less than 75% of the ordinary shares voting (in person or by proxy)), including amendments to the Articles. This may make it more

difficult for us to complete corporate actions deemed advisable by our Board of Directors. Under U.S. law, generally only majority shareholder approval is required to amend the certificate of incorporation or to approve other significant

transactions; • in the U.K., takeovers may be structured as takeover offers or as schemes of arrangement. Under English law, a

bidder seeking to acquire us by means of a takeover offer would need to make an offer for all of our outst anding ordinary shares and ADSs. If acceptances are not received for 90% or more of the ordinary shares and ADSs under the offer, under English

law, the bidder cannot complete a "squeeze out" to obtain 100% control of us. Accordingly, acceptances o f 90% of our outstanding ordinary shares/ADSs would likely be a condition in any takeover offer to acquire us, not 50% as is more

common in tender offers for corporations organized under U.S. law. By contrast, a scheme of arrangemen t, the successful completion of which would result in a bidder obtaining 100% control of us, requires the a pproval of a majority in number of the

shareholders or class of shareholders present and voting either in person or by proxy at the meeting and r epresenting 75% in value of the ordinary shares (including those represented by ADSs) voting at the meet

ing for approval; • under English law and the Articles, shareholders and other persons whom we know or have reasonable cause to

believe are, or have been, interested in our shares may be required to disclose information regarding their interests in our shares upon our request, and the failure to provide the required information could result in the loss or restriction of

rights attaching to the shares, including prohibitions on certain transfers of the shares, withholding of divid ends and loss of voting rights. Comparable provisions generally do not exist under U.S. law; and • under t he Articles, the quorum requirement for a shareholder meeting is a minimum of one shareholder present in

person or by proxy (or, if a corporation, by representative). Under U.S. law, a majority of the shares eligible to vote must generally be present (in person or by proxy) at a shareholders' meeting in order to constitute a quorum. The minimum

number of shares required for a quorum can be reduced pursuant to a provision in a company's certificate of incorporation or bylaws, but typically not below one-third of the shares entitled to vote at the meeting. As an English public limited company, certain capital structure decisions will require shareholder approval, which may

limit our flexibility to manage our capital structure. On

, 2023, the Company was re-registered as a public limited company with the name Arm Holdings plc. English law provides that, subject to certain exceptions (including the allotment, or the grant of 62 Table of Contents rights to subscribe for or convert any security into shares, in pursuance of an emp loyees' share scheme), a board of directors of a public limited company may only allot shares (or grant rights to subscribe for or convert any security into shares) with the prior authorization of shareholders, such authorization stating the aggregate nominal amount of shares that it covers and being valid for a maxim um period of five years, each as

specified in the articles of association or relevant ordinary shareholder resolution passed by shareholders at a general meeting. We have obtained authority from our shareholders to allot additional shares ending , which authorization will need to be renewed upon expiration (i.e., at least every five years) b

ut may be sought more frequently

for additional five-year terms (or for any shorter period). English law also generally provides shareholders with preemptive rights when

new shares are issued for cash, except that such rights do not apply to the allotment of equity securities t hat would, apart from any renunciation or assignment of the right to their allotment, be held under or allott ed or transferred pursuant to an

employees' share scheme. However, it is possible for the articles of association, or for shareholders to pa ss a special resolution at a general meeting, being a resolution passed by at least 75% of the votes cast, t o disapply preemptive rights.

Such a disapplication of preemptive rights may be for a maximum period of up to five years from the date of adoption of the articles of association, if the disapplication is contained in the articles of association, or f rom the date of the

shareholder special resolution, if the disapplication is by shareholder special resolution, but not longer tha n the duration of the authority to allot shares to which the disapplication relates. In either case, this disapplication would need to be

renewed by our shareholders upon its expiration (i.e., at least every five years). We have obtained authority from our shareholders to disapply preemptive rights ending

, which disapplication will need to be renewed upon expiration (i.e., at least every five years), but may be sought more

frequently for additional five-year terms (or for any shorter period). English law also generally prohibits a public company from

repurchasing its own shares without the prior approval of shareholders by ordinary resolution, being a res olution passed by a simple majority of votes cast, and other formalities. Such approval may be for a maxi mum period of up to five years. See

"Description of Share Capital and Articles of Association." Under current law, transfers of ordinary shares outside the ADR program and

the redeposit of ordinary shares into the ADR program will generally be subject to U.K. stamp duty or stamp duty reserve tax and the law may change to cover other transactions, including transactions in ADSs,

which would increase the cost of dealing

in ordinary shares or ADSs. On completion of this offering, it is anticipated that the ADSs will be transferre d to a nominee for

The Depository Trust Company ("DTC") and corresponding book-entry interests credited in the facilities of DTC. On the basis of current law and HM Revenue & Customs ("HMRC") practice, no charges to U.K. stamp duty or stamp

duty reserve tax ("SDRT") are expected to arise on either the transfer of ADSs into DTC's facilities or on s ubsequent transfers of book-entry interests in ADSs entirely within DTC's facilities. Similarly, on the basis of current

law and HMRC practice, a transfer of title in the ADSs from within the DTC clearance system to a purchas er out of the DTC clearance system and any subsequent transfers that occur entirely outside the DTC clearance system should not attract a charge

to U.K. stamp duty or SDRT. If you choose to withdraw the ordinary shares underlying your ADSs (in accordance with the deposit agreement,

applicable laws and regulations) from the depositary, U.K. stamp duty and SDRT will not generally be chargeable on any such withdrawal in your favor, but will generally be chargeable on any subsequent transfer s of the ordinary shares or redeposits

of the ordinary shares into the ADR program (at the rates specified below). Therefore, you are strongly en couraged to hold your ADSs (representing ordinary shares) in book-entry form through the facilities of DT C. In connection with the completion of this offering, we expect to put in place arrangements to require that tordinary shares held in

certificated form or otherwise outside the depositary system cannot be represented by ADSs within the D TC clearance system until the transferor of the ordinary shares has first delivered the ordinary shares to a depositary specified by us so that

any U.K. stamp duty (or SDRT) may be collected in connection 63 Table of Contents with the delivery to the depositary. Any such ADSs in respect of those ordinary shares so deposited may be evidenced by a receipt issued by the depositary. Before the transfer can be registered

in the books of the depositary for the ADSs to be issued, the transferor will also be required to put funds in the depositary to settle any resultant liability to stamp duty (or SDRT), which will be charged at a rate of 1 .5% of the value of the

ADSs. We have received confirmation from HMRC that, in respect of the transactions contemplated by, a nd put in place as part of, this offering, no charge to U.K. stamp duty or SDRT should arise. We cannot as sure you that the current legislation and/or HMRC guidance will not change. In particular, certain rights de rived from European

Union law currently recognized in U.K. domestic law will cease to be so following December 31, 2023 as a result of the Retained EU Law (Revocation and Reform) Act 2023, absent the exercise of a regulation-making power to restate or reproduce

specific rights in U.K. domestic law. Rights derived from European Union law, of this type, would therefore cease to restrict the application of the rules providing for the 1.5% U.K. stamp duty or SDRT charge. There has been no indication that these

European Union law rights will be restated or reproduced in U.K. domestic law before December 31, 2023. Accordingly, future issues or transfers of our ordinary shares to, or appropriations of our ordinary shares by, depositary receipt systems after

December 31, 2023 may be subject to 1.5% U.K. stamp duty or SDRT. The HMRC confirmation referred to above does not extend to such future transactions. It is also possible that, for example, in the future, a transfer of title in the ADSs from within the DTC clearance system to a purchaser out

of the DTC clearance system and/or any subsequent transfers of ADSs that occur entirely outside (or insi de) the DTC clearance system, will attract a charge to U.K. stamp duty or SDRT. Any such U.K. stamp duty or SDRT will be chargeable at a rate of

0.5% (or potentially 1.5% in certain circumstances) of any consideration, which is normally payable by the transferee. Any such duty must be paid (and the relevant transfer document, if any, stamped by HMRC) before the transfer can be registered in

the books of the depositary and, if relevant, ADSs issued to a nominee for DTC and corresponding book-entry interests credited in the facilities of DTC. For further information about the U.K. stamp duty and SDRT implications of holding ADSs and withdrawing ordinary shares under current law,

please see the section titled "Material Tax Considerations—U.K. Taxation" of this prospectus. We may be liable for stamp duty in

connection with the corporate reorganization. In connection with the corporate reorganization described under the section titled

"Corporate Reorganization," the entire issued share capital of Arm Limited was transferred to the Compan y. We have made an application to HMRC for such transfer to be adjudicated as not chargeable to U.K. st amp duty by virtue of section 77

of the Finance Act 1986. While it is expected that all of the conditions of section 77 of the Finance Act 198 6 are satisfied and relief should be available, if such relief is not forthcoming we will be required to pay 0.5 % U.K. stamp duty of the

value of the consideration given for that transfer, which is expected to be, broadly, 0.5% of the value of the transferred share capital of Arm Limited. The Articles will provide that, unless the Company by ordinary resolution consents to the selection of an alternative forum, the courts of England and

Wales will be the exclusive forum for the resolution of all shareholder complaints other than complaints as serting a cause of action arising under the Securities Act and the Exchange Act, and that the U.S. District Court for the Northern District of

California will be the exclusive forum for the resolution of any shareholder complaint asserting a cause of action arising under the Securities Act or the Exchange Act. The Articles will provide that, unless the Company by ordinary resolution consents to the selection of an alternative forum, the courts of

England and Wales will be the exclusive forum for resolving all shareholder complaints other than shareholder complaints asserting a cause of action arising under the Securities Act of 1933, as amended (the "Securities Act"), or the

Exchange Act, and that the U.S. District Court for the Northern District 64 Table of Contents of California will be the exclusive forum for resolving any shareholder complaint asserting a cause of action arising und er the Securities Act or the Exchange Act, including applicable claims

arising out of this offering. In addition, the Articles will provide that any person or entity purchasing or othe rwise acquiring any interest in our shares is deemed to have notice of and consented to these provisions. This choice of forum provision may limit a shareholder's ability to bring a claim in a judicial forum that it fin ds favorable for

disputes with us or our directors, officers or other employees, which may discourage such lawsuits. The e nforceability of similar exclusive forum provisions (including exclusive federal forum provisions for actions, suits or proceedings asserting a

cause of action arising under the Securities Act) in other companies' organizational documents has been challenged in legal proceedings, and there is uncertainty as to whether courts would enforce the exclusive forum provisions in the Articles.

Additionally, our shareholders cannot waive compliance with the federal securities laws and the rules and regulations thereunder. If a court were to find either choice of forum provision contained in the Articles to be inapplicable or unenforceable

in an action, we may incur additional costs associated with resolving such action in other jurisdictions, whi ch could adversely affect our results of operations and financial condition. The courts of England and Wal es and the U.S. District Court for

the Northern District of California may also reach different judgments or results than would other courts, in cluding courts where a shareholder considering bringing a claim may be located or would otherwise choos e to bring the claim, and such

judgments may be more or less favorable to us than our shareholders. Shareholder protections found in provisions under the Takeover Code will not

apply if our place of central management and control remains outside the U.K. The Takeover Code applies to all offers for

companies which have their registered office in the U.K., the Channel Islands or the Isle of Man if any of their equity share capital or other transferable securities carrying voting rights are admitted to trading on a U.K. regulated market or a

U.K. multilateral trading facility or on any stock exchange in the Channel Islands or the Isle of Man. The T akeover Code also applies to

all offers for public companies which have their registered office in the U.K., the Channel Islands or the Isl e of Man if they are considered by the Panel on Takeovers and Mergers (the "Takeover Panel") to have the

eir place of central

management and control in the U.K., the Channel Islands or the Isle of Man. This is known as the "reside ncy test." In determining whether the residency test is satisfied, the Takeover Panel has regard primarily to whether a majority of a

company's directors are resident in these jurisdictions. Although our registered office is in the U.K., the Ta keover Code does not

currently apply to us because our shares are not admitted to trading on a regulated market or multilateral t rading facility in the U.K. or any stock exchange in the Channel Islands or the Isle of Man, and the Takeov er Panel has confirmed to us that,

on the basis of the current residency of our directors as at the date of this prospectus, we will not have our place of central management and control in the U.K., the Channel Islands or the Isle of Man. As a result, our shareholders are not currently entitled to the benefit of certain takeover offer protections provided und er the Takeover

Code, including the rules regarding mandatory takeover bids and, therefore, holders of ADSs will not bene fit from these protections. In

the event that this changes, or if the interpretation and application of the Takeover Code by the Takeover Panel changes (including changes to the way in which the Takeover Panel assesses the application of the Takeover Code to English companies

whose shares are listed outside of the U.K., the Channel Islands or the Isle of Man), the Takeover Code may apply to us in the future. The Takeover Code provides a framework within which takeovers of companies are regulated and conducted. The following is a brief summary of

some of the most important rules of the Takeover Code: • In connection with a potential offer, if following a n approach by or on behalf of a potential bidder, the company

is "the subject of rumor or speculation" or there is an "untoward movement" in the 65 Table of Contents company's share price, there is a requirement for the potential bidder to make a public announcement about a potential offer for the company, or for the company to make a public announcement

about its receipt of a potential offer. • When a person (a) acquires, whether by a series of transactions ove r a period of time or not, interests in

shares carrying 30% or more of the voting rights of a company when taken together with shares in which persons acting in concert with that person are interested (which percentage is treated by the Takeover Co de as the level at which effective

control is obtained), or (b) acquires an interest in any other shares which increases the percentage of shar es carrying voting rights in which they are interested when they are, together with persons acting in conce rt with them, already

interested in shares which carry not less than 30% of the voting rights but do not hold shares carrying mor e than 50% of such voting rights, they must make a cash offer to all other shareholders at the highest pric e paid by them or any person acting

in concert with them in the twelve months before the offer was announced. • When interests in shares carr ying 10% or more of the voting rights of a class have been acquired for cash by an

offeror (i.e., a bidder) and any person acting in concert with it in the offer period (i.e., before the shares su bject to the offer have been acquired) and the previous twelve months, the offer must be in cash or be acc ompanied by a cash alternative

for all shareholders of that class at not less than the highest price paid by the offeror or any person acting in concert with it in that period. Further, if an offeror or any person acting in concert with it acquires for cas h any interest in shares

during the offer period, the offer for the shares must be in cash or accompanied by a cash alternative at a price at least equal to the highest price paid for such shares during the offer period. • If, after a firm offer a nnouncement is made, the offeror or any person acting in concert with it acquires an

interest in shares in an offeree company (i.e., a target) at a price higher than the value of the offer, the off er must be increased to not less than the highest price paid for the interest in shares so acquired. • The of feree company must appoint a competent independent adviser whose advice on the financial terms of the offer

must be made known to all the shareholders, together with the opinion of the board of directors of the offe ree company. • Favorable deals for selected shareholders are not permitted, except in certain circumstances where independent

shareholder approval is given and the arrangements are regarded as fair and reasonable in the opinion of the financial adviser to the offeree. • All shareholders must be given the same information. • Those issuin g takeover circulars must include statements taking responsibility for the contents thereof. • Profit forecast s, quantified financial benefits statements and asset valuations must be made to specified

standards and must be reported on by professional advisers. • Misleading, inaccurate or unsubstantiated statements made in documents or to the media must be publicly corrected

immediately. • Actions during the course of an offer by the offeree company, which might frustrate the offer are generally

prohibited unless shareholders approve these plans. Frustrating actions would include, for example, lengt hening the notice period for directors under their service contract or agreeing to sell off material parts of the target group. • Stringent requirements are laid down for the disclosure of dealings in relevant securities during an offer,

including the prompt disclosure of positions and dealings in relevant securities by the parties to an offer a nd any person who is interested (directly or indirectly) in 1% or more of any class of relevant securities. • Employees of both the offeror and the offeree company and the trustees of the offeree company's pension

scheme must be informed about an offer. In addition, the offeree company's employee representatives an d pension scheme trustees have the right to have a separate opinion on the effects of the offer on employ ment appended to the offeree board of

directors' circular or published on a website. 66 Table of Contents Risks Relating to this Offering and Own ership of Our Securities There has been no prior market for our ordinary shares or the ADSs and an active, liquid and orderly trading market may not develop for our ADSs or be

sustained following this offering, which could harm the market price of our ADSs and make it difficult for y ou to sell your ADSs. Prior to this offering, there was no public trading market for our ordinary shares or A DSs. Although our ADSs are expected to be listed on

Nasdaq, an active trading market for our ADSs may never develop or be sustained following this offering. You may not be able to sell your ADSs quickly or at the then-current market price if trading in our ADSs is not active. The initial public

offering price was determined by negotiations among the lead underwriters, the selling shareholder and us. Among the factors considered in determining the initial public offering price were our future prospects and the prospects of our industry in

general, our revenue, net income and certain other financial and operating information in recent periods, a nd the market prices of securities and certain financial and operating information of companies engaged in activities similar to ours.

However, there can be no assurance that, following the completion of this offering, the ADSs will trade at a price equal to or greater than the public offering price. The purchase price paid by SoftBank Group to ac quire shares in Arm Limited from SoftBank Vision Fund may not be, and should not be treated as,

indicative of the trading price of our ADSs following the completion of this offering. In August 2023, a subsidiary of SoftBank

Group acquired substantially all of SoftBank Vision Fund's approximately 25% interest in Arm Limited at a purchase price of approximately \$16.1 billion, with the associated payments to be made in installments o ver a two-year period. The

purchase price for this transaction was established by reference to the terms of a prior contractual arrang ement between the parties. Moreover, the transfer was part of a larger transaction that also involved transfers of certain other entities from

SoftBank Vision Fund to SoftBank Group. The consideration for such transfers is not included in the purch ase price paid for the shares of Arm Limited. In light of the foregoing, investors are cautioned that the purchase price paid in respect of the

Arm Limited shares may not be indicative of, and is not intended to reflect, expectations regarding the trad ing price of our ADSs following the completion of this offering. The future exercise of registration rights by SoftBank Group may materially and adversely affect the market price of the ADSs. Pursuant to the Share holder Governance Agreement, SoftBank Group and certain of its affiliates are entitled to certain registration rights

pursuant to which they may demand that we register the resale of its ordinary shares or securities convertible into or exchangeable for ordinary shares (including ADSs) ("Registrable Securities") and, under certain

n circumstances, will also

have customary "piggyback" registration rights for its Registrable Securities in connection with certain registrations of securities by us. In addition, SoftBank Group or its relevant affiliates may require us to file and maintain an

effective shelf registration statement under the Securities Act covering the resale of SoftBank Group's Re gistrable Securities. The registration of the resale of these securities will facilitate the public sale by SoftB ank Group of such

securities without regard to any limitations on the volume of securities that SoftBank Group may sell. In lig ht of SoftBank Group's expected beneficial ownership of our ordinary shares after giving effect to this offer ing, the registration of

the resale of a significant number of ADSs, or the perception that significant sales by SoftBank Group may occur, may have a material adverse effect on the market price of our ADSs. Raising additional capital may cause dilution to our existing shareholders, restrict our operations or cause us to relinquish valuable rights. We may seek additional capital through a combination of public and private equity offerings, debt financings, strategic

partnerships and alliances, and licensing arrangements. To the extent that we raise additional capital thro ugh the sale of equity, convertible debt securities or other equity-based derivative securities, your owners hip interest will be diluted, and

the terms of the securities may include liquidation or other preferences 67 Table of Contents that may be senior to your rights as holder of ADSs. Any indebtedness we incur would result in increased payment obligations and could involve restrictive covenants, such as limitations on our

ability to incur additional debt and other operating restrictions that could adversely impact our ability to co nduct our business. Any debt or additional equity financing that we raise may contain terms that are not fa vorable to us or our

shareholders. Furthermore, the issuance of additional securities, whether equity or debt, by us, or the pos sibility of such issuance, may cause the market price of our ADSs to decline and existing shareholders may y not agree with our financing plans

or the terms of such financings. If we raise additional funds through strategic partnerships, collaborations, and alliances and licensing arrangements with third parties, we may have to relinquish valuable rights to o ur IP or products, or grant

licenses on terms unfavorable to us. We may from time to time distribute rights to our shareholders, including rights to acquire our

securities. However, we cannot make rights available to holders in the U.S. unless we register the offer an d sale of the rights and the securities to which the rights relate under the Securities Act or an exemption from the registration requirements

is available. Also, under the deposit agreement, the depositary bank will not make rights available to hold ers unless either both the rights and any related securities are registered under the Securities Act, or the distribution of them to ADS

holders is exempted from registration under the Securities Act. We are under no obligation to file a registr ation statement with respect to any such rights or securities, to endeavor to cause such a registration stat ement to be declared effective or

to establish an exemption from registration under the Securities Act. Accordingly, you may be unable to p articipate in such a rights offerings and may experience dilution in your holdings. The market price of our ADSs may be volatile, and you may not be able to resell your ADSs at or above the initial public offering p rice. The market price of our ADSs following this offering could be volatile. The stock market in general, a nd the market for technology companies in

particular, has experienced extreme volatility that has often been unrelated to the operating performance of particular companies, and the trading price of our ADSs may be volatile due to factors beyond our control. As a result of this volatility,

you may not be able to sell your ADSs at or above the initial public offering price. The market price for our ADSs may be influenced by many factors, including, among others: • variations in our actual or anticipate d annual or quarterly operating results or those of others in our industry; • results of operations that other wise fail to meet the expectations of securities analysts and investors; • changes in earnings estimates or recommendations by securities analysts, or other changes in investor perceptions

of the investment opportunity associated with our ordinary shares relative to other investment alternatives;

• market conditions in the semiconductor industry; • publications, reports or other media exposure of our li censed products or those of others in our industry, or of

our industry generally; • announcements by us or others in our industry, or by our or their respective suppliers, distributors or other

business partners, regarding, among other things, significant contracts, price reductions, capital commitm ents or other business developments, the entry into or termination of strategic transactions or relationship s, securities offerings or other

financing initiatives, and public reaction thereto; • additions or departures of key management personnel; • significant lawsuits, including patent or shareholder litigation; • regulatory actions involving us or others in our industry, or actual or anticipated changes in applicable

government regulations or enforcement thereof; 68 Table of Contents • the development and sustainabilit y of an active trading market for our ordinary shares; • sales, or anticipated sales, of large blocks of our A DSs; • general economic and securities market conditions; and • other factors discussed in this "Risk Fact ors" section and elsewhere in this prospectus. Broad market and industry factors may negatively affect the market price of our ADSs, regardless of our actual

operating performance. Further, a decline in the financial markets and related factors beyond our control may cause the price of our ADSs to decline rapidly and unexpectedly. If the market price of our ADSs after the completion of this offering does

not exceed the initial public offering price, you may not realize any return on your investment in us and may lose some or all of your investment. In the past, securities class action litigation has often been brought against a company following a

decline in the market price of its securities. If we were to become involved in securities litigation, it could s ubject us to substantial costs, divert resources and the attention of management from our business and m aterially and adversely affect

our business, financial condition, and results of operations. The trading price of our ADSs may be influenced by reports published by industry and

equity research analysts. The trading market for our ADSs will be influenced by the research and reports that industry or equity

research analysts publish about us or our business. As a newly public company, the analysts who publish information about our ADSs will have had relatively little experience with us, which could affect their ability to accurately forecast our

results and could make it more likely that we fail to meet their estimates. We will not have any control over the analysts' content and opinions included in their reports. If any of the analysts who cover us issue an a dverse or misleading

opinion regarding us, our business model, financial performance, ADS price or otherwise, our ADS price would likely decline. If one or more of these analysts ceases coverage of our company or fails to regularly publish reports on us, we could lose

visibility in the financial markets, which, in turn, could cause our ADS price or trading volume to decline an d result in the loss of all or a part of your investment in us. Substantial future sales of ADSs in the public market, or the perception that these sales could occur, could cause the price of the ADSs to decline. If our existing shareholders sell, or indicate an intention to sell, substantial amounts of our ADSs in the public m arket after

the lockup and other legal restrictions on resale discussed in this prospectus lapse, the trading price of our ADSs could decline. Upon completion of this offering, we will have

ordinary shares outstanding. Of these shares, only the shares represented by ADSs sold in this offering by the selling shareholder, plus any shares

represented by ADSs sold upon the exercise of the underwriters' option to purchase additional ADSs, will be freely tradable without restriction in the public market immediately following this offering. In connection with this offering, our

officers, directors and the selling shareholder have agreed to be subject to a contractual lock-up with the u nderwriters, which will expire after the end of a lock-up period, described in the sections titled "Ordinary S hares and ADSs Eligible for Future Sale" and "Underwriting." If, upon the expiration of the lock-up period, or under any enforcement

pursuant to certain exceptions to the lock-up agreements, these shareholders sell substantial amounts of our ADSs in the public market or engage in financing transactions involving our ADSs or ordinary shares,

or the market perceives that such

transactions may occur, the market price of our ADSs and our ability to raise capital through an issue of e quity securities in the future could be adversely affected. In addition, in the case of non-payment at maturit y or another event of default,

the providers of the New SoftBank Group Facility may exercise their rights to foreclose on and sell or caus e the sale of our shares that may be pledged as collateral. If such shares are sold, then the market price of our ADSs could be adversely

affected. In the future, SoftBank Group may transfer a portion of its holdings in us to one or more of its affi liates or affiliated investment funds. Such affiliates or affiliated investment funds may have different invest ment strategies and

interests and may decide to sell their holdings to third parties even if SoftBank Group intends to continue to hold the remainder of its holdings. 69 Table of Contents The lock-up agreements contain important exceptions

that govern their applicability, including, with respect to the selling shareholder, any action necessary or a ppropriate for the purposes of pledging, charging or granting any lien, mortgage or other security interest with respect to the ordinary

shares to secure the New SoftBank Group Facility for the benefit of the lenders thereunder and any subse quent transfer pursuant to any foreclosure or enforcement of the security by the lenders; provided that any buyer upon such foreclosure or

enforcement will be obligated to sign the lock-up agreement for the remaining term of the lock-up. See "Or dinary Shares and ADSs Eligible for Future Sale—Lock-up Agreements." Moreover, the representatives of the underwriters may, in

their sole discretion, permit our officers, directors and other shareholders who are subject to these lock-up agreements to sell shares prior to the expiration of the lock-up agreements. Holders of ADSs are not treat ed as holders of our ordinary shares. By participating in this offering you will become a holder of ADSs with underlying ordinary shares in a company incorporated under the laws of

England and Wales. Holders of ADSs are not treated as holders of our ordinary shares, unless they withdr aw the ordinary shares underlying their ADSs in accordance with the deposit agreement and applicable laws and regulations. The depositary, the

custodian or their nominee will be the holder of the ordinary shares underlying the ADSs. Holders of ADSs therefore do not have any rights as holders of our ordinary shares, other than the rights that they have pursuant to the deposit agreement. See

"Description of American Depositary Shares." Holders of ADSs may be subject to limitations on the transf er of their ADSs and the

withdrawal of the underlying ordinary shares. ADSs are transferable on the books of the depositary. However, the depositary may

close its books at any time or from time to time when it deems expedient in connection with the performance of its duties. The depositary may refuse to deliver, transfer or register transfers of ADSs generally when our books or the books of the

depositary are closed, or at any time if we or the depositary think it is advisable to do so because of any r equirement of law, government or governmental body, or under any provision of the deposit agreement, o r for any other reason, subject to the

right of ADS holders to cancel their ADSs and withdraw the underlying ordinary shares. Temporary delays in the cancellation of your ADSs and withdrawal of the underlying ordinary shares may arise because the depositary has closed its transfer books

or we have closed our transfer books, the transfer of ordinary shares is blocked to permit voting at a share holders' meeting or we are paying a dividend on our ordinary shares. In addition, ADS holders may not be able to cancel their ADSs and

withdraw the underlying ordinary shares when they owe money for fees, taxes and similar charges and w hen it is necessary to prohibit withdrawals in order to comply with any laws or governmental regulations th at apply to ADSs or to the withdrawal of

ordinary shares or other deposited securities. See "Description of American Depositary Shares." The depositary for our ADSs is entitled

to charge holders fees for various services, including annual ADS service fees. The depositary for our AD Ss is entitled to charge

ADS holders fees for various services, including for the issuance of ADSs upon deposit of ordinary shares, cancellation of ADSs, distributions of cash dividends or other cash distributions, distributions of ADSs pursuant to share dividends or other

free share distributions, distributions of securities other than ADSs and annual ADS service fees. In the ca se of ADSs issued by the depositary into the DTC, the fees will be charged by the DTC participants to the account of the applicable

beneficial owners of ADSs in accordance with the procedures and practices of the DTC participants as in effect at the time. See "—Risks Relating to Our Status as a Controlled Company and Foreign Private Issu er—Under current law,

transfers of ordinary shares outside the ADR program and the redeposit of ordinary shares into the ADR p rogram will generally be subject to U.K. stamp duty or stamp duty reserve tax and the law may change to cover other transactions, including

transactions in ADSs, which would increase the cost of dealing in ordinary shares or ADSs." 70 Table of C ontents You will not have the same voting rights as the holders of our ordinary shares and may not receiv e

voting materials in time to be able to exercise your right to vote. Except as described in this prospectus an d the deposit

agreement, holders of the ADSs will not be able to exercise voting rights attaching to the ordinary shares r epresented by the ADSs. Under the terms of the deposit agreement, holders of the ADSs may instruct the depositary to vote the ordinary shares

underlying their ADSs. Otherwise, holders of ADSs will not have a right to vote unless they withdraw the o rdinary shares underlying their ADSs to vote them in person or by proxy in accordance with applicable law s and regulations and the Articles.

Even so, ADS holders may not know about a meeting far enough in advance to withdraw those ordinary s hares. If we ask for the instructions of holders of the ADSs, the depositary, upon timely notice from us, will notify ADS holders of the upcoming

vote and arrange to deliver our voting materials to them. Upon our request, the depositary will mail to ADS holders a shareholder meeting notice that contains, among other things, a statement as to the manner in which voting instructions may be

given to the depositary. We cannot guarantee that ADS holders will receive the voting materials in time to ensure that they can instruct the depositary to vote the ordinary shares underlying their ADSs. A sharehol der is only entitled to participate

in, and vote at, the meeting of shareholders, provided that it holds our ordinary shares as of the record dat e set for such meeting and otherwise complies with the Articles. In addition, the depositary's liability to AD S holders for failing to

execute voting instructions or for the manner of executing voting instructions is limited by the deposit agre ement. As a result, holders of ADSs may not be able to exercise their right to give voting instructions or be able to vote in person or by

proxy and they may not have any recourse against the depositary or us if the ordinary shares underlying t heir ADSs are not voted as they have requested or if such ordinary shares cannot be voted. We are entitl ed to amend the deposit agreement and to change the rights of ADS holders under the terms of such agre ement, or to terminate the deposit

agreement, without the prior consent of the ADS holders. We are entitled to amend the deposit agreement and to change the rights

of the ADS holders under the terms of such agreement, without the prior consent of the ADS holders. We and the depositary may agree to amend the deposit agreement in any way we decide is necessary or advantageous to us or to the depositary.

Amendments may reflect, among other things, operational changes in the ADS program, legal developme nts affecting ADSs or changes in the terms of our business relationship with the depositary. In the event t hat the terms of an amendment are

materially disadvantageous to ADS holders, ADS holders will only receive 30 days' advance notice of the amendment, and no prior consent of the ADS holders is required under the deposit agreement. Furthermo re, we may decide to direct the

depositary to terminate the ADS facility at any time for any reason. For example, terminations may occur if we decide to list our ordinary shares on a non-U.S. securities exchange and determine not to continue

to sponsor an ADS facility or when we become the subject of a takeover or a going-private transaction. If the ADS facility will terminate, ADS holders will receive at least 30 days' prior notice, but no

prior consent is required from them. Under the circumstances that we decide to make an amendment to the deposit agreement that is materially disadvantageous to ADS holders or terminate the deposit agreement, the ADS holders may choose to sell their

ADSs or surrender their ADSs and become direct holders of the underlying ordinary shares, but will have no right to any compensation whatsoever. ADS holders may not be entitled to a jury trial with respect to cl aims arising under the deposit agreement, which could result in less favorable

outcomes to the plaintiff(s) in any such action. The deposit agreement governing the ADSs representing o ur ordinary shares

provides that, to the fullest extent permitted by law, holders and beneficial owners of ADSs irrevocably wai ve the right to a jury trial of any claim they may have against us or the depositary arising out of or relating to the ADSs, any ADRs or the

deposit agreement. If this jury trial waiver provision is not permitted by applicable law, an action could proceed under the terms of the

deposit agreement with a jury trial. If we or the depositary opposed a jury trial demand based on the waiver, the court would determine whether the waiver was enforceable based on the facts and circumstances of 71 Table of Contents that case in accordance with the applicable state and federal law. To our knowledge

e, the enforceability of a contractual pre-dispute jury trial waiver in

connection with claims arising under the federal securities laws has not been finally adjudicated by the U.

S. Supreme Court. However, it our understanding that a contractual pre-dispute jury trial waiver

provision is generally enforceable, including under the laws of the State of New York, which govern the de posit agreement, by a federal or state court in the City of New York, which has non-exclusive jurisdiction o ver matters arising under the deposit agreement. In determining whether to enforce a contractual pre-disp ute jury trial waiver provision, courts will generally consider whether a party knowingly,

intelligently and voluntarily waived the right to a jury trial. We believe that this is the case with respect to the deposit agreement and the ADSs. It is advisable that you consult legal counsel regarding the jury waiver provision before agreeing

to be a party to the deposit agreement. If you or any other holders or beneficial owners of ADSs bring a cl aim against us or the

depositary in connection with matters arising under the deposit agreement or the ADSs, including claims u nder federal securities laws, you or such other holder or beneficial owner may not be entitled to a jury trial with respect to such claims,

which may have the effect of limiting and discouraging lawsuits against us and/or the depositary. If a laws uit is brought against us and/or the depositary under the deposit agreement, it may be heard only by a jud ge or justice of the applicable

trial court, which would be conducted according to different civil procedures and may result in different out comes than a trial by jury would have had, including results that could be less favorable to the plaintiff(s) in any such action, depending

on, among other things, the nature of the claims, the judge or justice hearing such claims, and the venue of the hearing. No condition,

stipulation or provision of the deposit agreement or ADRs serves as a waiver by any holder or beneficial o wner of ADSs or by us or the depositary of compliance with any substantive provision of the U.S. federal s ecurities laws and the rules and

regulations promulgated thereunder. The deposit agreement expressly limits our and the depositary's obligations and liabilities. The deposit agreement expressly limits our obligations and liabilities as well as those of the depositary. See "Description of American

Depositary Shares—Limitations on Obligations and Liabilities." Such limitations include the following: • We and the depositary are obligated only to take the actions specifically stated in the deposit agreement without

negligence or bad faith. • The depositary disclaims any liability for any failure to carry out voting instructions, for any manner in which

a vote is cast or for the effect of any vote, provided it acts in good faith and without negligence and in acc ordance with the terms of the deposit agreement. • The depositary disclaims any liability for any failure to determine the lawfulness or practicality of any action,

for the content of any document forwarded to you on our behalf or for the accuracy of any translation of su ch a document, for the investment risks associated with investing in ordinary shares, for the validity or wor th of the ordinary shares, for

any tax consequences that result from the ownership of ADSs, for the creditworthiness of any third party, f or allowing any rights to lapse under the terms of the deposit agreement, for the timeliness of any of our n otices or for our failure to give

notice. • We and the depositary will not be obligated to perform any act that is inconsistent with the terms of the deposit

agreement. • We and the depositary disclaim any liability if we or the depositary are prevented or forbidde n from or subject

to any civil or criminal penalty or restraint on account of, or delayed in, doing or performing any act or thin g required by the terms of the deposit agreement, by reason of any provision, present or future of any law or regulation, or by reason of

present or future provision of any provision of the Articles, or any provision of or governing the securities on deposit, or by reason of any act of God or war or other circumstances beyond our control. 72 Table of C ontents • We and the depositary disclaim any liability by reason of any exercise of, or failure to exercise, a ny discretion

provided for in the deposit agreement or in the Articles or in any provisions of or governing the securities on deposit. • We and the depositary further disclaim any liability for any action or inaction in reliance on the advice or

information received from legal counsel, accountants, any person presenting ordinary shares for deposit, any holder of ADSs or authorized representatives thereof, or any other person believed by either of us in good faith to be competent to give

such advice or information. • We and the depositary also disclaim liability for the inability by a holder to be nefit from any distribution,

offering, right or other benefit that is made available to holders of ordinary shares but is not, under the ter ms of the deposit agreement, made available to you. • We and the depositary also disclaim any liability for any action or inaction of any clearing or settlement system

(and any participant thereof). • We and the depositary may rely without any liability upon any written notic e, request or other document believed

to be genuine and to have been signed or presented by the proper parties. • We and the depositary also d isclaim liability for any consequential or punitive damages for any breach of the

terms of the deposit agreement. These provisions of the deposit agreement limit the ability of ADS holders to obtain

recourse if we or the depositary fail to meet our respective obligations under the deposit agreement. In ad dition, nothing in the deposit

agreement gives rise to a partnership or joint venture, or establishes a fiduciary relationship, among us, the depositary and you as ADS holder. Furthermore, nothing in the deposit agreement precludes the depositary (or its affiliates) from engaging in transactions in which parties

adverse to us or the ADS owners have interests, and nothing in the deposit agreement obligates the depositary to disclose those transactions, or any information obtained in the course of those transactions, to us or to the ADS owners, or to account

for any payment received as part of those transactions. You may not receive distributions on our ordinary shares represented by the ADSs or any

value for them if it is illegal or impractical to make them available to holders of ADSs. The depositary for the ADSs has agreed

to pay to you the cash dividends or other distributions it or the custodian receives on our ordinary shares or other deposited securities after deducting its fees and expenses, and any taxes. You will receive these distributions in proportion to the

number of our ordinary shares your ADSs represent. However, in accordance with the limitations set forth in the deposit agreement, it may be unlawful or impractical to make a distribution available to holders of A DSs. We have no obligation to take

any other action to permit distribution on the ADSs, ordinary shares, rights or anything else to holders of t he ADSs. This means that you may not receive the distributions we make on our ordinary shares or any v alue from them if it is unlawful or impractical to make them available to you. These restrictions may have an adverse effect on the value of your ADSs. Because we do not anticipate

paying any cash dividends on our ordinary shares in the foreseeable future, capital appreciation, if any, will be your sole source of gains and you may never receive a return on your investment. Under English law, a company's accumulated realized profits, to the extent they have not been previously utilized by distribution or

capitalization, must exceed its accumulated realized losses, to the extent that they have not been previou sly written off in a reduction or reorganization of capital duly made (on a non-consolidated 73 Table of Contents basis), before dividends can be paid. Therefore, we must have distributable profits before issuing a dividend. In addition, as a public limited company in England, we will only be able to make a

distribution if the amount of our net assets is not less than the aggregate of our called-up share capital and undistributable reserves and if, and to the extent that, the distribution does not reduce the

amount of those assets to less than that aggregate. We intend to retain earnings, if any, for use in our bus iness and do not anticipate

paying any cash dividends in the foreseeable future. As a result, capital appreciation, if any, on our ADSs will be your sole source of gains for the foreseeable future, and you will suffer a loss on your investment if you are unable to sell your

ADSs at or above the initial public offering price. Investors seeking cash dividends should not purchase o ur ADSs in this offering. Claims of U.S.

civil liabilities may not be enforceable against us. We are incorporated under the laws of England and Wal es and have our

registered office in England. The U.S. and the U.K. do not currently have a treaty providing for reciprocal r ecognition and enforcement of judgments (other than arbitration awards) in civil and commercial matters. Consequently, a final judgment for

payment given by a court in the U.S., whether or not predicated solely upon U.S. securities laws, would n ot automatically be recognized or enforceable in the U.K. In addition, uncertainty exists as to whether Engl ish courts would entertain original

actions brought in England and Wales against us or our directors or senior management predicated upon the securities laws of the U.S. or any state in the U.S. Any final and conclusive monetary judgment for a d efinite sum obtained against us in U.S.

courts would be treated by English courts as a cause of action in itself and sued upon as a debt at commo n law so that no retrial of the issues would be necessary, provided that certain requirements are met. Whe ther these requirements are met in

respect of a judgment based upon the civil liability provisions of the U.S. securities laws, including whethe r the award of monetary damages under such laws would constitute a penalty is an issue subject to determination by the court making such

decision. If an English court gives judgment for the sum payable under a U.S. judgment, the English judg ment will be enforceable by methods generally available for this purpose. These methods generally permit the English court discretion to

prescribe the manner of enforcement. As a result, U.S. investors may not be able to enforce against us or our senior management, Board of

Directors or certain experts named herein who are residents of the U.K. or countries other than the U.S. a ny judgments obtained in U.S. courts in civil and commercial matters, including judgments under the U.S. federal securities laws. The requirements of being a public company may strain our resources, divert man agement's attention, and affect our ability to attract and retain

qualified members of our Board of Directors. As a public company, we will be subject to the reporting requirements of the Exchange

Act, the Sarbanes-Oxley Act, the listing requirements of Nasdaq, on which our ADSs will trade, and other applicable securities rules and regulations. Compliance with these rules and regulations will increase our legal and financial compliance costs, make some activities more difficult, time-consuming, or costly, a nd increase demand on our systems and resources. The Exchange Act requires, among other things, that we file annual and current reports with

respect to our business and operating results. The Sarbanes-Oxley Act requires, among other things, that we maintain effective disclosure controls and procedures and internal control over financial reporting. In o rder to maintain and, if required,

improve our disclosure controls and procedures and internal control over financial reporting to meet this st andard, significant resources and management oversight may be required. As a result, management's att ention may be diverted from other

business concerns, which could harm our business and operating results. Although we have already hired additional employees to comply with these requirements, we may need to hire more employees in the fut ure, which will increase our costs and

expenses. In addition, changing laws, regulations, and standards relating to corporate governance and public disclosure are creating

uncertainty for public companies, increasing legal and financial compliance costs and making some 74 Ta ble of Contents activities more time consuming. These laws, regulations, and standards are subject to varying interpretations, in many cases due to their lack of specificity, and, as a result, their application

in practice may evolve over time as new guidance is provided by regulatory and governing bodies. This co uld result in continuing uncertainty regarding compliance matters and higher costs necessitated by ongoin g revisions to disclosure and governance

practices. We intend to invest resources to comply with evolving laws, regulations, and standards, and this investment may result in increased general and administrative expenses and a diversion of management's time and attention from

revenue-generating activities to compliance activities. If our efforts to comply with new laws, regulations, a nd standards differ from the activities intended by regulatory or governing bodies due to ambiguities relate d to practice, regulatory

authorities may initiate legal proceedings against us and our business may be harmed. We also expect that being a public company combined

with these new rules and regulations will make it more expensive for us to obtain director and officer liability insurance, and we may be required to accept reduced coverage or incur substantially higher costs to obtain coverage. These factors also

could make it more difficult for us to attract and retain qualified senior management and members of our B oard of Directors, particularly to serve on our audit committee and remuneration committee. As a result of disclosure of information in this prospectus and in filings required of a public company, our business and financial condition

will become more visible, which we believe may result in threatened or actual litigation, including by comp etitors and other third parties. If such claims are successful, our business and operating results could be h armed, and even if the claims do

not result in litigation or are resolved in our favor, these claims, and the time and resources necessary to r esolve them, could divert the resources of our management and materially harm our business, operating r esults and financial condition. Risks Relating to U.S. and U.K. Tax Regimes If we

are (or one of our non-U.S. subsidiaries is) a "controlled foreign corporation" (a "CFC"), there could be adverse U.S. federal income tax consequences to certain U.S. investors. Generally, if a U.S. investor is treated as owning, directly, indirectly or constructively, at least 10% of either the total value

or total combined voting power of our stock, such U.S. investor may be treated as a "United States shareh older" with respect to each CFC in our group, if any, for U.S. federal income tax purposes. A non-U.S. cor poration will generally be classified as a CFC for U.S. federal income tax purposes if United States shareh olders own, directly, indirectly or constructively, more than 50% of either the total

value or the total combined voting power of the stock of such corporation. Because SoftBank Group curre ntly owns, and immediately after this offering will continue to own, more than 50% of our ordinary shares, we will be a CFC at the time of this

offering or in the future if SoftBank Group owns, directly or indirectly, 50% or more (by value) of the stock of a U.S. subsidiary. In addition, because our group includes U.S. subsidiaries, our current non-U.S. subsidiaries and potentially any future newly formed or acquired non-U.S. subsidiaries generally will be treated as CFCs, regardless of whether we are treated

as a CFC. A United States shareholder of a CFC may be required to annually report and include in its U.S. taxable income its pro rata share of "Subpart F income," "global intangible low-taxed income" and invest ments of earnings in U.S. property, regardless of whether such CFC makes any distributions to its shareholders. Additionally, an individual that is a United States shareholder with respect to a CFC generally would not be

allowed certain tax deductions or foreign tax credits that would be allowed to a United States shareholder

that is a U.S. corporation. Failure to comply with CFC reporting obligations may also subject a United Stat es shareholder to significant

monetary penalties and may prevent the statute of limitations with respect to such United States sharehol der's U.S. federal income tax return for the year for which reporting was due from expiring. We cannot provide any assurances that we will

furnish to any United States shareholder information that may be necessary to comply with the reporting a nd tax paying obligations applicable under the CFC rules of the Internal Revenue Code of 1986, as amen ded (the "Code"), and the United

States Internal Revenue Service (the "IRS") has provided only limited guidance on situations in which investors may rely on publicly available information to comply with their reporting and tax paying obligations with respect 75 Table of Contents to foreign-controlled CFCs. U.S. investors should consult their tax advisors regarding the potential application of these rules to their investment in our ordinary shares or ADSs. If we are a passive foreign investment company (a "PFIC") for any taxable year, there could be adverse U.S. federal income tax consequences to

U.S. investors. In general, we will be a PFIC for any taxable year in which, after the application of certain I ook-through rules

with respect to our subsidiaries, either (1) 75% or more of our gross income consists of passive income or (2) 50% or more of the average quarterly value of our assets consists of assets that produce, or are held for the production of, passive

income (including cash and cash equivalents). For purposes of these tests, passive income generally includes, among other things, dividends, interest, gains from certain sales or exchanges of investment proper ty and certain rents and royalties. If

we are a PFIC for any taxable year during which a U.S. investor holds our shares, we will generally continue to be treated as a PFIC with respect to such U.S. investor for all succeeding taxable years during which such U.S. investor holds our

ordinary shares or ADSs, even if we cease to meet the threshold requirements for PFIC status. Such U.S. investor may be subject to adverse tax consequences with respect to our ordinary shares or ADSs, including ineligibility for any preferential tax

rates on capital gains or on actual or deemed dividends, interest charges on certain taxes treated as defer red and additional reporting requirements. We cannot provide any assurance that we will furnish to such U.S. investor information that may be

necessary to comply with the reporting and tax paying obligations applicable under the PFIC rules of the Code. Such U.S. investor should consult its tax advisors regarding the potential application of these rules to their investment in our ordinary

shares or ADSs. Based upon the value of our assets and the nature and composition of our income and a ssets, we expect that we will not be

classified as a PFIC for the taxable year ended March 31, 2023, although no assurances can be made in t his regard. However, the determination of whether we are a PFIC is a fact-intensive determination made o n an annual basis applying principles

and methodologies that in some circumstances are unclear and subject to varying interpretation. For insta nce, for our current and future taxable years, the total value of our assets (including goodwill) for PFIC tes ting purposes may be determined in

part by reference to the market price of our ordinary shares or ADSs from time to time, which may fluctuat e considerably. If our market capitalization declines while we hold a substantial amount of cash and cash equivalents for any taxable year, we

may be a PFIC for that taxable year. Furthermore, under the income test, our status as a PFIC depends on the composition of our income for the relevant taxable year, which will depend on the transactions we enter into in the future and our corporate

structure. The composition of our income and assets is also affected by how we spend the cash we raise in any offering. As a result, there can be no assurance that we will not be treated as a PFIC for the current or any future taxable year and our

U.S. counsel expresses no opinion with respect to our PFIC status for any prior, current or future taxable year. Even if we determine that we are not a PFIC for a taxable year, there can be no assurance that the I RS will agree with our

conclusion and that the IRS would not successfully challenge our position. For further discussion of the P

FIC rules and the adverse

U.S. federal income tax consequences in the event we are classified as a PFIC, as well as certain elections that may be available to U.S. investors, see the section of this prospectus titled "Material Tax Consider ations—Material U.S.

Federal Income Tax Considerations for U.S. Holders—Passive Foreign Investment Company Rules." Changes and uncertainties in the tax system

in the countries in which we have operations, could materially adversely affect our financial condition and results of operations, and reduce net returns to our shareholders. We conduct business globally and file in come tax returns in multiple jurisdictions. Our consolidated effective income tax rate, and the tax

treatment of our ADSs and ordinary shares, could be materially adversely affected by several factors, including: changing tax laws, regulations and treaties, or the interpretation thereof; tax policy initiatives and re forms under consideration (such

as those related to the Inclusive Framework (as defined below), the European Commission's state aid investigations and other initiatives); the practices of tax 76 Table of Contents authorities in jurisdictions in which we operate; and the resolution of issues arising from tax audits or examinations and any related interest or penalties. Such changes may include (but are not

limited to) the taxation of operating income, investment income, dividends received or (in the specific cont ext of withholding tax) dividends paid, or the stamp duty or SDRT treatment of our ADSs or ordinary share s. The Organisation for Economic Co-Operation and Development ("OECD") and the G20 Inclusive Frame work on Base Erosion and Profit

Shifting (the "Inclusive Framework") have put forth two proposals—Pillar One and Pillar Two—that revise t he existing profit allocation and nexus rules and ensure a minimal level of taxation, respectively. In July 20 23, the U.K.

enacted legislation to implement the OECD framework for Pillar 2, part of which will apply effectively from January 1, 2024. Other countries are also actively considering changes to their tax laws to adopt certain p arts of the Inclusive

Framework's proposals. As this framework is subject to further negotiation and implementation by each m ember country, the timing and ultimate impact of any such changes on our tax obligations are uncertain. T hese changes, if enacted into law,

could have an adverse impact on our effective tax rate, income tax expense and cash flows. We are continuing to monitor legislative developments and are in the process of evaluating the potential impact of the U.K. and other legislation on our

financial position, future results of operations and cash flows. We believe that our provision for income tax es is reasonable, but the

ultimate tax outcome may differ from the amounts recorded in our financial statements and may materially affect our financial results in the period or periods in which such outcome is determined. We are unable to predict what tax reform may be

proposed or enacted in the future or what effect such changes would have on our business, but such changes, to the extent they are brought into tax legislation, regulations, policies or practices in jurisdictions in which we operate, could increase

the estimated tax liability that we have expensed to date and paid or accrued on our financial statements, and otherwise affect our financial position, future results of operations, cash flows in a particular period and overall or effective tax

rates in the future in countries where we have operations, reduce post-tax returns to our shareholders and increase the complexity, burden and cost of tax compliance. Additionally, our future tax liability

could be impacted by changes in accounting principles or changes in applicable tax jurisdictions. In addition, we may periodically

restructure our legal entities and if taxing authorities were to disagree with our tax positions in connection with any such restructurings, our tax liability could be materially affected. In connection with any restructuring we could also incur

additional charges associated with consulting fees and other charges. We carry out extensive research and development activities, and as

a result, we benefit in the U.K. from the research and development expenditure credit ("RDEC") regime, w hich provides relief against U.K. corporation tax. Broadly, RDEC provides a tax credit currently equal to 20 % of 'qualifying

research and development expenditure' incurred from April 1, 2023 (the rate was previously 13% of qualif ying research and development expenditure incurred from April 1, 2020 to March 31, 2023) by certain companies where certain

criteria are met. To the extent a company cannot utilize the RDEC against U.K. corporation tax then certain rules apply that allow the RDEC to, among other things, reduce the tax liability of certain specified taxes (for example, value added tax or

employee taxes), or be surrendered to a group company, and to the extent it is not possible to utilize the RDEC in full, then the net tax credit is paid to the company by HMRC in cash. Between January 2023 and March 2023, the U.K. government ran a

consultation on the design of a single, simplified R&D tax relief scheme, expected to be based on the RD EC scheme, which would merge the existing RDEC and small and medium-sized enterprise R&D relief. The U.K. government is considering the responses and no decision has yet been made. We expect that, if implemented, the new scheme will be in place for expenditures incurred after April 1, 2024. We also bene fit from the U.K.'s "patent box" regime, which allows certain profits attributable to revenues from patented products (and other qualifying income) to be taxed at an effective corporation tax rate of 10%. If, however, there are unexpected adverse

changes to the RDEC or the "patent box" regime (including any such changes which result from the U.K. government's response to its consultation on the design of a single, simplified R&D tax relief scheme), or f or any reason we are

unable to qualify for such tax incentives, then our business, results of operations and financial condition m ay be adversely affected. 77 Table of Contents SPECIAL NOTE REGARDING FORWARD-LOOKING ST ATEMENTS This prospectus contains forward-looking statements that reflect our plans, beliefs, expectations and current views with respect to, among

other things, future events and financial performance. The forward-looking statements appear in a number of places in this prospectus, including, but not limited to, the sections titled "Prospectus Summary," "Risk Factors,"

"Management's Discussion and Analysis of Financial Condition and Results of Operations" and "Business". Forward-looking statements are based on our management's beliefs and assumptions and on information currently

available to our management. In some cases, you can identify forward-looking statements by the words "may," "might," "will," "could," "would,"

"should," "expect," "is/are likely to," "intend," "plan," "objective," "anticipate," "believe," "estimate," "predict," "potential,"

"target," "continue" and "ongoing," or the negative of these terms or other comparable terminology intende d to identify statements about the future. The forward-looking statements and opinions contained in this prospectus are based upon information available to us as of the date of this prospectus and, while we beli eve such information forms a reasonable basis for such statements, such information may be limited or in complete, and our statements should not

be read to indicate that we have conducted an exhaustive inquiry into, or review of, all potentially available relevant information. These statements involve known and unknown risks, uncertainties and other important factors that may cause our

actual results, levels of activity, performance or achievements to be materially different from the informatio n expressed or implied by these forward-looking statements. Such risks and uncertainties include, but are not limited to: • our future financial performance, including our expectations regarding our revenues, cost of sales, gross profit,

operating expenses and other operating results, as well as our ability to maintain profitability; • our dependence on the semiconductor and electronics industries and the demand for the products of our customers;

• our dependence on the compatibility of our products with the manufacturing and design processes of our customers; • our reliance on third parties to market and sell chips and end products incorporating our products, as well as

add value to our licensed products; • our dependence on a limited number of customers for a significant p ortion of our revenue; • our ability to attract new customers and sell additional products to our existing cus tomers; • the loss of any of our senior management personnel or one or more key employees or our inability to attract and

retain qualified personnel; • our ability to adequately fund our research and development efforts; • risks rel

ated to the availability of development tools, systems software, EDA tools and operating systems compatible with our architecture; • our ability to protect our proprietary products and our brand, and the costs of protecting such IP rights,

particularly as a result of litigation; • fluctuation and unpredictability of our results; • our ability to verify roy alty amounts owed to us under our licensing agreements; • risks related to foreign exchange fluctuations; • changes in our effective tax rate; • risks associated with organic growth or growth from strategic investm

ents or acquisitions we make, and the risk

of failing to effectively manage our growth; 78 Table of Contents • risks associated with the slow development of the market for our connectivity, device and data management

platform; • the possibility of cyberattacks, breaches of our security controls and unauthorized access to our data or a

customer's data; • our ability to satisfy data protection, security, privacy or other government- and industry -specific

requirements; • risks associated with the interests of SoftBank Group conflicting with the interests of other holders of our

ordinary shares and ADSs; • the effects of global general economic conditions, political factors, war or ho stility, pandemics and other

events outside of our control; and • other factors relating to our financial condition and arrangements. You should refer to the section titled "Risk Factors" for a discussion of important factors that may cause our actual results to

differ materially from those expressed or implied by our forward-looking statements. As a result of these factors, we cannot assure you that the forward-looking statements in this prospectus will prove to be accurate. Furthermore, if our

forward-looking statements prove to be inaccurate, the inaccuracy may be material. In light of the significa nt uncertainties in these forward-looking statements, you should not regard these statements as a represe ntation or warranty by us or any

other person that we will achieve our objectives and plans in the manner that we anticipate, in any specified time frame, or at all. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new

information, future events or otherwise, except as required by law, applicable regulations or the rules of a ny stock exchange to which we are subject. In addition, statements that "we believe" and similar statements reflect our beliefs and opinions on the relevant subject. These

statements are based upon information available to us as of the date of this prospectus, and while we beli eve such information forms a reasonable basis for such statements, such information may be limited or in complete, and our statements should not

be read to indicate that we have conducted an exhaustive inquiry into, or review of, all potentially available relevant information. These statements are inherently uncertain and investors are cautioned not to unduly rely upon these statements. You should read this prospectus and the documents that we reference in the prospectus and have filed as exhibits to the registration

statement, of which this prospectus is a part, completely and with the understanding that our actual future results may be materially different from what we expect. We qualify all of our forward-looking statements by these cautionary statements. 79 Table of Contents USE OF PROCEEDS We will not receive any proceed from the sale of the ADSs by the selling shareholder (including any proceeds from any sale of ADSs pursuant

to the underwriters' option to purchase additional ADSs from the selling shareholder). All net proceeds from the sale of ADSs in this offering will go to the selling shareholder. 80 Table of Contents DIVIDEND POLICY We intend to retain any earnings for use in our business and do not currently intend to pay dividends on our ordinary shares or ADSs. The

declaration and payment of any future dividends will be at the discretion of our Board of Directors and will depend upon our results of operations, cash requirements, financial condition, contractual restrictions, any future debt agreements or

applicable laws and other factors that our Board of Directors may deem relevant. See the section titled "Ri sk Factors—Risks Relating to this Offering and Ownership of Our Securities—Because we do not anticipa te paying any cash

dividends on our ordinary shares in the foreseeable future, capital appreciation, if any, will be your sole so

urce of gains and you may never receive a return on your investment." Under the laws of England and Wa les, among other things, we may only pay dividends if we have sufficient distributable reserves (as determined

on a non-consolidated basis), which are our accumulated realized profits that have not been previously distributed or capitalized less our accumulated realized losses, so far as such losses have not been previously written off in a reduction or reorganization of capital. In addition, as a public limited company in England, we will only be able to make a distribution if the amount of our net assets is not less than the aggregate of our called-up

share capital and undistributable reserves and if, and to the extent that, the distribution does not reduce the amount of those assets to less than that aggregate. 81 Table of Contents CORPORATE REORGANIZA TION On April 9, 2018, Arm Holdings Limited was incorporated as a wholly-owned subsidiary of Arm Limit ed under the laws of England and Wales

with nominal assets and liabilities, contingencies and commitments. After consummating the corporate re organization described herein, including the re-registration of Arm Holdings Limited as a public limited company, Arm Holdings plc became the ultimate holding company for Arm Limited. Arm Limited in turn was incorporated as a private company with limited liability under the laws of England and Wales on Novemb er 12, 1990. Arm Holdings plc is a holding company which, since formation, has not conducted any operations other than activities incidental to the

maintenance of its legal existence, the corporate reorganization and this offering. Investors in this offering will only acquire, and this prospectus only describes the offering of, ADSs representing ordinary shares of Arm Holdings plc. Ordinary

shares of Arm Holdings plc will not be offered to investors as part of this offering. The corporate reorganiz ation took place in several

steps, all of which were completed prior to the completion of this offering. We refer to these steps, which a re discussed below, as our "corporate reorganization." Amendment of the Articles of Association of, and Fi rst Reorganization of Share Capital of, Arm Holdings Limited On , 2023, Arm Holdings Limited am ended its articles of association to

permit its merger reserve to legally be used to pay up the shares allotted as a bonus issue, and to allow the creation of a new class of deferred shares (which carry no or extremely limited voting rights, and no right to share in the income or

capital of Arm Holdings Limited). On , 2023, Arm Holdings Limited undertook a reorganization of it s share capital to sub-divide its share

capital of 100 ordinary shares of £1.00 each into 100,000 ordinary shares of £0.001 each. Distribution of Ordinary Shares of Arm Holdings

Limited by Arm Limited On , 2023, Arm Limited distributed

100,000 ordinary shares of £0.001 each in the capital of Arm Holdings Limited (such number of shares to gether constituting 100% of the ordinary shares of Arm Holdings Limited) to Kronos II LLC, Arm Limited's majority shareholder

immediately prior to the distribution. We refer to the shares of Arm Holdings Limited distributed to Kronos I LLC as the "Dividend Shares." Exchange of Ordinary Shares of Arm Limited for Shares of Arm Holdings Limited Following the completion of the distribution of the Dividend Shares, on

, 2023, Kronos II LLC transferred its entire shareholding in the capital of Arm Limited, being 1,025, 233,999 ordinary shares of £0.001 each, to Arm Holdings Limited in

exchange for receiving 1,025,133,999 newly issued ordinary shares of £0.001 each in the capital of Arm Holdings Limited, and SVF HoldCo (UK) Limited transferred its entire shareholding in the capital of Arm Li mited, being one ordinary

share of £0.001, to Arm Holdings Limited in exchange for receiving one newly issued ordinary share of £0 .001 in the capital of Arm Holdings Limited. We refer to this as the "Share Exchange." Following the Share Exchange, the

former holders of shares in Arm Limited now hold shares in Arm Holdings Limited of the same class and in the same proportions as their previous shareholdings in Arm Limited. Arm Limited became a wholly-own ed subsidiary of Arm Holdings Limited as a

result of the Share Exchange. As a result of the Share Exchange, an English company law merger reserve in Arm Holdings Limited was created. First

Bonus Issue of Arm Holdings Limited Following the completion of the Share Exchange, on

, 2023, Arm Holdings Limited capitalized a portion of the amount standing to the credit of its merge r reserve and applied such sums in paying up in full new 82 Table of Contents ordinary shares to its share holders, which we refer to as the "First Bonus Issue." The First Bonus Issue was effected by the issuance of

ordinary shares of £0.001 each to Kronos II LLC and

ordinary shares of £0.001 each to SVF HoldCo (UK) Limited, in proportion to their shareholdings in Arm Holdings Limited.

We refer to the shares issued pursuant to the First Bonus Issue as the "First Bonus Shares." Reduction of Capital of Arm Holdings Limited Subsequent to the First Bonus Issue, on , 2023, Arm Holdings Limited reduced its share capital by way of the cancellation of all of the First Bonus Shares pursuant to Pa rt 17 of the Companies Act in order to create distributable reserves, which we refer to as the "Capital Red uction." Immediately

after the Capital Reduction, Kronos II LLC and SVF HoldCo (UK) Limited held 1,025,233,999 ordinary sha res of £0.001 each, which we refer to as the "Post-Reduction Shares," and one ordinary share of £0.001, r espectively, in the

capital of Arm Holdings Limited. As a result of the cancellation of all the First Bonus Shares, English comp any law distributable reserves in Arm Holdings Limited were created. Second Bonus Issue of Arm Holdings Limited Following the completion of the Capital Reduction, on , 2023, Arm

Holdings Limited capitalized the remaining amount standing to the credit of its merger reserve and applied such sums in paying up in full new ordinary shares, which we refer to as the "Second Bonus Issue." The Second Bonus Issue was

effected by the issuance of 1,025,233,999 ordinary shares of £0.001 each to National City Nominees Limit ed as the nominee for Citibank, N.A. – London Branch pursuant to the direction of Kronos II LLC. Second Reorganization of Share Capital of Arm Holdings Limited Subsequent to the completion of the Second Bo nus Issue, on , 2023, Arm

Holdings Limited undertook a second reorganization of its share capital to re-designate all of the Post-Red uction Shares as deferred shares of £0.001 each on a one-for-one basis, which we refer to as the "Second Reorganization of Share Capital." On , 2023, Arm Holdings Limited

repurchased these deferred shares for nominal consideration and cancelled such deferred shares. Re-reg istration of Arm Holdings Limited as a Public

Limited Company Following the completion of the Second Reorganization of Share Capital, on

, 2023, Arm Holdings Limited re-registered as a public limited company under the laws of England and Wales and changed its name from Arm Holdings Limited to Arm Holdings plc. Certain special resoluti ons passed by the shareholders of Arm Holdings Limited approved the re-registration as a public limited c ompany,

the name change to Arm Holdings plc and the adoption of new articles of association for Arm Holdings plc appropriate for a public limited company. 83 Table of Contents CAPITALIZATION The following table set s forth our cash and cash equivalents and capitalization as of June 30, 2023: • on an actual basis, derived from our unaudited financial statements included elsewhere in this prospectus; and • on an as adjusted b asis to give effect to the corporate reorganization and the vesting of equity awards in

connection with this offering. You should read this information together with our financial statements and related

notes appearing elsewhere in this prospectus and the information set forth under the sections titled "Prese ntation of Financial and Other Information" and "Management's Discussion and Analysis of Financial Condition and Results

of Operations." As of June 30, 2023 Actual As Adjusted (in millions except par value and share data) Cas h and cash equivalents \$ 1,248 Equity attributable to owners of the Company: Ordinary shares, \$0.001 par value, 1,025,234,000 shares authorized, issued and outstanding as of

June 30, 2023 2 Additional paid-in capital 1,275 Accumulated other comprehensive income 382 Retained earnings 2,562 Total equity \$ 4,221 Total capitalization \$ 5,469 84 Table of Contents MANAGEMENT'S D ISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS You should read the following discussion and analysis of our financial condition and results of operations together with our consolidated

financial statements and related notes appearing elsewhere in this prospectus. Some of the information c ontained in this discussion and analysis, including information with respect to our plans and strategy for o

ur business and our expectations with

respect to liquidity and capital resources, includes forward-looking statements. These forward-looking stat ements are subject to numerous risks and uncertainties, including, but not limited to, those risks and uncertainties described in the

"Risk Factors" and "Special Note Regarding Forward-Looking Statements" sections in this prospectus. Our actual results could differ materially from the results described in or implied by these forward-looking statements. Overview Arm architects, develops, and

licenses high-performance, low-cost, and energy-efficient CPU products and related technology, on which many of the world's leading semiconductor companies and OEMs rely to develop their products. Our energy-efficient CPUs have enabled advanced computing in greater than 99% of the world's smartphones , for the year ended December 31, 2022, and more than 250 billion chips, cumulatively, powering everything from the tiniest of sensors to

the most powerful supercomputers. We enable any company to make a modern computer chip through the unique combination of our energy-efficient CPU IP and related technologies and our unmatched ecosystem of technology partners. Our primary product offerings are leading CPU products that address diverse performance, power, and cost

requirements. Complementary products such as GPUs, System IP, and compute platforms are also availa ble and enable high-performance, efficient, reliable, system-level creation for a wide range of increasingly sophisticated devices and applications.

Our development tools and robust software ecosystem have further solidified our position as the world's most widely adopted processor architecture. Our partners include leading semiconductor technology supp liers (including foundries and EDA

vendors), firmware and operating system vendors, game engine vendors, software tool providers and application software developers. Our solution, combined with the breadth of our software ecosystem and the millions of chip design engineers and

software developers that utilize it, has created a virtuous cycle of adoption, which means that software de velopers write software for Arm-based devices because it offers the biggest market for their products, and chip designers choose Arm processors because they have the broadest support of software applications. Today, Arm CPUs run the vast

majority of the world's software, including the operating systems and applications for smartphones, tablets and personal computers, data centers and networking equipment, and vehicles, as well as the embedded operating systems in devices such

as smartwatches, thermostats, drones and industrial robotics. The exponential rise in smart devices in bot h consumer and enterprise markets has increased the demand for chips that provide more computational capability while optimizing for energy

efficiency. This trend has driven the dramatic growth of Arm CPUs over the past several years. The scale of our reach continues to expand, with more than 30 billion Arm-based chips reported as shipped in the fiscal year ended March 31, 2023 alone, representing an approximately 70% increase since the fiscal year ended March 31, 2016. Our creation of the Arm CPU architecture, the world's most widely used CPU architecture, has resulted in the proliferation and evolution

of computers as people know them today. We enabled the mobile phone and smartphone revolution, and through our focus on energy efficiency and our history of continuous innovation, we have enabled new cat egories of "smart" consumer

electronics. Today, we are redefining what is possible in industries such as cloud computing, automotive, and IoT. As a result, in the fiscal year ended March 31, 2023, more than 260 companies reported that the y had shipped Arm-based chips, and we estimate that approximately 70% of the world's population uses Arm-based products. We have long-standing, significant market share in high-value markets, such as mo bile applications processors, which enables us to invest in

other growth opportunities. Our long-term growth strategy includes 85 Table of Contents expanding our m arket share in growth markets, including cloud compute, networking equipment, automotive and consumer electronics. We believe that the increasing need for high-powered and

energy-efficient computing, as well as our continued investments, will enable us to grow our share in thes e segments. We also intend to expand our system IP and platform product offerings by continuing to deve lop a broader set of systems IP

specifically developed for use with Arm processors. Across all our end markets and products, we believe t

hat, as chip designs become more advanced and complex, our investments in additional functionality, hig her performance, higher efficiency, and

more specialized designs will allow us to deliver more value to our partners. We have achieved significant growth since our inception.

For our fiscal years ended March 31, 2023, 2022 and 2021, our total revenue was \$2,679 million, \$2,703 million and \$2,027 million, respectively. Over that same period, net income from continuing operations was \$524 million.

\$676 million and \$544 million, respectively. Our Business Model We have a flexible business model for lic ensing products to customers, and we are continuously assessing our ability to provide greater

flexibility to our customers and maximize the number of design wins for our products. Our customers licen se our products for a fee, which gives them access to our products and enables them to develop Arm-bas ed processors. Once a processor has been designed and manufactured with our products, we receive a per-unit royalty on substantially all Arm-based chips shipped by our

customers. Our business model enables the widest range of customers to access Arm products through a n agreement best suited to their particular business needs. Our licensing and royalty business model includes: • Arm Total Access Agreement s: Under an Arm Total Access agreement, we license a portfolio of CPLI designs and related technologies to a customer in return for an annual fee determined at

portfolio of CPU designs and related technologies to a customer in return for an annual fee determined at execution of the agreement. We retain the right, from time to time, to add or remove specific products from the package. The agreement is for a

fixed term and may limit the number of concurrent chip designs that may use products from the package.

• Arm Flexible Access Agreement s : Under an Arm Flexible Access agreement, we license a

portfolio of CPU designs and related technologies to a customer in return for an annual fee determined at execution of the agreement. Unlike an Arm Total Access license, the package of products licensed pursua nt to an Arm Flexible Access agreement

will not contain our latest products. Although customers are free to experiment with products contained in the Arm Flexible Access package, they must pay a single use license fee for specific products if they inclu de Arm products in a final chip

design "tape out," when the final result of a semiconductor chip design is sent for manufacturing. As with a n Arm Total Access agreement, we retain the right, from time to time, to add or remove specific products f rom the package. • Technology Licensing Agreements (TLA): Under a TLA, we license a single CPU design or other

technology design to a customer in return for a fixed license fee. The license may be limited by term (i.e., t he number of years during which the licensee is entitled to incorporate our products in new chip designs, but licensees typically have the

right to manufacture designs perpetually) and/or by number of uses (i.e., the number of concurrent chip d esigns that may use our products). • Architecture License Agreements (ALA): Under an ALA, the licensee is allowed to develop their own

highly customized CPU designs that is compliant with the Arm ISA for a fixed architecture license fee. As t he creation of an optimized CPU is very costly and time consuming, architecture licensees will often also li cense Arm CPU designs to use

either as a complementary processor alongside the licensee's Arm-compliant CPU design, or in other chip s where the licensee's own design is unsuitable. • Royalty Fees: We generate the majority of our revenue from customers who enter into

license agreements, pursuant to which we receive royalty fees based on average selling price of the custo mer's Arm-based chip or a fixed fee per chip. Royalty revenues are impacted primarily by the

adoption of our products by the licensee as well as other factors, such as product lifecycles, customer's b usiness performance, market trends and global supply constraints. In the fiscal year ended March 31, 202 3, royalty revenue

represented 63% of our total revenue. 86 Table of Contents Historically, most customers licensed our products under the terms of a TLA. In 2019 and

2021, we introduced the Arm Flexible Access and Arm Total Access agreements, respectively, to enable the widest range of customers to access our products through methods best suited to their particular business needs. We believe that the Arm Total

Access and Arm Flexible Access agreements provide enhanced flexibility for our customers (as compared to the TLA business model) and increase the number of chip designs using our products. While certain c

ustomers will elect to remain TLA customers,

some customers are in the process of transitioning from TLAs to Arm Total Access and Arm Flexible Access agreements. We may experience variability in license revenues due to the timing of product deliveries within each TLA, Arm Total Access and Arm

Flexible Access agreement. However, because Arm Total Access and Arm Flexible Access agreements a re renewable in nature, as customers transition away from TLAs, we expect our visibility into future licens e revenues to improve. We typically are able to command a royalty for chips that contain our products, which creates a long-term recurring revenue opportunity from

each design win. We typically see sustained revenue streams from older chips, as products containing tho se chips continue to be sold and older processors are incorporated into new chips, creating a cumulative effect that fuels long-term growth. For

example, based on royalty revenue information provided to us by customers in quarterly royalty reports, a pproximately 46% of our royalty revenue for the fiscal year ended March 31, 2023 came from products released between 1990 to 2012.

Additionally, as we transition to more Arm Total Access and Arm Flexible Access licenses, we expect more of our products to be incorporated into more of our customers' chip designs, and our royalty revenue to i ncrease over time as a result. Key Factors and Trends Affecting Our Operating Results We believe that the growth of our business and our future success are dependent upon many factors, including those described in the section

titled "Risk Factors" and elsewhere in this prospectus as well as the factors described below. While each of these factors presents significant opportunities for us, these factors also pose challenges that we must successfully address in

order to sustain the growth of our business and enhance our results of operations. Global Demand for Se miconductor Products and Cyclical Nature of

the Semiconductor Industry Semiconductor chips are essential components in consumer, enterprise, and automotive electronics, which

has resulted in sustained and increasing long-term demand for semiconductor chips, a significant percent age of which contain our products. Our license and royalty revenues are, in part, affected by market conditions in the 87 Table of Contents semiconductor industry, which is cyclical by nature and impacted by broad economic factors, such as worldwide gross domestic product and consumer and enterprise spending. While the semiconductor

industry has experienced significant, prolonged, and sometimes sudden downturns in the past, we expect there to be continued and increasing demand for semiconductors over the long term as macro trends driv e device manufacturers to produce more

powerful and energy-efficient devices. Because our royalty revenue is dependent on the number of Arm-p owered chips shipped by our customers, dislocations created by cyclical, economic factors generally affect demand for our customers' chips and, consequently, may result in variability in our

operating performance. Royalties are recognized on an accrual basis in the quarter in which the customer ships products incorporating our products. A material portion of the accrual is estimated using trend analy sis of market and sales data as well

as customer-specific financial information with a true-up in the following quarter based on actual sales dat a once received. Accordingly, differences between our estimated market trends and our customers'

forecasts of their chip shipments can lead to variability in our royalty revenues. Our Market Share Across End Markets Arm CPUs are the world's most widely licensed and deployed processors. Our products are used in almost all smartphones, the majority of

tablets and digital TVs, and a significant proportion of all chips with embedded processors, including for b oth consumer and enterprise applications. For the year ended December 31, 2022, we had a greater than 99% share of the smartphones market and

a very high share in a range of other electronic devices, from digital TVs to drones. As new high-growth m arkets for electronics emerge and incorporate more AI and ML workloads, they require our more advance d processor designs in areas such as cloud

computing, the automotive industry, and the IoT economy. Our operating and financial performance is dep endent, in large part, upon maintaining our market share in the smartphone and consumer electronics markets and maintaining or growing market

share in our other target markets. Ability to Provide Our Customers with More Value Per Chip We believe

our ability to continue to develop more advanced products and offer increasingly comprehensive product packages, including providing

more complete subsystems, will encourage greater use of our products by existing and prospective custo mers. For example, some licensees may combine multiple different Arm CPUs in a single chip, Arm CPUs with other Arm IP such as Arm GPUs, or deploy

Arm CPU implementations with more than 100 cores. Some customers may be better served by the integration of our IP into a subsystem with additional information to assist in fabrication. For chips where our products have provided more value, we will

typically receive a higher royalty rate per chip. Accordingly, we believe that our investments in higher perf ormance, higher efficiency, and more specialized designs will drive greater demand for our products and higher value for our customers,

which is expected to result in higher royalty fees. Our future performance is dependent on our continued a bility to provide value to customers, and our ability to drive additional value through technological innovati on. Increasing Design Wins with Existing and Prospective Customers We have in the past and will continue to make significant investments in research and development to ensure that we can develop products suitable for new opportunities with existing and prospective customers. A key measure of our success is o ur customer design wins. Because we are often embedded within our customers' R&D functions, we typic ally have significant, unique

visibility into our customers' product development pipelines, which we believe positions us to capture desi gn wins to a greater extent than our competitors. A "design win" occurs when a customer decides to inclu de an Arm CPU product

or related technology within one of their chip designs. For customers who already license our products, a new design win does not necessarily require a customer to sign a new license. By licensing a portfolio of Arm products to our customers (rather

than licensing a single CPU design or other technology design), we have made it easier and more compel ling for 88 Table of Contents customers to access and utilize more Arm products, further broadening our p otential customer base and end-market penetration. Our licensing options provide

greater flexibility to our customers and maximize our opportunities to secure more design wins for our products, which results in greater opportunities to increase our recurring royalty revenue. Performance of Ar m China We

depend on our commercial relationship with Arm China to access the PRC market, and a significant portion of our total revenue is generated from Arm China, a related party. Arm China has the right to sublicense our processor technology pursuant to

the IPLA. Our responsibility under the IPLA is to facilitate delivery of our processor technology to Arm Chi na's end customers in accordance with detailed instructions and other specifications from Arm China. For additional information

regarding the IPLA, see "Business—The IPLA with Arm China." Our revenue is calculated as a percentage of license and royalty fees earned by Arm China from sub-license arrangements entered into

with its end customers. Where our revenue is earned as a percentage of the license fee received by Arm China, we categorize such revenue as our license revenue. Our share of Arm China's royalties is categorized as Royalties in our financial

statements. Despite our significant reliance on Arm China through our commercial relationship with them, both as a source of revenue and as a conduit to the important PRC market, Arm China operates independ ently of us. Under the IPLA, Arm

China's payments due to us are determined based on the financial information that Arm China provides to us. Accordingly, we are dependent on Arm China providing us with reliable and timely financial informatio n. Additionally, political actions,

including trade and national security policies of the U.S. and PRC governments, such as tariffs, placing companies on restricted lists, or new end-use controls, have in the past, currently do and could in the future I imit or prevent us, directly or

through our commercial relationship with Arm China, from transacting business with certain PRC custome rs or suppliers, limit, prevent or discourage certain PRC customers or suppliers from transacting business with us or Arm China, or make it more

expensive to do so, which could adversely affect demand for our products. For the fiscal year ended Marc h 31, 2023, although our total revenues derived from the PRC increased as compared to the prior year, th

e growth in our royalty revenues slowed

for the same period primarily as a result of economic issues in the PRC and factors related to export control and national security matters. Furthermore, in light of these issues, we expect to continue to see declining royalty revenues derived from

the PRC and we could see a decline in licensing revenues. See "Risk Factors—Risks Relating to Our Bus iness and Industry—Our concentration of revenue from the PRC market makes us particularly susceptible to economic and political risks

affecting the PRC, which could be exacerbated by tensions between (on the one hand) the U.S. or the U. K. and (on the other hand) the PRC with respect to trade and national security." Developments in Export Control Regulations In October 2022, the BIS of the U.S. Department of Commerce published changes to U.S. export control regulations that restrict the PRC's

semiconductor and supercomputing industries' ability to obtain advanced computing chips, as well as soft ware, hardware, equipment, and technology used to develop and maintain supercomputers and manufact ure advanced semiconductors. We have been

impacted by the implementation in October 2022 of rules by the BIS, which principally relate to (i) implem enting new process requirements that require licensees to disclose semiconductor manufacturing facilities used for manufacturing Arm-based integrated circuit designs; and (ii) controlling previously non-controlled Arm interconnect IP as well as releasing a modified version of such IP that does not

exceed the BIS performance thresholds for the PRC. We anticipate additional changes to U.S. export cont rol regulations in the future, but we cannot forecast the scope or timing of such changes. We will continue to monitor such developments,

including potential additional trade restrictions, and other regulatory or policy changes by the U.S. and for eign governments. Impact of the

Current Macroeconomic Environment and Geopolitical Events Uncertainty in the macroeconomic environment, resulting from a range of

events and trends, including the recent financial institution failures, rise in global inflation and interest rate s, supply chain disruptions, 89 Table of Contents geopolitical pressures, including the unknown impact of current and future U.S. and PRC trade regulations, changes in PRC-Taiwan relations, the war in

Ukraine, fluctuation in foreign exchange rates, and associated global economic conditions have resulted in volatility in our operating performance. For example, the war in Ukraine could lead to further market disruptions and exacerbate current

supply chain constraints, including with respect to certain materials and metals, which are essential in se miconductor manufacturing. Furthermore, given the concentration of semiconductor manufacturing in East Asia (particularly in Taiwan), any

potential escalation in geopolitical tensions in Asia, particularly with respect to Taiwan, could significantly disrupt existing semiconductor chip manufacturing and increase the prospect of increased interruption to the semiconductor chip supply

across the world. Investment in Technology and Product Development To remain competitive, we must continue to develop new applications and enhancements to our existing products and services, particularly a

next-generation technology is adopted by market participants. Allocating and maintaining adequate resear ch and development resources, such as the appropriate personnel and development technology, to meet the evolving demands of the market is

essential to our continued success. Recent Events and Transactions Arm China Investment Sale Prior to r estructuring our investment in March 2022, we held an approximate 48% equity holding, accounted for as an equity method investment,

in Arm China. In March 2022, we distributed our interest in Arm China to Acetone Limited, a company und er control of SoftBank Group, our controlling shareholder, for contractual consideration of approximately \$ 930 million. We retained a 10% non-voting shareholding interest in Acetone Limited, which represents an approximate 4.8% indirect interest in Arm China. As a result of these transactions, we recognized a net di stribution to our immediate

shareholders of \$976 million. Our indirect equity interest in Arm China is recorded in income from equity in vestments, net on the Consolidated Income Statements included elsewhere in this prospectus. See "Relat ed Party

Transactions—Transactions with Associates—Arm China" for additional information regarding the sale of

our equity interest in Arm China and related transactions. Treasure Data and IoTP Disposals Following a strategic decision in 2021 to place greater focus on our core technology licensing business, we decided to distribute or sell

certain components of our IoT business to subsidiaries of SoftBank Group. In June 2021, we distributed al I of the equity interests in Treasure Data, Inc. and its subsidiaries ("Treasure Data") to our shareholders, a nd in November 2021 we

sold Pelion IOT Limited and its subsidiaries ("IoTP") to SoftBank Group Capital Limited. Treasure Data's a nd IoTP's net assets upon distribution and sale were approximately \$44 million and \$12 million, respective ly.

Upon distribution and sale, Treasure Data and IoTP qualified for classification as discontinued operations and therefore the results of operations have been reclassified to discontinued operations for all historical p eriods. Following the disposals

we do not have significant involvement with either company. During the fiscal years ended March 31, 202 2 and 2021, we recognized net losses from discontinued operations of \$127 million and \$156 million, respectively. Included in net

losses from discontinued operations are income tax expense (benefits) from discontinued operations of \$ 28 million and \$(38) million during the fiscal years ended March 31, 2022 and 2021, respectively. Key Fin ancial and Operating Metrics We

use the following key performance indicators and non-GAAP financial measures to analyze our business performance and financial forecasts and to develop strategic plans, which we believe provide useful information to the market to aid in

understanding and evaluating our results of operations in the same manner as our management team. Ce rtain judgments and estimates are inherent in our processes to calculate these metrics. 90 Table of Conte nts These key performance indicators and non-GAAP financial measures are presented for supplemental informational purposes only, should not be considered a substitute for financial information

presented in accordance with GAAP, and may differ from similarly titled metrics or measures presented by other companies. The following table sets forth a summary of the key financial and operating metrics: For the Fiscal Year Ended March 31, For the Fiscal Quarter Ended June 30, 2023 2022 2021 2023 2022 (in millions, except for Number of extant Arm Total Access and Arm Flexible Access Licenses) Total revenue \$ 2,679 \$ 2,703 \$ 2,027 \$ 675 \$ 692 Operating income 671 633 239 111 294 Non-GAAP operating income (1) 783 731 304 272 297 Net income from continuing operations 524 676 544 105 225 Non-GAAP net in come from continuing

operations (1) 657 663 207 246 236 Net cash provided by (used for) operating activities 739 458 1,233 (1 14) (231) Non-GAAP free cash flow (1) 606 346 1,030 (150) (268) Operating metrics: Number of chips shipped (2) 30,583 29,190 25,281 6,844 7,314 Number of extant Arm Total Access

licenses (2) 18 8 4 20 10 Number of extant Arm Flexible Access

licenses (2) 203 191 129 214 190 Annualized contract value (2) \$ 1,030 \$ 1,030 \$ 915 1,048 1,052 (1) No n-GAAP operating income, Non-GAAP net income from continuing operations and Non-GAAP free cash flow are

non-GAAP financial measures. For more information regarding our use of these measures and a reconcili ation of these measures to the most directly comparable GAAP financial measures, see "—Non-GAAP Financial Measures—Reconciliation of

Non-GAAP Financial Measures" below. (2) As of the last day of the applicable period. Number of Chips S hipped Each

quarter, most of our customers, and those contracted through Arm China, furnish us (directly or via Arm C hina) with royalty reports setting forth the actual number of Arm-powered chips they shipped in the immediately preceding quarter. Royalty

reports received in the 12-month period from April 1 to March 31 of each year relate to chip shipments ma de in the period from January 1 to December 31 of each year. We also perform various procedures to ass ess customer data related to royalties for

reasonableness, and our license agreements generally include rights for us to audit the books and record s of our customers to verify certain types of customer data. We consider the number of chips reported as shipped by our customers as a key performance indicator because it represents the acceptance of our products by companies who use chips in their products (e.g., our customers' customers). The number of chips shipped also provides insight into chip pricing and volumes in different end markets, which helps i

nform our pricing models and

competitive positioning. Number of Extant Arm Total Access and Arm Flexible Access Licenses Each quarter, we track the number of extant Arm Total Access and Arm Flexible Access licenses with our customers, and those contracted through

Arm China. We believe that, over time, many of our customers will 91 Table of Contents transition to eithe r an Arm Total Access or Arm Flexible Access license to access our products. This transition enables us a nd our customers to focus less on contract negotiations and more on how

our products can be deployed in our customers' future chips. We consider the number of extant Arm Total Access and Arm Flexible

Access licenses as a key performance indicator as it represents the increasing collaboration between us a nd our customers, which could be a leading indicator to more chips being designed with our products and, accordingly, more recurring royalty

revenue in the future, improving our long-term market share. Annualized Contract Value Each quarter, we track the annualized contract value ("ACV") relating to licensing agreements signed with our customers a nd those

contracted through Arm China per the aggregate license fee as shared under the IPLA. We define ACV a s the total annualized committed fees, excluding any potential future royalty revenue, for all signed agree ments deemed to be active through the last

day of each applicable reporting period. Arm Total Access agreements and ALAs are deemed to be active for, and annualized over, the number of years in the contract. Any other license agreements, including sin gle use and limited use licenses issued

under an Arm Flexible Access agreement or TLA, are deemed to be active for, and annualized over, three years based on the historical licensing patterns of our customers. The aggregate license fee shared by Arm China is also deemed to be active for,

and annualized over, three years. ACV is an operational metric based on committed fees, excluding royalt ies, not recognized revenue, and

therefore is not reconcilable to, nor a substitute for, revenue reported under GAAP. However, we consider ACV to be a key operational metric that we use to track existing licensing commitments with our custome rs. Bookings of new licenses and

recognized revenue may fluctuate materially from quarter to quarter due to customer buying patterns, timi ng of subscription renewals and as a function of contract duration. As a result, we believe ACV provides a n additional understanding of our

business performance and long-term trends. Non-GAAP Financial Measures In addition to our results det ermined in accordance with GAAP, we utilize and present financial measures that are not calculated and presented

in accordance with GAAP. Our non-GAAP financial measures include Non-GAAP operating income, Non-GAAP net income from continuing operations, and Non-GAAP free cash flow, each of which is described below. We

believe our non-GAAP financial measures are useful in evaluating our operating performance and liquidity position. We use the non-GAAP financial measures presented below, collectively, to evaluate our ongoin g performance and for internal planning,

forecasting and budgeting purposes. We believe that the presentation of our non-GAAP financial measure s, when viewed holistically, is helpful to investors in assessing the consistency and comparability of our performance in relation to prior periods

and facilitates comparisons of our financial performance relative to our competitors, particularly with respect to competitors that present similar non-GAAP financial measures in addition to their GAAP results. Non-GAAP financial measures are presented for supplemental information purposes only, should not be considered a substitute for financial

information presented in accordance with GAAP, and may not align with similar financial measures prese nted by our competitors, which may limit the ability of investors to assess our performance relative to cert ain peer companies. A reconciliation of each of our non-GAAP financial measures to the most directly comparable financial measure presented in accordance with

GAAP is presented below. Non-GAAP Operating Income and Non-GAAP Net Income From Continuing O perations We utilize Non-GAAP operating income and Non-GAAP net income from continuing operations f or the purpose of assessing our operating performance. 92 Table of Contents We define Non-GAAP oper

ating income as our GAAP operating income excluding purchased

intangible asset amortization, share-based compensation expense associated with equity awards where o ur intent is to issue equity upon vesting (in lieu of cash settlement) following the occurrence of an initial public offering or change in control,

costs associated with disposal activities, impairment of long-lived assets, restructuring and related costs, public company readiness costs, and other operating income (expenses), net, which includes costs of CO VID-19 response programs. We define Non-GAAP net income from continuing operations as our GAAP net income excluding acquisition-related intangible asset amortization,

share-based compensation expense associated with equity awards where our intent is to issue equity upo n vesting (in lieu of cash settlement) following the occurrence of an initial public offering or change in control, costs associated with disposal

activities, impairment of long-lived assets, restructuring and related costs, public company readiness cost s, other operating income (expenses), net, which includes costs of COVID-19 response programs, (incom e) loss from equity method investments,

and income tax effect on non-GAAP adjustments. We exclude these items from our Non-GAAP operating income and Non-GAAP net income from continuing operations measure because they are non-cash in nat ure, or because the amount and timing of these items

is unpredictable, not driven by core results of operations and renders comparisons with prior periods and competitors less meaningful. We believe Non-GAAP operating income and Non-GAAP net income from continuing operations provide useful information

to investors and others in understanding and evaluating our results of operations, as well as provide a use ful measure for period-to-period comparisons of our business performance. Moreover, we have included Non-GAAP operating income and Non-GAAP

net income from continuing operations in this prospectus because they are key measurements used by our management internally to make operating decisions, including those related to analyzing operating expenses, evaluating performance, and performing

strategic planning and annual budgeting. Non-GAAP operating income and Non-GAAP net income from continuing operations have limitations as

financial measures, should be considered as supplemental in nature, and are not meant as a substitute for the related financial information prepared in accordance with GAAP. These limitations include the following: • Non-GAAP operating income and Non-GAAP net income from continuing operations exclude certain recurring, non-cash

charges, such as acquisition-related intangible asset amortization, and although these are non-cash charg es, the assets being amortized contribute to revenue generation and may have to be replaced in the futur e. Non-GAAP operating income and

Non-GAAP net income from continuing operations do not reflect all cash requirements for such replaceme nts or for new capital expenditure requirements; and • Non-GAAP operating income and Non-GAAP net in come from continuing operations exclude share-based compensation

expense associated with equity awards where our intent is to issue equity upon vesting (in lieu of cash set tlement) following the occurrence of an initial public offering or change in control. Share-based compensat ion expense has been, and will

continue to be for the foreseeable future, a significant recurring expense in our business and an important part of our compensation strategy. Because of these limitations, you should consider Non-GAAP operating income and Non-GAAP net income from continuing operations alongside other

financial performance measures, including operating income, net income and our other GAAP results. For more information regarding our use of these measures and a reconciliation to the most directly comparable GAAP financial measure, see

"—Reconciliation of Non-GAAP Financial Measures." Non-GAAP Free Cash Flow We monitor Non-GAAP free cash flow for the purpose of measuring our liquidity. We define Non-GAAP free cash flow as cash flow from operations

minus capital expenditures and intangibles, offset by proceeds realized from capital disposal activities. We believe that Non-GAAP free cash flow is a meaningful indicator of liquidity that provides information to our management and investors about

the amount of cash generated from 93 Table of Contents operations, after purchases of property and equipment and purchases of intangible assets, that can be used for investment in our business and for acquisi

tions as well as to strengthen our balance

sheet. Non-GAAP free cash flow has limitations as an analytical tool and should not be considered in isola tion or as a substitute for analysis of other GAAP financial measures, such as net cash provided by operat ions. Non-GAAP free cash flow does

not reflect our ability to meet future contractual commitments and may be calculated differently by other c ompanies in our industry, limiting its usefulness as a comparative measure. For more information regarding our use of this measure and a

reconciliation to the most directly comparable GAAP financial measure, see "—Reconciliation of Non-GAAP Financial Measures." Reconciliation of Non-GAAP Financial Measures The non-GAAP financial information is presented for supplemental informational purposes only, should not be considered a substitute for financial information presented in accordance with GAAP, and may be different from similarly titled non-GAAP financial measures used by other companies. A reconciliation of each non-GAAP financial measure to the most directly comparable financial

measure stated in accordance with GAAP is provided below. We encourage investors and others to revie w our financial information in its entirety, not to rely on any single financial measure and to view the non-G AAP financial measures in conjunction

with their respective related GAAP financial measures. The following is a reconciliation of Non-GAAP oper ating income to Operating

income, the most directly comparable GAAP financial measure: For the Fiscal Year Ended March 31, For the Fiscal Quarter Ended June 30, (in millions) 2023 2022 2021 2023 2022 Operating income \$ 671 \$ 633 \$ 239 \$ 111 \$ 294 Adjusted for : Acquisition-related intangible asset amortization 5 9 11 1 2 Share-based compensation expense (equity

settled) (1) 60 30 41 146 (7) Costs associated with disposal activities 4-4-(1) Impairment of long-lived assets -213- Restructuring and related costs 126- - 1 Public company readiness costs 4211148 Other operating income (expenses), net -15- Non-GAAP operating income \$ 783 \$ 731 \$ 304 \$ 272 \$ 297 (1) Total share-based compensation expense, including both cash and equity settled aw ards, was \$326 million, \$26

million and \$54 million for the fiscal years ended March 31, 2023, 2022 and 2021, respectively. In the fisc al year ended March 31, 2022, the equity-settled share-based compensation expense of \$30 million was more than the total share-based

compensation expense of \$26 million due to liability-settled share-based compensation expense credits pr imarily attributable to executive departures. Total share-based compensation expense, including both cas h and equity settled awards, was \$158

million and \$13 million for the fiscal quarters ended June 30, 2023 and 2022, respectively. In the quarter e nded June 30, 2022, the share-based compensation income of \$7 million pertains to a decrease in fair val ue of certain liability-classified awards that will be settled in equity at the time of vesting. For non-GAAP p urposes, we adjust for those awards that are currently liability-classified but will be equity settled after the initial public offering. Liability-classified awards are remeasured at the end of each reporting period through the date of settlement to ensure that the expense recognized for each award is equivalent to the amount to be paid in cash or equity

settled after the initial public offering. 94 Table of Contents The following is a reconciliation of Non-GAAP net income from continuing operations to Net

income from continuing operations, the most directly comparable GAAP financial measure: For the Fiscal Year Ended March 31, For the Fiscal Quarter Ended June 30, (in millions) 2023 2022 2021 2023 2022 Ne t income from continuing operations \$ 524 \$ 676 \$ 544 \$ 105 \$ 225 Adjusted for: Acquisition-related intan gible asset amortization 5 9 11 1 2 Share-based compensation expense (equity

settled) (1) 60 30 41 146 (7) Costs associated with disposal activities 4 — 4 — (1) Gain on disposal of b usiness (4) — — — Impairment of long-lived assets — 21 3 — — Restructuring and related costs 1 26 — — 1 Public company readiness costs 42 11 1 14 8 Other operating income (expenses), net — 1 5 — — (Income) loss from equity method investments, net 45 (141) (476) 7 14 Pre-tax total non-GAAP adjust

— (Income) loss from equity method investments, net 45 (141) (476) 7 14 Pre-tax total non-GAAP adjust ments 153 (43) (411) 168 17 Income tax effects on non-GAAP adjustments (20) 30 74 (27) (6) Non-GAAP net income from continuing operations \$ 657 \$ 663 \$ 207 \$ 246 \$ 236 (1) Total share-based compens ation expense, including both cash and equity settled awards, was \$326 million, \$26

million and \$54 million for the fiscal years ended March 31, 2023, 2022 and 2021, respectively. In the fisc al year ended March 31, 2022, the equity-settled share-based compensation expense of \$30 million was

more than the total share-based

compensation expense of \$26 million due to liability-settled share-based compensation expense credits pr imarily attributable to executive departures. Total share-based compensation expense, including both cas h and equity settled awards, was

\$158 million and \$13 million for the fiscal quarters ended June 30, 2023 and 2022, respectively. In the quarter ended June 30, 2022, the share-based compensation income of \$7 million pertains to a decrease in fair value of certain liability-classified awards that will be settled in equity at the time of vesting. For non-G AAP purposes, we adjust for those awards that are currently liability-classified but will be equity settled after the

initial public offering. Liability-classified awards are remeasured at the end of each reporting period throug h the date of settlement to ensure that the expense recognized for each award is equivalent to the amount to be paid in cash or equity

settled after the initial public offering. The following is a reconciliation of Non-GAAP free cash flow to Net c ash

provided by operating activities, the most directly comparable GAAP cash flow measure: For the Fiscal Ye ar Ended March 31, For the Fiscal Quarter Ended June 30, (in millions) 2023 2022 2021 (1) 2023 2022 N et cash provided by (used for) operating activities \$ 739 \$ 458 \$ 1,233 \$ (114) \$ (231) Adjusted for: Purc hases of property and equipment (64) (34) (104) (26) (12) Purchases of intangible assets (29) (41) (6 1) — (14) Payment of intangible asset obligations (40) (37) (38) (10) (11) Non-GAAP free cash flow \$ 606 \$ 346 \$ 1,030 \$ (150) \$ (268) (1) Includes a one-time \$750 million non-cancellable and non-refunda ble prepayment from a large technology

customer. 95 Table of Contents Components of Results of Operations Total Revenue Most of our licenses have two components: license fees and support and maintenance fees (recognized as license and other r evenue) and per-chip royalties (recognized as royalty revenue). However, some licenses can have multiple

payment milestones that are date-based or event-based (e.g., six months after the effective date of the contract or upon tape-out of the first chip design). We disaggregate revenue into the following major categories: License and Other Revenue License and other revenue includes revenue from licensing, software development tools, design services, training, support, and all other fees

that do not constitute royalty revenue. The products licensed by us consists of design information and related documentation to enable a customer to design and manufacture semiconductor chips and related tech nology. Over the term of a license,

contractual payments can generally range from hundreds of thousands of dollars to hundreds of millions o f dollars, depending on the type of license, its duration, and the type of product that is being licensed. A lic ense may be perpetual, use-limited or time-limited in its application. Delivery (i.e., providing the customer access to the licensed products) generally occurs within a short period after executing a license agreeme nt. In some cases, we

may license products that are still under development, in which case delivery can be many months, or eve n years, after executing a license agreement. We generate a significant proportion of our Licensing and ot her revenues from a relatively small

number of customers. License fees are invoiced pursuant to an agreed schedule. Typically, the first invoice is generated upon signing of

the license agreement, and licensing and other revenue is recognized upon delivery of the products. In ad dition to the license fees, our license agreements generally provide for customer support services, which c onsist of telephonic or e-mail support. Fees for customer support services are generally specified in the contract. Typically, no upgrades to the licensed products are provided, except those updates and upgrades provided on a when-and-if-available basis. Revenues from customer service support are recorded within o ther revenues. Arm Flexible Access agreements provide our customers with access to a wide range of processor, graphics, and systems products, especially

older and less performant products. Arm Flexible Access agreements have two components: an annual lo w-cost portfolio license fee payable in installments and a license fee once they have reached "tape-out," w hich occurs when the final result of our customer's semiconductor chip design incorporating our products i s sent for manufacturing, at which point they decide which of our products they

wish to deploy in their chip. We believe that Arm Flexible Access agreements are most suitable for smalle r companies, including start-ups and business units of larger companies, that want to experiment with

different configurations of our products before committing to a chip design. As of June 30, 2023, we had 2 14 extant Arm Flexible Access agreements with our customers, reflecting an increase of 85 from 129 as o f March 31, 2021. Arm Total Access agreements also provide our customers with access to a package of our products, including processor, graphics, and systems

products. Arm Total Access customers have the option to license our most advanced processors as part of the package. Arm Total Access customers pay a periodic portfolio license fee to maintain access to our products. There are no additional fees

payable by our customers under our Arm Total Access agreements upon tape-out because manufacturing design rights are included within the portfolio license fee and are reflected in the license pricing. We believe that Arm Total Access agreements are most suitable for larger, established, semiconductor comp anies who expect to deploy our products in a wide range of their products. As of June 30, 2023, we had 2 0 extant Arm Total Access agreements with

our customers, reflecting an increase of 16 from 4 as of March 31, 2021. We provide software developme nt tools and a range of services to

companies developing chips based on our products. These tools and services include, among others: (i) s oftware development tools for engineers to write and debug software on Arm processors, (ii) design licens e and development services to

customize technology IP tailored towards customers' specific needs, (iii) training on our products and how to write software to utilize their 96 Table of Contents functionality and capability, and (iv) support and mai ntenance, for which we generally require an annual fee for a minimum of one year. Royalty Revenue Roy alties are generally either set as a percentage of the licensee's average selling price per chip or as a fixed amount per chip. The

royalty rates per chip typically reduce over time as the total volume of chips incorporating our products shi pped increases; notwithstanding such reductions in royalty rates and fees per chip, license agreements wi th component manufacturing

customers typically include a minimum royalty percentage or fee per chip. Royalty payment schedules in i ndividual license agreements vary depending on the nature of the license and the degree of market acceptance of our products on the date the

license agreement is executed. In addition, the amount of royalty payments in respect of our products can increase as the customer integrates more of our products into the chip. See "—Key Factors and Trends A ffecting Our Operating

Results—Ability to Provide Our Customers with More Value Per Chip" above for examples of how custom ers may incorporate multiple products in a single chip. License contracts require the licensee to issue royalty reports, including details

of chip sales, to us on a quarterly basis. Royalty revenue is recognized on an accrual basis in the quarter in which the customers ship

chips containing our products, using an estimate based on sales trends and judgment for several key attributes, including industry estimates of expected shipments, the percentage of markets using our products, and average selling price (with a true-up in the following quarter based on actual sales data once received). Revenues from External

Customers and Related Parties We also separately present revenues derived from contracts with our external customers and those derived

from related parties. Revenues from related parties are derived from Arm China and customers in which we have an equity method investment. Cost of

Sales Cost of sales ("COS") is comprised primarily of the costs of providing technical support and training to our

customers. Occasionally, some Research and Development costs may be classified as COS if one of our IP products is being customized as part of professional and design services. COS expenses consist prima rily of employee-related expenses, project

costs associated with professional services and the provision of support and maintenance to customers, a long with expenses related to license development services revenue, amortization of developed technolog y, and allocated overhead.

Employee-related expenses include salaries, bonuses, share-based compensation and associated benefit s. Research and Development Research and development is at the heart of our business and critical to o ur future success. Accordingly, we have always invested, and will

continue to invest, significant resources in our R&D program. Our vision to invest and develop new products is driven by our desire to maintain or increase our market share and create value for our customers. By developing and licensing

innovative products, we allow our customers to focus their resources on competitive differentiation, unique to their own ability to differentiate. We have substantially increased our R&D investment to focus on long-term returns and to replicate the strong position that we maintain in

smartphones and in other markets, such as automotive, networking equipment, cloud compute and indust rial IoT. Each generation of processor is typically more advanced and more complex than the previous ge neration, which requires increased development

efforts that may be partially offset by improvements in productivity. Consequently, each year we increase our R&D investment in line with the increased development needs of the next generation of products. Engineers are in high demand and

well-remunerated, and accordingly our increased R&D activity will continue to result in an increase in cost s, principally driven by salaries for such technical employees and the costs of tools they need. 97 Table of Contents R&D expenses consist primarily of employee-related expenses, including salaries,

bonuses, share-based compensation, and benefits associated with employees in research and developm ent functions, along with project materials costs, third-party fees paid to consultants, depreciation and am ortization, allocated overhead, information

technology and other development expenses. We receive government grants to compensate for certain re search activities and we recognize the benefit as a reduction of the related expenses included in R&D expenses. Selling, General and Administrative Our engineering teams are well supported by vital selling, general and administrative functions. Selling, general and administrative expenses

consist primarily of employee-related expenses, including salaries, bonuses, share-based compensation, and benefits associated with employees in sales and marketing, along with corporate and administrative f unctions, including accounting and legal

professional services fees, depreciation and amortization, advertising expenses, allocated overhead, information technology and other corporate-related expenses. Disposal, Restructuring and Other Operating Expenses, Net In recent years, we have invested in new systems for our commercial and finance teams to st reamline our operations and create efficiencies. In

March 2022, we announced a restructuring plan to align our selling, general and administrative workforce with strategic business activities. The expenses associated with this plan are included within "Disposal, re structuring and other operating

expenses, net" in the consolidated income statements and consist of employee termination benefits and o ther related costs. Disposal expenses consist primarily of transaction costs, such as legal and professional lees, relating to various

disposal activities. Restructuring and other operating expenses consist primarily of employee termination benefits. Recognition of costs

for employee termination benefits depends on whether employees are required to render service beyond a minimum retention period in order to receive the termination benefits. If employees are required to rend er service beyond a minimum retention

period in order to receive the termination benefits, costs are recognized ratably over the applicable future service period. Otherwise, costs are recognized when the Company has committed to a restructuring plan and has communicated those actions to

employees. Employee termination benefits covered by existing benefit arrangements are recognized whe n the Company has committed to a restructuring plan and the termination benefits are probable and estim able. Impairment of Long-Lived Assets Impairment of long-lived assets includes impairments recognized on certain property and equipment and acquired intangibles as a result of lower

than anticipated operating results and a deterioration in projected results. For purposes of determining the impairment, we relied on the income approach utilizing discounted cash flows to arrive at fair value. Income (loss) from Equity Investments, Net Income (loss) from equity investments, net includes changes in the fair value of certain equity method investments for which we elect to apply

fair value accounting or at the net asset value, our proportionate share of equity method investee income or loss for certain equity method investments, and gains and losses on other marketable and non-marketa ble securities. Our proportionate share of income or loss from equity method investments accounted for u nder the equity method under GAAP and is recognized in the quarter following the quarter in

which such income or loss is recognized by our investee. Interest Income, Net Interest income consists pri marily of interest received on cash and cash equivalents, short-term investments that we hold with various financial institutions, and loans receivable. Interest expense consists primarily of interest on finance lease s. 98 Table of Contents Other Non-Operating Income (Loss), Net Other non-operating income (loss), net c onsists of one-time gains and losses and other miscellaneous income and expense items unrelated to our core operations, including gains or losses arising from changes in the fair value of derivative financial inst ruments.

gains or losses on realized and unrealized foreign exchange contracts and changes in the fair value of convertible loans receivable. Income Tax Expense We account for

income taxes using the asset and liability method under GAAP, whereby deferred income taxes are recognized for the tax consequences of temporary differences between financial statement carrying amounts and the tax basis of assets and liabilities.

Income tax expense reflects income earned and taxed, in jurisdictions in which we conduct business, which mainly include U.K. and U.S. federal and state income taxes. We benefit from the U.K.'s "patent box" regime, which allows

certain profits attributable to revenue from patented products (and other qualifying income) to be taxed at an effective corporation tax rate of 10%. Results of Operations The following

table sets forth the components of continued operations from our consolidated income statements and su ch data as a percentage of total revenue on an absolute basis, for the periods indicated: For the Fiscal Ye ar Ended March 31, For the Fiscal Quarter Ended June 30, (in millions, except percentages) 2023 % of re venue 2022 % of revenue 2021 % of revenue 2023 % of revenue 2022 % of revenue Revenue: Revenue f rom external customers \$ 2,025 76 % \$ 2,219 82 % \$ 1,579 78 % \$ 535 79 % \$ 524 76 % Revenue from r elated parties 654 24 % 484 18 % 448 22 % 140 21 % 168 24 % Total revenue 2,679 100 % 2,703 100 % 2,027 100 % 675 100 % 692 100 % Cost of sales (106) 4 % (131) 5 % (145) 7 % (31) 5 % (25) 4 % Gr oss profit 2,573 96 % 2,572 95 % 1,882 93 % 644 95 % 667 96 % Operating expenses: Research and de velopment (1,133) 42 % (995) 37 % (814) 40 % (337) 50 % (218) 32 % Selling, general and administra tive (762) 28 % (897) 33 % (826) 41 % (196) 29 % (153) 22 % Impairment of long-lived assets — 0 % (21) 1% (3) 0% — 0% — 0% Disposal, restructuring and other operating expenses, net (7) 0% (26) 1 % — 0 % — 0 % (2) 0 % Total operating expense (1,902) 71 % (1,939) 72 % (1,643) 81 % (533) 79 % (373) 54 % Operating income 671 25 % 633 23 % 239 12 % 111 16 % 294 42 % Income (loss) from equi ty investments, net (45) 2 % 141 5 % 476 23 % (7) 1 % (14) 2 % Interest income, net . 42 2 % 2 0 % 2 0 % 24 4 % 2 0 % Other non-operating income (loss), net 3 0 % 10 0 % (20) 1 % (1) 0 % 4 1 % Income fr om continuing operations before income taxes 671 25 % 786 29 % 697 34 % 127 19 % 286 41 % Income tax expense (147) 5 % (110) 4 % (153) 8 % (22) 3 % (61) 9 % Net income from continuing operations \$ 524 20 % \$ 676 25 % \$ 544 27 % \$ 105 16 % \$ 225 33 % 99 Table of Contents Comparison of Perform ance for the Fiscal Quarters Ended June 30, 2023 and 2022 Total revenue For the Fiscal Quarter Ended June 30, Period-Over- Period Change (in millions, except percentages) 2023 % of Revenue 2022 % of Re venue 2023 to 2022 % Change Revenue from external customers: \$ 535 79 % \$ 524 76 % 2 % License a nd Other Revenue \$ 180 27 % \$ 147 21 % 22 % Royalty Revenue \$ 355 53 % \$ 377 54 % (6 %) Revenue e from related parties \$ 140 21 % \$ 168 24 % (17 %) License and Other Revenue \$ 95 14 % \$ 111 16 % (14 %) Royalty Revenue \$ 45 7 % \$ 57 8 % (21 %) Total revenue \$ 675 100 % \$ 692 100 % (2 %) Total re venue was \$675 million and \$692 million for the fiscal guarters ended June 30, 2023 and

2022, respectively. License and other revenue was \$275 million and \$258 million for the fiscal quarters en ded June 30, 2023 and 2022, respectively. The increase in license and other revenues was primarily drive n by new licensing deals

as well as renewals of our existing license arrangement by customers to gain access to the latest versions of our technology IPs. Royalty revenue was approximately \$400 million and approximately \$434 million for the fiscal quarters ended

June 30, 2023 and 2022, respectively. The decrease in royalty revenue was driven primarily by the macro economic slowdown and lower shipments to normalize inventory levels. Revenue from external customers increased by \$11 million during the fiscal quarter ended June 30, 2023 as compared to the fiscal quarter ended June 30, 2022, driven primarily by a \$33 million increase in license and other revenue, which was p artially offset by a \$22 million decrease in royalty revenue. Revenue from related parties decreased by \$2 8 million during

the fiscal quarter ended June 30, 2023 as compared to the fiscal quarter ended June 30, 2022, primarily d

riven by a \$16 million decrease in license and other revenue and a \$12 million decrease in royalty revenue as a result of

trade protection and national security policies of the U.S. and PRC governments, which adversely affecte d PRC semiconductor suppliers and customers. During the fiscal quarters ended June 30, 2023 and 2022 revenue from sales to customers outside of the U.S. accounted for approximately

57% and approximately 62% of total revenue, respectively. Less than 2% of our total revenue is denomin ated in currencies other than U.S. dollars, and the impact of changes in foreign exchange rates on our revenues and results of operations for the

fiscal quarters ended June 30, 2023 and 2022 was immaterial. Cost of sales For the Fiscal Quarter Ended June 30, Period-Over- Period Change (in millions, except percentages) 2023 % of revenue 2022 % of revenue 2023 to 2022 % Change Cost of sales \$ (31) 5 % \$ (25) 4 % 24 % Cost of sales were \$31 million a nd \$25 million for the fiscal quarters ended June 30, 2023 and

2022, respectively. Cost of sales increased by \$6 million during the fiscal quarter ended June 30, 2023 as compared to the fiscal quarter ended June 30, 2022, primarily due to increases in employee share-based compensation,

professional service fees, and activities associated with professional and design services. 100 Table of C ontents Research and development For the Fiscal Quarter Ended June 30, Period-Over- Period Change (in millions, except percentages) 2023 % of revenue 2022 % of revenue 2023 to 2022 % Change Research and development \$ (337) 50 % \$ (218) 32 % 55 % Research and development expenses were \$337 million and \$218 million for the fiscal quarters ended

June 30, 2023 and 2022, respectively. Research and development expenses increased by \$119 million d uring the fiscal quarters ended June 30, 2023 as compared to the fiscal quarter ended June 30, 2022, due to increased investments

in next generation of products. The increase was primarily due to employee share-based compensation, s alaries and related expenses due to headcount increases from hiring as well as increases in cloud engine ering expenses, including cloud services,

depreciation, and allocated facility overheads, partially offset by increases in research and development ta x credits and gains from cash flow hedge activity. Selling, general and administrative For the Fiscal Quart er Ended June 30, Period-Over- Period Change (in millions, except percentages) 2023 % of revenue 202 2 % of revenue 2023 to 2022 % Change Selling, general and administrative \$ (196) 29 % \$ (153) 22 % 2 8 % Selling, general and administrative expenses were \$196 million and \$153 million for the fiscal quarters ended June 30, 2023 and 2022, respectively. Selling, general and administrative expenses incre ased by \$43 million during the fiscal quarter ended June 30, 2023 as compared to the fiscal quarter ended June 30, 2022,

primarily due to increases in employee share-based compensation, public company readiness costs, prof essional service expenses and related charges, legal fees, and provision for current expected loss on acc ounts receivable and were partially offset

by decreases in sales commission expenses, employee related bonus awards, lease rental costs and gains from cash flow hedge activity. Disposal,

restructuring and other operating expenses, net For the Fiscal Quarter Ended June 30, Period-Over- Period Change (in millions, except percentages) 2023 % of revenue 2022 % of revenue 2023 to 2022 % Change Disposal, restructuring and other operating expenses, net \$-0% \$ (2) 0 % (100)% Disposal, restructuring and other operating expenses, net were zero million and \$2 million for the fiscal

quarters ended June 30, 2023 and 2022, respectively. Disposal, restructuring and other operating expens es, net decreased by \$2 million for the fiscal quarter ended June 30, 2023 as compared to the fiscal quart er ended June 30,

2022, primarily due to a decrease in restructuring activities. Restructuring activities were completed in the first two quarters of the fiscal year ended March 31, 2023 for the restructuring plan announced in March 2 022. 101 Table of Contents Income (loss) from equity investments, net For the Fiscal Quarter Ended June 30, Period-Over- Period Change (in millions, except percentages) 2023 % of revenue 2022 % of revenue 2023 to 2022 % Change Income (loss) from equity investments, net \$ (7) 1 % \$ (14) 2 % (50)% Income (loss) from equity investments, net was \$7 million and \$14 million for the fiscal quarters

ended June 30, 2023 and 2022, respectively. Loss from equity investments, net decreased by \$7 million f or the fiscal quarter ended June 30, 2023 as compared to the fiscal quarter ended June 30, 2022, primarily due to a reduction

in unrealized losses related to equity method investments accounted for at fair value, and non-marketable securities. Interest income, net For the Fiscal Quarter Ended June 30, Period-Over- Period Change (in mi llions, except percentages) 2023 % of revenue 2022 % of revenue 2023 to 2022 % Change Interest income, net \$ 24 4 % \$ 2 0 % 1,100 % Interest income, net was \$24 million and \$2 million for the fiscal quarters ended June 30, 2023

and 2022, respectively. Interest income, net increased by \$22 million for the fiscal quarter ended June 30, 2023 as compared to the fiscal quarter ended June 30, 2022, primarily due to favorable interest rate yield s recognized on

short-term investments and cash equivalents. Other non-operating income (loss), net For the Fiscal Quart er Ended June 30, Period-Over- Period Change (in millions, except percentages) 2023 % of revenue 202 % of revenue 2023 to 2022 % Change Other non-operating income (loss), net \$ (1) 0 % \$ 4 1 % (125) % Other non-operating income (loss), net was \$(1) million and

\$4 million for the fiscal quarters ended June 30, 2023 and 2022, respectively. Other non-operating income (loss), net decreased by \$5 million for the fiscal quarter ended June 30, 2023 as

compared to the fiscal quarter ended June 30, 2022, primarily due to realized and unrealized foreign exchanges losses, partially offset by realized and unrealized foreign exchange gains, along with fair value changes in derivative financial

instruments and convertible loans receivables. Income tax expense For the Fiscal Quarter Ended June 30, Period-Over- Period Change (in millions, except percentages) 2023 % of revenue 2022 % of revenue 2023 to 2022 % Change Income tax expense \$ (22) 3 % \$ (61) 9 % (64)% For the fiscal quarters ended June 30, 2023 and 2022, income tax expense was \$22 million and \$61 million,

respectively. The income tax expense as a percentage of income before taxes was 17% and 21% for the f iscal quarters ended June 30, 2023 and 2022, respectively. 102 Table of Contents Income tax expense d ecreased compared to the same period last fiscal year primarily due to

lower pre-tax income and a reduction in irrecoverable overseas withholding taxes. The effective tax rate d ecreased compared to the same period last fiscal year primarily due to a reduction in irrecoverable overse as withholding taxes. Although the

statutory rate in the United Kingdom increased to 25% from 19%, there was an increase in patent box ben efit, which offset the increase. On August 16, 2022, the Inflation Reduction Act of 2022 was enacted into U.S. law. The legislation includes a new corporate alternative

minimum tax ("CAMT") of 15% on the adjusted financial statement income ("AFSI") of corporations with average AFSI exceeding \$1.0 billion over a three-year period. The CAMT is effective for the Company for the fiscal year ending

March 31, 2024. The Company has assessed the potential impact of the CAMT and does not expect the CAMT will have a material impact on the financial statements or results of operations. Comparison of Perf ormance for the Fiscal Years Ended March 31, 2023, 2022 and 2021 Total revenue For the Fiscal Year E nded March 31, Period-Over-Period Change (in millions, except percentages) 2023 % of revenue 2022 % of revenue 2021 % of revenue 2023 to 2022 % Change 2022 to 2021 % Change Revenue from external c ustomers: \$ 2,025 76 % \$ 2,219 82 % \$ 1,579 78 % (9 %) 41 % License and Other Revenue \$ 569 21 % \$ 902 33 % \$ 574 28 % (37 %) 57 % Royalty Revenue \$ 1,456 55 % \$ 1,317 49 % \$ 1,005 50 % 11 % 31 % Revenue from related parties \$ 654 24 % \$ 484 18 % \$ 448 22 % 35 % 8 % License and Other Revenue \$ 435 16 % \$ 239 9 % \$ 140 7 % 82 % 71 % Royalty Revenue \$ 219 8 % \$ 245 9 % \$ 308 15 % (11 %) (20 %) Total revenue \$ 2,679 100 % \$ 2,703 100 % \$ 2,027 100 % (1 %) 33 % 2023 compared to 2022 T otal revenue was \$2,679 million and \$2,703 million for the fiscal years ended March 31, 2023 and 2022, r espectively. License

and other revenue was \$1,004 million and \$1,141 million for the fiscal years ended March 31, 2023 and 2 022, respectively. The decrease in license and other revenue primarily was due to marginal decrease in si ze and timing of new

licensing deals. License revenue may potentially be volatile across periods due to variability of large deals between fiscal years, which historically have had a large license revenue impact. Royalty revenue was ap proximately \$1,675 million and

approximately \$1,562 million for the fiscal years ended March 31, 2023 and 2022, respectively. The incre ase in royalty revenue was driven primarily by continued organic growth as a result of higher net ASP per chip and increased adoption

of our products by customers in their chips. Revenue from external customers decreased by \$194 million

during the fiscal years ended

March 31, 2023 as compared to the fiscal year ended March 31, 2022, driven primarily by a \$333 million d ecrease in license and other revenue, which was partially offset by a \$139 million increase in royalty revenue. Revenue from

related parties increased by \$170 million during the fiscal years ended March 31, 2023 as compared to the fiscal year ended March 31, 2022, primarily driven by a \$196 million increase in license and other revenue, which was

partially offset by a \$26 million decrease in royalty revenue as a result of economic and national security i ssues currently ongoing in the PRC. During the fiscal years ended March 31, 2023 and 2022, revenue from sales to customers outside of the U.S. accounted for approximately

59% and approximately 54% of total revenue, respectively. Less than 2% of our total revenue is denomin ated in currencies other than U.S. dollars, and the impact of changes in foreign exchange rates on our revenues and results of operations for the

fiscal years ended March 31, 2023, 2022 and 2021 was immaterial. 103 Table of Contents 2022 compare d to 2021 Total revenue was \$2,703 million and \$2,027 million for the fiscal years ended March 31, 2022 and 2021, respectively. License

and other revenue was \$1,141 million and \$714 million for the fiscal years ended March 31, 2022 and 202 1, respectively. The increase in license and other revenue primarily was due to an increase in licensing revenue from three

high-value license agreements and as we introduced new approaches to licensing certain of our products to provide more customers with more reasons and more ways to license. Royalty revenue was approximately \$1,562 million and approximately

\$1,313 million for the fiscal years ended March 31, 2022 and 2021, respectively. The increase in royalty r evenue was driven primarily by continued organic growth as a result of higher net ASP per chip and incre ased adoption of our products

by customers in their chips. Revenue from external customers increased by \$640 million during the fiscal years ended March 31,

2022 as compared to the fiscal year ended March 31, 2021, driven primarily by a \$328 million increase in I icense and other revenue and a \$312 million increase in royalty revenue. Revenue from related parties in creased by

\$36 million during the fiscal years ended March 31, 2022 as compared to the fiscal year ended March 31, 2021, primarily driven by a \$99 million increase in license and other revenue, which were partially offset by a \$63 million

decrease in royalty revenue as a result of trade protection and national security policies of the U.S. and P RC governments, which adversely affected PRC semiconductor suppliers and customers. During the fiscal years ended March 31, 2022 and 2021 revenues from sales to customers outside of the U.S. accounted for approximately

54% and approximately 58% of total revenue, respectively. Less than 2% of our total revenue is denomin ated in currencies other than U.S. dollars, and the impact of changes in foreign exchange rates on our revenues and results of operations for the

fiscal years ended March 31, 2022 and 2021 was immaterial. Cost of sales For the Fiscal Year Ended March 31, Period-Over-Period Change (in millions, except percentages) 2023 % of revenue 2022 % of revenue 2021 % of revenue 2023 to 2022 % Change 2022 to 2021 % Change Cost of sales \$ (106) 4 % \$ (131) 5 % \$ (145) 7 % (19 %) (10 %) 2023 compared to 2022 Cost of sales were \$106 million and \$131 million for the fiscal years ended March 31, 2023 and 2022, respectively. Cost of sales

decreased by \$25 million during the fiscal year ended March 31, 2023 as compared to the fiscal year end ed March 31, 2022, primarily due to decreases in activities associated with professional and design servic es, and employee and related

retention awards, offset by increases in employee share-based compensation. 2022 compared to 2021 C ost of sales were \$131 million and \$145 million for the fiscal years ended March 31, 2022 and 2021, respectively. Cost of sales

decreased by \$14 million during the fiscal year ended March 31, 2022 as compared to the fiscal year end ed March 31, 2021, primarily due to decreases in activities associated with professional and design servic es as well as a decrease

in developed technology intangibles asset amortization due to certain assets coming to end of life. This de

crease was partially offset by general increases in salaries and related expenses, professional services ex penses, among other miscellaneous

expenses. Research and development For the Fiscal Year Ended March 31, Period-Over-Period Change (in millions, except percentages) 2023 % of revenue 2022 % of revenue 2021 % of revenue 2023 to 2022 % Change 2022 to 2021 % Change Research and development \$ (1,133) 42 % \$ (995) 37 % \$ (814) 40 % 14 % 22 % 104 Table of Contents 2023 compared to 2022 Research and development expenses were \$1,133 million and \$995 million for the fiscal years ended March 31, 2023 and 2022,

respectively. Research and development expenses increased by \$138 million during the fiscal year ended March 31, 2023 as compared to the fiscal year ended March 31, 2022, due to increased investments in n ext generation of products. The

increase was due to general increases in salaries and related expenses and share-based compensation, i ncreases in cloud engineering expenses, including cloud services, depreciation, and allocated facility over heads, partially offset by decreases in

employee related retention awards and increases in research and development tax credits. 2022 compare d to 2021 Research and development expenses were \$995 million and \$814 million for the fiscal years en ded March 31, 2022 and 2021,

respectively. Research and development expenses increased by \$181 million during the fiscal year ended March 31, 2022 as compared to the fiscal year ended March 31, 2021, primarily due to general increases in salaries and related

retention awards, partially offset by decreases in government research grant income from the Innovate U. K. grant due to a reduction in the relevant qualifying expenses for which the Innovate U.K. grant is intende d to compensate. Selling, general and administrative For the Fiscal Year Ended March 31, Period-Over-P eriod Change (in millions, except percentages) 2023 % of revenue 2022 % of revenue 2021 % of revenue 2023 to 2022 % Change 2022 to 2021 % Change Selling, general and administrative \$ (762) 28 % \$ (89 7) 33 % \$ (826) 41 % (15 %) 9 % 2023 compared to 2022 Selling, general and administrative expenses were \$762 million and \$897 million for the fiscal years ended March 31, 2023 and 2022,

respectively. Selling, general and administrative expenses decreased by \$135 million during the fiscal year ended March 31, 2023 as compared to the fiscal year ended March 31, 2022, primarily due to decreases in salaries and related

expenses and employee retention awards, due in part to restructuring activities announced in March 2022, along with decreases in provisions for current expected credit losses on accounts receivable and recover ies, decreases in depreciation and

amortization, general cloud service expenses, and allocated facility overheads, partially offset by increase s in employee share-based compensation, public company readiness costs, professional services expens es and related charges, litigation

provisions and related legal fees, travel expenses, and other miscellaneous items. 2022 compared to 202 1 Selling, general and administrative expenses were \$897 million and \$826 million for the fiscal years end ed March 31, 2022 and

2021, respectively. Selling, general and administrative expenses increased by \$71 million during the fiscal year ended March 31, 2022 as compared to the fiscal year ended March 31, 2021, primarily due to gener al increases in salaries

and related retention awards, increases in professional services expenses and related charges, cloud infr astructure costs, and provisions for current expected credit losses on accounts receivable. These increas es were partially offset by decreases

in acquisition related costs, depreciation and amortization and other miscellaneous items. 105 Table of Co ntents Impairment of long-lived assets For the Fiscal Year Ended March 31, Period-Over-Period Change (in millions, except percentages) 2023 % of revenue 2022 % of revenue 2021 % of revenue 2023 to 2022 % Change 2022 to 2021 % Change Impairment of long-lived assets \$ — 0 % \$ (21) 1 % \$ (3) 0 % (100) % 600 % 2023 compared to 2022 Impairment of long-lived assets was zero and \$21 million for the fiscal y ears ended March 31, 2023 and 2022, respectively. Impairment

of long-lived assets decreased by \$21 million during the fiscal year ended March 31, 2023 as compared to the fiscal year ended March 31, 2022, as there was no impairment of property and equipment or operating lease right-of-use assets in the fiscal year ended March 31, 2023. 2022 compared to 2021 Impairment of long-lived assets was \$21 million and \$3 million for the fiscal years ended March 31, 2022 and 2021, respectively.

Impairment of long-lived assets increased by \$18 million during the fiscal year ended March 31, 2022 as c ompared to the fiscal year ended March 31, 2021, primarily related to impairment of certain property and equipment, intangible

assets and operating lease right-of-use assets. Disposal, restructuring and other operating expenses, net For the Fiscal Year Ended March 31, Period-Over-Period Change (in millions, except percentages) 2023 % of revenue 2022 % of revenue 2021 % of revenue 2023 to 2022 % Change 2022 to 2021 % Change Di sposal, restructuring and other operating expenses, net (7) 0 % (26) 1 % - 0 % (73) % (100 % 202) 3 compared to 2022 Disposal, restructuring and other operating expenses, net were \$7 million and \$26 million for the fiscal years ended March 31, 2023

and 2022, respectively. Disposal, restructuring and other operating expenses, net decreased by \$19 millio n for the fiscal year ended March 31, 2023 as compared to the fiscal year ended March 31, 2022, primaril y due to a decrease in

restructuring activities, which was partially offset by an increase in disposal expenses. Restructuring activities were completed in the first two quarters of the fiscal year ended March 31, 2023 for the restructuring plan announced in March 2022. 2022 compared to 2021 Disposal, restructuring and other operating expenses, net were \$26 million and zero for the fiscal years ended March 31, 2022.

Disposal, restructuring and other operating expenses, net increased by \$26 million for the fiscal year ende d March 31, 2022 as compared to the fiscal year ended March 31, 2021, primarily due to the announcement of a restructuring plan

in March 2022 to align our selling, general and administrative workforce with strategic business activities a nd to improve efficiencies in our operations. Income (loss) from equity investments, net For the Fiscal Yea r Ended March 31, Period-Over- Period Change (in millions, except percentages) 2023 % of revenue 202 2 % of revenue 2021 % of revenue 2023 to 2022 % Change 2022 to 2021 % Change Income (loss) from equity investments, net \$ (45) 2 % \$ 141 5 % \$ 476 23 % (132)% (70)% 106 Table of Contents 2023 compared to 2022 Income (loss) from equity investments, net was \$(45) million and \$141 million for the fiscal years ended March 31, 2023 and 2022,

respectively. Income from equity investments, net decreased by \$186 million for the fiscal year ended Mar ch 31, 2023 as compared to the fiscal year ended March 31, 2022, primarily due to unrealized losses relat ed to equity method

investments accounted for at fair value, and non-marketable securities. 2022 compared to 2021 Income fr om equity investments, net was \$141 million and \$476 million for the fiscal years ended March 31, 2022 a nd 2021,

respectively. Income from equity investments, net decreased by \$335 million for the fiscal year ended Mar ch 31, 2022 as compared to the fiscal year ended March 31, 2021, primarily due to unrealized gains relate d to equity method

investments accounted for at fair value, and non-marketable securities. Interest income, net For the Fiscal Year Ended March 31, Period-Over-Period Change (in millions, except percentages) 2023 % of revenue 2022 % of revenue 2021 % of revenue 2023 to 2022 % Change 2022 to 2021 % Change Interest income, net \$ 42 2 % \$ 2 0 % \$ 2 0 % 2,000 % 0 % 2023 compared to 2022 Interest income, net was \$42 million and \$2 million for the fiscal years ended March 31, 2023 and 2022. Interest income, net

increased by \$40 million for the fiscal year ended March 31, 2023 as compared to the fiscal year ended M arch 31, 2022, primarily due to favorable interest rate yields recognized on short-term investments and ca sh equivalents. 2022 compared to 2021 Interest income, net was \$2 million for each of the fiscal years en ded March 31, 2022 and 2021. No material changes in interest

income or expenses were realized in the fiscal year ended March 31, 2022 as compared to the fiscal year ended March 31, 2021. Other non-operating income (loss), net For the Fiscal Year Ended March 31, Peri od-Over-Period Change (in millions, except percentages) 2023 % of revenue 2022 % of revenue 2021 % of revenue 2023 to 2022 % Change 2022 to 2021 % Change Other non-operating income (loss), net \$ 3 0 % \$ 10 0 % \$ (20) (1)% (70)% (150)% 2023 compared to 2022 Other non-operating income (loss), net was \$3 million and \$10 million for the fiscal years ended

March 31, 2023 and 2022, respectively. Other non-operating income (loss), net decreased by \$7 million for the fiscal year ended March 31, 2023 as compared to the fiscal year ended March 31,

2022, primarily due to realized and unrealized foreign exchanges gains, along with fair value changes in d erivative financial instruments, convertible loans receivable, and a gain recognized upon the sale of certain net assets that meets the

definition of a business, partially offset by realized and unrealized foreign exchange losses. 107 Table of Contents 2022 compared to 2021 Other non-operating income (loss), net was \$10 million and \$(20) million for the fiscal years

ended March 31, 2022 and 2021, respectively. Other non-operating income (loss), net increased by \$30 million for the fiscal year ended March 31, 2022 as compared to the fiscal year ended

March 31, 2021, primarily due to realized and unrealized foreign exchanges gains, along with fair value changes in derivative financial instruments and convertible loans receivable, partially offset by realized and unrealized foreign exchange

losses. Income tax expense For the Fiscal Year Ended March 31, Period-Over-Period Change (in millions , except percentages) 2023 % of revenue 2022 % of revenue 2021 % of revenue 2023 to 2022 % Change 2022 to 2021 % Change Income tax expense \$ (147) 5 % \$ (110) 4 % \$ (153) 8 % 34 % (28)% 2023 c ompared to 2022 Income tax expense was \$147 million and \$110 million for the fiscal years ended March 31, 2023 and 2022, respectively. Our effective

tax rate for the fiscal years ended March 31, 2023 and 2022 was 22% and 14%, respectively. In the fiscal year ended March 31, 2023, our effective tax rate increased by approximately 8%, primarily due to signific ant irrecoverable

withholding taxes and decreased profits qualifying for the U.K. patent box regime in the fiscal year ended March 31, 2023. 2022

compared to 2021 Income tax expense was \$110 million and \$153 million for the fiscal years ended Marc h 31, 2022 and

2021, respectively. Our effective tax rate for the fiscal years ended March 31, 2022 and 2021 was 14% and 22%, respectively. In the fiscal year ended March 31, 2022, our effective tax rate decreased by approximately 8%, primarily due to

significant unrecoverable withholding taxes as a result of insufficient specific U.K. profits in the fiscal year ended March 31, 2021 and increased profits qualifying for the U.K. patent box regime in the fiscal year ended March 31, 2022. Quarterly Financial Information The following table sets forth, for each of the three-month periods indicated, selected financial data from our unaudited consolidated income

statements and consolidated balance sheets. The information for each of these quarters has been prepar ed on the same basis as the audited annual consolidated financial statements included elsewhere in this prospectus. 108 Table of Contents This data should be read in conjunction with our annual consolidated financial statements

and unaudited consolidated interim condensed financial statements and the related notes, all of which are included elsewhere in this prospectus. The results of historical periods are not necessarily indicative of the results in any future period and

the results of a particular quarter or other interim period are not necessarily indicative of the results for a full year. Three Months Ended March 31, 2022 June 30, 2022 September 30, 2022 December 31, 2022 March 31, 2023 June 30, 2023 (in millions) Consolidated Income Statements Data: License and Other Revenue \$ 233 \$ 258 \$ 188 \$ 299 \$ 259 \$ 275 Royalty Revenue 424 434 442 425 374 400 Total revenue 657 692 630 724 633 675 Cost of sales (37) (25) (25) (29) (27) (31) Gross profit 620 667 605 695 606 644 Total operating expense (704) (373) (422) (451) (656) (533) Operating income (loss) (84) 294 183 24 4 (50) 111 Net income (loss) \$ (29) \$ 225 \$ 114 \$ 182 \$ 3 \$ 105 Consolidated Balance Sheets Data: Ca sh, cash equivalents and short-term investments \$ 1,635 \$ 1,354 \$ 1,376 \$ 1,772 \$ 2,215 \$ 2,049 Total a ssets \$ 6,510 \$ 6,213 \$ 6,256 \$ 6,610 \$ 6,866 \$ 6,700 Total shareholders' equity \$ 3,548 \$ 3,748 \$ 3,851 \$ 4,039 \$ 4,051 \$ 4,221 Quarterly Trends License and Other Revenue License and

Other Revenue increased quarter over quarter driven by continued adoption of our technology product off erings, with the exception of the second quarter and fourth quarter of the fiscal year ended March 31, 202 3. The declines in those quarters were

predominantly due to marginal decrease in size and timing of new licensing deals. Our deals include term license recognized at the point in time upon delivery to the customer. License revenue may potentially be volatile across periods due to

variability of large deals between quarters, which historically have had a large license revenue impact. Ro yalty Revenue Royalty revenue increased quarter over quarter driven by continued organic growth as a re sult of higher net ASP per chip and increased adoption

of our technology products by customers in their chips, with the exception of the third quarter and fourth q uarter of the fiscal year ended March 31, 2023. The declines in those two quarters were primarily as a res

ult of economic and national

security issues currently ongoing in the PRC. The impact of these policies was more pronounced in the se cond half in comparison to the first half of the fiscal year ended March 31, 2023. We expect this volatility to continue in the fiscal year

ending March 31, 2024 and beyond. Cost of sales and Gross profit Our quarterly cost of sales trends do n ot vary directly with our license and other revenue and royalty revenue. As a result, we have not

experienced large fluctuations in the amount of our cost of sales from period to period. Our quarterly cost of sales expenses consist of employee-related expenses, project costs associated with professional services and the provision of support and

maintenance to customers, along with expenses related to license development services revenue, amortiz ation of developed technology, and allocated overhead. The fluctuations in our gross profit for each of the periods presented were directly impacted by our total revenue for the same period. 109 Table of Contents Operating expense Our operating expenses primarily consist of research and development, selling, gener all and administrative expenses. Personnel related expenses

are the most significant component of operating expenses and consist of salaries, bonuses, stock-based c ompensation and associated benefits. Operating expenses also include cloud infrastructure costs and allo cated overheads, amongst other items. Total operating expenses generally increased in each of the perio ds presented except for the quarters ended June 30, 2023 and June 30,

2022, primarily due to increases in personnel-related expenses, share based compensation, cloud infrastr ucture and other related costs to support our growth. We experienced a decrease in total operating expenses during the first guarter ended June 30, 2022 as compared to the fourth guarter ended

March 31, 2022 primarily as a result of increase in bonus awards, acceleration of employee retention awards and one-time restructuring charges incurred in the fourth quarter ended March 31, 2022. We also experienced an increase in total operating expenses in the fourth quarter ended March 31, 2023 as compared to the earlier quarters of

same fiscal year primarily as a result of new grants of share-based compensation, increase in bonus awar ds and increase in litigation provisions, incurred in the fourth quarter ended March 31, 2023. In the first quarter ended June 30, 2023, we experienced a decrease in total operating expenses compared to the fourth quarter ended March 31,

2023 primarily as a result of decreases in employee retention awards, share-based compensation, and litigation provisions. We intend to

continue to make significant investments in research and development as we expand our existing technol ogy product offerings. We also intend to incur additional general and administrative expenses as a result of operating as a public company. Liquidity and Capital Resources We

measure liquidity in terms of our ability to fund our cash obligations as they become due, including require ments of our business operations, working capital requirements, capital expenditures, contractual obligations, acquisitions and investments,

and other commitments. We have historically financed, and intend to continue to finance, our operations p rimarily through cash generated from our business operations, partially supported by government research grants and tax credits. For the fiscal

quarters ended June 30, 2023 and 2022, the government research grant and tax credits benefits recogniz ed were approximately \$34 million and \$24 million, respectively. For the fiscal years ended March 31, 202 3, 2022 and 2021, the

government research grant and tax credits benefits recognized were approximately \$83 million, \$84 million and \$94 million, respectively. As of June 30, 2023, we had cash and cash equivalents of approximately \$1,248 million

and short-term investments of \$801 million. We believe that our cash and cash equivalents and short-term investments will be

adequate to meet our liquidity requirements for at least the 12 months following the date of this prospectu s and in the longer term. Our future capital requirements will depend on several factors, including our reve nue growth, the timing and extent

of spending on R&D efforts and other growth initiatives, the timing of new products and services introducti ons, market acceptance of our products, and overall economic conditions. We could be required, or could elect, to seek additional funding

through debt or equity financing; however, additional funds may not be available on terms acceptable to u

s, if at all. If we are unable to raise additional capital or generate cash flows necessary to expand our oper ations and invest in continued

innovation, we may not be able to compete successfully, which would harm our business, results of opera tions, financial condition and prospects. See "Risk Factors—Risks Relating to Our Business and Industry." 110 Table of Contents The following table summarizes our cash flows for the periods indicated. For the Fi scal Year Ended March 31, For the Fiscal Quarter Ended June 30, (in millions) 2023 2022 2021 2023 202 2 Net cash provided by (used for) operating activities \$ 739 \$ 458 \$ 1,233 \$ (114) \$ (231) Net cash provided by (used for) investing activities \$ (138) \$ (619) \$ (340) \$ (177) \$ 36 Net cash used for financing activities \$ (42) \$ (32) \$ (789) \$ (15) \$ (11) Effect of foreign exchange rate changes on cash and cash equivalents \$ (9) \$ (17) \$ 1 \$ — \$ (10) Net increase (decrease) in cash and cash equivalents \$ 550 \$ (210) \$ 105 \$ (306) \$ (216) Cash and cash equivalents at the beginning of the period \$ 1,004 \$ 1,214 \$ 1,10 9 \$ 1,554 \$ 1,004 Cash and cash equivalents at the end of the period \$ 1,554 \$ 1,004 \$ 1,214 \$ 1,248 \$ 788 Less cash from discontinued operations, end of the period \$ 1,554 \$ 1,004 \$ 1,171 \$ 1,248 \$ 788 Net Cash Provided by (Used for) Operating Activities Fiscal Quarter Ended June 30, 2023 compared to June 30, 20 22 Net cash used for operating activities decreased by \$117 million to \$114 million for the fiscal quarter ended June 30, 2023 as

compared to the fiscal quarter ended June 30, 2022, primarily due to a decrease in net income adjusted f or certain non-cash items, partially offset by changes in working capital. Changes in working capital were primarily driven by lower

accounts receivable balance due to \$164 million of higher collections and \$42 million of lower payment of employee related bonus awards . Fiscal Year End March 31, 2023 compared to March 31, 2022 Net cash provided by operating activities increased by \$281 million to \$739 million for the fiscal year ended March 31, 2023,

primarily due to \$713 million accounts receivable collections from Arm China, partially offset by outflow of \$442 million accrued compensation and benefits relating to cash incentive awards. Fiscal Year End March 31, 2022 compared to March 31, 2021 Net cash provided by operating activities decreased by \$775 million to \$458 million for the fiscal year ended March 31, 2022,

primarily due to changes in working capital resulting from a one-time \$750 million non-cancellable and no n-refundable prepayment from a large technology customer, which was received in the fiscal year ended March 31, 2021. Net Cash Provided by (Used for)

Investing Activities Fiscal Quarter Ended June 30, 2023 compared to June 30, 2022 Net cash used for investing activities increased by \$213 million to \$177 million for the fiscal quarter ended June 30, 2023 as compared to the fiscal quarter ended June 30, 2022, primarily due to a \$35 million increase in purchases of short-term investments and a \$170 million decrease in proceeds from maturity of short-term investment s. 111 Table of Contents Fiscal Year Ended March 31, 2023 compared to March 31, 2022 Net cash used f or investing activities decreased by \$481 million to \$138 million for the fiscal year ended March 31, 2023, primarily due to \$836 million proceeds from maturity of short-term investments, which was partially offset by \$361 million purchases of short-term investments. Fiscal Year Ended March 31, 2022 compared to March 31, 2021 Net cash used for investing activities increased by \$279 million to \$619 million for the fiscal y ear ended March 31, 2022,

primarily due to \$380 million of purchases of short-term investments and \$31 million of purchases of investments in convertible loans, partially offset by a \$70 million decrease in purchases of property, plant and e quipment and a

\$42 million decrease in purchases of equity investments. Net Cash Used for Financing Activities Fiscal Q uarter Ended June 30, 2023 compared to June 30, 2022 Net cash used for financing activities increased b y \$4 million to \$15 million for the fiscal quarter ended June 30, 2023 as

compared to the fiscal quarter ended June 30, 2022, primarily due to a \$5 million payment for finance leas e arrangements and partially offset by a \$1 million decrease in payments of intangible asset obligations. F iscal Year Ended March 31, 2023 compared to March 31, 2022 Net cash used for financing activities incre ased by \$10 million to \$42 million for the fiscal year ended March 31, 2023, primarily

due to \$50 million proceeds from short-term debt borrowing, and offset by \$43 million cash outflow associ ated with the distribution and sale of Treasure Data and IoTP in the fiscal year ended March 31, 2022. Fis cal Year Ended March 31, 2022 compared to March 31, 2021 Net cash used for financing activities decre ased by \$757 million to \$32 million for the fiscal year ended March 31, 2022,

primarily due to a \$750 million dividend payment to our shareholders in the fiscal year ended March 31, 2 021. Contractual Obligations and

Commitments Our material cash requirements include the following contractual and other obligations. Lea ses We have operating lease

arrangements for office space, data centers, equipment and other corporate assets. As of March 31, 2023, we had lease payment obligations of \$260 million, with \$31 million payable within twelve months of March 31, 2023. Existing SoftBank Group Facility In March 2022, certain subsidiaries of SoftBank Group enter ed into a term loan facility with certain lenders, which was amended and upsized in

June 2022, pursuant to which a subsidiary of SoftBank Group borrowed \$8.5 billion, all of which remains o utstanding as of the date of this prospectus. In connection with such term loan facility, a subsidiary of Soft Bank Group has pledged its

entire interest in us, consisting of substantially all of our ordinary shares, as collateral for the obligations u nder the term loan facility, and we entered into a springing guarantee and indemnity, pursuant to which we agreed to, upon the

occurrence of certain triggering events, 112 Table of Contents provide a guarantee to the lenders for amo unts borrowed under the term loan facility. SoftBank Group has informed us that (i) it intends to repay the term loan facility prior to, or

substantially concurrently with, the pricing of this offering, and (ii) at the time of such repayment, our sprin ging guarantee and indemnity will be terminated. The repayment of the term loan facility and the release of our obligations

thereunder is a condition to the closing of this offering. See "Related Party Transactions—Transactions with SoftBank Group—Existing SoftBank Group Facility" and Note 18 to our consolidated financial statements included elsewhere

in this prospectus. Restructuring In March 2022, we announced a restructuring plan to align our workforce with strategic business activities and to improve efficiencies in our

operations. As a result of the restructuring plan, we recognized a liability of \$26 million, which is entirely re lated to estimated one-time employee termination benefit costs. The restructuring

activities were substantially completed in the first two quarters of the fiscal year ended March 31, 2023. Cr itical Accounting Estimates Our consolidated financial statements are prepared in accordance with accounting principles generally accepted in the U.S. The preparation of

these consolidated financial statements requires us to make estimates and assumptions that affect the re ported amounts of assets, liabilities, revenues, costs, and expenses, and related disclosures. We base ou r estimates on historical and

anticipated results and trends and on various other assumptions that we believe are reasonable under the circumstances, including assumptions as to future events. By their nature, estimates are subject to an inh erent degree of uncertainty. Although

we believe that the estimates and the assumptions supporting our assessments are reasonable, actual re sults could differ materially (either positively or negatively, as applicable) from our estimates, which could have a material effect on our

consolidated financial statements. We believe that, of our significant accounting policies, which are described in Note 1 to our

consolidated financial statements included elsewhere in this prospectus, the following accounting policies involve a greater degree of management judgment and complexity. Accordingly, the following policies we believe are the most critical to aid in

fully understanding and evaluating our consolidated financial condition, results of operations, and cash flo ws. Revenue Recognition Our revenue is derived from contracts with customers. We recognize revenue in accordance with Accounting Standards Codification 606, Revenue

from Contracts with Customers ("ASC 606"). The core principle of ASC 606 is to recognize revenue upon the transfer of services or products to customers in an amount that reflects the consideration we expect to be entitled to in exchange

for those services or products. We apply the five-step framework under ASC 606 to recognize revenue as described in our revenue recognition policy included in Note 1 of our consolidated financial statements included elsewhere in this prospectus. The most critical judgments required in applying ASC 606 and our revenue recognition policy relate to the determination of distinct

performance obligations, the evaluation of the standalone selling price ("SSP") for each performance oblig

ation and the assessment of the contract combination criteria. Determination of distinct performance oblig ations For our licensing arrangements, we grant customers the choice to acquire additional rights, goods, or services at contract inception (for

example, renewals of offerings, version extensions through term renewals, additional future products, or a dditional usage of term license). Therefore, judgment is required in determining whether products and ser vices are considered distinct

performance obligations that should be accounted for separately. We utilize forward-looking information in identifying performance obligations for IP or their version extensions of architecture IP under development or future products and in

considering if implicit promises exist in certain long-term contracts. 113 Table of Contents Evaluation of the standalone selling price for each performance obligation Judgment is required to determine the SSP for each distinct performance obligation in the contract. Directly observable prices are generally

not available for our products, so we estimate the SSP for each performance obligation by maximizing the use of observable inputs. Some of our performance obligations, such as support, maintenance services, and training services, have observable

inputs that are used to determine the SSP of those distinct performance obligations. However, our license s of products often have highly variable pricing as standalone sales are rare and pricing varies from one tr ansaction to another. When offerings

with highly variable pricing lack substantial direct costs to estimate SSP based on a cost-plus margin appr oach, the transaction price is allocated using the residual approach on the basis that we have identified the e SSP for other performance

obligations in the same contract. If two or more performance obligations have highly variable or uncertain pricing, we apply a combination of methods to estimate the SSPs, including utilizing list prices, contract prices, and effort estimates of

future IP. Assessment of contract combination criteria In certain instances, we enter into multiple contract s with the same customer that are treated, for accounting purposes, as a single contract

if the contracts are entered into at, or near, the same time and are interrelated. Judgments are required in evaluating whether various contracts are interrelated, which includes considerations as to whether they were negotiated as a package with a

single commercial objective, where the amount of consideration on one contract is dependent on the performance of the other contract, or if some or all obligations in the contracts constitute a single performance obligation. Estimates on Sales-Based Royalty Revenue Accruals For certain license arrangements, sales -based royalties are collected on customers' chips that incorporate our products. Royalties are set

either as a percentage of the licensee's average selling price per chip or as a fixed amount per chip. Roya lties are recognized on the licensee's sales in the period in which they ship their Arm-powered chips to the ir end customers. Our estimates of royalty-based accruals take into consideration the macroeconomic effects of global events, such as COVID-19, geopolitical issues (such as trade bans

or wars), and natural disasters, any of which may interrupt supply chain activities as well as demand for s hipments of technology products. These estimates also involve the use of historical data and judgment for several key attributes, including

industry estimates of expected shipments, the percentage of markets using our products, and average selling price. Generally, our estimates represent the then-current period's shipments for which we expect our licensees to submit royalty

statements in the following quarter in accordance with our license agreements. Upon receipt of royalty sta tements from the licensees with the actual reporting of sales-based royalties that we previously estimated, we record a favorable or

unfavorable adjustment based on the difference, if any, between estimated and actual sales. Historically, actual amounts for sales-based royalties have been materially consistent with our estimates, and no significant adjustments have been required

for prior-period royalty estimates. However, we can provide no assurances that material adjustments will n ot be required in future periods. Valuation of Equity Investments Measured at Fair Value Non-marketable securities Non-marketable securities represent either direct or indirect, through a capital fund, investments in

unlisted early-stage development enterprises. For certain of these securities, we have elected to apply the net asset value ("NAV") practical expedient, where NAV is the estimated fair value of the investments. Fo

r other investments, under

the measurement alternative, these equity securities are recorded at cost minus impairment, if any, plus or minus changes resulting from qualifying observable price changes resulting from the issuance of similar or identical securities in an orderly

transaction by the same issuer. As of March 31, 2023 and 2022, non-marketable securities measured at NAV were \$18 million and \$29 million, respectively. 114 Table of Contents Determining whether an observed transaction is similar to a security within our portfolio

requires judgment based on the rights and preferences of the securities. Recording upward and downward adjustments to the carrying values of equity securities as a result of observable price changes requires quantitative assessments of the fair

values of equity securities held. Equity Method Investments Equity method investments represent strategic investments in unlisted development enterprises. For certain of these investments, we have

elected to apply the fair value option. Where applicable, the NAV practical expedient has been applied. Equity method investments measured at NAV were \$109 million and \$107 million as of March 31, 2023 and 2022, respectively. Equity method

investments measured at fair value as of March 31, 2023 and 2022 were \$482 million and \$524 million, re spectively. We elected the fair

value option for Arm China, Acetone Limited, and Ampere Computing LLC. We initially computed the fair value for our investments, consistent with the methodology and assumptions that market participants would use in their estimates of fair value,

with the assistance of a third-party valuation specialist or based on inputs provided by the investee. The fa ir value computation is updated on a quarterly basis. The investments are classified within Level 3 in the fair value hierarchy because

we estimate the fair value of the investments using (i) the market approach based on similar transactions, (ii) the market-calibration approach based on the guideline public company method and/or (iii) probability-weighted expected

return approach, and/or (iv) subject to the availability of sufficient information, the income approach based on the discounted cash flow method. We consider numerous objective and subjective factors to determin e the best estimate of fair value for our investees. These factors include

forecasts, the financial condition of the investee and the prices paid for securities sold to third-party invest ors, if any, as well as the valuation of comparable companies. Impairment of investments Non-marketable equity securities under the measurement alternative are subject to periodic impairment

analysis. The periodic impairment analysis considers both qualitative and quantitative factors that may have a significant impact on the investee's fair value. Qualitative factors considered include the investee's financial condition and

business outlook, industry and sector performance, market for technology, operational and financing cash flow activities, and other relevant events and factors affecting the investee. When indicators of impairmen t exist, we prepare a quantitative

assessment of the fair value of the equity investments using both the market and income approaches, whi ch require judgment and the use of estimates, including discount rates, investee revenue and costs, and c omparable market data of private and

public companies, among others. During the fiscal years ended March 31, 2023, 2022 and 2021, we recognized impairments of \$8 million, \$3 million and \$21 million, respectively, on non-marketable equity securities. Equity method investments not measured under the fair value option are subject to periodic impairment reviews using the other-than-temporary

impairment model, which considers the severity and duration of a decline in fair value below cost and our ability and intent to hold the investment for a sufficient period of time to allow for recovery. We did not recognize any impairments on equity

method investments during the fiscal years ended March 31, 2023, 2022 or 2021. Ordinary Share Valuati ons Prior to this offering, given the absence of a public trading market for our ordinary shares, our Board of Directors exercised its reasonable

judgment and considered numerous objective and subjective factors to 115 Table of Contents determine the best estimate of fair value of our ordinary shares underlying RSUs and Executive Awards awarded to employees and non-executive directors as

equity compensation, including: • contemporaneous independent third-party valuations of our ordinary sha

res; • our financial condition, results of operations, and capital resources; • the likelihood and timing of ach ieving a liquidity event, such as an initial public offering or sale of the

Company, given prevailing market conditions; • the lack of marketability of our ordinary shares; • our estim ates of future financial performance; • market performance and valuations of comparable companies; • the hiring or loss of key personnel; • the status of our development, product introduction, and sales efforts; • i ndustry outlook and other information, such as market growth and volume and macro-economic events; a nd • additional objective and subjective factors relating to our business. To determine the fair value of our ordinary shares, we first estimated our enterprise value and then allocated that enterprise value to our ordinary shares and ordinary share equivalents. Our enterprise value was estimated using the income and market-calibration approaches. The income approach estimates enterprise value based on the estimate d present value of future cash flows the business is expected to generate

over its remaining life. The estimated present value is calculated using a discount rate reflective of the risk s associated with an investment in a similar company in a similar industry or having a similar history of rev enue growth. For each

valuation, we prepared a financial forecast to be used in the computation of the value of invested capital f or both the income approach and market-calibration approach. The financial forecast considered our past results and expected future financial

performance. The risk associated with achieving this forecast was assessed in selecting the appropriate d iscount rate. There is inherent uncertainty in these estimates as the assumptions used are highly subjective and subject to changes as a result

of new operating data and economic and other conditions that impact our business. The market-calibration analyzes the percent change in

the enterprise values of peer companies between the prior valuation date and the current valuation date. Based on the observed market movement in the enterprise values of peer companies, a market movement factor is selected to represent the

potential shift in enterprise value between the prior valuation date and the current valuation date. The sele cted market movement factor is applied to the indicated value as of the prior valuation date. Share-based Compensation We

expense share-based compensation over the requisite service periods of the awards, which generally is e quivalent to the vesting term. Compensation expense is recorded only for those awards that are expected to vest. The fair value of RSUs is

determined on the date of grant and at the end of each reporting period using Monte Carlo simulations or the discounted cash flow approach. The fair value of phantom shares is determined based on the share price of our ultimate parent, SoftBank

Group. We classify awards that can and will be settled in cash as liabilities in our consolidated balance sh eets. Certain RSUs and all of phantom shares are liability-classified and are remeasured at the end of each reporting period through the date

of settlement to ensure that the expense recognized for each award is equivalent to the amount to be paid in cash. 116 Table of Contents Restricted Share Units (RSUs)—2019 AEP and 2019 EIP RSUs are grant ed to both employees and certain of our executive officers and vesting is subject to continuous service, the achievement of

market condition targets, and are contingent upon the occurrence of various events comprising a change in control, an initial public offering, or the passage of time. RSUs vest on the earliest to occur of (1) our initial public offering or six

months following our initial public offering (as applicable), (2) the acquisition of more than 50% of the votin g power of our shares, or the sale of the Company or another change in control event, and (3) March 9, 2 026. The vesting of certain RSUs

may be subject to market condition targets, and the remuneration committee has discretion to settle veste d RSUs with shares or cash. If no change in control or initial public offering were to occur before Decemb er 31, 2025, the remuneration

committee would have discretion to settle each RSU in cash, subject to achievement of certain market condition targets. The market condition targets are related to our valuation upon change in control, initial public offering, or passage of time.

The weighted average fair value of the RSUs was measured at each reporting date using the Monte Carlo simulation model. The Monte Carlo

simulation model simulates our equity value at an assumed listing exit event in order to determine the RS U vesting percentage. The model simulates the RSU vesting percentage over one million iterations, and the average of all iterations is the fair

value of an RSU. The model then discounts the future value of RSU at the assumed listing exit event date back to the valuation date based on the risk-free rate. The Monte Carlo simulation model incorporates various assumptions such as expected share

price volatility until a liquidity event, expected dividend yield, risk-free interest rate, and expected time to a n initial public offering. For the fiscal year ended March 31, 2023, the Company paid \$15.9 million in relati on to the modification of 2019 AEP RSUs that had vesting

conditions accelerated pursuant to restructuring activities, of which \$11.8 million of share-based compens ation cost was recognized in the current year. We did not have any payments arising from normal course vesting events for

liability-classified RSU awards for the fiscal years ended March 31, 2023, 2022 and 2021. For awards und er the 2019 AEP or the 2019 EIP that have not vested, due to a change in control or an initial public offering, these would be settled in

cash upon the passage of time and achievement of a certain market condition target. Upon completion of this offering, we expect to recognize share-based compensation expense of approximately

\$ for which the service-based vesting condition was satisfied or partially satisfied as of

, 2023. Upon completion of this offering, all RSUs under the 2019 AEP will vest and our intent is to settle those RSUs in shares instead of cash. This

will result in a change to the classification of the RSUs at that time from liability-classified to equity-classified awards The 2022

RSU Plan In June 2022, the 2022 RSU Plan was established to grant RSUs to all employees of the Comp any ("All Employee

Awards"). Employees may elect not to participate in the plan. The RSUs vest in tranches, require continuo us service through the vesting date and are subject to graded vesting over time. We recognize share-bas ed compensation cost using the straight-line method over the service period of the award except for performance grants with specific performance criteria, net of estimated forfeitures. The 2022 RSU

Plan provides vesting schedules applicable prior to an initial public offering and after an initial public offering. For all periods presented, an initial public offering is generally not considered probable until it has occ urred. Accordingly, the

RSUs are currently probable of vesting based on the vesting schedule applicable prior to an initial public of fering over a three-year period. The 2022 RSU Plan allows for either cash or share settlement of the RSU s by tranche at the discretion of the Company's remuneration

committee. At the time of issuance, we intended to settle all tranches of the RSUs in shares at the vesting date and such RSUs were accounted for as equity-classified awards. In November 2022, the Company d etermined that it would settle the first

tranche of the All Employee Awards outstanding that vest in March 2023 and May 2023 by paying cash in stead of issuing shares. The Company accounted for this change as a modification and reclassified the aff ected portion of the award from equity to

liability and will remeasure the 117 Table of Contents awards at fair value at each reporting period throug h the date of settlement. These RSUs neither carry rights to dividends nor voting rights until the shares are issued or transferred to the

recipient. Awards are forfeited if an employee leaves the Company before the RSUs vest. We also grante d additional awards under the 2022

RSU Plan to new hires starting in September 2022 ("New Starter Awards"). The New Starter Awards shar e substantially the same terms as the existing RSUs for All Employee Awards with changes limited to the vesting schedules. The New Starter

Awards require continuous service through the vesting date. In addition to the New Starter Awards, we als o granted RSUs to all employees and new hires of our subsidiary, Arm Israel, starting in February 2023 (the "Israel Awards"). The

Israel Awards have substantially the same terms as the existing RSUs for All Employee Awards and New Starter Awards with changes limited to the vesting schedules. The Israel Awards require continuous service through the vesting date. We used the income approach and market-calibration approach based on comparable publicly traded companies in similar lines of businesses to

measure the fair value of the All Employee Awards. The income approach estimates enterprise value bas ed on the estimated present value of future cash flows the business is expected to generate over its remaining life. The estimated present value is

calculated using a discount rate reflective of the risks associated with an investment in a similar company in a similar industry or having a similar history of revenue growth. For each valuation, we prepared a financial forecast to be used in the

computation of the value of invested capital for both the income approach and market-calibration approach. The financial forecast considered the Company's past results and expected future financial performance. The risk associated with

achieving this forecast was assessed in selecting the appropriate discount rate. There is inherent uncertainty in these estimates as the assumptions used are highly subjective and subject to changes as a result of new operating data and economic and

other conditions that impact the business. The market-calibration approach analyzes the percent change in the enterprise values of peer

companies between the prior valuation date and the current valuation date. Based on the observed marke t movement in the enterprise values of peer companies, a market movement factor is selected to represent the potential shift in enterprise value

between the prior valuation date and the current valuation date. The selected market movement factor is applied to the indicated value as of the prior valuation date. We did not have any payments arising from n ormal course vesting events for the liability or equity-classified RSU awards for the fiscal year ended March 31, 2023. Upon completion of this offering, we expect to recognize share-based compensati on cost of approximately \$\frac{1}{2}\$ for which the service-based vesting condition was satisfied or partially satisfied as of \$\frac{1}{2}\$, 2023. Upon the completion of this offering, the All Employee Awards will be acc

an initial public offering which will result in an acceleration of compensation cost. Upon the completion of t his offering, it is our intent to continue to settle the RSUs in shares. Executive Awards Granted under the 2022 RSU Plan—Executive Awards In November 2022, the Company issued two types of executive awards (the "Annual Awards" and "One-time Launch Awards") under

ounted for using the vesting schedules applicable after

the 2022 RSU Plan to certain of our executive officers (collectively, the "Executive Awards"). These Executive Awards under the 2022 RSU Plan have total award values based on fixed monetary amounts known at inception and do not carry

rights to dividends nor voting rights. The Executive Awards entitle participants to a fixed amount of cash o r, upon the occurrence of a change in control or an initial public offering, ordinary shares of the Company at the discretion of our

remuneration committee. Executive Awards are liability-classified and remeasured at the end of each reporting period through the date of settlement so that the expense recognized for each award is equivalent to the amount to be paid in cash. One-time Launch Awards vest in tranches and require continuous service through the vesting dates and are subject to graded vesting over a

period of three years. The Company also granted One-time Launch Awards with customized vesting sche dules to certain of our executive officers with a potential fixed monetary amount of 118 Table of Contents \$55.0 million at the grant date. These customized awards vest upon (1) the occurrence of one of various e vents comprising a change in control of the Company, (2) an initial public offering, and

(3) March 9, 2026. For more information about awards that vest at the completion of this offering, see "Ma nagement and Executive Remuneration—Awards Vesting at the Completion of this Offering." Annual Awards include a portion that vests over a three-year continuous service period and/or another portion that is subject to continuous

service and satisfaction of certain Company performance conditions. The time-based portion of the Annual Awards vest over a three-year period. The Annual Awards that are subject to continuous service and sati sfaction of certain Company performance

conditions vest upon the satisfaction of performance metrics as established for each one-year performanc e period and have the potential to vest between 0% and 200% of original fixed monetary amount of the a ward depending on the achievement of annual

performance metrics. Upon an initial public offering each Executive Award will vest and, at the discretion of the Remuneration Committee,

be settled by a variable number of shares based on the initial public offering price per ADS. As of March 3

1, 2023, awards were expected to settle in cash at the vesting date. Awards are forfeited if an employee I eaves the Company before the awards

vest. We did not have any payments arising from normal course vesting events for the liability-classified Executive Awards for the fiscal

year ended March 31, 2023. Upon completion of this offering, we expect to recognize share-based compensation cost of approximately \$ for which the service-based vesting condition was satisfied or

partially satisfied as of , 2023. Upon the completion of this offering, the Executive Awards will be accounted for using the vesting schedules applicable

after an initial public offering which will result in an acceleration of compensation cost. Upon the completio n of this offering, it is our intent to settle the Executive Awards in shares. Impairment of Goodwill Goodwill is recorded as the excess of consideration transferred over the acquisition-date fair values of assets acqui red and liabilities assumed. We have identified one reporting unit. We perform an annual impairment asse ssment in the fourth fiscal guarter

or more frequently if indicators of potential impairment exist, which includes evaluating qualitative and qua ntitative factors to assess the likelihood of an impairment of the reporting unit's goodwill. If our assessment concludes that it is

more likely than not that the fair value is more than its carrying value of our reporting unit, goodwill is not c onsidered impaired and we are not required to perform the quantitative goodwill impairment test. If our im pairment assessment concludes that it is more likely than not that the fair value is less than its carrying value, we perform the

quantitative goodwill impairment test, which compares the fair value of the reporting unit to its carrying value. Impairments, if any, are based on the excess of the carrying amount over the fair value. Our goodwill impairment test considers the

income method and/or market method to estimate a reporting unit's fair value. Significant judgments are r equired in assessing impairment of goodwill include the identification of reporting units, estimating future c ash flows, determining

appropriate discount and growth rates and other assumptions. Changes in these estimates and assumptions could materially affect the determination of fair value, whether an impairment exists and if so the amount of that impairment. We completed our annual goodwill impairment test in the fourth quarter of the fiscal years ended March 31, 2023, 2022 and 2021. It was

determined, after performing a qualitative review, that it is not more likely than not that the fair value of our single reporting unit was less than its carrying amount. Accordingly, there was no indication of impairmen t, and the quantitative

goodwill impairment test was not performed. Income Taxes We are subject to income taxes in the United Kingdom and other foreign jurisdictions. We account for deferred taxes by using the asset and

liability method under GAAP. Under this method, we determine deferred 119 Table of Contents tax assets and liabilities based on temporary differences between the financial reporting and the tax bases of assets and liabilities. Deferred tax assets and liabilities are measured using the

enacted tax rates and laws that are expected to be in effect when the differences are expected to reverse. We recognize a deferred tax asset when it is more likely than not that the asset will be realized. We regul arly review our deferred tax assets

for recoverability and establish a valuation allowance based upon historical losses, projected future taxable income and the expected timing of the reversals of existing temporary differences. To the extent we increase or decrease the allowance in a

period, we recognize the change in the allowance within "Income tax expense" in the consolidated income statement. Unforeseen changes in tax rates and tax laws, as well as differences in the projected taxable income as compared to actual

taxable income, may affect these estimates. The provision for income taxes includes the impact of reserve provisions and changes to

reserves as well as the related net interest and penalties. In addition, we are subject to the continuous ex amination of our income tax returns by the United Kingdom and other tax authorities that may assert asse ssments against us. We regularly

assess the likelihood of adverse outcomes resulting from these examinations and assessments to determine the adequacy of our provision for income taxes. Recent Accounting Pronouncements For a summary of recent accounting pronouncements and the anticipated effects on our consolidated financial s

tatements, see Note 2 to our consolidated financial statements included elsewhere in this prospectus. Qu alitative and Quantitative Disclosures about Market Risk We are exposed to market risks in the ordinary c ourse of our business. Market risk represents the risk of loss that may impact our financial

position due to adverse changes in financial market prices and rates. Our market risk exposure is primaril y the result of fluctuations in interest rates and foreign currency exchange rates. See Note 1 to our consoli dated financial statements

included elsewhere in this prospectus for additional details. Interest Rate Risk We are exposed to interest rate risk arising on interest-bearing assets that we hold, including cash and cash equivalents, short-term investments, and loans receivable. As of June 30, 2023, a hypothetical 1% increase or decrease in intere st rates would have an approximate \$14 million (positive or negative, as applicable) impact on our operating results in the consolidated

financial statements for the fiscal quarter ended June 30, 2023. Foreign Currency Exchange Risk We are exposed to foreign exchange risk in respect of our revenues and expenses where our revenues and expenses are denominated in a currency

other than the functional currency of the transacting entity. We mitigate a proportion of this risk through the use of currency forward contracts. Translational exposure arises on the revaluation of net investments in the consolidated financial statements, where these are not denominated

in U.S. dollars and on loans to subsidiaries in currencies other than our functional currency. As of June 30 , 2023, a hypothetical 10% increase or decrease in the relative value of U.S. dollars to British pound sterling would have an

approximate \$19 million (positive or negative, as applicable) effect on our operating results in the consolid ated financial statements for the fiscal quarter ended June 30, 2023. 120 Table of Contents BUSINESS O ur North Star Building the future of

computing, on Arm. Together. For everyone. Our Company Arm is defining the future of computing. Semi conductor technology has become one of the world's most critical resources, as it enables all

electronic devices today. At the heart of these devices is the CPU, and Arm is the industry leader of CPUs . We architect, develop, and license high-performance, low-cost, and energy-efficient CPU products and r elated technology, on which many of the world's leading semiconductor companies and OEMs rely to dev elop their products. Our energy-efficient CPUs have

enabled advanced computing in greater than 99% of the world's smartphones, for the year ended Decem ber 31, 2022, and more than 250 billion chips, cumulatively, powering everything from the tiniest of sensor s to the most powerful

supercomputers. Today, Arm CPUs run the vast majority of the world's software, including the operating s ystems and applications for smartphones, tablets and personal computers, data centers and networking e quipment, and vehicles, as well as the

embedded operating systems in devices such as smartwatches, thermostats, drones and industrial roboti cs. We estimate that approximately 70% of the world's population uses Arm-based products, and the scal e

of Arm's reach continues to expand, with more than 30 billion Arm-based chips reported as shipped in the fiscal year ended March 31, 2023 alone, representing an approximately 70% increase since

the fiscal year ended March 31, 2016. Today, any company can make a modern computer chip through the unique combination of our

energy-efficient CPU IP and related technologies and our unmatched ecosystem of technology partners, a nd do it cost effectively due to our flexible business model. Each CPU product can be licensed to multiple companies, leading to economies of scale

that allow us to charge each licensee only a fraction of what it would cost them to develop internally, while minimizing their risk and time-to-market. With the

complexity of CPU design increasing exponentially, over the past decade no company has successfully d esigned a modern CPU from scratch. We have been innovating at the forefront of compute technology for decades and have established important

relationships with the companies driving the future of computing across multiple industries. More than 260 companies reported that they had shipped Arm-based chips in the fiscal year ended March 31, 2023, including the largest technology companies

globally (such as Amazon and Alphabet), major semiconductor chip vendors (such as AMD, Intel, NVIDIA, Qualcomm and Samsung), automotive industry incumbents, leading auto suppliers, IoT innovators, and

more. The exponential rise in smart devices in both consumer and enterprise markets has increased the d emand for chips that provide more

computational capability while optimizing energy efficiency. Thirty years ago, the PC was the only comput er with which most people would interact at home, work, or school. Then, mobile phones became comput ers in our pockets and digital TVs became

computers in our living rooms. Now, vehicles are effectively computers on wheels, and servers and netwo rking equipment are the computers that connect devices and services together. Additionally, there are billi ons of tiny low-cost devices – from sensors to electric motor controllers – that are now functionally comput ers, as well. Each of these computers needs at least one CPU, and in many cases more than one. This tr end has

driven the dramatic growth of Arm-based chips over the past several years. Our creation of the

Arm CPU architecture, the world's most widely used CPU architecture, has resulted in the proliferation and evolution of computers as people know them today, advancing a paradigm of increasing compute performance coupled with industry-leading

power efficiency. We enabled the mobile phone and smartphone revolution, and through our focus on ene rgy efficiency and our history of continuous innovation, we have enabled new categories of "smart" consumer electronics. Today, we are

redefining what is possible in industries such as cloud computing, automotive, and IoT. Energy efficiency is not only important for business, but it is also a critical component in achieving sustainability for our plane t. This makes Arm CPU

technology ideal for current and future computing applications as the demands for compute performance are growing exponentially while the need for low power remains critical. 121 Table of Contents Every CPU has an ISA, which defines the software instructions that can be executed by the

CPU, essentially a common language for software developers to use. The ISA sets the foundation for a la rge library of compatible software which runs on those CPUs. As the Arm CPU is the most popular and pe rvasive CPU in history, the Arm ISA is also

the most popular and pervasive ISA in history. This means that Arm-based chips have a global communit y of software developers familiar with how to program the CPU. Chip designers utilizing the Arm CPU can add desired functionality (Wi-Fi connectivity, image processing, video processing, etc.) to create an SoC to meet the needs of any end market. Our primary product offerings are leading CPU products that address diverse performance, power, and cost requirements. Complementary products

such as GPUs, System IP, and compute platforms are also available and enable high-performance, efficie nt, reliable, system-level creation for a wide range of increasingly sophisticated devices and applications. Our development tools and robust

software ecosystem have further solidified our position as the world's most widely adopted processor arch itecture and have created a virtuous cycle of adoption, which means that software developers write software for Arm-based devices because

it offers the biggest market for their products, and chip designers choose Arm processors because they h ave the broadest support of software applications. This combination of pervasiveness and ease of portabil ity has resulted in our CPU designs having the world's richest software ecosystem,

built in partnership with the leading operating systems providers (including Google Android, Microsoft Win dows and all major Linux distributions), software tools and game engine vendors (such as EA, Unity and Epic Games), and application developers.

We also support a flourishing ecosystem of third-party tool vendors for embedded software and a vibrant I oT ecosystem. Open-source software plays a vital role in the success of Arm-based chips, and we are committed to contributing to open-source software and tools to ensure our offerings are optimized for the I atest technologies. As the

world moves increasingly towards AI- and ML-enabled computing, Arm will be central to this transition. Arm CPUs already run AI and ML workloads in billions of devices, including smartphones, cameras, digital TVs. cars and cloud data centers. The CPU

is vital in all AI systems, whether it is handling the AI workload entirely or in combination with a co-process or, such as a GPU or an NPU. In the emerging area of large language models, generative AI and autonomous driving, there will be a heightened emphasis on the low power acceleration of these algorith ms. In our latest ISA, CPUs, and GPUs, we have added new functionality and instructions to accelerate fu ture AI and ML algorithms. We are working

with leading companies such as Alphabet, Cruise, Mercedes-Benz, Meta and NVIDIA to deploy Arm techn ology to run Al workloads. Arm had

5,963 full-time employees across North America, Europe and Asia as of March 31, 2023. We are an engin eering-first company, with approximately 80% of our global employees, as of March 31, 2023, focused on research, design, and technical

innovation, and we have global operations and research and development centers in the U.K, Europe, No rth America, India, and Asia-Pacific. Our headquarters are located in Cambridge, U.K. For the fiscal year ended March 31, 2023, our total revenue was relatively flat at \$2,679 million, as compared to \$2,703 million in the fiscal

year ended March 31, 2022. In the fiscal year ended March 31, 2023, as a percentage of total revenue our gross profit margin was 96% and operating income margin was 25%. In the fiscal year ended March 31, 2023, we generated net income from

continuing operations of \$524 million (Non-GAAP net income from continuing operations of \$657 million), compared to \$676 million (Non-GAAP net income from continuing operations of \$663 million) in the fiscal year ended March 31, 2022. For the fiscal-year ended March 31, 2022, our total revenue grew by 33%, to \$2,703 million, from \$2,027 million in the fiscal

year ended March 31, 2021. In the fiscal year ended March 31, 2022, as a percentage of total revenue, o ur gross profit margin was 95% and operating income margin was 23% compared to 93% and 12%, respectively, in the fiscal year ended

March 31, 2021. In the fiscal year ended March 31, 2022, we generated net income from continuing operations of \$676 million (Non-GAAP net income from continuing operations of \$663 million),

compared to \$544 million (Non-GAAP net income from continuing operations of \$207 million) in the fiscal year ended March 31, 2021. 122 Table of Contents Our Journey History Established in 1990, Arm began as a joint venture between Acorn Computers, Apple Computer, and VLSI Technology. We were publicly listed on the London Stock Exchange and the Nasdag Stock Market from 1998 until 2016, when we

were taken private by SoftBank Group, our

controlling shareholder. The original joint venture set out to develop a processor that was high performanc e, power efficient, easy to

program, and readily scalable – a goal that continues to define Arm today. One of the first Arm-based products was a predecessor of today's tablets. As a battery-powered device, it required an

energy-efficient chip to maximize its battery life while providing the necessary compute capabilities. This p roduct benefited from Arm's clear focus on efficient CPU design. Our CPUs initially gained significant tract ion in mobile phones in the mid-1990s because our energy-efficient processors provided an appropriate le vel of performance while consuming little power, which was critical for these smaller form factor devices. As the mobile phone market

continued to grow rapidly, more semiconductor companies entered the market. All these companies need ed to source high-performance, energy-efficient processors to run their mobile phone software, and many of them licensed Arm CPU products. Over time,

mobile phones, and the chips they used, became more advanced and ultimately evolved into the smartph ones that are prevalent today. The Arm CPU proved to be critical in enabling the smartphone revolution. The mobile phone was one of the first consumer electronic devices to evolve into an intelligent, connected, digital device that needed a smart

processor to run a growing library of software. With the help of Arm technology, many more devices such as televisions, watches, washing machines, cameras, factory equipment, and others are undergoing the s ame revolution. Strategic Evolution Since

becoming a private company in 2016, we have made significant investments to further develop and marke tour products to build on our success in powering the world's smartphones and other consumer electronic devices. We have focused in recent

years on making Arm the ubiquitous provider of compute technology in all market segments by expanding into new markets, including, but not limited to, cloud computing, networking, automotive, and IoT, most of which have strong secular tailwinds. Our

investments have resulted in a diversified business with more durable growth. Key elements of our evolution included: • Creating a Market-Led Business with Products Optimized for Specific

Verticals. We have developed multiple product families, each optimized for markets such as smartphones, cloud computing, networking, automotive and IoT. • Building the New Armv9 Architecture. Leveraging the

progress made by previous generations of our

products, we embarked on the development of the Armv9 architecture, the ninth version of the Arm ISA. T oday, the Armv9 architecture powers CPUs that offer improved security and performance across various applications. Consequently, the Armv9

architecture has the potential to drive our royalty opportunity per device even higher. • Broadening our Compute Platforms. We have curated, integrated, and optimized our CPU and

system-design components together into foundational compute platforms to deliver best-in-class performa nce and energy efficiency for our customers. • Expanding our Value Proposition for Customers. As building chips using the most advanced

manufacturing processes became more complex and more costly, the opportunity to expand our product offerings to our customers increased. As a result, we have created more advanced and optimized CPU products that enable us to provide more value to

our customers by giving their devices more functionality and more performance while using less power an d at lower cost. 123 Table of Contents • Introducing New Licensing Models with Increased Focus on Maximizing Royalty Opportunities. By

licensing a portfolio of Arm products (rather than licensing a single CPU product or other technology desig n), we have made it easier and more compelling for customers to access and utilize more Arm products, f urther broadening our potential

customer base and end market penetration. Our licensing models provide greater flexibility to our custom ers and maximize our opportunities to secure more design wins for our products, which results in greater opportunities to increase our recurring

royalty revenue. • Diversifying and Deepening our Relationships with Market Leaders . We have establish ed close

partnerships with leading companies across all of our target markets, including, among others, OPPO, Sa msung, vivo and Xiaomi in mobile computing, Amazon and Alibaba in cloud compute, Cruise and Merced es-Benz in advanced automotive, and Raspberry

Pi, Schneider Electric and Siemens in industrial IoT. Industry Background Semiconductors are indispensa ble to everyday life. In today's technology-driven world, semiconductors are the enablers of the devices a nd

infrastructure that facilitate virtually everything people do, such as making a phone call, sending an email, storing files in the cloud, streaming videos, or traveling by car, train, or plane. Almost all of the products a nd services people use

every day rely on semiconductors. Manufacturing, logistics, city infrastructure, and building management also increasingly build their processes and services around semiconductor-enabled devices. As consumer s and enterprises continue to demand more

from their devices, the pervasiveness of high-performance and energy-efficient semiconductors will continue to expand. We believe there are several key trends driving the growth and evolution of the semiconductor industry. Proliferation of Smart, Connected Devices Supporting an Increasingly Digital World The world is becoming increasingly digital with the proliferation of smart, connected devices, such as smartphones, wearables, PCs, tablets,

and other electronic devices. Even everyday products like washing machines, thermostats, and utility met ers are becoming more advanced. According to Deloitte's 2022 Connectivity and Mobile Trends Survey, the average U.S. household had 22

connected devices in 2022, doubling from 11 devices in 2019. The market trend to make nearly all produc ts smart and connected is not just limited to consumer electronics, but is also driving a wave of innovation across a broad range of end markets

and use cases. For example, vehicles are effectively transforming into computers on wheels, factory floor s are becoming increasingly automated with robotics, and retail shopping is evolving with the help of cashi er-less checkout technology. Increased Need for High-Performance, Power-Efficient Compute The massiv e expansion of data, advanced software applications, and AI are driving the need for high-performance compute capabilities. To address increasingly complex workloads, a key approach has been to increase the speed of a CPU and expand the number of processor cores per chip. For example, core

count increased by approximately tenfold between 2010 and 2022 for many smartphone application proce ssors and by more than 30 times over the same period for certain data center server chips. Moreover, the number of cores per "high end"

Arm-based chip has increased from 8 in 2016 to 192 in 2023. Solely running an existing chip faster may d eliver more compute performance, but increasing performance in this way results in higher energy costs, and may cause thermal limits to be

exceeded. For example, individual servers are limited by their ability to dissipate heat energy, while whole data centers are limited by how much electricity is available to them. Mobile devices are limited by the energy stored in their batteries,

while their instantaneous power is limited by thermal constraints. Furthermore, the transition to electric ve hicles is increasing pressure on automakers to consider the power consumption and thermal management of vehicle electronics. In addition,

enterprises are increasingly mindful of environmental sustainability, which is driving a need for more effici ent alternatives to offset the continued growth in data centers and other compute deployments. According to McKinsey, the energy usage from

data centers is expected to increase two times by the end of 2030 relative to 2022 levels. Collectively, the se considerations result in the need for innovation in chip design to address market demands for an optim al balance of performance,

efficiency, size, and cost across end markets. 124 Table of Contents Increasing Complexity and Cost of D esigning Leading-Edge Solutions The resources required to develop leading-edge products are significant and continue to increase exponentially as manufacturing process nodes

shrink. According to IBS, IC design costs were approximately \$249 million for a 7nm chip and approximately \$725 million for a 2nm chip, representing approximately a three-times increase in design cost as compared to a 7nm chip. Design partners play

an increasingly valuable role in the chip design process by providing specialized capabilities and expertise that enable semiconductor suppliers to focus on their core product differentiation, while keeping pace with market innovation. Design

partners facilitate innovation and enhance customers' competitive positioning by reducing the complexity, risk, and cost of a significant part of the development cycle. For example, to design a 2nm chip, IBS estim ates that the software

development, verification, and IP qualification is 71% of the overall cost. In addition, design partners, like Arm, that can demonstrate a deep understanding of their customers' workloads are better positioned to int egrate themselves into their

customers' workflows, further expanding their value proposition over time. Source: IBS July 2022. Growth of In-House Development and Custom Silicon Chips Many OEMs today utilize "off-the-shelf," or

"merchant," semiconductors when building their product offerings. However, this approach can introduce c ompromises. For example, an OEM may use a chip that includes features that are irrelevant for its use case, at the expense of

performance and cost efficiency. Similarly, an OEM may need a chip that incorporates features not otherw ise available from a merchant supplier. As a result, leading OEMs are increasingly looking to build custom chips in-house that deliver greater

performance and greater efficiency at an equal or better price for a particular use case. The successes of Arm-based products such as Amazon's Graviton, deployed across Amazon data centers globally, have demonstrated the opportunity to create a sustainable competitive advantage through this approach. For e xample, Amazon claims that Graviton delivers up to 40% better price performance over comparable x86-b ased systems. This trend of increasing use of

in-house developed solutions has significantly expanded the opportunity for Arm. 125 Table of Contents O ur Solution We provide the most pervasive CPU architecture in the world. The key elements of our solution include: • Arm CPUs. The foundation of our product offerings is our market-leading CPU products. Our CPU

products leverage our common scalable ISA and address the widest range of performance, power, and co st requirements. • Other Design Offerings . We have a portfolio of products that are deployed alongside o ur

CPUs, including: • Graphics Processing Units. We offer a family of GPU products providing an optimal visual experience

across a wide range of devices. • System IP. Complementary design components that enable designers to create high-performance,

power-efficient, reliable, and secure chips. • Compute Platform Products. Arm's CPU, GPU, and System I

P products integrate into a

foundational compute platform optimized for a specific end market. • Development Tools and Software. O ur tools and software support the development and deployment of

our offerings. We continue to expand the scope of our product offerings, investing in more holistic, end-m arket

optimized designs, expanding beyond individual design IP to providing subsystem designs. Given the com plexities of developing chips using the most advanced manufacturing processes, we are making significant investments to better support the

increasing number of OEMs looking to develop their own customized chips. In addition, we have cultivate d a broad ecosystem of third-party

hardware and software partners to support our customers. Our partners include leading semiconductor te chnology suppliers, including foundries (such as Global Foundries, Intel's Foundry Services business, TS MC and UMC) and EDA vendors (such as

Cadence, Synopsys and Siemens). We also invest in our software ecosystem and work closely with firmw are and operating system vendors (such as Amazon Linux, Canonical, Google, Microsoft, RedHat, VMwar e and Wind River), game engine vendors (such as

Unity and Epic Games), software tool providers (such as Green Hills, IAR and Lauterbach), and application software developers (such as Adobe, EA, King and Microsoft). Our solution, combined with the breadth of our software ecosystem and the millions of chip design engineers and software developers that utilize it, has created a virtuous cycle of adoption, which means that software developers write software for Arm-based devices because it offers the biggest market for their products, and chip designers choose Arm processors because they have the broadest support of software applications. We believe that the primary customer benefits of

our solution include: • Ability to Optimize for Performance, Power and Area (PPA) . Arm's flexible and modular

design IP enables customers to build chips optimized for the PPA requirements for a specific use case or end market. A battery-powered device such as a smartphone has a different PPA requirement versus a hi gh-performance cloud server or an IoT sensor. By developing a wide range of CPU and related technologi es, Arm can provide a CPU optimized for various use cases to reduce both energy consumption and area (with area being a key driver of the ultimate cost of a chip). • Alignment with the Semiconductor Industry's Technology Roadmap. As leading-edge

manufacturing processes continue to progress towards smaller transistors, developing chips is becoming harder and more costly, requiring more engineering time and effort. To further reduce our customers' cost s and to help de-risk their product development efforts, we combine our CPU products and SoC knowledg e with our deep understanding of our ecosystem partners' design tools and manufacturing processes to provide processor

products that not only optimize for power and performance, but also accelerate time to market for our cust omers. In addition, through our deep customer and partner relationships, we have unique visibility into the future requirements of end markets

as far as 10 years out, which informs the development of our products to ensure that our products meet or exceed future market needs. 126 Table of Contents • Reduced Design Risk and Cost. Our solution allow s customers to build optimized chips, while

reducing their design execution risk and their internal development costs. We generally expect to license our products to multiple customers, enabling us to completely cover the cost of developing new Arm products by charging each licensee only a

portion of the total development costs. We invest significant time, resources and effort in the design and v erification of each processor and work closely with our partners to ensure a standard of excellence in the processor products we deliver to

our customers. • Incorporation of AI and ML Acceleration in Every Processor We Design. Using an AI or ML algorithm

is just another way of programming the software needed to run a chip, and we expect that AI and ML algo rithms will complement the software used by most chips in the future, from high-end super computers to tiny, remote sensors. Arm processors run AI and ML workloads, and every smartphone currently in the m arket efficiently runs AI inference applications, such as voice recognition and applying filters to digital ima ges. To ensure that software

developers can efficiently run the AI and ML workloads, each generation of our processors is designed to accelerate key parts of algorithms that will be used in future applications. Our Market Opportunity We define our TAM

to include all chips that can contain a processor and, therefore, our TAM includes the main controller chips in smartphones, PCs, digital TVs, servers, vehicles and networking equipment. Our TAM excludes chips that are unlikely to contain a

processor, such as memory and analog chips. For the calendar year ended December 31, 2022, we estim ate that our TAM was

approximately \$202.5 billion and we forecast that our TAM will grow at a CAGR of 6.8% to approximately \$246.6 billion by the end of the calendar year ending December 31, 2025. We estimate that the aggregate value of chips containing

Arm technology was approximately \$98.9 billion in the calendar year ended December 31, 2022, representing an approximate 48.9% market share as compared to an approximate 42.3% market share as of December 31, 2020. We estimate that our

royalty revenue as of December 31, 2022 represented approximately 1.7% of the industry TAM containing Arm-based chips. We expect that the cost and complexity of chip design will continue to increase, and that we will be able to contribute a greater proportion of the technology included in each chip, resulting in our royalties comprising a greater proportion of each chip's total value. Our calculation of TAM is based on a combination of

third-party sources, customer reports and our own internal assessments and judgment. Mobile Application s Processor The mobile applications processor is the primary chip in a smartphone and runs the operating system and applications in addition to controlling

many of the device functions, including gaming, music, video, and any other applications. While high com pute performance is required for today's applications, processors also must be highly energy efficient so t hat the smartphone's battery

will last all day without needing to be recharged. We expect the mobile applications processor market to g row from approximately \$29.9 billion in the calendar year ended December 31, 2022 to approximately \$36 .0 billion in the calendar

year ending December 31, 2025, representing a CAGR of 6.4% over that period. We have maintained ma rket share in the mobile applications processor market of greater than 99% for many years, by virtue of all key mobile operating systems,

including Android, depending on Arm processors. We expect the value of the market for mobile applications processors to continue to grow,

particularly in light of several smartphone usage trends that are increasing the need for high-performance processing capabilities: • 5G Modems: Many smartphones are now built with 5G technology, which enables new data-intensive

applications for the smartphone, driving the need for even greater performance while maintaining or improving energy efficiency to address the thermal constraints of small form factors. 127 Table of Contents • Mobile Gaming: According to International Data Corporation ("IDC"), mobile gaming

represented 61% of the overall gaming market in 2022. A number of the latest smartphones include Arm's latest GPU, which makes game graphics more realistic and immersive. • Al and ML: Emerging Al and ML workloads drive many apps and games, and Armv9-based smartphones have

additional instructions to accelerate AI and ML functionality. Other Mobile Chips Mobile phones contain m any chips beyond the main applications processor, including the modem, Wi-Fi, Bluetooth and NFC conne ctivity chips, GPS chips, touchscreen controllers, power management chips, camera chips, audio chips and more, which we refer to collectively as the "other mobile chips market." We expect the other mobile chip

market to remain relatively flat at approximately \$17.6 billion in the calendar year ended December 31, 20 22 and approximately \$17.5 billion in the calendar year ending December 31, 2025, representing a CAGR of (0.2)% over that

period. The market share of Arm-based chips in the other mobile chips market varies by device and is gen erally higher in chips that run more software (such as modem and connectivity chips) and is lower in chips that require less software (such as power management chips). Consumer Electronics CE includes p roducts found in the home, such as digital TVs, tablets, laptops, XR headsets and wearables. We expect the CE chip market to grow

from approximately \$46.9 billion in the calendar year ended December 31, 2022 to approximately \$53.2 billion in the calendar year ending December 31, 2025, representing a CAGR of 4.3% over that period. The market share of Arm-based chips in consumer electronics is increasing as new product categories,

such as smart speakers, XR headsets and laptops, adopt Arm products to achieve high performance with out sacrificing efficiency. Laptops with Microsoft Windows and Google Chrome operating systems utilize A rm products. The adoption of smart wearables

is expected to continue, with IDC projecting the number of wearables to grow at a CAGR of 4.7% between 2022 and 2027. Similarly, augmented reality and virtual reality hardware is reaching an inflection point, with IDC projecting the number of such

hardware shipments to grow at a CAGR of 32.0% between 2022 and 2027. Industrial IoT and Embedded The industrial IoT and embedded semiconductor TAM includes chips used by a wide range of goods, including washing machines, thermostats,

digital cameras, drones, sensors, surveillance cameras, manufacturing equipment, robotics, electric motor controllers and city infrastructure and building management equipment. IDC expects the total number of I oT connected devices to grow from

approximately 37.6 billion in 2022 to approximately 49.1 billion by 2026. We expect the industrial IoT and embedded chip market to grow from approximately \$41.5 billion in the calendar year ended December 31, 2022 to

\$50.5 billion in the calendar year ending December 31, 2025, representing a CAGR of 6.7% over that peri od. Our market share in the IoT and embedded chip market has grown from 58.4% as of December 31, 2020 to 64.5% as of December 31, 2022. Many manufacturers and logistics companies are using advance d sensors and smart machines capable of capturing and analyzing data in real

time to improve and automate industrial processes and logistics systems. Combining the data captured by sensors with AI and data analytics can result in improvements in manufacturing yield and system through put. Our products are broadly applicable

for sensors and embedded computers that require small, power efficient and smart processors. Networking Equipment Our networking equipment TAM includes chips deployed into wireless networking such as b ase-station equipment, enterprise Wi-Fi, and wired networking equipment such as routers and switches. A ccording to 128 Table of Contents IBISWorld, total internet traffic volume is expected to grow from 335 ex abytes per month in 2022 to 580 exabytes per month in 2025, representing a CAGR of 20%, thereby incre asing the need to

deploy additional networking equipment. The market is growing as more wired and wireless infrastructure is deployed, as much of the data

consumed in the cloud is created at the edge and needs to be transmitted over networks to the data cente r for processing. We expect the networking equipment chip market to grow from approximately \$17.2 billion in the calendar year ended

December 31, 2022 to approximately \$18.2 billion in the calendar year ending December 31, 2025, representing a CAGR of 1.8% over that period. Our market share in the networking equipment market has increased from 18.8% as of December 31.

2020 to 25.5% as of December 31, 2022. Arm is posed to accelerate market-share gains resulting from the deployment of 5G networks as infrastructure scales from fewer large cell towers covering a wide area to a large number of small cells providing high-speed coverage, with a single architecture across both large and small cells to allow for flexible deployment of software and workloads. Cloud Compute The cloud compute

market includes the main server chips, DPUs, and SmartNICs used by CSPs to run their operations. Thes e CSPs include Amazon AWS, Microsoft Azure, Google Cloud, Alibaba Cloud, Baidu, Inc., Tencent Holdin gs Ltd. and Oracle Corporation. We expect the

cloud compute market to grow from approximately \$17.9 billion in the calendar year ended December 31, 2022 to approximately \$28.4 billion in the calendar year ending December 31, 2025, representing a CAG R of 16.6% over that period. The

increase in cloud computing has been driven by the rapid increase in data traffic generated by consumers and enterprises globally and by the migration of enterprise workloads to the cloud. As a result, IDC predicts spending on cloud infrastructure

to reach approximately 68% of total compute and storage infrastructure spend by 2027. As the volume of workloads continues to increase, CSPs are increasingly seeking custom processor solutions that can deli

ver improvements in performance per watt

and total cost of ownership. Arm-based chips have been gaining market share as CSPs, such as

Amazon and Alibaba, have started to deploy Arm products in their own in-house designed chips used in t heir data centers, and as other CSPs, such as Microsoft and Oracle, start to deploy chips designed by Ar m

licensees, such as Ampere. As a result, we expect our market share of cloud compute to grow significantly faster than the overall cloud compute market. Our market share in the cloud compute market has grown from 7.2% as of December 31, 2020 to 10.1%

as of December 31, 2022. Other Infrastructure Other Infrastructure refers to the technological components and systems that support various aspects of computing, networking, and data

processing and include chips deployed into HPC systems, enterprise servers, and edge networking equip ment. We expect the other infrastructure market to grow from approximately \$12.7 billion in the calendar y ear ended December 31, 2022 to

approximately \$13.7 billion in the calendar year ending December 31, 2025, representing a CAGR of 2.7 % over that period. Our market share in the other infrastructure market has grown from 9.1% as of December 31, 2020 to 16.2% as of

December 31, 2022. Automotive Our automotive TAM includes all chips with processors within vehicles. T his includes chips used for IVI, ADAS, engine management, and body and

chassis control. We expect the automotive chip market to grow from approximately \$18.8 billion in the cal endar year ended December 31, 2022 to approximately \$29.1 billion in the calendar year ending December 31, 2025, representing a CAGR

of 15.7% over that period. Today, our market share in the automotive market is highest in more technologically advanced functional areas such as IVI and ADAS. Our market share in the automotive market has grown from 33.0% as of December 31, 2020 to

40.8% as of December 31, 2022. Our total automotive royalty revenue grew 36% in the fiscal year ended March 31, 2023, as compared to the previous fiscal year. The automotive TAM is expected to increase as ADAS, electrification, IVI, and eventually autonomous driving, accelerate requirements for

higher compute performance in newly manufactured vehicles. At the same time, automakers must operat e with strict constraints on power consumption, heat dissipation, and packaging, 129 Table of Contents w hile prioritizing functional safety. Furthermore, automotive electronics are transitioning from hardware-defined to software-defined architecture and compute, enabling new services and features

such as ADAS to be continuously improved via over-the-air updates. Gartner estimates that by 2029, soft ware-defined vehicles will surpass 90% of total unit production,

up from 3% in 2021. Many of these trends mirror the evolution of the smartphone and, therefore, we belie ve that we are well positioned to outpace the growth of the overall automotive market. Our Business Mode I and Customers Our

open and flexible business model provides access to high-quality CPU products for a wide range of potent ial customer types and end markets. We license our products to semiconductor companies, OEMs, and ot her organizations to design their chips. Our

customers license our products for a fee, which gives them access to our designs and enables them to cr eate Arm-based chips. Once a chip has been designed and manufactured with our products, we receive a per-unit royalty on substantially all chips shipped. The royalty has typically been based on a percentage of the ASP of the chip or a fixed fee per unit, and it typically increases as more Arm products are included in the chip. Our business model

enables the widest range of customers to access Arm products through an agreement best suited to their particular business needs. Arm Total Access Arm Total Access provides access to the widest range of Arm products and is intended for customers who use Arm products in chips

for multiple end markets. An Arm Total Access licensee pays an annual fee determined at execution of the agreement, and, in return, the licensee gains access to our portfolio of products, including new products that are introduced during the term of

the license. As of March 31, 2023, we had 18 Arm Total Access agreements with leading CSPs, microcon troller chip vendors, and networking chip vendors, including approximately half of our top 20 customers. A rm Total Access customers include Amazon

AWS, Infineon Technologies AG, Marvell Technology, Inc., Microsoft, NXP Semiconductors N.V., Realtek Semiconductor Corp, STMicroelectronics N.V. and others. Arm Flexible Access Arm Flexible

Access is a low cost entry model for smaller companies and provides access to some of our most popular products for consumer electronics and embedded computing. An Arm Flexible Access licensee pays a no minal fee per year and, in return, gains access

to more than 80 components, including our Cortex-M and Cortex-R family of CPUs and many of the most widely deployed Cortex-A CPUs

and our System IP products. Although customers are free to experiment with products contained in the Ar m Flexible Access package, they must pay a single use license fee for any products they include in a final chip design, and such license fee is

based on the specific products incorporated in that final chip design. As of March 31, 2023, we had 203 Ar m Flexible Access agreements, including many smaller companies and start-ups who are still developing their first Arm-based chip. Both Arm Total Access and Arm Flexible Access agreements provide our customers with access to a broad portfolio of Arm products, which changes the relationship b

etween Arm and our customer from a sales engagement to a design partnership. Once the Arm Total Acc ess or Arm Flexible Access is signed, our

focus moves to design wins, helping our customer maximize the value of the Arm products that they have licensed. Technology License Agreements A Technology License Agreement has been the primary mean s for a customer to access Arm products for many years. To gain access to

Arm products under a TLA, a customer pays a fixed license fee to access a single CPU product or other t echnology design. The license fee depends on which Arm products are being licensed, the term during w hich the licensee is able to design using our

products covered by the license (manufacturing rights are typically perpetual), and the number of chip products of the licensee that may use our products. 130 Table of Contents As we have deepened our relation ships with our customers, we have started to migrate them to

more holistic license agreements, including Arm Total Access and Arm Flexible Access agreements. Archi tecture Licenses A very small number of companies want to design customized Arm CPUs for their next-g eneration chips. For these companies, we can provide an

architecture license which allows the licensee to develop their own CPU design that is compliant with the Arm ISA. In addition to the architecture license fee, the licensee agrees to pay a royalty on every chip that contains the Arm-compliant design. As the creation of an optimized CPU is very costly and time consuming, architecture licensees often also license Arm CPU products to use either as a complementary process or alongside the

licensee's Arm-compliant CPU design, or in other chips where the licensee's own design is unsuitable. We expect the number of new licensees for this technology to diminish over time as the effort

required on their part to provide the customization often does not provide a reasonable return on investme nt. Arm licenses can yield royalties for

many years Regardless of the license model a customer uses, we receive a per-unit royalty fee on substantially every chip shipped.

Because each chip may ship for many years, and each Arm CPU can be reused in new products as new applications emerge, these licensing agreements help to ensure a long tail of recurring royalty revenues, which provide significant visibility into

future revenue streams. Arm is still collecting royalty revenues for products that were first developed and li censed in the early 1990s. For example, based on royalty revenue information provided to us by customer s in quarterly royalty reports,

approximately 46% of our royalty revenue for the fiscal year ended March 31, 2023 came from products r eleased between 1990 to 2012. Our recurring royalties support Arm's revenue growth into the future and provide enhanced performance

visibility and predictability, as new products and architectures are launched. Competitive Strengths We have enjoyed success for more than 30 years by providing market-leading technology, adapting our solution to changing market needs and

building a software developer ecosystem unlike any other in history. Our competitive strengths include: • Technology Leadership with Proven Capabilities Across Markets . Arm CPU technology has been an industry leader for many years and continues to be the most widely deployed architecture globally. Sin ce our inception, our customers have shipped more than 250 billion Arm-based chips, and we estimate that Arm had an approximate 48.9% market share by value in the calendar year ended December 31, 202 2, up from approximately 39.7% in the calendar year ended December 31, 2014. Our products are used in

virtually all smartphones, a majority of

tablets and digital TVs, and a significant proportion of all chips with embedded processors. We have an es tablished presence in the cloud market, working with many of the largest hyperscalers, including Amazon, Alibaba, Alphabet and Microsoft. In

2018, we entered the cloud compute market, and, as of December 31, 2022, we have grown our market s hare to approximately 10.1%. In the automotive market, we work with many of the leading suppliers, and we believe that, on average, each new

vehicle produced in our fiscal year ended March 31, 2023 contained approximately 13 Arm-based chips.

Our products deliver leading performance per watt and provides the flexibility to design custom

chips, addressing the growing need for power-efficient compute capabilities. We believe that these factors , which have driven our success in the mobile and consumer electronics markets, are emerging as key fac tors in the automotive, cloud compute,

networking equipment, and other growth markets. • World's Most Extensive Ecosystem of Third-Party Soft ware and Hardware Partners . Arm has

the world's largest ecosystem of third-party software and hardware partners, including chip design and ver ification tools vendors, advanced fabrication, operating system and application vendors, software 131 Tab le of Contents tools providers, and training and support services companies. As of March 31, 2023, more t han 1,000 partner companies were invested in developing products that complement Arm's

technology, allowing Arm customers to get their products to market more efficiently with reduced cost, dev elopment time, and risk. The wide deployment of chips based on the Arm ISA provides software and tools companies with a large market to develop

and sell their products into. As of March 31, 2023, there were more than 8 million apps running on Arm-ba sed devices built by more than 15 million developers designing software for Arm-based systems. We esti mate that, Arm's engineers invested more than 10 million hours in creating the base software and tools for chips containing Armv8 processors, and that the developers have then

spent another 1.5 billion hours creating their apps and software. We also estimate that Arm will be investing more than 30 million hours creating the base software and tools for Armv9 processors, which will enable the next generation of apps

and software for Arm-based chips. The breadth of our ecosystem creates a virtuous cycle that benefits our customers and deeply integrates us into the design cycle because it is difficult to create a commercial product or service for a particular end

market until all elements of the hardware and supporting software and tools ecosystem are available. Buil ding the required software ecosystem around an architecture requires significant investment and can take decades. For instance, we started to

invest in the technology and ecosystem for the server market in 2007, but it took over 10 years for Arm to start to gain share, given the lack of an existing hardware/software ecosystem at the start. • Deep Integration with Customers and Ecosystem Partners. We work closely with our customers

and ecosystem partners to understand future industry trends and the evolution of end markets. We have worked in partnership with our top 10 customers by royalty revenue, for the fiscal year ended March 31, 2 023, for an average of over

20 years. When a major semiconductor company licenses Arm products to deploy in their product roadmap, they are committing to use Arm products in multiple generations of their future chips. We believe that it is essential that we align with our

customers on their development plans and engineering timeline, so that our products meet or exceed their requirements and are delivered at the right time in their chip development timeline. Because it can take t wo to three years to design a new Arm

processor, and it can take another two to three years to develop a chip, this close relationship with our cu stomers' R&D functions can provide us with unparalleled visibility into the product pipeline of our customer s and, by extension.

their customers and end markets. This requires us to not only work closely with our direct customers, but also with other elements of the ecosystem to understand and align product plans. Our collaborative relationships with partners in our extensive

ecosystem, including companies that contribute design tools, manufacturing capabilities, software and oth er components, provide us with unique insights across the entire semiconductor industry, enabling us to in vest in developing new products years,

and sometimes up to a decade, before the products are deployed to end-users. • Efficient Model and Lon g-Term Visibility Enables Investment in Future Products. Our business

model provides significant flexibility to fund long-term investments in future products. We have a capital-light and people-focused model, with most of our investments directed at hiring and retaining

engineers undertaking advanced research and development. With few exceptions, there are no direct cost s associated with signing a technology license or in collecting a royalty, which enabled us, in the fiscal year ended March 31, 2023, to

generate 96% gross margins and fund extensive investments in research and development. Arm incurs re search and development investments today for the development of products that will be licensed in the fut ure, with royalty fees to follow for years,

and often decades, beyond that. We focus our investments on leading-edge products, and we leverage o ur underlying technology across multiple derivative products targeting different markets and extending into new applications over time. We are able

to make significant upfront investments due to our alignment with customer roadmaps and the resulting vi sibility from long-term royalty streams. Some products continue to generate royalty revenue even after 25 years following their initial

development, and approximately 46% of royalty revenue received in the fiscal year ended March 31, 2023 came from products released between 1990 to 2012, based on royalty revenue information provided to us by customers in quarterly royalty

reports. 132 Table of Contents • We Satisfy our Customers' Processor Design Needs in a Mutually Beneficial Way. We

invest extensively in creating leading products that can be used across a wide range of end markets and c ustomers. As we expect to license our products to multiple customers, we can typically cover the entire co st of developing new Arm products by

charging each customer only a portion of the total development costs. This lowers the costs for each semi conductor designer to license Arm products, versus developing the technology in-house, and enables customers to focus resources on differentiation. In addition, by licensing Arm CPU technology, the license e immediately gains access to the vast Arm ecosystem, which would be impossible to leverage if they dev eloped their own CPU in- house. • World-Class R&D Team with a Proven Track Record of Innovation. We are an engineering-first

company, with 4,753 of our employees, or approximately 80% of our global employees, as of March 31, 2 023, focused on research, design, and technical innovation. Our customers rely on us to deliver advanced technology, leveraging our extensive

capabilities and scale across our CPU, GPU, systems, and platform products. Our culture encourages cro ss collaboration between teams and individuals, and we highly value collective effort. As a result of our un ique reach and impact, we are able to

attract and retain some of the brightest semiconductor engineers in the world. Our research and develop ment team is prolific at developing new inventions, for which we seek patents to the greatest extent possi ble. As of March 31, 2023, we owned

or co-owned a portfolio of approximately 6,800 issued patents and had approximately 2,700 patent applic ations pending worldwide, many of which are relevant to the key technologies used in many of the chips manufactured today. Our Growth Strategies We assess our investments through the lens of sustainable g rowth. Our research and development and new business initiatives are often tied to

revenue streams five to ten years in the future, while our historical investments drive revenue and enable profitability and cash flow generation today. Key levers of our growth strategy are: • Gain or Maintain Shar e in Long-Term Growth Markets. We already have significant market share in

some high-value markets, such as mobile applications processors, which enables us to invest in other gro wth opportunities. As of December 31, 2022, our market share in growth markets, including cloud computing, networking equipment, automotive

and consumer electronics, was 10.1%, 25.5%, 40.8% and 32.3%, respectively. We believe that the increa sing need for high-powered and energy-efficient computing, as well as our continued investments, will enable us to grow our market share in these

segments. We are gaining share in cloud compute, as we provide CPU products that have leading perfor mance per watt, and we provide CSPs with the flexibility to design their own chips to meet their specific n eeds more effectively, at a much lower

cost than purchasing an off-the-shelf chip based on an alternative architecture. Additionally, the automotive market is being transformed through increasingly advanced

vehicle software, infotainment, ADAS and eventually autonomous systems, which drives the need for mor e chips and more advanced chips in every vehicle. We already have a leading share of these new chips being integrated into vehicles today, and we

believe we are well positioned to be the CPU architecture for vehicles of the future. • Increase the Value of Arm Processors in Every Smart Device. As chip designs become more advanced

and complex, we believe that our investments in additional functionality, higher performance, higher efficie ncy, and more specialized designs will allow us to deliver more value to our partners. For smartphones, we continue to increase our

investments in CPU and GPU products to provide PC-like speed and graphics and all-day battery life. For the automotive market, our CPUs balance increasing performance

with the constraints of energy consumption and heat dissipation, while also meeting the highest Automotiv e Safety Integrity Level standards required for ADAS and autonomous driving. For servers and high-end n etworking equipment, we are enabling market-leading core counts, such as in Ampere's Altra Max and Ali baba's Yitian 710 server processors, which both have 128 Arm CPU cores. These innovations enable us to license more advanced Arm

products, and for our customers to implement Arm-based chips with multiple CPUs and more cores, all of which 133 Table of Contents allow us to capture more value per chip. For example, a chip with an Arm C PU based on the latest Armv9 architecture and with eight cores, plus an Arm GPU, will typically have a m uch higher

royalty rate than a chip with a dual-core Arm CPU core based on an older architecture. Our customers have only just started to ship chips based on the latest Armv9 technology, enabling natural expansion in our royalty per chip as the deployment of

our latest technology accelerates. • Expand our System IP and SoC Offerings . To enable further improve ments in performance and

efficiency, we continue to develop a broader set of configurable systems IP offerings, including proven onchip interconnect, security IP, memory controllers, and other design IP to be used with our

processors, including the integration of multiple IP technologies into a subsystem and additional informati on to assist in fabrication. More recently, we have invested in a holistic, solution-focused approach

to design, expanding beyond individual design IP elements to providing a more complete system. By deliv ering SoC solutions optimized for specific use cases, we can ensure that the entire system works together seamlessly to provide maximum

performance and efficiency. At the same time, by designing an increasingly greater portion of the overall c hip design, we are further reducing incremental development investment and risk borne by our customers while also enabling us to capture more

value per device. • Invest in Next-Generation Technologies. We continuously evaluate emerging markets and technologies

that may enable us to create more advanced products that bring more value to our customers and ecosys tem. For example, we are leading the way in integrating AI and ML capabilities across all devices through our highly scalable architecture. All

modern smartphones are AI and ML capable by virtue of their Arm processors, and we are increasingly w orking with companies in other markets, such as consumer electronics and automotive, to deploy AI-base d solutions. For the networking, cloud and data center markets, we continue to add AI-specific features to our CPUs to enable market-leading performance. • Benefit from the Flexibility of Arm Products . Each Arm processor provides a certain compute

capability within a power budget and, as such, can be used in multiple different devices that have similar c ompute requirements. An Arm customer who may have designed a processor for one application may, in t he future, find additional applications

that can utilize this technology. Consequently, Arm products may be used in new products for new end m arkets for many years or in some cases decades. For example, a processor originally licensed to go into a chip for a smartphone, can also be used

in a chip for a tablet, digital TV, or smart speaker. We expect this trend to continue with growing proliferati on of devices and use cases. • Expand Access to Arm Products Through our Flexible Business Model. We are focused on making

Arm products as easy as possible to access and to integrate into a chip design. We will continue to expan d our flexible engagement model to provide all companies with easy access to Arm products, including lo w and no-cost offerings for startups. In recent years and with a growing portfolio of new products, we have started to move customers onto product portfolio licenses, where each customer will gain access to a broad

portfolio of Arm products. Our business model makes licensing our products much easier by allowing our customers to quickly gain access to Arm products. We believe our business model will encourage custom er experimentation and result in a broader

range of Arm features being used. Our business model is also designed to provide better alignment betwe en pricing and the value delivered by us across low- and high-end devices. Cybersecurity and Data Privac y We are focused on delivering to our customers and third-party partners a secure environment that supports innovation and the development of our

products while reinforcing our position as a trusted partner in the ecosystem. We collect, store and otherw ise process certain personal, confidential, and proprietary information in the ordinary course of our busine ss, including trade secrets,

employee data and other sensitive data. In addition, our third-party partners and customers regularly provi de us with highly sensitive information, including details 134 Table of Contents about their future product p lans and roadmaps. To protect this information, our dedicated Enterprise Security team works on an ongoing basis to develop our understanding of active threats

targeting Arm and its partner ecosystem and effectively leverages this intelligence using security analytics and automated testing to improve our situational awareness and defense. Our security model and control s are based on international standards

and industry best practices, such as the National Institute of Standards and Technology's cyber security fr amework. We also have a

dedicated privacy team that builds and executes our privacy program, which includes working with our leg al team to conduct privacy and impact assessments and reviews, and support data protection and privacy related requests. We continually monitor

the regulatory environment and from time to time make additional changes to our services and business p ractices to enable us and our customers to comply with applicable laws, regulations, rules, standards, and other obligations. See "Risk

Factors—Risks Relating to Government Regulation and Legal Compliance—Actual or perceived failures to satisfy data protection, security, privacy or other laws, regulations, rules, standards and other government- and industry-specific

obligations could adversely affect our business, results of operations, financial condition and reputation." Competition We believe that our architecture and CPU designs are the leading independent processor technologies licensed to other companies. In addition,

our established worldwide network of partners and customers affords us broad presence, which paired wit h an unparalleled software developer ecosystem gives us an advantage over other companies that licens e processor-related technology. Our products

are used in nearly all smartphones, a majority of tablets and digital TVs, and a significant proportion of all chips with embedded processors. In addition, we believe that our extensive ecosystem and the high barrie rs to entry into certain of our

end markets enhance our competitive position. The breadth of our ecosystem creates a virtuous cycle that benefits our customers and closely integrates us into their design cycle. We have deep relationships with our customers and ecosystem partners,

which provide unique visibility across the entire semiconductor industry. We compete based on a variety of factors, including price,

performance, product quality, software availability, marketing and distribution capability, customer support, name recognition and financial strength. Further, given our reliance on our partners and customers, our competitive position is dependent

on our partners' and customers' competitive positions. In addition, our partners and customers do not lice nse our products exclusively; rather, several of our partners and customers also design, develop, manufa cture and market processors

based on non-Arm based architectures as well as develop their own Physical IP in-house. Our partners a nd customers compete with each other and with us in various

applications. The level of competition and the nature of the competitor generally varies based on the end market. For established markets where there is an incumbent architecture with a supporting ecosystem, it can be difficult for a new

architecture to displace existing architectures and, therefore, to gain market share. For example, we have made significant progress and have established a large market share in markets such as smartphones, co nsumer electronics and IoT. We face

competition primarily from other architectures like x86 and RISC-V in many of these markets. Furthermore , certain semiconductor companies, including some of our existing customers, have designed or are in the process of designing their own architectures in markets such as smartphone application processors, other mobile chips, consumer electronics, IoT and embedded computing, networking equipment, automotive, a nd cloud compute. The markets for our products are intensely competitive and are characterized by rapid technological change. These changes result in frequent

product introductions, short product life cycles and increased product capabilities typically representing si gnificant price and performance improvements. We face significant competition from established technologies such as the x86 architecture, as

well as from free, open-source technologies, including the RISC-V architecture. Many of our customers ar e also major supporters of the RISC-V architecture and related

technologies. If the RISC-V architecture and related technologies continue to be developed and market su pport for RISC-V increases, our customers may choose to utilize

this free, open-source architecture instead of our products. The x86 and RISC-V architectures have busin ess models that are different from ours and may be more attractive to our customers. Our current and potential competitors also may establish cooperative relationships among themselves or with third parties that may further enhance their resources or 135 Table of Contents strengthen their positions within these markets or they may be subject to more favorable regulatory regimes. For example, in August 2023, a group of our customers and other competitors announced

a joint venture aimed at accelerating the adoption of RISC-V. In addition, some semiconductor companies , including certain of our customers, have developed their own proprietary architecture for specific market s or applications. See "Risk Factors—Risks Relating to Our Business and Industry." Marketing, Sales and Partner Enablement We believe that we have the industry's largest ecosystem of third-party software and hardware partners, including advanced manufacturing,

OS and application developers, software tools vendors, and training and support services. The availability of our marketing, sales and support services to our ecosystem is critical to the success of our products a nd allows us to create and maintain

deep customer and partner relationships, through which we have visibility into the future requirements of t he end markets for our products. As of March 2023, we had over 650 employees across the world dedicat ed to marketing, sales, and partner

enablement. We market our products directly to our semiconductor partners and customers from our offic es across the world. Our CPUs and related technologies are marketed on the basis of a number of factors , including performance, power consumption,

price, speed-to-market, support and maintenance offerings and the availability of third-party support. We a lso capitalize on the extensive marketing and distribution

networks of our semiconductor partners who market and distribute our products directly to systems comp anies. Our solution is used by many

different types of customers, including major chip vendors, OEMs, service providers, start-ups or small bu siness units, and researchers and academics. The combination of billions of chips, shipping into myriad end markets, the breadth of our software ecosystem, and the millions of chip design engineers and software developers collectively has created a virtuous cycle in which software developers write software for Ar m-based devices because it is the biggest market for their products, and chip designers choose our proce ssors because they have the broadest support network. As a result, we believe we are well-positioned to continue to attract and retain customers through our dedicated marketing, sales and partner enablement t eams. Research and Development We are an engineering-first company, with approximately 80% of our g lobal employees, as of March 31, 2023, focused on research, design,

and technical innovation, and we have global operations and research and development centers in the U. K., Europe, North America, India, and Asia-Pacific. Our ability to compete is substantially dependent on a dvancement of our products in order to

meet evolving market demands. Our engineers are involved in researching and developing new versions of processor cores, specialist processors, such as graphics IP and AI accelerators, System IP and Physic al IP technology as well as related software

and tools applications. Our significant research and development investments and increasing market shar e in certain markets, such as mobile applications processors, consumer electronics, and embedded computing, enable us to invest more effectively

and efficiently in the development of new products in various end markets such as the automotive and clo ud computing markets. We have committed, and intend to continue to commit, significant financial and oth er resources to technology and product

innovation and development. For more information about our research and development policies, see "Ma nagement's Discussion and Analysis of Financial Condition and Results of Operations—Components of R esults of Operations—Research

and Development" and "Management's Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations—Comparison of Performance for the Fiscal Years Ended March 31, 202 2 and

2021—Research and Development." Intellectual Property Our success and ability to compete effectively depend significantly on protecting our IP. To protect our IP rights, we primarily rely on

patent, copyright, trade secret and trademark laws, trade secret protection and confidentiality agreements, as well as license agreements with our employees, customers, partners, and others. We have an active p rogram of protecting our proprietary

technology through the filing of patents, registration of 136 Table of Contents trademarks, and use of confidentiality agreements and other IP rights. As of March 31, 2023, we owned or co-owned approximately 6, 800 issued patents

and have approximately 2,700 patent applications pending worldwide. The majority of these patents and p atent applications fall into the categories of processor architecture and microarchitecture, ML and comput er vision, graphic processor

architecture, on-chip system design and memory technology. We maintain and support an active program to protect our IP, primarily through encouraging engineers to propose new invention submissions and defending issued patents against infringement. Approximately 97% of our active patent portfolio (granted and pending) is owned solely by

us, or jointly with, our subsidiaries, with the remaining 3% comprising patent assets jointly owned with one or more third parties. Through intra-group licensing arrangements, we have access to our entire patent portfolio for the purposes of licensing technology or otherwise providing services to third parties. As a result of our global

operations, efforts to protect our technology, trade secrets and other proprietary information can be difficul t, particularly in jurisdictions that provide limited or no protection for IP rights. If confidential information (in cluding, but not

limited to, trade secrets, and proprietary technology and information) is improperly shared we would likely seek to determine the source and whether or not financial losses could be recovered through contractual claims against a licensee.

Additionally, we would seek to block importation of finished goods created in such "limited-protection" terri tories into territories where there exist better protections. Although we intend to protect our rights vigorous ly, there can be no

assurance that such measures will be successful. See "Risk Factors—Risks Relating to Our Business and Industry—Failure to obtain, maintain, protect, defend or enforce our IP rights could impair our ability to protect our proprietary

products and our brand, and the costs of obtaining, maintaining, protecting, defending and enforcing such IP rights, particularly as a result of litigation, may adversely and materially affect our results of operations." The IPLA with Arm China We are party to

the IPLA with Arm China. Under the IPLA, Arm China licenses certain of our IP from us. In turn, Arm China sublicenses such IP to its PRC

customers, as the exclusive distributor of our IP licenses to customers in the PRC. • Customers. Arm Chin a is permitted to sublicense to customers in the PRC. This includes any

ultimate parent of a group that is incorporated in the PRC and traded on any official stock exchange, any entity whose ultimate parent is incorporated in the PRC, and any entity under the ultimate control of a PR

C citizen. However, it does not

include PRC subsidiaries of companies incorporated outside of the PRC, even though these companies m ay still sell products in the PRC. • Products. Arm China can sublicense our standard IP offerings. Arm China is required to procure our

consent in order to sublicense non-standard technology or architectural licenses. We may remove any su blicensable IP that we declare obsolete or no longer generally make available to our licensees, whereupo n Arm China's

rights with respect to such IP are limited to licenses it previously granted. Arm China may only distribute our IP in accordance with our

model license terms provided by us. Any deviations from our model license terms require our consent. • P ricing. There are no material restrictions under the IPLA on the prices that Arm China may set for its sublicenses. • Term. The initial term of the IPLA is through April 23, 2048, after which the IPLA will automatically renew for consecutive 10-year periods until the later of (a) the last to expire of the patents licensed pursuant to the IPLA expires and (b) the last of the trade secrets licensed

pursuant to the IPLA ceases to be confidential (other than through the fault of us or Arm China). During the term of the IPLA, Arm China may grant sublicenses to its PRC customers. There are no material restrictions on the duration of the

sublicenses that Arm China provides during the term of the IPLA. 137 Table of Contents • Termination. We and Arm China each have the ability to unilaterally terminate the IPLA upon the

occurrence of standard termination events, such as the non-terminating party's material uncured breach of the IPLA, bankruptcy or extended force majeure event of at least 180 days having a material

adverse effect on the terminating party. Under the IPLA, Arm China may also develop its own IP. Howeve r, Arm China is

only permitted to develop (i) certain derivative products incorporating our IP and (ii) Arm China's own products that do not incorporate our IP, where such products constitute technology related to IC products or te chnology that

enables companies to build ICs, and exclude any "processor cores." Under the IPLA, we are entitled to ap proximately 90% of the revenues generated by Arm China on our IP products that it most frequently sublic enses to its customers. In addition, under the IPLA, we are contractually obligated to indemnify both Arm China and its PRC customers that sublicense our IP in the

event either Arm China or such customers incur damages or costs in lawsuits, administrative proceedings or similar actions based upon a claim that our IP infringes the IP of a third party. For the fiscal years ende d March 31, 2023, 2022, and 2021, revenues attributable to our relationship with Arm China were approximately

24%, 18%, and 20% of our total revenue, respectively. See "Risk Factors—Risks Relating to Our Busines s and Industry—We

depend on our commercial relationship with Arm China to access the PRC market. If that commercial relationship no longer existed or deteriorates, our ability to compete in the PRC market could be materially and adversely affected" and

"Risk Factors—Risks Relating to Our Business and Industry—Neither we nor SoftBank Group control the operations of Arm China, which operates independently of us." Our People and Human Capital Resources Our Core Beliefs define how we work together to ensure our continued success. We believe that our employees' commitment to developing and

contributing positively to our culture in a manner consistent with our Core Beliefs is a differentiating factor that creates a competitive advantage for us and our ecosystem, supports the execution of our long-term b usiness strategy and is

attractive to current and prospective employees. Our Core Beliefs are an important aspiration for us and, as part of their annual review, our people are rated on how effectively they live our Core Beliefs. Our three Core Beliefs are: • " Do great things "—working at pace, embracing challenges, finding a way • " We, not I "—winning together, not alone • " Be your brilliant self "—exemplified by skillful individuality, performance, and

inclusion In line with our focus on embedding Diversity, Equity and Inclusion ("DEI") in everything we do, DEI practices are integrated into each of our Core Beliefs. As part of our Employee Value Proposition, we have made a series of

commitments to our people and their experience of working at Arm that we measure through our annual e

ngagement survey. These include ensuring our people contribute to solving the world's complex technology problems and spend their time on

valuable work that matters; rewarding our people competitively and equitably for the work they do and the skills and experience they bring to Arm; developing our people towards the careers they want and support ing their success in work and life; co-creating an inclusive environment by integrating DEI practices into e verything we do; and using our position as a global company to be a force for good. Diversity, Equity, and Inclusion We know that diverse teams drive innovation and creativity, excel at solving complex problems a nd make better decisions. We are committed to

fostering a culture of inclusion in which representation matters, people are valued, diverse perspectives ar e heard, and everyone's skills are utilized. 138 Table of Contents The foundation of our DEI strategy is to i ntegrate DEI practices into everything we do. We

have four pillars of our DEI strategy: • People —Hire, support, and empower talent from all backgrounds a t all levels throughout the

entire employee life cycle • Culture —Embody core beliefs and inclusive actions every day • Leadership —Lead internally and externally with DEI as a business, people, and culture

imperative • Partnerships —Utilize DEI as a strategic enabler across the ecosystem We have developed a nd regularly review performance indicators to evaluate our progress in pursuit of our DEI priorities. For example, we have

a company-wide accountability measure for "commitment to DEI" as part of the annual review process. In the past two years, over 99% of our people have supported our DEI strategy by getting involved in our DEI initiatives. In 2022, we were among the winners of the annual Glassdoor Employees' Choice Awards for the best places to work in the U.K. This award is

entirely based on voluntary and anonymous feedback that our employees have shared on Glassdoor. Wel lbeing and Benefits We invest in our people by taking a holistic approach to their wellbeing, which include s physical, mental, social, and financial wellbeing. We

offer a range of benefits and programs, like flexible work hours and time off for life-changing and defining situations through our progressive leave policy and support for new parents. Talent We aspire to attract, engage, and retain the innovators of tomorrow, and we aim to recruit individuals with diverse backgrounds , skills, and abilities who will contribute to our success. We seek candidates through a variety of channels, including job boards, social

networks, universities and more. Our employee referral program is one of our key recruitment tools and, o n average, nearly 25% of our hires each quarter join us following a referral by one of our employees. As p art of our Early Careers program, we recruited over 150 university graduates globally in the fiscal year en ded March 31, 2023, spread

across our offices in the U.K., U.S., India and Europe. Putting DEI at the heart of our recruiting, we have s trategic partnerships to

source interns, apprentices, and graduates, and we collaborate with other organizations to recruit individu als with diverse backgrounds. We are committed to a hiring process free of any bias or discrimination and in compliance with applicable laws

in each of the countries in which we operate. We have a learning culture where colleagues are empowere d to own and drive development to

meet their work and personal goals by learning through the shared experience of others, learning resourc es and practice. We invest heavily in technical development with a dedicated team to support colleagues in obtaining the proper training to

advance their technical capabilities in support of our strategy. Our Employees We employ a global workfor ce that spans across 19 countries. As of March 31, 2023, approximately 80% of our 5,963 global employe es were

engaged in engineering activities delivering products for our partners to schedule and specification as well as driving innovations in our industry. During the fiscal year ended March 31, 2023, we engaged an avera ge of 1.421 contractors and

consultants. 139 Table of Contents The following table sets forth the number of our employees for each of the past three

financial years: Function March 31, 2023 March 31, 2022 March 31, 2021 Engineering 4,753 4,758 4,712 Non-Engineering 1,210 1,571 1,655 Geographic Distribution United Kingdom 2,785 3,219 3,161 United St ates 1,157 1,177 1,246 India 848 793 826 Other 1,173 1,140 1,134 Total Employees 5,963 6,329 6,367

We consider relations with our employees to be good and have never experienced a work stoppage. Our employees

in France and Hungary are represented by works councils. We consider our relationship with these works councils to be productive and constructive, and there are currently no ongoing disputes. During the fiscal year ended March 31, 2023, we restructured our business to focus on activities that move our strategy for ward while

taking a more disciplined approach on our costs and investment activities. To achieve this, we stopped wo rk that was duplicative or no longer critical to our future success. This restructuring resulted in the terminat ion of 436 general and

administrative positions across nine countries. Most of these terminations were in the U.K. and the U.S. T he restructuring was completed by June 2022. There are currently no plans for future restructuring; howev er, we continue to proactively review our organizational design in relation to our

evolving business needs and make ordinary course adjustments, as necessary or appropriate, on an ong oing basis. Environmental, Social and Governance We believe in the power of technology to build a better world for everyone, but we understand that technological advancement cannot be

achieved at the expense of the environment or our societal well-being. We are committed to maximizing o ur positive societal impact; minimizing our climate impact; and promoting ethical and responsible business practices and the personal wellbeing of

our employees and the communities we impact. Decarbonizing Compute Arm has a long-term ambition to contribute to decarbonizing compute, and we are working towards this goal by first seeking to reduce our own

carbon emissions. In September 2020, we committed to achieving net zero carbon by 2030, 20 years ahe ad of the 2050 target outlined in the United Nations' Paris Climate Agreement. To achieve this, we are committed to taking a science-aligned

approach to cut absolute emissions by 50% (from a 2019 baseline) by 2030 and follow a 1.5° Celsius pat hway. We have committed to a 42% reduction in supply-chain carbon, which is supported by our work with the Carbon Disclosure Project

("CDP") Supply Chain. Through the CDP Supply Chain, we have gathered data to reduce supply chain e missions, and the next step is to work with suppliers to reduce these emissions. We also recognize that o ur power- and energy-efficient products have a role to play in decarbonizing compute, and our longer-term objective is

to explore how we can continue to maximize these initiatives within our ecosystem. We recognize the importance of transparent reporting and produce comprehensive reports that demonstrate our commitment to the issues that are material to our business

and stakeholders, for example by reporting against the Global Reporting Initiative Index and to the CDP. Closing the Digital Divide We are working to maximize our positive social impact by closing the digital divide between those who have full access to digital technologies

and the billions of people who currently do not. We do this with our employees and our ecosystem of soci al impact partners to find opportunities where we can add value and 140 Table of Contents expertise. Thr ough our Arm Flexible Access and developer programs, we have lowered the barriers to using our products and this has had a positive impact on start-ups and initiatives in the environmental and social space. Our Arm Education initiative

aims to help close education and skills gaps in Computer Engineering and STEM. As part of the initiative, we provide teaching and learning resources, IP, tools, and other support to universities and work closely with academic and industry partners

on research collaborations. Since 2013, we have supported and collaborated with over 2,500 universities worldwide and enabled more than 10,000 Arm-based classes. Employee Community Engagement At a local level, Team Arm, our employee community engagement program, provides our people with opport unities to volunteer and fundraise for charitable purposes. Everyone at Arm is entitled to time off once per month to engage in volunteer activities. Governance We strive to be a

leader in corporate responsibility and demonstrate our values through responsible business practices. We are guided by governance policies promoting a core moral stance on ethical issues, security and safety. Our Board of Directors is responsible

for reviewing our policies, metrics and risks that relate to ESG. Further, our management team maintains a Sustainability Committee that oversees and monitors the implementation of our sustainability programs,

and ESG risks are reported through

management's Risk Review Committee. We intend to continue to examine the sustainability topics that are most relevant for our

business and stakeholders as we further develop and advance our sustainability strategy. We have established company policies, including, our Code of Conduct, our Code of Conduct for Suppliers, our Anti-Brib ery and Corruption Policy and DEI

policies, that support our efforts to operate sustainably by guiding our employees, partners and suppliers in their business dealings and requiring compliance with applicable laws and regulations. These company policies address practices and

requirements that we have established with respect to environmental protection, responsible sourcing, hu man rights, labor standards and ethics, diversity, and compliance, among other topics. We review these p olicies regularly to ensure that they

remain relevant to our organization, our people, our partners and applicable laws and regulation. Facilities Our global headquarters are located in Cambridge, U.K., occupying approximately 322,950 square feet of leased office space in the aggregate,

with the leases expiring between 2023 and 2044. We are currently on a temporary extension of one of the leases for our global headquarters while we negotiate the lease renewal. We also lease additional facilities in Belgium, Denmark, France,

Germany, Hungary, India, Ireland, Israel, Japan, South Korea, Norway, Poland, Slovenia, Sweden, Taiwan, the U.K., and the U.S. We believe

that our current global headquarters and global offices are well maintained and adequate for our current n eeds and that suitable additional or substitute space at commercially reasonable terms will be available as needed. Government Regulation We are subject to

regulation by various governmental agencies, including, but not limited to, such agencies in the U.K., the European Union, the U.S., and the PRC. These laws and regulations affect our activities in areas 141 Tab le of Contents including, but not limited to, labor, telecommunications, IP ownership and infringement, tax, economic sanctions, import and export requirements and controls, anti-corruption, national security and foreign investment, foreign exchange controls and cash repatriation restrictions, privacy and data prot ection (such as the GDPR, the U.K. GDPR, and the CCPA), security and cybersecurity, and data localizati on requirements, anti-competition,

environmental, health and safety, financial reporting and the certification requirements associated with public sector contracts. We monitor changes in these laws, regulations, treaties, and agreements, and believe that we are in material compliance

with applicable laws. See "Risk Factors—Risks Relating to Government Regulation and Legal Complianc e" and "Risk Factors—Risks Relating to U.S. and U.K. Tax Regimes." Legal Proceedings From time to time, we

are involved in various legal, administrative, and regulatory proceedings, claims, demands and investigati ons relating to our business, which may include claims with respect to commercial, product liability, IP, cy bersecurity, privacy, data

protection, antitrust, breach of contract, labor and employment, whistleblower, mergers and acquisitions a nd other matters. In addition, under our customer agreements, we agree in some cases to indemnify our c ustomers if a third party files a claim

in court or another venue asserting that our products infringe such third party's IP rights. Although we do n ot agree to indemnify our customers' end customers, such end customers may be subject to infringement claims and may initiate

claims against us as a result. We are currently involved in pending litigation, including, but not limited to, a lawsuit that we issued against Qualcomm and Nuvia in the United States District Court for the District of Delaware (Case No. 1:22-cv-01146). In addition, our products are involved in pending litigation to which we are not a party. We cannot provide you any assurances regarding how any such

litigation will be resolved, what benefits we will obtain or what losses we might incur. The results of any cu rrent or future litigation cannot be predicted with certainty, and regardless of the outcome, litigation can have an adverse impact on us

because of defense and settlement costs, diversion of management resources and other factors. See "Risk Factors—Risks Relating to Our Business and Industry—We are currently involved in pending litigation" and "Risk

Factors—Risks Relating to Our Business and Industry—We may be sued by third parties for alleged infringement, misappropriation or other violation of their IP rights or proprietary rights and our defense against these claims can be

costly . " 142 Table of Contents MANAGEMENT AND EXECUTIVE REMUNERATION Executive Officers and Directors The

following table sets forth information regarding our executive officers and directors as of the date of this prospectus. Name Age Position(s) Non-Executive Directors: Masayoshi Son 66 Chairman of the Board of Directors Ronald D. Fisher 75 Director Jeffrey A. Sine 68 Director Karen E. Dykstra 64 Director Anthony Michael Fadell 54 Director Rosemary Schooler 55 Director Paul E. Jacobs, PhD 60 Director Executive Officers: Rene Haas 61 Chief Executive Officer and Director Jason Child 54 Executive Vice President and Chief Financial Officer Kirsty Gill 51 Executive Vice President and Chief People Officer Spencer Collins 42 Executive Vice President and Chief Architect Will Abbey 53 Executive Vice President and Chief Commercial Officer Non-Executive Directors Masayoshi Son has served as a Director and Chairman of our Board of Directors since March 2018. From September 2016 to March 2018,

Mr. Son served as Chairman of the Board of Directors of Arm Holdings plc. Mr. Son founded SoftBank Gr oup in September 1981 and has been its Chairman and Chief Executive Officer since February 1986. Founded initially as a PC software

distribution business, SoftBank Group and its portfolio of companies have expanded to cover a range of te chnologies, including advanced telecommunications, internet services, AI, smart robotics, and IoT. Mr. So n has overseen investments in some

of the world's fastest-growing technology companies. Mr. Son serves in various capacities within SoftBank Group's portfolio of companies, including SoftBank Corp. (Japanese Telecommunication Operator) as it s Chairman since 2015 and

served as its Chairman and Chief Executive Officer from 2006 to 2015. Mr. Son has also served as Honor ary Chairman of the Broadband Association in Japan. Mr. Son was selected to serve on our Board of Dire ctors because of his vast executive leadership experience, including through his

service as Chairman and Chief Executive Officer of SoftBank Group, a large international public company and our controlling shareholder, along with his significant expertise in technology and innovation. Ronald D. Fisher has served as a Director of our Board of Directors since March 2018. Mr. Fisher is a Senior Advisor at SoftBank

Investment Advisors. Mr. Fisher joined SoftBank Group in 1995 and was the founder and Managing Partn er of SoftBank Capital. Mr. Fisher joined the Board of SoftBank Group in 1997 and was Vice Chairman from 2017 to 2022. Mr. Fisher has

more than 40 years of experience of working with high-growth and turnaround technology companies. Pri or to joining SoftBank Group, Mr. Fisher was the Chief Executive Officer of Phoenix Technologies Ltd., the leading developer and marketer of

system software products for personal computers, from 1990 to 1995. Mr. Fisher joined Phoenix from Inte ractive Systems Corporation, a 143 Table of Contents UNIX software company that was purchased by the Eastman Kodak Company in 1988. Mr. Fisher served for five years as President, initially as Chief Operating Officer and then Chief Executive

Officer at Interactive Systems. Mr. Fisher earned an MBA from Columbia University and a Bachelor of Co mmerce from the University of Witwatersrand in South Africa. Mr. Fisher was selected to serve on our Bo ard of Directors due to his extensive business, operational and management experience in the

technology industry. Jeffrey A. Sine has served as a Director of our Board of Directors since September 2 022. Mr. Sine is the Co-Founder and Partner of The Raine Group LLC, a global merchant bank focused o n technology, media, and communications. Prior to founding The Raine Group LLC, he served as Vice Ch airman and Global Head of

Technology, Media & Telecom Investment Banking at UBS Investment Bank. Mr. Sine was a Managing Di rector at Morgan Stanley and an attorney at Sullivan & Cromwell in New York and London. Mr. Sine curre ntly serves on the

boards of many portfolio companies and subsidiaries of The Raine Group LLC. He also serves on the boards of National Public Radio, ITHAKA, Educational Testing Service, American University and The Manhatt an Theatre Club. Mr. Sine was selected to serve on our Board of Directors due to his significant experience as a leader and director of multiple global

companies with international operations as well as his capital markets and financial experience from his te nure at global financial institutions. Karen E. Dykstra has served as a Director of our Board of Directors si nce September 2022. Ms. Dykstra is the Chief Financial Officer of

VMware, Inc., a position she has held since June 2023. Ms. Dykstra previously served as Chief Financial and Administrative Officer, and as Chief Financial Officer, of AOL, Inc., a web portal and online service provider. Prior to joining AOL,

Inc., Ms. Dykstra was a Partner at Plainfield Asset Management LLC ("Plainfield"), where she served as C hief Operating Officer, Chief Financial Officer and a director of Plainfield Direct LLC, Plainfield's business development

company. Previously, she spent over 25 years with Automatic Data Processing, Inc., a provider of human capital management solutions to employers, serving most recently as Chief Financial Officer, and prior the reto as Vice President—Finance,

Corporate Controller, and in other capacities. Ms. Dykstra is a director of VMware, Inc. and former director of Crane Co., AOL, Inc. and Boston Properties, Inc. Ms. Dykstra was selected to serve on our Board of Di rectors due to her broad executive management experience and financial expertise as

the Chief Financial Officer of multiple global companies and her experience from serving on the board of d irectors of other companies in the technology industry. Anthony Michael Fadell has served as a Director of our Board of Directors since September 2022. Mr. Fadell is an active investor

and entrepreneur with over 30 years of experience in founding companies and designing consumer products. He is the Principal at the Build Collective, an investment and advisory firm that invests in deep tech st artups.

Currently, the Build Collective is working with startups on over 200 innovative technologies. Mr. Fadell is t he founder and former Chief Executive Officer of Nest, a major pioneer in the IoT space. He was Senior V ice President of

Apple's iPod division and led the team that created the first 18 generations of the iPod and the first three g enerations of the iPhone. Mr. Fadell also served as an Advisor to the Chief Executive Officer at Apple. Thr oughout his career,

Mr. Fadell has authored more than 300 patents. He is also a New York Times bestselling author of BUILD : An Unorthodox Guide to Making Things Worth Making . Mr. Fadell was selected to serve on our Board of Directors due to his extensive experience in a range of technology companies as well as

his significant leadership experience, including serving as the founder and Chief Executive Officer of a lea der in the IoT space, and his in-depth knowledge of the technology industry. Rosemary Schooler has serv ed as a Director of our Board of Directors since December 2022. Ms. Schooler has over 30 years of experience in the global technology industry. She most recently served as Corporate Vice 144 Table of C ontents President and General Manager of Data Center and Al Sales for Intel Corporation. During her 33-year career at Intel, Ms. Schooler managed and oversaw

sales and corporate strategy for the company's IoT business. Ms. Schooler also held vice president and g eneral manager positions at a number of Intel start-up initiatives in the embedded/IoT,

networking and storage businesses, including architecture, product development and customer success e fforts. In her networking role, Ms. Schooler led industry transforming initiatives, including Network Function Virtualization and

technologies such as Data Plane Development Kit. Ms. Schooler has supported industry efforts, including ATIS and TIA, as well as non-profits, including the National Center for Women in Technology. She was previously a director for Cloudera and currently serves on the board of directors for Zurn Water Solutions. Ms. Schooler earned a B.S. in ceramic science and engineering from Penn State University. Ms. Schooler was selected to serve on our Board of Directors due to her expansive knowledge of corporate strategy and strategic planning

and vast experience as a leader in the technology industry. Paul E. Jacobs, PhD has served as a Director of our Board of Directors

since December 2022. Dr. Jacobs is the Chairman and Chief Executive Officer of XCOM Labs, which he f ounded in 2018 to develop high performance wireless technologies and applications. Prior to founding XC OM Labs, Dr. Jacobs served as the

Chief Executive Officer and Executive Chairman of Qualcomm Inc., where he spearheaded the company's efforts to develop and commercialize fundamental mobile technology breakthroughs that fueled the wireless internet and smartphone revolutions.

Dr. Jacobs is a prolific inventor with over 80 U.S. patents granted or pending in the field of wireless techno logy and devices. Dr. Jacobs currently serves as a director of Dropbox, Inc. and For Inspiration and Recognition of Science and

Technology. He earned a B.S. in Electrical Engineering and Computer Science, M.S. in Electrical Engineering, and Ph.D. in Electrical Engineering and Computer Science from the University of California, Berkeley. He founded the Jacobs Institute for

Design Innovation at the University of California, Berkeley. Dr. Jacobs is a member of the National Acade my of Engineering and a Fellow of the American Academy of Arts and Sciences. Dr. Jacobs was selected to serve on our Board of Directors based on his experience as the leader and board member of multiple global

companies, as well as his innovation and business experience with companies in, and his in-depth knowle dge of, the technology sector. Executive Officers Rene Haas has

served as our Chief Executive Officer and a Director since February 2022. Prior to being appointed as Chi ef Executive Officer, Mr. Haas served as President of our IP Product Groups (IPG) from January 2017. Un der his leadership, Mr. Haas

transformed IPG to focus on key solutions for vertical markets with a more diversified product portfolio an d increased investment in our software ecosystem. In addition to his role as Chief Executive Officer, Mr. H aas has sat on the boards of

Arm China and SoftBank Group since December 2016 and June 2023, respectively. Mr. Haas also provid es certain advisory and consulting services to SoftBank Group. Mr. Haas joined the Company in October 2013 as Vice President of Strategic

Alliances and two years later was appointed to the Executive Committee and named Arm's Chief Commer cial Officer in charge of global sales and marketing. Before joining the Company, Mr. Haas held several a pplications management,

applications engineering and product engineering roles, including seven years at NVIDIA as Vice Preside nt and General Manager of its computing products business. Prior to NVIDIA, Mr. Haas executive roles at Scintera Networks and Tensilica.

Mr. Haas earned his Bachelor of Science in Electrical and Electronics Engineering from Clarkson University and is a graduate of the Stanford University Graduate School of Business Executive Education Program. Mr. Haas was selected to serve

on our Board of Directors due to his knowledge of our business as our Chief Executive Officer and his ext ensive experience in the semiconductor industry. Jason Child has served as our Executive Vice President and Chief Financial Officer since November 2022. Mr. Child's career

spans 30 years across all aspects of global finance and strategy, accounting, capital markets and treasury , initial public offering execution, and investor relations. He has extensive experience in scaling disruptive technologies within enterprise

software and software-as-a-service industries, e-commerce, local 145 Table of Contents commerce, cons umer hardware and IoT, and online residential real estate. He most recently served as Senior Vice-Presid ent and Chief Financial Officer at Splunk, a technology company specializing

in application management, security, and compliance, as well as business and web analytics. Mr. Child has also served as Chief Financial Officer for Groupon, Inc., a global e-commerce marketplace,

Jawbone, a consumer technology and wearable device company, and Opendoor Technologies Inc, an online real estate company. Prior to those roles, he spent more than 11 years leading various global finance teams at Amazon and served as Chief Financial

Officer of Amazon International. Mr. Child has served as a member of the board of directors of Coupang, I nc., an e-commerce company, since April 2022. He holds a B.A. from the Foster School of Business at the University of Washington, where he currently serves on its Global Advisory Board. Kirsty Gill has served as our Executive Vice

President and Chief People Officer since April 2018. Ms. Gill joined the Company in 2002 and has held va rious leadership roles in the People group, including executive compensation, reward, organizational effectiveness, and people services and

systems. As Chief People Officer, she is responsible for managing our policies with respect to our employ ees, our workplace and the sustainability of our business practices. Ms. Gill delivers a unique, progressive , and human working

environment, ensuring that our Core Beliefs are reflected in our policies and practices, allowing everyone t

o thrive and contribute to their full potential. Prior to joining the Company, Ms. Gill was Human Resources Director for a start-up company, GF-X, and started her human resources career at Accenture. Ms. Gill gra duated from the University of Cambridge and is a board member of Cambridge Ahead. Spencer Collins h as served as our Executive Vice President and Chief Legal Officer since September 2022. Prior to his appointment.

he served as Interim General Counsel from February 2022. Mr. Collins has more than 20 years of industry experience and has served as lead counsel on many of the highest-profile M&A and investment transactions in the technology sector. Prior

to joining the Company, Mr. Collins was Managing Partner and General Counsel at SoftBank Investment Advisors, the investment manager of SoftBank Vision Fund. Mr. Collins has also served as a partner in the investment team at SoftBank

Investment Advisors. Prior to joining SoftBank Investment Advisors, he practiced as a technology-focused M&A and investment lawyer in the London offices of White & Case and Allen & Overy. Mr. Collins also spent time on

secondment from Allen & Overy to Fenwick & West. Mr. Collins holds an LL.B. with first class honors. Ric hard

Grisenthwaite has served as our Executive Vice President and Chief Architect since March 2022. Mr. Gris enthwaite joined Arm in March 1997, and is responsible for the long-term evolution of our architecture, leading its development for

more than 20 years, beginning with Armv6. He is currently leading development on Armv9 to ensure its sp ecialized processing unlocks new markets and opportunities across the full spectrum of compute. Early in his tenure at the Company,

Mr. Grisenthwaite worked on Arm720T, Arm940T, and Arm1136EJF-S. Prior to joining the Company, he worked for Analog Devices on fixed-function digital signal processors and at Inmos/ST on the Transputer. Mr. Grisenthwaite is an Arm fellow, has a B.A. in Electrical and Information Sciences from the University of Cambridge and holds 107 patents in the field of microprocessors. Will Abbey has served as our Executive Vice President and Chief Commercial Officer since April 2023. Mr. Abbey joined the Company in 2004 and has held a number of leadership roles, including Senior Vice President of Sales and Partner

Enablement, General Manager of our Physical Design group and Vice President of Commercial Operation s for the Physical IP Division. Now, as

Executive Vice President and Chief Commercial Officer, Mr. Abbey leads sales, field engineering, and par tner enablement at the Company, helping some of the world's most innovative organizations leverage the newest technologies to ready

themselves for the next wave of digital transformation. From IP to AI, his unique insight has helped the wo rld's technology leaders transform their products and operations. Before joining the Company, he worked in product management positions

at Celoxica, Infineon Technologies, and Loughborough Sound Images. Mr. Abbey serves on the board of EnPro Industries and holds a BEng from Sheffield Hallam University, U.K. Family Relationships There are no family

relationships among any of our executive officers or directors. 146 Table of Contents Foreign Private Issu er Exemption We are a "foreign private issuer," as defined by the SEC. As a result, in accordance with SE C and Nasdaq rules, we may, and intend

to, rely on and comply with certain home country governance requirements and exemptions thereunder ra ther than complying with Nasdaq corporate governance standards. While we expect to voluntarily follow m ost Nasdaq corporate governance rules, we

intend to take advantage of certain exemptions, including, but not limited to, exemptions from: • the Nasda q rules applicable to domestic issuers requiring disclosure within four business days of any

determination to grant a waiver of the Code of Conduct to directors and officers; • the requirement to obtain shareholder approval for certain issuances of securities, including shareholder

approval of share option plans; • the requirement that our audit committee have review and oversight responsibilities over all "related party

transactions," as defined in Item 7.B of Form 20-F; • the requirement that there be regularly scheduled me etings of only the independent directors at least twice a

year; • the requirement to solicit proxies and provide proxy statements for all meetings of shareholders; an d • the requirement that the Company's bylaws or articles of association provide that a quorum for the

shareholders' meeting consists of at least 33 1/3% of the outstanding shares of the Company's voting common shares. We intend to follow the practices of England and Wales, our country of incorporation, in lie u of the foregoing requirements. Although we may

rely on home country corporate governance practices in lieu of certain of the rules in the Nasdaq Rule 560 0 Series and Rule 5250(d), we must comply with Nasdaq's Notification of Noncompliance requirement (Rule 5625), the Voting Rights

requirement (Rule 5640), the Diverse Board Representation Rule (Rule 5605(f)), the Board Diversity Disclosure Rule (Rule 5606) and that we have an audit committee that satisfies Rule 5605(c)(3), consisting of committee members that meet the

independence requirements of Rule 5605(c)(2)(A)(ii). Accordingly, our shareholders will not have the sam e protections afforded to

shareholders of companies that are subject to all of the corporate governance requirements of Nasdaq. W e may utilize these exemptions for as long as we continue to qualify as a foreign private issuer. Controlled Company Status SoftBank Group

is expected to beneficially own approximately % of our outstanding ordinary shares upon the completion of this offering (or % if the underwriters exercise in full their option to purchase additional

ADSs from the selling shareholder). As a result of SoftBank Group's ownership, after the completion of this offering, we will be a "controlled company" within the meaning of the corporate governance rules of Nas dag. Under these rules.

a listed company of which a majority of the voting power is held by an individual, group or another company is a "controlled company" and may elect not to comply with certain corporate governance requirements. As a controlled company,

certain exemptions under the rules will mean that we are not required to comply with certain corporate go vernance requirements, including that (1) a majority of our Board of Directors consists of independent dire ctors, as defined under Nasdaq

listing rules, (2) a majority of the independent directors select or recommend its director nominees, (3) the remuneration committee be responsible for determining or recommending the compensation of executive officers other than our Chief

Executive Officer, and (4) we have a remuneration committee that consists entirely of independent directors. We intend to take advantage of the foregoing exemptions. Accordingly, you will not have the same protections afforded to shareholders

of companies that are subject to all of these corporate governance requirements. In the event that we cea se to be a "controlled company" and our ADSs continue to be listed on Nasdaq, we will be required to co mply with these provisions

within the applicable transition periods. See "Risk Factors—Risks Relating to Our Status as a Controlled Company and Foreign Private Issuer—We will be a "controlled company" within the meaning of the Nasda q corporate

governance rules and, as a result, be eligible to rely on exemptions from certain corporate governance re quirements that provide protection to stockholders of companies that are not controlled companies." 147 T able of Contents Composition of our Board of Directors Our business and affairs are managed under the direction of our Board of Directors. Our Board of Directors currently consists of eight members,

all of whom will continue to serve on our Board of Directors upon the completion of this offering. Mr. Son s erves as the Chair of our Board of Directors. Our Board of Directors has affirmatively determined that non e of Ms. Dykstra,

Mr. Fadell, Ms. Schooler and Dr. Jacobs have a relationship that would interfere with the exercise of indep endent judgment in carrying out the responsibilities of director and that each of these directors is "independent" as

that term is defined under Nasdaq rules. Six of our eight current directors were appointed in 2022 in antici pation of becoming a public

company. Prior to the appointment of these new directors, we undertook a fulsome review of the composit ion of our Board of Directors and the skills and qualifications necessary to lead our company going forwar d. Our Board of Directors considered

diversity of experience and expertise as well as gender, racial and ethnic diversity. We believe that the diversity of viewpoints and collective experience of our directors makes our Board of Directors well positione d to lead Arm into the future. SoftBank Group's Director Nomination Rights Our Board of Directors does n

ot have a standing nominating committee. Pursuant to the Shareholder Governance Agreement, SoftBank Group will

have the right to designate a certain number of candidates for election to our Board of Directors based on its and its controlled affiliates' ownership of our outstanding ordinary shares, provided that a certain numb er of such candidates must

be "independent" under law or stock exchange rules applicable to our directors at the time of such nomina tion. SoftBank Group's designation rights are as follows: Ownership of our outstanding ordinary shares: N umber of SoftBank Group candidates for election to our Board of Directors: Number of SoftBank Group candidates that must be independent: Greater than 70% 7 3 Less than or equal to 70% and greater than 60% 6 2 Less than or equal to 60% and greater than 50% 5 1 Less than or equal to 50% and greater than 40% 4 0 Less than or equal to 40% and greater than 30% 3 0 Less than or equal to 30% and greater than 20% 2 0 Less than or equal to 20% and greater than 5% 1 0 SoftBank Group's rights to designate candidates for election to our Board of Directors are based on an

eight-member board, including our Chief Executive Officer, and pursuant to the Shareholder Governance Agreement, will be modified ratably to reflect any change in the number of directors on our Board of Direct ors. Additionally, effective upon completion of this offering and for so long as SoftBank Group and its controlled affiliates own more than 70% of

our outstanding ordinary shares, SoftBank Group will have the right to increase the size of the our Board of Directors to nine directors and appoint a director, who need not be independent, to the board to fill the newly created vacancy. If such

right is exercised, SoftBank Group will have the right to nominate up to eight candidates for election to our Board of Directors for as long as it and its controlled affiliates hold more than 70% of our outstanding ordinary shares. Our Board of Directors will make determinations with respect to each director's independence. To the extent SoftBank Group nominates a

director as an independent director that our Board of Directors, upon advice of counsel, determines does not meet the applicable independence standards, SoftBank Group will be required to propose a new nominee. The Shareholder Governance Agreement also provides SoftBank Group with proportional rights to representation on the committees of our Board of

Directors, subject to applicable restrictions. 148 Table of Contents Committees of our Board of Directors Our Board of Directors has two standing committees: an audit committee and a remuneration committee. Audit Committee Our audit

committee oversees our corporate accounting and financial reporting process and assists our Board of Dir ectors in monitoring our financial systems. Our audit committee is responsible for, among other things: • s electing a qualified firm to serve as (i) the independent registered public accounting firm to audit our financial statements and (ii) the U.K. statutory auditors; • helping to ensure the independence and perform ance of the independent registered public accounting firm and the

U.K. statutory auditors; • helping to maintain and foster an open avenue of communication between mana gement and the independent registered

public accounting firm; • discussing the scope and results of the audit with the independent registered public accounting firm and U.K.

statutory auditors, and reviewing, with management, the independent registered public accounting firm an d U.K. statutory auditors, our interim and year-end operating results; • developing procedures for employe es to submit concerns anonymously about questionable accounting or audit

matters; • reviewing and approving, if applicable, in accordance with our related party transaction policy, a ny proposed

transactions with related persons; • reviewing our policies and practices on risk assessment and risk man agement, including in respect of cyber

security, data privacy and technology and information security; • obtaining and reviewing a report by the in dependent registered public accounting firm at least annually, that

describes its internal quality-control procedures, any material issues with such procedures, and any steps taken to deal with such issues when required by applicable law; and • approving (or, as permitted, pre-ap proving) all audit and all permissible non-audit services to be performed by the independent registered public accounting firm and U.K. statutory auditors. Our audit committee consists

of and Board of Directors has affirmatively determined that , and

meet the requirements for independence under current Nasdaq rules and the additional independence standards applicable to audit committee members established pursuant to Rule 10A-3 of the Exchange A ct. In addition, our Board of Directors has determined that will

qualify as an "audit committee financial expert" as defined by applicable SEC rules. Each member of our a udit committee is financially literate. Remuneration Committee Our

remuneration committee oversees our remuneration policies, plans and benefits programs. Our remunerat ion committee is responsible for, among other things: • reviewing and making recommendations to our Bo ard of Directors related to our remuneration plans and equity-based

plans; • reviewing and making recommendations to our Board of Directors concerning the overall remuner ation philosophy,

policies and plans of the Company; • reviewing and making recommendations to our Board of Directors regarding the performance goals and objectives

relevant to the remuneration of our Chief Executive Officer; 149 Table of Contents • evaluating and making recommendations to our Board of Directors regarding the performance of our Chief Executive

Officer under the previously established performance criteria, goals and objectives, and evaluating and m aking recommendations to our Board of Directors regarding total remuneration for our Chief Executive Officer; • reviewing and making recommendations to our Board of Directors regarding the remuneration to be paid to our non-executive directors; • reviewing and recommending to our Board of Directors the approval of the directors' remuneration report,

which shall be subject to a shareholder advisory vote at the Company's annual general meeting each year; • selecting and retaining a remuneration consultant; and • such other matters that are specifically delegat ed to the remuneration committee by our Board of Directors from

time to time. Our remuneration committee consists

of , and , with

serving as chair. Code of

Conduct We maintain a Code of Conduct applicable to our and our subsidiaries' employees, independent contractors, senior

management and directors, including our principal executive officer, principal financial officer, principal ac counting officer or controller, or persons performing similar functions. Our Board of Directors will monitor c ompliance with our Code of

Conduct, including reviewing the adequacy and effectiveness of our procedures to ensure proper complia nce. Following the effectiveness of the registration statement of which this prospectus is a part, a current copy of the Code of Conduct will be

posted on the Investor Relations section of our website. Remuneration of Executive Officers and Directors For the fiscal year ended March 31, 2023, the aggregate remuneration paid to the members of our Board of Directors and our executive

officers for services in all capacities, including retirement and similar benefits but excluding Executive Awa rds (as described below), was \$43,136,444. Of that aggregate amount, \$17,297,457 was related to remun eration paid to the members of our

Board of Directors. For the fiscal year ended March 31, 2023, the highest paid director received remunera tion of \$16,518,639, excluding the Executive Awards described below. We do not set aside or accrue any amounts to provide pension, retirement or similar benefits to members of our Board of Directors or executive

officers, although we made defined contribution pension contributions on behalf of, and paid pension allo wances to, our directors and executive officers in an aggregate amount of \$153,874 during the fiscal year ended March 31, 2023. During the fiscal year ended March 31, 2023, pursuant to our equity incentive plan s described under "—Equity Incentive

Plans," we granted conditional rights to receive a specified amount of cash or our ordinary shares to our executive officers, which we refer to as "Executive Awards," with outstanding awards in the aggregate amount of \$64,769,682. For

the fiscal year ended March 31, 2023, our highest paid director did not receive any RSUs and received an Executive Award in the amount of \$20,000,000. For more information about awards that vest at the comp

letion of this offering, see

"—Awards Vesting at the Completion of this Offering." Executive Officer Employment Arrangements and Director Appointment Letters Executive Officer Employment Agreements We have entered into offer letter s or employment agreements with our executive officers. Each of our executive officers is employed for an indefinite term unless either we or the executive officer gives prior notice 150 Table of Contents to termina te such employment. We may terminate an executive officer's employment for cause, at any time, without advance notice or severance (except for accrued remuneration or where

required by applicable law). Cause includes, for example, where the executive officer has committed gros s misconduct or negligence. We may terminate an executive officer's employment, for a fair reason and fo llowing a fair process, by providing

prior written notice varying between 30 days and 12 months depending on the terms of the executive's ag reement or at any time for some executives based in the U.S. In such case of termination by us, we will provide severance payments

to the executive officer as expressly required by the applicable law of the jurisdiction where the executive officer is based or per the terms contained in their individual agreement, if any. Two U.S. executives are entitled to receive severance if

they resign for good reason, their employment is terminated due to death or permanent disability, or if ther e is a change in control event, as set out in their individual agreements. Good reason includes, for exampl e, a significant diminution in

authorities, duties or responsibilities, or a material reduction of the executive's salary. To resign for good r eason, the executive must provide sixty days of notice and a reasonable cure period. An executive officer may terminate their

employment at any time with prior written notice, if required, as set out in their individual employment agre ement. Each executive officer

has agreed to hold, both during and after the employment agreement is terminated, in strict confidence an d not to use, except for our benefit, any confidential information of our company or affiliates or of our custo mers, suppliers and other

business partners. The executive officers have also agreed to disclose to us all inventions, designs and a ny other IP which they develop during their employment with us and to assist us in obtaining and enforcing patent, copyright and other legal

rights for such inventions, designs, and IP. In addition, each of our executive officers has agreed to be bo und by post-termination covenants in order to protect our business interests, including restrictions on solic iting our customers and our

employees. Two U.S. executives have post-termination non-compete provisions that equal or exceed the duration of their severance benefits. Non-Executive Director Appointment Letters Prior to the Consummati on of this Offering We have entered into letters of appointment with each of our non-executive directors, except for

Messrs. Son and Fisher. These letters set forth the terms on which each of our non-executive directors se rve on our Board of Directors. Under the letters of appointment, our non-executive directors were entitled to receive (i) remuneration for their services as non-executive directors in accordance with the non-executive director remuneration policy described below and (ii) reimbursement for expenses incurred in connection with the performance of their duties as directors. Continued appointment under the letters

was contingent on continued satisfactory performance, re-nomination by the independent directors and approval of the Board of Directors, re-election by the shareholders

and any relevant statutory provisions and provisions of the Articles relating to removal of a director. These appointment letters were terminated prior to the consummation of this offering. Non-Executive Director R emuneration Policy Upon completion of this offering, our Board of Directors intends to implement a new n on-executive director remuneration policy applicable to each of our non-executive directors other than Mr. Son. Under such policy, our non-executive directors will receive an annual

retainer of \$80,000 in cash and \$220,000 in equity awards under our Omnibus Incentive Plan (as defined below). In addition, our non-executive directors, other than Mr. Son, will receive a fee of \$5,000 per meeting of the Board of Directors. Members of the audit committee and the remuneration committee will receive \$15,000 and \$10,000, respectively, in cash annually. The chairs of the audit committee and remuneration committee will receive \$30,000 and

\$20,000, respectively, in cash annually. Non-executive directors do not receive benefits upon removal or r

esignation from their respective position as directors. We also will reimburse non-executive directors for expenses properly incurred in connection with the performance of his or her duties as a director, including, but not limited to, reasonable travel expenses. Equity Incentive Plans We have granted

equity-based awards to our executive officers and non-executive directors under: (1) the 2022 RSU Plan, (2) the NED Plan, (3) the 2019 AEP and (4) the 2019 EIP (collectively, the

"Prior Plans"). As of 151 Table of Contents June 30, 2023, the total number of ordinary shares subject to outstanding RSU awards granted under the Prior Plans is 38,778,401, and the aggregate value of outstanding Executive Awards

granted under the Prior Plans is \$95 million. We do not plan to grant further awards under the Prior Plans following the completion of this offering. Instead, equity-based awards granted at or after the completion of this offering will be under

our new omnibus incentive plan. The principal features of the four previously-adopted plans that pertain to outstanding awards held by our executive officers and non-executive directors, and the principal

features of our 2023 Omnibus Incentive Plan (the "Omnibus Incentive Plan"), are summarized below. With respect to awards granted under the Prior Plans and the Omnibus Incentive Plan that may be satisfied by transfer or issue of our

ordinary shares, the remuneration committee or other plan administrator may also satisfy them by transfer or issue of ADSs instead. Unless otherwise indicated, under this "Equity Incentive Plans" section, references to our ordinary shares

shall also include references to ADSs. These summaries are qualified in their entirety by reference to the actual text of the applicable plan, each of which is filed as an exhibit to the registration statement of which this prospectus is a part. 2022 RSU Plan The 2022 RSU

Plan was adopted on June 13, 2022 and amended and restated on September 6, 2022. The 2022 RSU Pl an allows for the grant of awards to our (and our subsidiaries') employees and executive directors. The principal features of the 2022 RSU

Plan are summarized below. Administration The 2022 RSU Plan is administered by our remuneration committee. Our remuneration committee has the authority to construe and interpret the

rules of the 2022 RSU Plan, including any sub-plans or appendices to the 2022 RSU Plan and the terms of awards granted under the 2022 RSU Plan, and to make all other determinations and take all actions deemed

necessary or advisable for administering the 2022 RSU Plan. Awards The 2022 RSU Plan provides for th e grant of RSUs, phantom awards, which are similar to RSUs, except that they may only be settled in cas h, and

other awards. Only Executive Awards, which are conditional rights to receive a specified amount of cash or our shares, have been awarded to our executive officers under the 2022 RSU Plan. Shares Available for Awards The aggregate nominal amount of shares over which the remuneration committee may grant awards under the 2022 RSU Plan and the NED Plan is

limited so that it does not exceed at any time an amount equal to (x) 4% of the aggregate nominal amount of our fully diluted equity share capital less (y) the aggregate of the nominal amount of shares allocated in respect of awards

granted under the rules of the 2022 RSU Plan and awards granted under the rules of the NED Plan (excluding any shares allocated in respect of lapsed awards under the 2022 RSU Plan and the NED Plan). Shares that are delivered to recipients upon the

vesting of an award under the 2022 RSU Plan may be satisfied through the issue of new ordinary shares or the transfer (including out of treasury) of shares. Plan Term No awards may

be granted under the 2022 RSU Plan after the earlier of (i) the tenth anniversary of the date of the adoption of the 2022 RSU Plan, and (ii) the completion of our initial public offering. Key Terms of Executive Awards Granted to our Executive Officers under the 2022 RSU Plan The Executive Awards granted to our executive officers under the 2022 RSU Plan entitle the executive officer to a fixed amount of cash or,

after our initial public offering, our ordinary shares. We have generally 152 Table of Contents granted two types of Executive Awards under the 2022 RSU Plan, which we refer to as Annual Awards and One-time Launch Awards. On limited occasions, we have

also granted Executive Awards with customized vesting schedules to certain of our executive officers. An nual Awards and One-time Launch Awards could be settled differently depending on whether vesting occ urs

before or after our initial public offering. The Annual Award typically consists of a portion that is subject only to a time-based vesting schedule and a portion that is subject to a performance-based and time-based vesting schedule. The time-based

portion of the Annual Award vests on an annual basis over three years. The performance-based portion v ests on an annual basis over three years, with each year's vesting amount being within a range of 0% to 2 00% of the award value based on

whether our annual performance metrics are satisfied. The One-time Launch Awards vest on an annual b asis over three years, with no performance-based vesting conditions. We have also granted Executive Aw ards

with terms that differ from those described above. Generally, these awards provide for all or a portion of the award to vest upon the earliest to occur of our initial public offering, a change in control event and a specified future date, subject to

continued employment through the applicable vesting date. Before our initial public offering, any portion of the Executive Awards that

vest will be settled in cash. Upon and after our initial public offering, any portion of the Executive Awards t hat vest will be satisfied in our shares based on the closing price per ADS on the date of our initial public offering, subject to the

right of our remuneration committee to satisfy all or part of any such vested portion in cash. As with the R SU awards, upon a change of control event, which generally includes the acquisition of more than 50% of the voting power of our shares or the

sale of all or substantially all of our assets, a pro rata portion of the unvested Executive Awards will vest. Generally, unvested awards

granted under the 2022 RSU Plan will lapse on the date the executive officer ceases to be an eligible emp loyee or executive director for any reason whatsoever under the 2022 RSU Plan (including, e.g., in connection with the termination of his or her

employment or service as an executive director), except that if the cessation to be an eligible employee or executive director in question is due to ill-health, injury, disability or death, our remuneration

committee may vest all or a portion of that participant's awards. The executive officer will not be treated a s ceasing to be an eligible employee or executive director for these purposes upon leaving the employme nt of a member of our group if,

within the following seven days, he or she recommences employment with another member of our group. The awards will also lapse if our remuneration committee determines that part or all of any such unvested awards should lapse in accordance with any

malus or clawback policy adopted from time to time. Before the record date on which such shares are act ually issued or transferred, a

participant is not entitled to any voting, dividend or other rights attaching to such shares. After such record date of the issue or transfer of such shares, the shares held by a participant will rank equally in all respects to our other ordinary

shares. Clawback All awards granted under the 2022 RSU Plan are subject to lapse, forfeiture and/or rec oupment under any clawback policy that we may adopt

pursuant to the listing standards of any national securities exchange or association on which our securities are listed or as is otherwise required by applicable laws. At this time, we have not adopted a policy regarding the recovery of certain

incentive-based remuneration awarded to current and former executive officers in the event of an accounting restatement. In 2023, we intend to adopt a malus and clawback policy consistent with Rule 10D-1 of the Exchange Act, which requires U.S. national securities exchanges to adopt listing standards for the recovery of erroneously awarded remuneration under certain circumstances. Adjustment In the event of a variation of our equity share capital, a demerger or exempt distribution by virtue of section 1075 of the UK Corporation Tax Act 2010 or a special dividend or distribution, our remuneration committee (acting un

and/or class of shares comprised in an award as it considers appropriate. Plan Amendment Our remunera tion committee may amend the 2022 RSU Plan at any time; however, any amendment which would materially disadvantage participants may

animously) may adjust the number

not be made without prior consent of the majority (assessed by 153 Table of Contents reference to the size of the affected awards) of disadvantaged participants who respond to the request made by our remuner

ation committee to approve such amendment. Our remuneration committee has

the absolute discretion to determine which participants are materially disadvantaged by a proposed amen dment. Transferability and

Participant Payments A participant may not transfer, assign or otherwise dispose of an award or any right s in respect of it. If he or

she does, whether voluntarily or involuntarily, then the award immediately lapses. No payment is required from a participant for the grant of an award. The Arm Non-Executive Directors RSU Award Plan The NED Plan was adopted on September 6, 2022 and allows for the grant of RSUs and

phantom awards to our non-executive directors. The principal features of the NED Plan and awards grant ed to our non-executive directors are substantially the same as the

terms of the 2022 RSU Plan, except that only non-executive directors are eligible to receive awards and the only awards granted to our non-executive directors have been

RSUs, which generally have provided for vesting to occur over a one-year period. The NED Plan is admini stered by our remuneration Committee. The aggregate number of shares over which the our remuneration committee may grant awards under the 2022 RSU Plan and the NED Plan is limited so that it does not exceed at any time an amount equal to (x) 4% of the aggregate nominal amount of our fully diluted equity sh are capital less (y) the

aggregate of the nominal amount of shares allocated in respect of awards granted under the rules of the 2 022 RSU Plan and awards granted under the rules of the NED Plan (excluding any shares allocated in respect of lapsed awards under the 2022 RSU

Plan and the NED Plan). No awards may be granted under the NED Plan after the earlier of (i) the tenth a nniversary of the date of the adoption of the NED Plan, and (ii) our initial public offering. RSUs are awards that entitle the holder to a specified number of our ordinary shares, subject to satisfaction of vesting and other conditions.

The RSUs granted to our non-executive directors vest in March or May of the year following the year of gr ant on the basis of the continued service of the director. The number of RSUs awarded to our non-executive directors for the fiscal year ended March 31, 2023 was determined by dividing \$220,000 by an estimated per share value, with the award pro-rated for non-executive directors on the Board for less than the full year. In addition, a pro-rate portion of the non-executive directors'

RSUs vest upon the occurrence of a change of control event. In each case, once vested, the RSUs are capable of being settled in shares or cash (or a mix of both), as determined by the our remuneration committee. The Arm Limited All-Employee Plan 2019 The 2019 AEP was adopted by our shareholders on December 8, 2019 and amended and restated on each of May 18, 2021 and June 13,

2022, and allows for the grant of awards to our employees and executive directors. The material terms of the 2019 AEP are summarized below. Administration The 2019

AEP is administered by our remuneration committee. Our remuneration committee has the authority to construe and interpret the rules of the 2019 AEP, including any sub-plans or appendices to the 2019 AEP and

the terms of awards granted under the 2019 AEP, and to make all other determinations and take all action s deemed necessary or advisable for administering the 2019 AEP. Shares Available for Awards The aggregate nominal amount of shares over which our remuneration committee may grant awards under the 2019 AEP will be limited so that it

does not exceed at any time an amount equal to (x) 2.2% of the aggregate nominal amount of our fully dil uted equity share capital less (y) the aggregate of the nominal amount of shares allocated in respect of a wards granted under

the rules of the 2019 AEP (excluding any shares allocated in respect of lapsed awards under the 2019 AEP). 154 Table of Contents Awards The 2019 AEP provides for the grant of RSUs and phantom shares. As of the date of this prospectus, our executive officers have only been

granted RSUs pursuant to the 2019 AEP. Key Terms of RSUs Granted to our Executive Officers under the 2019 AEP RSUs granted to our executive officers under the 2019 AEP generally vest on a linear scale on the earliest to occur of (1) 180 days

following our initial public offering with a listing value between \$32 billion and \$55 billion and above (with n one of the awards vesting when the value is \$32 billion or less and all awards vesting when the value is \$55 billion

or above), (2) the acquisition of more than 50% of the voting power of our shares, or sale of the Company

or other change in control event with an implied value between \$32 billion and \$55 billion and above (with none of the awards vesting

when the value is \$32 billion or less and all awards vesting when the value is \$55 billion or above), and (3) March 9, 2026 if the value of our fully diluted share capital on December 31, 2025 is between \$55 billion and

\$75 billion and above (with none of the awards vesting when the value is \$55 billion or less and all awards vesting when the value is \$75 billion or above). If there is a change of control event following our initial public offering but before the vesting date which is 180 days after the initial

public offering, then the awards shall be capable of vesting only on the occurrence of such change of cont rol event, and not the initial public offering, and for the purposes of calculating to what extent (if at all) a participant's award

vests, our remuneration committee must determine the extent to which the relevant vesting hurdle is met or exceeded on both: (i) the initial public offering and (ii) the relevant change of control event, and subject to certain exceptions,

use whichever of the two measurements is more favorable to the participant. Other terms applicable to the RSUs awarded to our executive

officers under the 2019 AEP, including terms relating to termination of employment and forfeiture of the a wards, awards being subject to any clawback polices we may adopt, adjustments in the event of changes to capitalization and similar events,

plan amendments and transferability of awards, are generally consistent with the terms of the RSUs grant ed under the 2022 RSU Plan, as described above. The 2019 EIP The 2019 EIP was

adopted by our shareholders on December 8, 2019 and amended and restated on September 6, 2022, an d allows for the grant of awards to certain of our executive officers or other eligible employees designated by our remuneration committee in

its absolute discretion acting unanimously. Only one of our executive officers holds an award under the 20 19 EIP. The material terms of the 2019 EIP are substantially similar to the terms of the 2019 AEP described above, except that

(1) participation is generally limited to our executive officers, (2) the aggregate number of shares over whi ch our remuneration committee may grant awards under the 2019 EIP is 0.3% of the aggregate nominal a mount of our fully diluted

equity share capital (less the aggregate of the nominal amount of shares allocated in respect of awards gr anted under the rules of the 2019 EIP, excluding any shares allocated in respect of lapsed awards under the 2019 EIP), and

(3) vesting of the executive officer's RSUs upon the earliest to occur of an initial public offering, sale of the Company or other change in control event and a specified future date is not subject to the value threshol ds noted in the

discussion of the 2019 AEP. New Omnibus Incentive Plans On , 2023, our Board of Directors ado pted and our shareholders approved

the Omnibus Incentive Plan, which we intend to use following the completion of this offering for the grant of incentive awards to our employees, including our executive directors, and our non-employees, including our non-employee directors. The Omnibus Incentive Plan will become effective upon the completion of this offering. The principal terms of the Omnibus Incentive Plan are summarized below. 155 Table of Contents Eligibility Our employees, including executive directors, and employees of our subsidiaries will be eligible to participate in the Omnibus Incentive Plan.

Our non-executive directors and consultants, and non-executive directors and consultants of our subsidiar ies, are eligible to participate in the Non-Employee Sub-Plan to the Omnibus Incentive Plan. Persons eligible to receive awards under the Omnibus Incentive Plan (including the Non-Employee Sub-Plan) are toget her referred to as service providers below. Except as otherwise specified, references below to the Omnibus Incentive Plan include the Non-Employee Sub-Plan, provided that in no event may an officer or employee grant, or have administrative discretion with respect to, his or her own award. Administration The

Omnibus Incentive Plan will be administered by our Board of Directors, our remuneration committee or an y other committee composed of members of our Board of Directors that is appointed by our Board of Directors or our remuneration committee to

administer the Omnibus Incentive Plan, subject to certain limitations imposed under the Omnibus Incentive Plan, and other applicable laws and stock exchange listing rules. The administrator will have the authorit

y to construe and interpret the

Omnibus Incentive Plan and the terms of awards granted under the Omnibus Incentive Plan. Subject to a pplicable law, the administrator may authorize one or more officers or employees to administer the Omnib us Incentive Plan. Shares Available for Awards The maximum number of ordinary shares that may be issued under the Omnibus Incentive Plan as approved at the time of adoption of the Omnibus

Incentive Plan was equal to the sum of (i) 20,500,000 ordinary shares and (ii) an annual increase on April 1 of each year beginning on April 1, 2024 and ending on April 1, 2028, equal to the lesser of (A) 2% of the aggregate number of

ordinary shares outstanding on March 31 of the immediately preceding fiscal year and (B) such smaller nu mber of ordinary shares as determined by our Board of Directors or our remuneration committee. No mor e than 20,500,000 ordinary shares may

be issued under the Omnibus Incentive Plan upon the exercise of incentive stock options. If an award under the Omnibus Incentive Plan is

exchanged for or settled in cash, forfeited, canceled or expires without the issuance of our ordinary share s, any unused shares underlying the award will be deemed not to have been issued for purposes of determining the maximum number of ordinary

shares that may be issued under the Omnibus Incentive Plan. Additionally, shares underlying awards issued by the Company in assumption of, or in substitution or exchange for, awards previously granted by a company acquired by the Company or any of

its affiliates or with which the Company or any of its affiliates combines will not be deemed not to have be en issued for purposes of determining the maximum number of ordinary shares that may be issued under the Omnibus Incentive Plan. To the

extent not prohibited by applicable laws, any ordinary shares underlying an award that are surrendered or withheld in payment of the award's exercise or purchase price, or in satisfaction of tax withholding obligations with respect to an award,

will be deemed not to have been issued for purposes of determining the maximum number of ordinary sha res that may be issued under the Omnibus Incentive Plan, unless otherwise determined by the administrat or. Awards may be settled in ordinary shares or ADSs. References in this summary to ordinary shares include references to our ADSs. Ordinary

shares issued under the Omnibus Incentive Plan may be new shares, shares purchased on the open mar ket or treasury shares. Awards The types of awards granted under the Omnibus Incentive Plan will be det ermined by the administrator, but may include awards of share

options, share appreciation rights ("SARs"), restricted shares, RSUs, other awards of cash, shares or othe r property (which may include a specified cash amount that is payable in cash or shares, or awards tied to the appreciation in the

value of shares), dividends and dividend equivalents. Vesting conditions 156 Table of Contents applicable to awards may be based on continued service, achievement of company, business unit or other performance objectives, or such other criteria as our remuneration committee may establish. • Options and SARs.

Options provide for the purchase of our ordinary shares in the

future at an exercise price set at a specified price and usually become exercisable in one or more installm ents after the grant date, subject to the participant's continued employment or service with us and/or subject to the satisfaction of

performance targets established by the administrator. SARs entitle their holder, upon exercise, to receive from us an amount equal to the appreciation of the shares underlying the award between the grant date a nd the exercise date, payable either in

ordinary shares, cash or a combination of the two, as determined by the administrator. The administrator will determine the number of shares underlying each option and SAR, the exercise or base price of each option and SAR and the conditions and

limitations applicable to the exercise of each option and SAR. In general, the exercise price per share for each option or SAR granted under the Omnibus Incentive Plan will not be less than the nominal value of s uch share and for grantees who are

subject to tax in the U.S. not less than the fair market value of such share at the time of grant. • Restricted Shares and RSUs. Restricted shares are an award of non-transferable ordinary shares that remain forf eitable unless and until specified conditions are met and which may be subject to a purchase price. RSUs are contractual promises for grantees to receive our ordinary

shares (or, as determined by the administrator, the cash equivalent) in the future, which may also be subject to vesting, issuance and forfeiture conditions. The administrator may provide that the delivery of the shares underlying RSUs will occur

upon or as soon as reasonably practicable after the RSUs vest or will be deferred on a mandatory basis or at the election of the grantee. The terms and conditions applicable to restricted shares and RSUs will be determined by the administrator,

subject to the conditions and limitations contained in the Omnibus Incentive Plan. • Other Awards; Dividen ds and Dividend Equivalents . Other awards may include awards of fully vested ordinary

shares, cash incentive awards, and other awards valued wholly or partially by referring to, or otherwise ba sed on, our ordinary shares or other property. Other awards may be granted to grantees and may also be available as a payment form in the

settlement of other awards, as standalone payments and as payment in lieu of compensation to which a p articipant is otherwise entitled. The administrator will determine the terms and conditions of other awards, which may include any purchase price,

performance goal, transfer restrictions and vesting conditions. Awards of restricted shares may also entitl e the participant to receive dividends paid on the ordinary shares underlying the awards, and RSUs and ot her stock-based awards (other than

options and SARs) may entitle the participant to receive dividend equivalents, which are notional entitlem ents representing the dividends that would have been paid had the ordinary shares underlying the award been outstanding. Dividends and dividend

equivalents may be subject to the same vesting conditions as the awards to which they relate. Awards may be granted in

consideration of past or future services. The administrator may, but need not, require the payment of cons ideration by the participant with respect to an award. To the extent permitted by applicable law, the administrator may authorize the deferral

of the settlement of awards. To the extent terms of the Omnibus Incentive Plan do not address local laws in non-U.S. jurisdictions, we anticipate that provisions specific to such non-U.S. jurisdictions in which awards are granted will be addressed in the award agreement

"riders," which will set forth or modify otherwise applicable terms as needed to comply with local laws, including, as applicable, tax laws, securities laws, employment laws, data privacy requirements and exchang e controls. Transferability Prior to

the issuance of ordinary shares with respect to an award granted under the Omnibus Incentive Plan, participants generally will not be allowed to transfer awards. However, awards may be transferred by will or by the laws of descent and distribution. 157 Table of Contents Term of Plan; Amendment and Termination T he Omnibus Incentive Plan will have a five-year term; however, the administrator may amend, suspend or terminate the Omnibus Incentive Plan

and award agreements at any time. Generally, if the administrator proposes any amendment, suspension or termination that would be to the material disadvantage of any grantees in respect of subsisting rights under the Omnibus Incentive Plan or the

relevant award agreement, then: (i) the administrator must invite each such disadvantaged grantee to indicate whether or not they approve the amendment, and (ii) such amendment shall only take effect if the majority (assessed by reference to the

size of affected awards) of the grantees who respond to an invitation consent to the amendment. Change in Control In the event of a change in control, unless otherwise specified by the administrator or specified in an individual agreement with the

participant, awards generally will only accelerate to the extent they are not substituted or assumed by the acquiring entity or if the awards are substituted or assumed by the acquiring entity and the participant's se rvice is terminated under

specified circumstances within 18 months following the change in control. In the event the awards are not assumed or substituted by the acquiring or surviving entity in a change in control, except as otherwise det ermined by the administrator or

provided in an award agreement, employment or similar agreement in the definitive change in control tran saction agreement, time-based awards will become vested on a pro-rata basis as of the date of the chang e in control, and all or a portion of

performance-based awards may vest, but only to the extent (if at all) determined by the administrator. The

administrator may also elect to terminate an award in exchange for cash. Adjustments for Certain Corpor ate Events In the event of a stock dividend, stock split or other non-reciprocal transaction that affects shar e values, the type and the number of

ordinary shares, ADSs or other securities subject to the Omnibus Incentive Plan and outstanding awards, and the exercise or base price of outstanding awards will be equitably adjusted as appropriate to reflect the transaction. Additionally, in the

event of a reorganization, amalgamation, dissolution, sale of assets or shares or other corporate transactions, the administrator may take a variety of actions with respect to outstanding awards, including canceling awards in exchange for cash or

other property, accelerating the vesting of awards, causing awards to be terminated or replaced with other rights or property or providing for the substitution or assumption of outstanding awards in a manner intended to preserve the intended

economic and other benefits of the plans and outstanding awards. Non-U.S. and Non-U.K. Participants O ur remuneration committee may modify awards granted to participants who are non-U.S. or U.K. nationals or employed outside the U.S. and the U.K. or establish sub-plans or procedures to address differences in laws, rules, regulations or customs of such

international jurisdictions with respect to tax, securities, currency, employee benefit or other matters or to enable awards to be granted in compliance with a tax favorable regime that may be available in any jurisdiction. Non-Employee Sub-Plan The Non-Employee Sub-Plan governs equity awards granted to our non-executive directors, consultants, advisers and other non-employee service providers and generally provides for awards to be made on identical terms to awards made under

the Omnibus Incentive Plan. Employee Benefit Trust We may establish an employee benefit trust (the "EB T") which would be constituted by a trust deed entered into by the Company and a

professional trustee. 158 Table of Contents The Company would have the power to appoint and remove the trustee. The trustee of the EBT

would have the power to acquire ordinary shares or ADSs. We could fund the EBT by loan or non-repaya ble grant or gift to acquire ordinary shares or ADSs by subscription for newly issued shares at nominal val ue or by purchasing ordinary shares or

ADSs on the open market. Any ordinary shares or ADSs acquired by the EBT could be used for the purpo ses of satisfying awards under the Omnibus Incentive Plan, the 2022 RSU Plan, the 2019 AEP, the 2019 EIP and any other employee share plans

established by our group from time to time. Arm Annual Bonus Plan We have granted cash awards to our executive officers under the Arm Annual Bonus Plan (the "Annual Bonus Plan"). The principal

features of this cash plan are summarized below. This summary is qualified in its entirety by reference to the actual text of the Annual Bonus Plan, which is filed as an exhibit to the registration statement of which this prospectus is a part. Administration For our

executive officers, the Annual Bonus Plan is administered by our remuneration committee. Eligibility Our (and our subsidiaries') employees (which include our executive officers) are eligible to participate in the Annual Bonus Plan. Start of Plan Period At

the start of each plan period (which runs from April 1 of a year to March 31 of the following year), our rem uneration committee determines: (i) whether the Annual Bonus Plan will be operated in respect of that plan period,

(ii) which eligible executive officers may participate in the Annual Bonus Plan, (iii) each participant's target percentage of the actual base salary which may be payable as the bonus award (the "Target Bonus Percentage")

for such plan period; and (iv) the performance conditions for such plan period. With respect to the fiscal ye ar ended March 31, 2023, the target bonus opportunity of our executive officers was in the range from 100 % to 125% of their base

salary levels. The maximum bonus award that can be earned is 200% of the target bonus award (based on the Target Bonus Percentage of the participant's salary) plus any individual performance multiplier. Performance Conditions Our remuneration committee sets performance conditions for each plan period for the whole Company, one or more divisions or business units of

the Arm group (or any subdivision thereof), and/or individual participants, as appropriate, and may in its s ole discretion amend or waive the performance conditions in whole or in part (a) in accordance with the terms specified in the

performance conditions, or (b) if events happen which cause our remuneration committee to consider that (i) the amended performance conditions would be a fairer measure of performance and would be no mor e difficult to satisfy than the

existing performance conditions, or (ii) the existing performance conditions should be waived in whole or in part. Our remuneration committee may withhold, reduce or cancel all or any part of the bonus award for any participant in the event

that our remuneration committee considers that such participant's performance or conduct during the plan period warrants such action. With respect to the fiscal year ended March 31, 2023, the performance cond itions were based on the revenue and profit (EBITDA) of our

group. With respect to the fiscal year ended March 31, 2023, a participant's actual bonus percentage was affected by

(i) the Company performance multiplier (the maximum of which was 100%), and (ii) such participant's 159 Table of Contents individual performance multiplier, based on such participant's overall ratings assigned in his or her 2023 annual review. The maximum bonus award a participant could receive for the fiscal year ended March 31, 2023 was 125% of the Target Bonus Percentage of his or her actual base salary (1 00% attributed to our performance, multiplied by 1.25 for an "Exceptional" rating). New Hires A person who

becomes an eligible executive officer during the course of a plan period and who our remuneration committee determines shall become a participant will be eligible to receive a pro-rated bonus award for such plan period. The pro-rated bonus award will be calculated by determining what the participant's full-year b onus award entitlement would have been under the applicable performance conditions and then making a pro-rate adjustment to such entitlement based on the portion of such plan period in which such participant participated in the Annual Bonus Plan. Change of Performance Conditions and Targets Our re muneration committee, in its sole discretion and at any time within a plan period, may evaluate performance conditions and make changes

to a participant's defined targets. In such case, such participant's bonus award shall be calculated based on our remuneration committee's evaluation, in its sole discretion, of what such participant's full-year bonus award

entitlement would have been under the original performance conditions and what such participant's full-ye ar bonus award entitlement would be under the new performance conditions. Following this, our remunera tion committee shall make an

adjustment to such bonus award based on each of the two entitlements. Termination of Employment Gen erally, a participant must be continuously employed by a member of our group through the end of the applicable plan period in order to

receive a bonus award for such plan period. If a participant ceases to be an eligible executive officer prior to the end of such plan period for any reason, such participant shall immediately forfeit upon termination a ny and all entitlement to any

portion of the bonus award for such plan period. Change in Control In the event of a change of control eve nt during a plan period, the plan period will end and each participant will receive a bonus award payment, payable as soon as administratively practicable following such change of control event, calculat ed by determining what such participant's full-year bonus award entitlement would have been based on d eemed maximum achievement of the

applicable performance conditions through the date of the consummation of such change of control event and then making a pro-rata adjustment to such entitlement based on the portion of such plan period occurring before the date on which such change of control event is consummated. Plan Amendment and Termination Subject to applicable law, our Board of Directors or Executive Committee (or another duly aut horized committee) may (i) delete, alter or

add to any of the provisions of the Annual Bonus Plan in any respect at any time unilaterally and without the consent of any participant, or (ii) terminate the Annual Bonus Plan at any time. If the Annual Bonus Plan is terminated during a plan

period, such termination will not affect the operation of the Annual Bonus Plan for the rest of such plan per iod and bonus awards may be determined and paid pursuant to the rules of the Annual Bonus Plan. Awar ds Vesting at the Completion of this Offering We have granted Executive Awards and RSUs with customiz ed vesting schedules to certain of our executive officers, which will begin vesting upon

the completion of this offering. Executive Awards will be settled in a 160 Table of Contents number of ordi

nary shares based on the initial public offering price per ADS. In particular, (i) an Executive Award with a v alue of \$20 million that was granted to our Chief Executive

Officer will vest in its entirety upon consummation of this Offering and be settled by the delivery of ordinary shares, assuming an initial public

offering price of \$\ \text{per ADS}, which is the midpoint of the price range set forth on the cover page of this p rospectus, subject to a 12-month holding period, and (ii) Executive Awards with an aggregate value of \$35 million that were granted to two executive officers will, upon the completion of this offering, vest in inst allments over 36 months based on the particular executive officer's vesting schedule and be settled by the delivery of ordinary

shares, assuming an initial public offering price of \$ per ADS, which is the midpoint of the price range set forth on the cover page of this prospectus, upon the completion of this offering. Assuming

an initial public offering price of \$ per ADS, which is the midpoint of the price range set forth on the cover page of this prospectus, our executive officers will receive an aggregate of

shares upon the completion of this offering, subject in each case to the award's vesting schedul e and the terms of the award certificate. In addition, we granted a special cash award in the amount of \$2 0 million to our Chief Executive Officer, which will vest upon the completion

of this offering. Insurance and Indemnification To the extent permitted by the Companies Act, we are empowered to indemnify our directors against any liability they incur by reason of their

directorship. We maintain directors' and officers' insurance to insure such persons against certain liabilitie s. We expect to enter into a deed of indemnity with each of our directors and executive officers prior to the completion of this

offering. In addition to such indemnification, we provide our directors and executive officers with directors' and officers' liability insurance. 161 Table of Contents RELATED PARTY TRANSACTIONS In addition to the director, director nominee and executive officer remuneration and indemnification arrangements discussed above in the

section titled "Management and Executive Remuneration," this section describes transactions or loans, si nce April 1, 2020, between us and (a) enterprises that directly or indirectly through one or more intermediaries, control or

are controlled by, or are under common control with, our company; (b) associates; (c) individuals owning, directly or indirectly, an interest in the voting power of our company that gives them significant influence o ver our company, and

close members of any such individual's family; (d) key management personnel, that is, those persons havi ng authority and responsibility for planning, directing and controlling our activities, including directors and senior management and

close members of such individuals' families; and (e) enterprises in which a substantial interest in the votin g power is owned, directly or indirectly, by any person described in (c) or (d) or over which such a person i s able to

exercise significant influence. We refer to the entities and persons described in (a) through (e) above as "r elated parties." Transactions with SoftBank Group Shareholder

Governance Agreement In connection with this offering we will enter into the Shareholder Governance Agreement with SoftBank Group,

which will govern certain aspects of the relationship between us and SoftBank Group following the comple tion of this offering, including matters related to pre-emptive rights, rights related to the composition of our Board of Directors and its

committees, registration rights, rights related to related party transactions, information and other rights, co nsultation rights and a consent right, among other matters, including during periods in which SoftBank Gro up beneficially owns less than a

majority of our outstanding ordinary shares. The form of the Shareholder Governance Agreement is attached as an exhibit to the registration statement of which this prospectus forms a part. Pre-emptive Rights P ursuant to the Shareholder Governance Agreement, if we propose to allot or issue any ordinary or preferred shares or options, warrants or

other securities convertible into or exercisable for ordinary or preferred shares (including ADSs) (other than (i) pursuant to an offer made to all ordinary shareholders on the same terms; or (ii) in connection with any incentive plan or share

scheme otherwise approved by SoftBank Group to the extent such approval is required under the Shareh

older Governance Agreement), SoftBank Group shall be entitled (but not obligated) to subscribe for a num ber of the securities we propose to allot or

issue that will enable it to maintain its proportional legal and economic interests in our share capital prior to such allotment or issuance. 162 Table of Contents Rights Related to Our Board of Directors Pursuant to the Shareholder Governance Agreement, SoftBank Group will have the right to designate a certain number of candidates for election

to our Board of Directors based on the level of its and its affiliates' ownership of our outstanding ordinary s hares, provided that a certain number of such candidates must be "independent" under law or stock exchange rules applicable

to our directors at the time of such nomination. SoftBank Group's designation rights are as follows: Owner ship of our outstanding ordinary shares: Number of SoftBank Group candidates for election to our Board of Directors: Number of SoftBank Group candidates that must be independent: Greater than 70% 7 3 Less than or equal to 70% and greater than 60% 6 2 Less than or equal to 60% and greater than 50% 5 1 Less than or equal to 50% and greater than 40% 4 0 Less than or equal to 40% and greater than 30% 3 0 Less than or equal to 30% and greater than 20% 2 0 Less than or equal to 20% and greater than 5% 1 0 Soft Bank Group's rights to designate candidates for election to our Board of Directors are based on an eight-member board, including our Chief Executive Officer, and, pursuant to the Shareholder Governance Agreement, will be modified ratably to reflect any change in the number of directors on our Board of Direct ors. Additionally, effective upon completion of this offering and for so long as SoftBank Group and its controlled affiliates own more than 70% of

our outstanding ordinary shares, SoftBank Group will have the right to increase the size of the our Board of Directors to nine directors and appoint a director, who need not be independent, to the board to fill the newly created vacancy. If such

right is exercised, SoftBank Group will have the right to nominate up to eight candidates for election to our Board of Directors for as long as it and its controlled affiliates hold more than 70% of our outstanding ordinary shares. Our Board of Directors will make determinations with respect to each director's independence. To the extent SoftBank Group nominates a

director as an independent director that our Board of Directors, upon advice of counsel, determines does not meet the applicable independence standards, SoftBank Group will be required to propose a new nominee. The Shareholder Governance Agreement also provides SoftBank Group with proportional rights to representation on the committees of our Board of

Directors, subject to applicable restrictions. Registration Rights Pursuant to the Shareholder Governance Agreement, we will provide SoftBank Group with certain registration rights that will obligate us to register the resale of ordinary shares or securities convertible into or exchangeable for ordinary shares (in cluding ADSs) ("Registrable Securities") owned by SoftBank Group after the completion of this offering, provided that we will not

be obligated to effect a registration, offer or sale when restricted from doing so under an applicable lock-up entered into in connection with a registered offering of our ordinary shares or securities convertible into or exchangeable for ordinary

shares (including ADSs) (provided further that such restriction will not exceed 180 days after the date of p ricing of this offering or 60 days after any 163 Table of Contents other public offering). At the request of S oftBank Group, we will use our commercially reasonable efforts to register the resale of Registrable Secur ities owned by SoftBank Group or certain

of its affiliates after the closing of this offering, or subsequently acquired, for public sale under the Securiti es Act on a registration statement on Form F-1, or a short-form registration statement on Form F-3 if we a re then eligible to use such

form to register the resale of Registrable Securities on SoftBank Group's behalf. There are no limitations on the total number of times that SoftBank Group may request such registration, but SoftBank Group will not be permitted to request such

registration more than three times in any rolling 12-month period. In addition, SoftBank Group or its relevant affiliates may require us

to file and maintain the effectiveness of a short-form registration statement on Form F-3 after we are eligib le to use that form to register the resale of Registrable Securities on SoftBank Group's or the relevant affili ates'

behalf. In the event that SoftBank Group requests registration in connection with registered underwritten o

fferings, SoftBank Group will retain the right to designate the underwriters for such offerings. We will also provide SoftBank Group with "piggyback" registration rights that will entitle SoftBank Group or its relevant affiliates

to include its Registrable Securities in future registrations effected by us of our securities under the Securities Act. There is no limit on the number of these "piggyback" registrations that SoftBank Group may request. SoftBank

Group's "piggyback" rights will be subject to cutbacks on the number of Registrable Securities that SoftBa nk Group may include in registrations effected by us in connection with underwritten offerings, subject to the good faith

determination by the managing underwriters for such offerings that the number of Registrable Securities to be offered by us and SoftBank Group exceeds the number of Registrable Securities that can reasonably be sold in the offering. We also have agreed to cooperate in these registrations and certain other financing transactions. All expenses payable in connection with such

registrations will be paid by us, except that SoftBank Group will pay all its own internal administrative and its own legal and similar costs and underwriting discounts and commissions applicable to the sale of ADSs representing its ordinary shares. The Shareholder Governance Agreement will contain customary indemn ification and contribution provisions by us for the benefit of SoftBank

Group and, in limited situations, by SoftBank Group for the benefit of us with respect to the information provided by SoftBank Group for inclusion in any registration statement, prospectus or related document. Rights Related to Related Party Transactions Pursuant to our related party transactions policy, material related party transactions must be reviewed and approved or ratified by the audit

committee of our Board of Directors. The Shareholder Governance Agreement further provides, however, that, so long as SoftBank Group is considered a "related party" under our related party transactions policy, the following process will

apply to transactions with SoftBank Group and its affiliates: • all transactions with SoftBank Group and its affiliates that would otherwise be subject to the related party

transactions policy will be presented to the audit committee of our Board of Directors; • transactions or arr angements existing on the date of our listing and disclosed in this prospectus, including

immaterial amendments of such transactions, will be exempt from the review and approval or ratification r equirements of our related party transactions policy, provided that extensions and material amendments t hereof will require approval or

ratification to the same extent as other related party transactions; • if the audit committee of our Board of Directors determines that a particular transaction or series of related

transactions will be conducted in the ordinary course of our business (i.e., the licensing of intellectual property) upon terms generally available to third parties, such transaction will be exempt from the approval and ratification requirements of

our related party transactions policy unless such transaction, or series of related transactions, has a value of over \$20 million, in which case such transaction or series of transactions will be presented to the Boar d of Directors for approval

or ratification; and 164 Table of Contents • if the audit committee of our Board of Directors determines that a particular proposed transaction is to be

conducted on an arm's-length basis or upon terms generally available to third parties, such transaction will be presented to our full Board of Directors for approval. Information and Other Rights The Shareholder G overnance Agreement also provides that: • so long as SoftBank Group consolidates us for the purposes of its consolidated financial statements or accounts

for its investment in us under the equity method, SoftBank Group is entitled to access to our data, informa tion and personnel (including our independent auditors) who shall provide SoftBank Group with such reas onable assistance as required to allow

SoftBank Group to complete its consolidated financial statements in a timely manner; • we will provide SoftBank Group with such reasonable information as SoftBank Group may request to allow SoftBank

Group to comply with its global tax obligations in a timely manner; and • so long as SoftBank Group conso lidates us for the purposes of its consolidated financial statements or accounts

for its investment in us under the equity method, we must coordinate with SoftBank Group prior to the public disclosure of material information and prior to the disclosure and filing of SoftBank Group's annual and quarterly earnings

information, periodic reporting, reports to shareholders and other disclosures. SoftBank Group Consultation Rights For so long as we are a consolidated subsidiary of SoftBank Group, if we propose to (i) change of ur independent auditor to a firm

outside of the professional services networks commonly referred to as the "Big Four accounting firms" or (ii) make any material changes in our accounting policy, the Shareholder Governance Agreement requires us to provide SoftBank

Group with prior written notice of such proposed changes, consult with SoftBank Group in good faith regar ding the rationale for such proposed changes, and use our reasonable endeavors to resolve any disagree ment and obtain SoftBank Group's

consent to such proposed changes. In the event SoftBank Group has not responded within 30 calendar d ays of being notified of such

proposed changes after good faith consultation by us, then we may adopt such changes upon a determin ation by our Board of Directors that such changes are in the best interests of us and our shareholders. Sof tBank Group Consent Right In addition to statutory rights under English law, until the later of (i) the time at which SoftBank Group and its controlled affiliates cease

to own at least a majority of our ordinary shares and (ii) the time at which we cease to be a consolidated s ubsidiary of SoftBank Group, the Shareholder Governance Agreement provides that SoftBank Group shall have a consent right with respect to any

decision by us to adopt any incentive plan or share scheme or expansion of an existing plan or scheme (i ncluding our Omnibus Incentive Plan), in each case, unless the maximum number of ordinary shares over which rights may be issued does not exceed

5% of our issued share capital at the time of adoption or expansion of such plan or scheme. Such consent right does not apply to any incentive plan or share scheme in place at the time of completion of this offering. Consulting Agreement We are party

to a consulting agreement with SoftBank Group pursuant to which we provide to SoftBank Group and its a ffiliates certain technical consultancy and advisory services relating to potential transactions, strategic part nerships, licensing agreements,

commercial arrangements or other arrangements involving SoftBank Group or its affiliates. We are not ent itled to any fees for the consulting and advisory services provided, other than the reimbursement of certain expenses incurred in connection with

providing such services. In connection with the performance of services under the consulting agreement or otherwise, we may enter into strategic 165 Table of Contents partnerships, licensing agreements or other commercial arrangements involving businesses or other assets owned by SoftBank Group or its affiliates, business or assets in which SoftBank Group or

its affiliates have a controlling interest, or businesses with which SoftBank Group or its affiliates have a commercial arrangement or partnership. Existing SoftBank Group Facility In March 2022, certain subsidiaries of SoftBank Group entered into a term loan facility (the "Existing SoftBank Group Facility") with

certain lenders, which was amended and upsized in June 2022, pursuant to which a subsidiary of SoftBan k Group borrowed \$8.5 billion, all of which remains outstanding as of the date of this prospectus. A subsidiary of SoftBank Group has pledged

substantially all of our total issued and outstanding share capital, as security for the Existing SoftBank Gro up Facility. In connection

with the Existing SoftBank Group Facility, in March 2022, we entered into a Springing Guarantee and Inde mnity with J.P. Morgan SE, as facility agent, pursuant to which we agreed to, upon the occurrence of cert ain triggering events, provide a

guarantee to the lenders for amounts borrowed under the Existing SoftBank Group Facility. To date, no su ch triggering events under the Springing Guarantee and Indemnity have occurred, and we have not been required to provide such guarantee. SoftBank

Group has informed us that (i) it intends to repay the term loan facility prior to, or substantially concurrently with, the pricing of this offering, and (ii) at the time of such repayment, that our springing guarantee and indemnity will

be terminated. The repayment of the Existing SoftBank Group Facility and the release of our obligations the hereunder is a condition to the closing of this offering. New SoftBank Group Facility On

August 19, 2023, certain subsidiaries of SoftBank Group entered into the New SoftBank Group Facility, pursuant to which a subsidiary of SoftBank Group is expected to borrow up to \$8.5 billion either following, or

substantially concurrently

with, the closing of this offering and following the repayment of the Existing SoftBank Group Facility. The New SoftBank Group Facility

will initially be secured by a pledge of 769,029,000 of our ordinary shares representing 75.01% equity inte rest in us (before giving effect to the issuance of ordinary shares issuable upon the completion of this offer ing in connection with the

vesting of RSUs and Executive Awards) pursuant to certain exceptions to the lock-up agreements. See "O rdinary Shares and ADSs Eligible for Future Sale—Lock-up Agreements." In connection with the New Soft Bank Group Facility, we entered into certain customary undertakings for the benefit of the lenders to facilitate the pledge of the ordinary shares securing the New SoftBank Group Facility and we have agreed to facilitate the foreclosure upon the pledge following an event of default thereunder. See "Risk Factors—Risks Relating to Our Status as a Controlled Company and Foreign Private Issuer—SoftBank Group's interests may conflict with our own interests and those of holders of our ADSs." Other Transactions with S oftBank Group Following a strategic decision in 2021 to place greater focus on our core technology licensi ng business, we decided to distribute or sell

certain components of our IoT business to subsidiaries of SoftBank Group. In June 2021, we distributed all of the equity interests in Treasure Data to our shareholders, and in November 2021, we sold IoTP to Soft Bank Group Capital Limited. Treasure

Data's and IoTP's net assets upon distribution and sale were approximately \$44 million and \$12 million, re spectively. Prior to the distribution of Treasure Data, a member of SoftBank Group made a \$50 million loan to Treasure Data. This loan accrued

interest at a rate of 2.0% per annum. The loan balance, including accrued interest, was included in the distribution of Treasure Data to Arm Limited's shareholders. 166 Table of Contents In June 2023, we entered into a subscription letter with a subsidiary of SoftBank Vision

Fund and Kigen (UK) Limited ("Kigen"), an entity of which SoftBank Vision Fund indirectly owned 85% of the share capital on a fully diluted basis with the remainder comprising management incentives. Pursuant to the subscription letter, we

and the subsidiary of SoftBank Vision Fund each invested \$10 million in exchange for preference shares of Kigen. The preference shares are convertible into common shares of Kigen and are entitled to full dividend, distribution and voting rights. The

preference shares have 1x non-participating liquidation preference. The preference shares are freely tran sferable other than to competitors of Kigen. Following the consummation of the subscription, we and the subsidiary of SoftBank Vision Fund owned

approximately 12% and 76% of the fully diluted shares outstanding, respectively. Kigen is engaged in the business of physical sim, eSim and iSim authentication. We executed this investment due to the potential of Kigen's product lines to

complement our IoT strategy. Transactions with Directors Jeffrey A. Sine Mr. Sine is a

Co-Founder and Partner of The Raine Group LLC. In connection with this offering, Raine Securities LLC, a subsidiary of The Raine Group LLC, has performed certain initial public offering advisory services on our behalf, for which it is entitled to

receive an amount that is equal to 5% of the underwriting discounts and commissions set forth in this pros pectus, plus the corresponding spread if the underwriters exercise their option to purchase additional ADS s. In addition, at our sole discretion, we may pay or cause to be paid to Raine Securities LLC an amount t hat is equal to up to an additional 5%

of the underwriting discounts and commissions set forth in this prospectus, plus the corresponding spread if the underwriters exercise their option to purchase additional ADSs, based upon an assessment of Rain e Securities LLC's performance in

providing services to us. Furthermore, Mr. Sine, The Raine Group LLC and its affiliated entities engage in transactions with

SoftBank Group, SoftBank Vision Fund, and their respective management and affiliates. Certain of these t ransactions have involved SoftBank Group's investment in us. Other such transactions include a broad range of advisory services performed on

behalf of SoftBank Group and its affiliates. In addition, SoftBank Group retains an indirect minority owners hip stake in The Raine Group LLC and is an investor in certain investment funds managed by Raine Capit al LLC, a subsidiary of The Raine Group

LLC. Transactions with Associates Arm China On March 28, 2022, we sold our entire equity interest in Arm China to another subsidiary of SoftBank Group, Acetone Limited,

for consideration of approximately \$930 million. The consideration was exchanged for a promissory note e qual to 90% of the consideration and shares in Acetone Limited equal to the remaining 10% of the consideration. On the same date, the

promissory note receivable was distributed to our shareholders. Following the distribution and in satisfacti on of the balance of the consideration left outstanding, Acetone Limited issued new shares to Arm Limited such that the obligation of Acetone

Limited in respect of the payment of the consideration left outstanding was satisfied fully and extinguished . As of the date of this

prospectus, approximately 48% of the equity interest in Arm China is owned by Acetone Limited, which is controlled by SoftBank Group and in which we own a 10% non-voting interest, approximately 35% is indirectly owned by HOPU Investment Management

Company, and approximately 17% is directly and indirectly owned by other Chinese parties. Our 10% non-voting interest in Acetone Limited represents an approximate 4.8% indirect ownership interest in Arm China. We are party to the IPLA with Arm China, under which Arm China licenses certain of our IP from us that Arm China in turn sublicenses to its

PRC customers. Prior to the entry into this arrangement, Arm China's results were consolidated in our fina ncial statements; however, as a result of the transaction described above, Arm 167 Table of Contents China's results will no longer be consolidated in our financial statements. Under the IPLA with Arm China, Arm China's payments due to us are determined based on the financial

information that Arm China provides to us. For the fiscal years ended March 31, 2023, 2022 and 2021, revenues attributable to our

relationship with Arm China were approximately 24%, 18% and 20% of our total revenue, respectively. In addition, under the IPLA with Arm

China, we are contractually obligated to indemnify both Arm China and its PRC customers that sublicense our IP in the event either Arm China or such customers incur damages or costs in lawsuits, administrative proceedings or similar actions based

upon a claim that our IP infringes the IP of a third party. See "Risk Factors—Risks Relating to Our Busine ss and

Industry—We depend on our commercial relationship with Arm China to access the PRC market. If that c ommercial relationship no longer existed or deteriorates, our ability to compete in the PRC market could be materially and adversely

affected" and "Risk Factors—Risks Relating to Our Business and Industry—Neither we nor SoftBank Gro up control the operations of Arm China, which operates independently of us." Other Transactions In the or dinary

course, Arm entities enter into transactions with counterparties affiliated with the Company's indirect shar eholders on an arms' length basis, including SoftBank Corp. and its affiliates. Related Party Transaction P olicy Prior

to the completion of this offering, we expect to adopt a related party transaction policy. Our related party transaction policy will set forth our procedures for the identification, review, consideration and approval or ratification of related party

transactions. The policy will become effective in connection with this offering. For purposes of our policy o nly, a related party transaction is any transaction, arrangement or relationship or series of similar transactions, arrangements or

relationships (including any indebtedness or guarantee of indebtedness) between us or any of our parent or subsidiaries and any related party. Transactions involving compensation for services provided to us as an employee or director are not covered

by this policy. Subject to the provisions of the Shareholder Governance Agreement applicable to transactions with SoftBank Group and its

affiliates described below, under the policy, if a transaction has been identified as a related party transaction, including any transaction that was not a related party transaction when originally consummated or any transaction that was not

initially identified as a related party transaction prior to consummation, the related party transaction must be approved or ratified by the audit committee of our Board of Directors. In reviewing any such transaction,

our audit committee will

consider, among other things, the material facts, the interests, direct and indirect, of the related parties, the benefits to us of the transaction and whether the transaction is on terms that are comparable to the terms available to or from, as the

case may be, an unrelated third party or to or from employees generally. With respect to transactions with SoftBank Group and its affiliates, for so long as the corresponding provisions in the Shareholder Governance Agreement remain in effect, the

audit committee will not be required to approve (i) transactions or arrangements existing as of the date of our listing and disclosed in this prospectus; provided that extensions and material amendments thereof will require approval to the same

extent as other related party transactions; (ii) ordinary course transactions upon terms generally available to third parties unless the applicable transaction or series of related transactions has a value over \$20 mill ion, in which case our Board

of Directors must review and approve or ratify the transaction; and (iii) transactions that the audit committ ee determines are at arm's length, in which case our Board of Directors must review and approve the tran saction. See

"—Transactions with SoftBank Group—Shareholder Governance Agreement—Rights Related to Related Party Transactions." Under the policy, we will collect information that we deem reasonably necessary from each director, executive

officer and, to the extent feasible, significant shareholder to enable us to identify any existing or potential r elated party transactions and to effectuate the terms of the policy. In addition, under our Code of Conduct, our employees and directors

have an affirmative responsibility to disclose any material transaction or relationship that may give rise to a conflict of interest. 168 Table of Contents PRINCIPAL AND SELLING SHAREHOLDER The following ta ble and related footnotes set forth information with respect to the beneficial ownership of our ordinary shar es, as of

, 2023, after giving effect to our corporate reorganization, and as adjusted to reflect the sale of the ADSs offered in this offering, by: • each beneficial owner of 5% or more of our outstanding ordinary share s; • each of our directors and executive officers; • all of our directors and executive officers as a group; an d • the selling shareholder. Beneficial ownership is determined in accordance with the rules of the SEC. T hese rules generally attribute beneficial ownership of securities

to persons who possess sole or shared voting power or investment power with respect to those securities and include ordinary shares issuable upon the exercise of options that are immediately exercisable or exe rcisable within 60 days of

- , 2023. Percentage ownership calculations prior to the completion of this offering are based on ord inary shares outstanding as of
 - , 2023 after giving effect to our corporate reorganization. The

percentage of ordinary shares beneficially owned after the completion of this offering is based on ordinary shares outstanding

after this offering, including ordinary shares represented by ADSs to be issued in connection with this offering, and assuming (i) no exercise of the

underwriters' option to purchase additional ADSs; and (ii) a public offering price of \$ per ADS, which i s the midpoint of the price range set forth on the cover page of this prospectus. Except as otherwise indic ated, all of the shares reflected in the table are ordinary shares and all persons listed below have sole voting and

investment power with respect to the shares beneficially owned by them, subject to applicable community property laws. The information is not necessarily indicative of beneficial ownership for any other purpose. A description of any material relationship that our principal shareholders have had with us or any of our aff iliates within the past three

years is included under "Related Party Transactions." The principal shareholders listed below do not have voting rights with respect to their ordinary shares that are different from the voting rights of other holders of our ordinary

shares. 169 Table of Contents Except as otherwise indicated in the table below, addresses of the director s, executive

officers and named beneficial owners are care of Arm Holdings Limited, 110 Fulbourn Road, Cambridge

CB1 9NJ, United Kingdom. As of , 2023, to our knowledge, there are no U.S.

record holders of our issued and outstanding ordinary shares. Ordinary Shares Beneficially Owned Prior to this Offering Ordinary Shares Offered Pursuant to this Offering Ordinary Shares Beneficially Owned After this Offering Name of Beneficial Shareholder Number Percent Number Percent 5% Shareholders and Selling Shareholder: SoftBank Group Corp. Jacobs, PhD Rene Haas Jason Child Kirsty Gill Spencer Collins Richard Grisenthwaite Will Abbey All executive officers and directors as a group (13 individuals) * Less than 1% (1) Represents shares held of record by Kronos II LLC, an indirect wholly-owned subsidiary of SoftBank Group.

Excludes one ordinary share beneficially owned by SoftBank Vision Fund, a subsidiary of SoftBank Group . SoftBank Group may be deemed to have beneficial ownership of our ordinary shares beneficially owned by SoftBank Vision Fund. SoftBank Group

disclaims any such beneficial ownership. 769,029,000 of our ordinary shares that will be beneficially owne d by SoftBank Group after this offering, representing a 75.01% equity interest in us (before giving effect to the issuance of ordinary shares

issuable upon the completion of this offering in connection with the vesting of RSUs and Executive Award s), will initially be pledged as security under the New SoftBank Group Facility. Masayoshi Son, who is a Di rector and the Chairman of our Board

of Directors, is Representative Director, Corporate Officer, Chairman and CEO of SoftBank Group. Rene Haas, who is a Director and our Chief Executive Officer is a Director of SoftBank Group. Messrs. Son and Haas disclaim beneficial ownership of

these shares. The address for SoftBank Group is 1-7-1 Kaigan, Minato-ku, Tokyo 105-7537, Japan. 170 T able of Contents DESCRIPTION OF SHARE CAPITAL AND ARTICLES OF ASSOCIATION The following describes our issued share capital, summarizes the material provisions of the Articles and highlights cert ain

differences in corporate law in the England and Wales and Delaware. Please note that this summary is no t intended to be exhaustive and does not purport to be complete, and is qualified in its entirety by reference to the Articles to be in effect

upon completion of this offering and applicable English law. For further information, please refer to the full version of the Articles, which are included as an exhibit to the registration statement of which this prospect us is a part. Further,

please note that holders of ADSs to be in effect upon completion of this offering will not be treated as one of our shareholders and will not have any shareholder rights. Introduction Arm Holdings plc was

incorporated as a private limited company with the legal name Arm Holdings Limited under the laws of En gland and Wales on April 9, 2018, with the company number 11299879. Arm Holdings Limited re-register ed as a public limited company on , 2023 and changed its name to Arm Holdings plc. Arm Limited was incorporated as a private limited company with the legal name Widelogic Limited under the laws of England and Wales on

November 12, 1990 with the company number 02557590. On December 3, 1990, Widelogic Limited chan ged its company name to Advanced RISC Machines Limited, and, on May 21, 1998, it changed its company name to Arm Limited, which was a

wholly owned subsidiary of Arm Holdings plc with the company number 02548782. Our business was initially operated through Arm Holdings plc with the company number 02548782, which was previously an independent publicly traded corporation until its

acquisition in September 2016 by SoftBank Group. On March 19, 2018, as a part of a reorganization, Arm Holdings plc with the company number 02548782 re-registered as a private limited company and was renamed SVF HoldCo (UK) Limited, which became a subsidiary of SoftBank Vision Fund, which retained an approximate 25% interest in our company with the remainder beneficially held by SoftBank Group. In A ugust 2023, a subsidiary of SoftBank Group

acquired substantially all of SoftBank Vision Fund's interest in Arm Limited at a purchase price of approximately \$16.1 billion, with the associated payments to be made in installments over a two-year period. The purchase price was established

by reference to the terms of a prior contractual arrangement between the parties. Accordingly, prior to this offering, SoftBank Group beneficially owns substantially all of our outstanding shares. Our registered offic e is 110 Fulbourn Road,

Cambridge, Cambridgeshire, CB1 9NJ, U.K. Pursuant to the terms of our corporate reorganization: (i) each ordinary share in the

capital of Arm Holdings Limited was transferred, by way of a dividend in specie, by Arm Limited to each of the shareholders of Arm Limited in an approximate proportion to the shareholding that such shareholders held in Arm Limited; (ii) the

shareholders of Arm Limited exchanged each of the ordinary shares held by them in Arm Limited for newly issued ordinary shares of Arm Holdings Limited of the same class and in approximately the same proportions as their previous shareholding in Arm

Limited, and as a result, Arm Holdings Limited became the sole shareholder of Arm Limited; and (iii) Arm Holdings Limited re-registered as a public limited company and changed its name to Arm

Holdings plc. See "Corporate Reorganization" for more information. Share Capital As of June 30, 2023, the issued share capital of Arm Limited consisted of a single class of ordinary shares, and 1,025,234,000 or dinary

shares of £0.001 per share were outstanding as of such date and each issued share was (and remains) fully paid. During the period from June 30, 2023 to

, 2023, new ordinary shares in

the capital of Arm Limited were issued. Following the share exchange between the shareholders of Arm Li mited and Arm Holdings Limited as

part of our corporate reorganization, the shareholders of Arm Limited exchanged each of the ordinary sha res held by them in Arm Limited for newly issued ordinary shares of Arm Holdings Limited of the same class and in approximately the same

proportions as their previous shareholding in Arm Limited, and as a result, Arm Holdings Limited became t he sole shareholder of Arm Limited. See "Corporate Reorganization" for more information. 171 Table of C ontents Following the completion of the remaining steps in the corporate reorganization on

, 2023, the issued share capital of Arm Limited remains a single class of ordinary shares, and 1,02 5,234,000 ordinary shares of £0.001 per share were outstanding as of

such date and each issued share is fully paid, and the issued share capital of Arm Holdings plc consists of a single class of ordinary shares, and 1,025,234,000 ordinary shares of £0.001 per share were outstanding as of such date and each

issued share is fully paid. Upon the completion of this offering, we will have

ordinary shares outstanding, including ordinary shares represented by ADSs. In accordance with the Companies Act, there is no limit on our authorized share capital. We do not have any shares that do not represent

capital. No ordinary shares are held by or on behalf of the Company or by subsidiaries of the Company. O rdinary Shares In accordance with the Articles to be in effect upon the completion of this offering, the following summarizes the rights of holders of our

ordinary shares: • each holder of our ordinary shares is entitled to one vote per ordinary share on all matt ers to be voted on by

shareholders generally; • the holders of the ordinary shares shall be entitled to receive notice of, attend, s peak and vote at our general

meetings, provided that the Company may determine that only those persons entered into the register of members at the close of business on a day decided by the Company (being no more than 21 clear days before the day that notice of the meeting is

sent) shall be entitled to receive such notice; and • the holders of our ordinary shares are entitled to receive such dividends as are recommended by our directors and

declared in accordance with the Articles. See also "—Articles of Association" below. RSUs RSUs are conditional rights to

receive our ordinary shares in the future, which may also remain forfeitable unless and until specified con ditions are met. Each RSU entitles the holder thereof to one ordinary share upon vesting subject to our re muneration committee's right to

settle the RSUs in cash (except in certain jurisdictions). See "Management and Executive Remuneration—Equity Incentive Plans." As of June 30, 2023, there were a total of 11,493,548 RSUs outstanding under the 2019 AEP, which vest on the occurrence of an "exit

event" (which includes 180 days after the completion of this offering) to the extent that the relevant vesting hurdle is met or exceeded. As of June 30, 2023, there were a total of 192,999 RSUs outstanding under 2

019 EIP, which vest on the occurrence of an "exit

event" (which includes the completion of this offering) and are not subject to any vesting hurdle. As of Jun e 30, 2023, there

were a total of 27,065,349 RSUs outstanding under the 2022 RSU Plan. Except for the Israel Awards, whi ch may have different vesting schedules, these RSUs vest over a three-year period on an annual basis pri or to the completion of this offering and

awards will be accounted for using the vesting schedules applicable after an initial public offering following the completion of this offering. As of June 30, 2023, there were a total of 26,505 RSUs outstanding under the NED Plan, which all have vested. 172 Table of Contents Executive Awards Executive Awards are con ditional rights to receive a specified amount of cash or our shares in the future, which may also remain forf eitable

unless and until specified conditions are met. After the completion of this offering, the Executive Awards e ntitle the holder thereof to ordinary shares upon vesting subject to our remuneration committee's right to s ettle the Executive Awards

in cash. See "Management and Executive Remuneration—Equity Incentive Plans." As of June 30, 2023, there were

Executive Awards in the aggregate amount of \$95 million outstanding under the 2022 RSU Plan. Register of members We are required by the Companies Act to keep a register of our shareholders. Under English law, the ordinary shares are deemed to be issued

when the name of the shareholder is entered in the register of members. The register of members therefore is prima facie evidence of the identity of our shareholders, and the shares that they hold. The register of members generally provides limited,

or no, information regarding the ultimate beneficial owners of our ordinary shares. Our register of member s upon the completion of this offering will be maintained by our registrar,

. Holders of the

ADSs will not be treated as our shareholders and their names will therefore not be entered in our register of members. The depositary, the custodian or their nominees will be the holder of the ordinary shares und erlying the ADSs. Pursuant to the

terms of the deposit agreement, holders of the ADSs have a right to receive the ordinary shares underlying their ADSs. For discussion on the ADSs and ADS holder rights, see "Description of American Depositary Shares" below. Under the Companies Act, we must enter an allotment of shares in our statutory books as soon as practicable and in any event within two months

of the allotment. We are required by the Companies Act to register a transfer of shares (or give the transfer ree notice of and reasons for refusal as the transferee may reasonably request) as soon as practicable and in any event within two months of

receiving notice of the transfer. We, any of our shareholders or any other affected person may apply to the court for rectification of

the register of members if: • the name of any person, without sufficient cause, is wrongly entered in or omi tted from our register of members;

or • there is a default or unnecessary delay in entering on the register the fact of any person having cease d to be a

member. Preemptive Rights English law generally provides shareholders with statutory preemptive rights when new shares are issued for cash; however, it is possible for a

company's articles of association, or shareholders at a general meeting representing at least 75% of our ordinary shares present (in person or by proxy) and voting at that general meeting, to disapply these preem ptive rights. Such a

disapplication of preemptive rights may be for a maximum period of up to five years from the date of adopt ion of the Articles, if the disapplication is contained in the Articles, or from the date of the shareholder reso lution, if the disapplication

is by shareholder resolution. In either case, this disapplication would need to be renewed by the Company 's shareholders upon its expiration (i.e., at least every five years). On

, 2023, our shareholders approved the disapplication of preemptive rights for a period ending , which disapplication will need to be renewed upon expiration (i.e., at least every five years) to remain effective, but may be

sought more frequently for additional five-year terms (or for any shorter period). 173 Table of Contents His

tory of Share Capital On December 8, 2019, all ordinary shares of £1.00 each in the capital of Arm Limite d were sub-divided into ordinary shares of £0.001 each, resulting in our outstanding ordinary shares chan ging from 1,025,234 ordinary shares of £1.00 each to 1,025,234,000 ordinary shares of £0.001

each. As part of our corporate reorganization: • on , 2023, all ordinary shares of

£1.00 each in the capital of Arm Holdings Limited were sub-divided into ordinary shares of £0.001 each, r esulting in its outstanding ordinary shares changing from 100 ordinary shares of £1.00

each to 100,000 ordinary shares of £0.001 each; • following the completion of the sub-division referred to above, on

, 2023, 1,025,133,999 ordinary shares of £0.001 each in the capital of Arm Holdings Limited were i ssued to Kronos II LLC and one (1) ordinary share of £0.001 in the

capital of Arm Holdings Limited was issued to SVF HoldCo (UK) Limited in exchange for the transfer of 1, 025,233,999 ordinary shares of £0.001 each in the capital of Arm Limited and one (1) ordinary share of £0.001 in the capital of Arm

Limited by Kronos II LLC and SVF HoldCo (UK) Limited, respectively; • following the completion of the sh are exchange referred to above, on

, 2023, a first bonus share issue of ordinary shares of

£0.001 each in the capital of Arm Holdings Limited were issued to Kronos II LLC and SVF HoldCo (UK) Li mited in proportion to their shareholding in Arm Holdings Limited pursuant to a capitalization of the merger reserve of Arm Holdings Limited; • following the completion of the first bonus share issue referred to abov e, on

, 2023, ordinary shares in the capital of Arm Holdings Limited (being all of the first bonus share issue) were cancelled pursuant to a capital reduction; • following the capital reduction ref erred to above, on

, 2023, a second bonus share issue of 1,025,233,999 ordinary shares of £0.001 each in the capital of Arm Holdings Limited were issued to National City Nominees Limited as

the nominee for Citibank, N.A.—London Branch pursuant to the direction of Kronos II LLC; and • following the completion of the second bonus share issue referred to above, on

, 2023, the 1,025,233,999 ordinary shares of £0.001 each in the capital of Arm Holdings Limited h eld directly by Kronos II LLC were re-designated as deferred shares and subsequently repurchased by Ar m Holdings Limited and cancelled thereafter. Articles of Association The Articles

will be effective subject to and conditional upon completion of this offering and listing of ADSs representin g our ordinary shares on Nasdaq. A summary of the terms of the Articles is set out below. The summary b elow is not a complete copy of the

terms of the Articles. The Articles contain, among other things, provisions to the following effect: Objects T he Articles contain no

specific restrictions on our purpose and therefore, by virtue of section 31(1) of the Companies Act, our pur pose is unrestricted. Voting Rights Subject to any rights or restrictions attached to any shares from time to time, the general voting rights attaching to shares are

as follows: • any resolution put to the vote at a general meeting must be decided exclusively on a poll; on a poll, every

shareholder who is present in person or by proxy or corporate representative shall have one vote 174 Tab le of Contents for each share of which they are the holder. A shareholder entitled to more than one vote on a poll need not, if they vote, use all their votes or cast all the votes in the same way; and • if two or more persons are joint holders of a share, then in voting on any question the vote of the senior

shareholder who tenders a vote, whether in person or by proxy, shall be accepted to the exclusion of the v otes of the other joint holders. For this purpose, seniority shall be determined by the order in which the na mes of the holders stand in the

register of members. Restrictions on Voting Unless the Board of Directors decides otherwise, no sharehol der shall be entitled to vote at any general meeting or at any separate class

meeting in respect of any share held by them unless all calls or other sums payable by them in respect of that share have been paid. The

Board of Directors may from time to time make calls upon the shareholders in respect of any money unpaid on their shares and each shareholder shall (subject to at least 14 clear days' notice specifying the time or times and place of payment)

pay at the time or times so specified the amount called on their shares. Dividends We may, subject to the

provisions of the Companies Act and the Articles, by ordinary resolution of the shareholders of the Company declare

final dividends out of profits available for distribution in accordance with the respective rights of sharehold ers, but no such dividend shall exceed the amount recommended by the Board of Directors. The Board of Directors may from time to time pay shareholders such interim dividends as appears to the Board of Directors to be justified by

the profits available for distribution (including any dividends at a fixed rate). The Board of Directors may re tain all or part of any

dividend or other sum payable on or in respect of a share on which the Company has a lien in respect of which the Board of Directors are entitled to issue an enforcement notice. Sums so deducted can be used to pay amounts owing to the Company in

respect of the shares. Subject to any special rights attaching to or the terms of issue of any share, no dividend or other moneys payable

by us on or in respect of any share shall bear interest against us. Any dividend unclaimed after a period of 12 years from the date such dividend became due for payment shall be forfeited and shall revert to us. Di vidends may be declared or paid in any currency and the Board of Directors may decide the rate of exchange for any currency conversions that

may be required, and how any costs involved are to be met. The Board of Directors may, by ordinary resolution of the shareholders of the

Company, direct that payment of any dividend declared may be satisfied wholly or partly by the distributio n of assets, including in particular of paid up shares or debentures of any other company. Depositary Arra ngements The

Articles provide for depositary arrangements and allow for the operation of the deposit agreement with the depositary, as well as to facilitate the acquisition of shares through ADRs, including a requirement to vote on a poll. Change of Control There is no

specific provision in the Articles that would have the effect of delaying, deferring or preventing a change of control. 175 Table of Contents Variation of Rights All or any of the rights and restrictions attached to any class of shares issued may be varied or abrogated with the consent in writing of the

holders of not less than three-fourths in nominal value of the issued shares of that class (excluding any shares held as treasury shares) or by special resolution passed at a separate general meeting of the holders of such shares, subject to the

Companies Act and the terms of their issue. The Companies Act provides a right to object to the variation of the share capital by the shareholders who did not vote in favor of the variation. Should an aggregate of not less than 15% of the

shareholders of the issued shares in question apply to the court to have the variation cancelled, the variation shall have no effect unless and until it is confirmed by the court. Alteration of Share Capital We may, by ordinary resolution of the shareholders of the Company, consolidate all or any of our share capital into shares of larger amount than our existing shares, or sub-divide our shares or any of them into shares of a smaller amount. We may, by special resolution of the shareholders of the Company, confirmed by the court, reduce our share capital or any capital redemption reserve or any share premium account in any manner authorized by the Companies

Act. We may redeem or purchase all or any of our shares as described in "—Other Relevant English Law Considerations—Purchase of Own Shares." Allotment of Shares and Preemption Rights Subject to the Companies Act and to any rights attached to existing shares, any share may be issued with or have attached to it such rights and

restrictions as we may by ordinary resolution determine, or if no ordinary resolution has been passed or s o far as the resolution does not make specific provision, as our Board of Directors may determine (including shares which are to be redeemed,

or are liable to be redeemed at our option or the holder of such shares). In accordance with section 551 of the Companies Act, the Board

of Directors may be generally and unconditionally authorized to exercise for each prescribed period of up to five years all the powers of the Company to allot shares up to an aggregate nominal amount equal to the amount stated in the relevant

ordinary resolution authorizing such allotment. The provisions of section 561 of the Companies Act (which confer on shareholders rights

of preemption in respect of the allotment of equity securities which are paid up in cash) apply to the Comp any except to the extent disapplied for a period of up to five years by special resolution of the shareholder s of the Company. Lien and Forfeiture The Company

shall have a first and paramount lien on every share (not being a fully paid share) for all moneys payable to the Company (whether presently or not) in respect of that share. The Company may sell, in such manner as the Board of Directors determines,

any share on which the Company has a lien if a sum in respect of which the lien exists is presently payable and is not paid within the due date for payment. Subject to the terms of the allotment, the Board of Directors may from time to time make

calls on the members in respect of any moneys unpaid on their shares. Each member shall (subject to receiving at least 14 clear

days' notice) pay to the Company the amount called on his or her shares. If a call or any installment of a c all remains unpaid in whole or in part after it has become due and payable, the Board of Directors may giv e the person from whom it is

due not less than 14 clear days' notice requiring payment of the amount unpaid together with any interest which may have accrued and any expenses incurred by the Company by reason of such non-payment. The

notice shall name the place where payment is to be made and shall state that if the notice is not complied with the shares in respect of which the call was made will be liable to be forfeited. 176 Table of Contents Transfer of Shares Any shareholder holding shares in certificated form may transfer all or any of their shares by an instrument of transfer in any usual or common

form or in any other manner which is permitted by the Companies Act and approved by the Board of Direc tors. Any written instrument of transfer must be signed by or on behalf of the transferor and, in the case of a share which is not fully paid up,

the transferee. All transfers of uncertificated shares shall be made in accordance with and subject to the provisions of the

Uncertificated Securities Regulations 2001 (the "Uncertificated Securities Rules") and the facilities and requirements of its relevant system. The Uncertificated Securities Rules permit shares to be issued and held in uncertificated form

and transferred by means of a computer-based system. The Board of Directors may, in its absolute discretion, decline to register any

transfer of any share in certificated form unless: • it is for a share which is fully paid up; • it is for a share u pon which the Company has no lien; • it is only for one class of share; • it is in favor of a single transferee or no more than four joint transferees; • it is duly stamped (if this is required); and • it is lodged at our regis tered office or such other place as the Board of Directors may decide, accompanied by

the certificate for shares to which it relates or such other evidence (if any) as the Board of Directors may r easonably require to prove the title of the transferor or, if the transfer is executed by some other person on their behalf, the authority

of that person to do so. General Meetings In accordance with the Companies Act, we are required in each year to hold an annual general meeting in addition to any other general meetings

in that year and to specify the meeting as such in the notice convening it. The annual general meeting shall be convened whenever and wherever the Board of Directors sees fit, subject to the requirements of the Companies Act, as described in

"—Differences in Corporate Law—Annual General Meeting" and "—Differences in Corporate Law—Notice of General Meetings" below. The arrangements for the calling of general meetings are described in "—Differences in Corporate Law—Notice of General

Meetings" below. Quorum of General Meetings No business, other than the appointment of a chair, shall be transacted at any general meeting unless a quorum is present. A minimum of one

shareholder present in person or by proxy and entitled to vote shall be a quorum for all purposes. Class M eetings The provisions in the Articles relating to general meetings apply to every separate general meeting of the holders of a class of shares except

that: • the quorum for such class meeting shall be two holders in person or by proxy representing not less than one-third in nominal value of the issued shares of the class; and • if at any adjourned meeting of such holders a quorum is not present at the meeting, one holder of shares of the

class present in person or by proxy at an adjourned meeting constitutes a quorum. 177 Table of Contents

Number of Directors We may not have fewer than two directors on the Board of Directors. We may, subject to the provisions of the Companies Act, by ordinary

resolution of the shareholders of the Company, vary the minimum and/or impose a maximum number of di rectors from time to time. Directors Subject to the Articles and the Companies Act, the Company may by o rdinary resolution appoint a person who is willing to act as a

director and the Board of Directors shall have power at any time to appoint any person who is willing to act as a director, in both cases either to fill a vacancy or as an addition to the existing Board of Directors, provided the total number of

directors shall not exceed any maximum number imposed in accordance with the Articles. Under the Shar eholder Governance Agreement,

SoftBank Group will have the right to designate a certain number of candidates for election to our Board of Directors based on its and its affiliates' ownership of our outstanding ordinary shares, provided that a certain number of such

candidates must be "independent" under law or stock exchange rules applicable to our directors at the time of such nomination. SoftBank Group's designation rights are as follows: Ownership of our outstanding or rdinary shares: Number of SoftBank Group candidates for election to our Board of Directors: Number of SoftBank Group candidates that must be independent: Greater than 70% 7 3 Less than or equal to 70% and greater than 60% 6 2 Less than or equal to 60% and greater than 50% 5 1 Less than or equal to 50% and greater than 40% 4 0 Less than or equal to 40% and greater than 30% 3 0 Less than or equal to 30% and greater than 20% 2 0 Less than or equal to 20% and greater than 5% 1 0 SoftBank Group's rights to nominate candidates for election to our Board of Directors are based on an

eight-member board, including our Chief Executive Officer, and pursuant to the Shareholder Governance Agreement, will be modified ratably to reflect any change in the number of directors on our Board of Direct ors. Additionally, effective upon completion of this offering and for so long as SoftBank Group and its controlled affiliates own more than 70% of

our outstanding ordinary shares, SoftBank Group will have the right to increase the size of the our Board of Directors to nine directors and appoint a director, who need not be independent, to the board to fill the newly created vacancy. If such

right is exercised, SoftBank Group will have the right to nominate up to eight candidates for election to our Board of Directors for as long as it and its controlled affiliates hold more than 70% of our outstanding ordinary shares. Our Board of Directors will make determinations with respect to each director's independence. To the extent SoftBank Group nominates a

director as an independent director that our Board of Directors, upon advice of counsel, determines does not meet the applicable independence standards, SoftBank Group will be required to propose a new nomi nee. Upon completion of this offering, our Board of Directors will consist of one class of directors constituting our entire Board of Directors. At

the annual general meeting all the directors shall retire from office except any director appointed by our B oard of Directors after the notice of that annual general meeting has been given and before that annual general meeting has been held. Each

director who retires at an annual general meeting may be reappointed, unless resolved otherwise by the B oard of Directors prior to the date of the notice of such annual general meeting. Subject to the provisions of the Articles, the Board of Directors may regulate their proceedings as they deem appropriate. A director may, and

the secretary at the request of a director shall, call a meeting of the directors. The quorum for a meeting of the Board of Directors may

be determined by the Board of Directors and until otherwise determined, it is set at two directors. 178 Table of Contents Questions and matters requiring resolution arising at a meeting shall be decided by a majority of votes of the participating directors, with each director having one vote. In the case of an equality of votes, the chair will not have a casting vote or second vote. Directors' Interests The

directors may authorize, to the fullest extent permitted by law, any matter or situation proposed to them w hich would otherwise result in a director infringing his or her duty to avoid a situation in which he or she ha s, or can have, a direct or

indirect interest that conflicts, or possibly may conflict, with our interests. A director shall not, except as ot herwise agreed by him or her, be accountable to us for any remuneration, profit or other benefit which he or she derives from any

matter authorized by the directors or by the shareholders in general meeting and no contract shall be liable to be avoided on any such grounds. Any authorization by our Board of Directors will be effective only if:

• to the extent permitted by the Companies Act, the matter in question shall have been proposed by any di rector for

consideration in the same way that any other matter may be proposed to the directors under the provision s of the Articles; • any requirement as to the quorum for consideration of the relevant matter is met without counting the conflicted

director and any other interested director; and • the matter is agreed to without the interested director voting or would be agreed to if the interested

director's and any other interested director's votes are not counted. Subject to the requirements under sections 175, 177 and 182 of the Companies Act, a director who is any way, whether directly or indirectly, interested in a proposed or existing transaction or arrangement with us shall declare the nature of his or her interest at a meeting of the

directors. Subject to the Articles, a director shall not vote in respect of any transactions or arrangements with the Company in which he

or she has an interest and which may reasonably be regarded as likely to give rise to a conflict of interest. A director shall not be counted in the quorum at a meeting in relation to any resolution on which he or she is debarred from voting. Under the Articles, certain transactions which would otherwise give rise to a conflict are considered to be permitted interests of our

directors. In the event that these permitted interests arise, the director in question will still count towards the quorum requirements of the relevant meeting and be entitled to vote on resolutions relating to such permitted interests, as follows: • any contract, transaction or arrangement or any other proposal in which he or she has an interest but of which he

or she is not aware or which cannot reasonably be regarded as likely to give rise to a conflict of interest; • any contract, transaction or arrangement or any other proposal in which he or she has an interest only by virtue

of interests in shares, debentures or other securities of the Company, or by reason of any other interest in or through the Company; • the giving of any guarantee, security or indemnity in respect of money lent or obligations incurred by him or her

or by any other person at the request of or for the benefit of our company or any of our subsidiary underta kings; • the giving of any guarantee, security or indemnity in respect of a debt or obligation of our company or any of

our subsidiary undertakings for which the director themselves has assumed responsibility in whole or in p art under a guarantee or indemnity or by the giving of security; • any proposal or contract relating to an off er of shares or debentures or other securities of or by our company or

any of our subsidiary undertakings in which offer he or she is or may be entitled to participate as a holder of securities or in the underwriting or sub-underwriting of which he or she is to participate; 179 Table of Co ntents • any arrangement involving any other body corporate in which the director (directly or indirectly) is interested,

including as an officer, shareholder, creditor, employee or otherwise, provided that he or she (together with the persons connected with him or her) is not the holder of, or beneficially interested in, 1% or more of a ny issued equity share capital

of any class of such body corporate or of the voting rights available to members of that relevant body corporate; • any arrangement for the benefit of employees or former employees of our company or any of our subsidiary

undertakings which does not award him or her any privilege or benefit not generally awarded to employee s or former employees to whom the arrangement relates; • any contract relating to purchase or maintenan ce by our company of insurance for any liability for the benefit of

directors or for the benefit of a group of people which includes directors; • any arrangement concerning the giving of indemnities in favor of directors; • concerning the funding of expenditure by any directors on (i) defending criminal, civil or regulatory

proceedings or action against them, (ii) in connection with an application to the court for relief, (iii) defending them in any regulatory investigations, or (iv) anything that would enable the director to avoid incurring expenditure

for the matters listed at (i)—(iii) hereof; and • any arrangements in relation to which a director's interest, or

the interest of directors generally, have

been authorized by ordinary resolution. Directors' Fees and Remuneration The ordinary remuneration of t he directors (which may take the form of cash, securities in the Company, or such other form as the Board of

Directors decide) shall from time to time be determined by the Board of Directors. A director's remuneration may also include the payment of gratuities, allowances, pension or other retirement benefits, superannuation or death or disability

benefits to such director. Any director who is appointed to any executive office (which, for this purpose, in cludes the chair or any

deputy chair), who serves on any committee or who devotes special attention to the business of our comp any, or who otherwise performs services which in the opinion of the directors are outside the scope of the ordinary duties of a director, may be

paid such extra remuneration by way of salary, commissions, participation in profits or otherwise as the B oard of Directors may determine. Each director may be paid his or her reasonable expenses incurred for a ttending and returning from meetings of the Board of Directors,

committees of the Board of Directors, general meetings, separate meetings of the holders of any class of shares or of debentures, or otherwise in connection with the business of the Company. Borrowing Powers Subject to the

Articles and the Companies Act, the Board of Directors may exercise all the powers to borrow money, pro vide any indemnity or guarantee, mortgage or charge our undertaking, property and uncalled capital, issu e debentures and other securities and to

give security, whether outright or as collateral security for any debt, liability or obligation of us or of any third party. Capitalization of

Profits The directors may, if they are so authorized by an ordinary resolution of the shareholders of the Company, decide to

capitalize any undistributed profits of the Company not required for paying any preferential dividend, or an y sum standing to the credit of the Company's share premium account, capital redemption reserve or othe r undistributable reserve. To the

extent a capitalized sum is appropriated from profits available for distribution it may also be applied in or t owards paying up any amounts unpaid on existing shares held by the entitled members, or in paying up n ew debentures of the Company which

are allotted credited as fully paid to the entitled members (or a combination of the two). 180 Table of Cont ents Indemnity So far as permitted by applicable law, every director or other officer of our group shall be indemnified against all costs, charges, expenses,

losses and liabilities sustained or incurred by them in connection with that director's or officer's duties or p owers in relation to the Company or other members of our group. See also "Indemnification of Directors a nd Officers"

in Part II below. Other Relevant English Law Considerations Application of the U.K. City Code on Takeove rs and Mergers The Takeover Code applies to all offers for companies which have their registered office in the U.K., the Channel Islands or the Isle of Man if

any of their equity share capital or other transferable securities carrying voting rights are admitted to trading on a U.K. regulated market or a U.K. multilateral trading facility or on any stock exchange in the Channe I Islands or the Isle of Man. The Takeover Code also applies to all offers for public companies which have their registered office in the U.K., the Channel Islands or

the Isle of Man if they are considered by the Takeover Panel to have their place of central management a nd control in the U.K., the Channel Islands or the Isle of Man. This is known as the "residency test." In det ermining whether the

residency test is satisfied, the Takeover Panel has regard primarily to whether a majority of a company's d irectors are resident in these jurisdictions. Although our registered office is in the U.K., the Takeover Code does not currently apply to the us because our shares are not admitted to

trading on a regulated market or multilateral trading facility in the U.K. or any stock exchange in the Chan nel Islands or the Isle of Man, and the Takeover Panel has confirmed to us that, on the basis of the curren t residency of our directors as at

the date of this prospectus, we will not have our place of central management and control in the U.K., the Channel Islands or the Isle of Man. As a result, our shareholders are not currently entitled to the benefit of

certain takeover offer protections provided under the Takeover

Code, including the rules regarding mandatory takeover bids and, therefore, holders of ADSs will not bene fit from these protections. In

the event that this changes, or if the interpretation and application of the Takeover Code by the Takeover Panel changes (including changes to the way in which the Takeover Panel assesses the application of the Takeover Code to English companies

whose shares are listed outside of the U.K., the Channel Islands or the Isle of Man), the Takeover Code may apply to us in the future. • Under Rule 9 of the Takeover Code, when any person acquires, whether by a series of transactions over a period of

time or not, an interest in shares of the Company which, taken together with shares in which such person is already interested, and in which persons acting in concert with such person are interested, carry 30% or more of the voting rights in the

Company, such person and, depending upon the circumstances, persons acting in concert with such person shall, except in limited circumstances, be obliged to extend offers, on the basis set out in Rules 9.3 and 9.5 of the Takeover Code, to the

holders of any class of equity share capital, whether voting or non-voting, and also to the holders of any ot her class of transferable securities carrying voting rights. Offers for different classes of equity

share capital must be comparable; the Takeover Panel should be consulted in advance in such cases. • T he offer must be in cash (or accompanied by a cash alternative) at not less than the highest price paid for any

interest in the shares by the person required to make an offer or any person acting in concert with such person during the 12 months prior to the announcement of the offer. • A similar obligation to make such a cash offer also arises when any person that (together with any persons acting

in concert) is already interested in shares which in the aggregate carry 30% or more of the voting rights of the Company but does not hold shares which carry more than 50% of such voting rights acquires an interest in any other shares of the Company

which increase the percentage of shares carrying voting rights in which such person is interested. • Under the Takeover Code, "persons acting in concert" comprise persons who, pursuant to an agreement or understanding (whether formal or informal and whether or not in writing) co-operate to obtain or 181 Table of Contents consolidate control of a company or to frustrate the successful outcome of an offer for a company and "control" means an interest or interests, in shares carrying in the aggregate 30%

or more of the voting rights of a company, irrespective of whether the holding or holdings give de facto control. For

so long as SoftBank Group and any person acting in concert with it hold shares carrying more than 50% of the voting rights of the Company following completion of the offering, subject to the Takeover Code applying, the rules relating to mandatory

bids under the Takeover Code will not apply to any acquisitions of shares made by SoftBank Group or its concert parties. Squeeze-out provisions Under sections 979 to 982 of the Companies Act, where a takeover offer

has been made for us and the offeror has acquired, or unconditionally contracted to acquire, not less than 90% in value of the shares to which the offer relates and not less than 90% of the voting rights carried by those shares, the offeror could

then compulsorily acquire the remaining 10%. It would do so by sending a notice to outstanding sharehold ers telling them that it will compulsorily acquire their shares, provided that no such notice may be served a fter the end of: (a) the period

of three months beginning with the day after the last day on which the offer can be accepted; or (b) if earli er, and the offer is not one to which section 943(1) of the Companies Act applies (being an offer subject to the Takeover Code), the

period of six months beginning with the date of the offer. The squeeze-out of the minority

shareholders can be completed at the end of six weeks from the date the notice has been given, at which time the offeror must send a copy of the notice to the Company together with an instrument of transfer ex ecuted on behalf of the outstanding

shareholder(s) by a person appointed by the offeror of the shares to which the notice relates, and pay the consideration to us to be held in trust for the outstanding minority shareholders. The consideration offered to the members whose shares are

compulsorily acquired under this procedure must, in general, be the same as the consideration that was a vailable under the original offer. A dissenting shareholder may object to the transfer on the basis that the offeror is not entitled and bound to

acquire shares or to specify terms of acquisition different from those in the offer by applying to court within six weeks of the date on which notice of the transfer was given. Sell Out Sections 983 to 985 of

the Companies Act also gives our minority shareholders a right to be bought out in certain circumstances by an offeror who has made a takeover offer for all of our shares. The holder of shares to which the offer r elates, and who has not otherwise

accepted the offer, may require the offeror to acquire their shares if, prior to the expiration of the acceptan ce period for such offer, (a) the offeror has acquired or unconditionally agreed to acquire not less than 90 % in value of all of our

shares; and (b) not less than 90% of the voting rights carried by those shares. The offeror is required to give any shareholder notice of his right to be bought out within one month of that right arising. The offeror may impose a time limit on

the rights of minority shareholders to be bought out that is not less than three months after the end of the acceptance period, or if longer a period of three months from the date of the notice. If a shareholder exerc ises their rights to be bought

out, the offeror is required to acquire those shares on the terms of the offer or on such other terms as may be agreed. Disclosure of Interest in

Shares Pursuant to Part 22 of the Companies Act and the Articles, we are empowered by notice in writing to require any person whom

we know or have reasonable cause to believe to be interested in our shares, or at any time during the thre e years immediately preceding the date on which the notice is issued has been so interested, within a rea sonable time to disclose to us details

of that person's interest and (so far as is within his or her knowledge) details of any other interest that sub sists or subsisted in those shares. Under the Articles, if a person defaults in supplying us with the required disclosures in relation to the shares in question (the

"default shares") within the prescribed period of 14 days, our directors may by notice direct that: • in respect of the default shares and any other shares held by such person, the relevant shareholder shall not be entitled to vote (either in person or by representative or proxy) at any general meeting or to exercise any of their right conferred by a shareholding in relation to general meetings; and 182 Table of Contents • where the default shares represent at least 0.25% in nominal value of the issued shares of their class,

(a) any dividend or other money payable in respect of the default shares shall be retained by us without lia bility to pay interest and/or (b) no transfers by the relevant shareholder of any shares may be registered (u nless the shareholder

himself or herself is not in default and the shareholder provides a certificate, in a form satisfactory to the di rectors, to the effect that after due and careful enquiry the shareholder is satisfied that none of the shares to be transferred are

default shares), provided that, where shares are uncertificated, any refusal to transfer such shares can only be made in accordance with and subject to the provisions of the Uncertificated Securities Rules. Purchase of Own Shares Under the

laws of England and Wales, a public limited company may purchase its own shares out of the distributable profits of the company or the proceeds of a fresh issue of shares made for the purpose of financing the purchase, subject to complying with

procedural requirements under the Companies Act (including that the purchase be approved by the company's shareholders) and provided that the Articles do not restrict the company's ability to purchase its own shares. Our Articles will not

prohibit us from purchasing our own shares. Therefore, subject to the Companies Act and without prejudic e to any relevant special rights attached to any class of shares, the Company may purchase any of its own shares of any class in any way and at

any price (whether at par or above or below par). A limited company may not purchase its own shares if, a s a result of the purchase, there would no longer be any issued shares of the company other than redeem able shares or shares held as treasury

shares. Shares must be fully paid in order to be repurchased. Any such purchase will be either a "market purchase" or an

"off market purchase," each as defined in the Companies Act. A "market purchase" is a purchase made on a "recognized investment exchange" (other than an overseas exchange) as defined in the U.K. Financial Services and

Markets Act 2000, as amended (the "FSMA"). An "off market purchase" is a purchase that is not made on a "recognized investment exchange." Both "market purchases" and "off market purchases" require prior shareholder approval by way of an ordinary resolution. In the case of an "off market purchase," a company's shareholders, other than the shareholders from whom the company is purchasing shares, must a pprove the terms of the

contract to purchase shares and in the case of a "market purchase," the shareholders must approve the m aximum number of shares that can be purchased and the maximum and minimum prices to be paid by the company. Both resolutions authorizing

"market purchases" and "off-market purchases" must specify a date, not later than five years after the pas sing of the resolution, on which the authority to purchase is to expire. A share buy-back by a company of it s shares will give rise to U.K. stamp duty (and may give rise to

stamp duty reserve tax) at the rate of 0.5% of the amount or value of the consideration payable by the company (rounded up to the next £5.00), and such stamp duty (or stamp duty reserve tax) will be paid by the company. The charge to stamp

duty reserve tax will be cancelled or, if already paid, repaid (generally with interest), where a transfer instr ument for stamp duty purposes has been duly stamped within six years of the charge arising (either by pa ying the stamp duty or by

claiming an appropriate relief) or if the instrument is otherwise exempt from stamp duty. The Nasdaq Glob al Select Market is an

"overseas exchange" for the purposes of the Companies Act and accordingly does not fall within the definition of a "recognized investment exchange" for the purposes of the FSMA, as modified by the Companies Act, and any purchase

made by us would need to comply with the procedural requirements under the Companies Act that regulat e "off market purchases." Distributions and Dividends Under

the Companies Act, before a company can lawfully make a distribution or dividend, it must ensure that it h as sufficient distributable reserves (on a non-consolidated basis). The basic rule is that a company's profit s available for the purpose

of making a distribution are its accumulated, realized profits, so far as not previously utilized by distributio n or capitalization, less its accumulated, realized losses, so far as not previously written off in a reduction or reorganization of

capital duly made. The requirement to have sufficient distributable reserves before a distribution or divide nd can be paid applies to us and to each of our subsidiaries that has been incorporated under the laws of England and Wales. 183 Table of Contents It is not sufficient that we, as a public company, have made a distributable profit for the

purpose of making a distribution. An additional capital maintenance requirement is imposed on us to ensu re that the net worth of the Company is at least equal to the amount of its capital. A public company can o nly make a distribution: • if, at the time that the distribution is made, the amount of its net assets (that is, the total excess of assets

over liabilities) is not less than the total of its called up share capital and undistributable reserves; and • if, and to the extent that, the distribution itself, at the time that it is made, does not reduce the amount of its net assets to less than that total. Shareholder Rights Certain rights granted under the Companies Act, i ncluding the right to requisition a general meeting or require a resolution to be put to

shareholders at the annual general meeting, are only available to our shareholders. For English law purpo ses, our shareholders are the persons who are registered as the owners of the legal title to the shares and whose names are recorded in our

register of members. If a person who holds their ADSs in the depositary wishes to exercise certain of the rights granted under the Companies Act, they will be required to first take steps to withdraw their ADSs from the settlement system operated by

the depositary and become the registered holder of the shares in our register of members. A withdrawal of shares from depositary may have tax implications. Requisitioning Shareholder Meetings If any sharehold er or shareholders representing at least 5% of the paid-up capital of the Company carrying voting rights re quests, in

accordance with the provisions of the Companies Act, us to (a) call a general meeting for the purposes of bringing a resolution before the meeting, or (b) give notice of a resolution to be proposed at a general meeting, such request must

among other things (in addition to any other statutory requirements): • set forth the name and address of the requesting person and equivalent details of any person associated with it

or him (in the manner contemplated by the Articles), together with details of all interests held by such pers on (and their associated persons) in us; • if the request relates to any business the member proposes to b ring before the meeting, set forth a brief

description of the business desired to be brought before the meeting, the reasons for conducting such bus iness at the meeting, the text of the proposal (including the complete text of any proposed resolutions) an d, in the case of any proposal to

amend the Articles, the complete text of the proposed amendment; • set forth, as to each person (if any) w hom the shareholder proposes to nominate for appointment to the Board of

Directors, all information that would be required to be disclosed by us in connection with the election of dir ectors, and such other information as we may require to determine the eligibility of such proposed nomine e for appointment to the Board of

Directors. Exchange Controls There are no governmental laws, decrees, regulations or other legislation in the U.K. that may affect the import or export of capital,

including the availability of cash and cash equivalents for use by us, or that may affect the remittance of di vidends, interest, or other payments by us to non-resident holders of our ordinary shares or ADSs representing our ordinary shares, other than withholding tax requirements. There is no limitation imposed by the laws of England and Wales or in the Articles on the right of non-residents to hold or vote shares. Differences in Corporate Law The applicable provisions of the Companies Act differ from laws ap plicable to U.S. corporations and their shareholders. Set forth below is a

summary of certain differences between the provisions of the Companies Act 184 Table of Contents appli cable to us and the General Corporation Law of the State of Delaware relating to shareholders' rights and protections. This summary is not intended to be a complete discussion of the

respective rights and it is qualified in its entirety by reference to Delaware law and the laws of England an d Wales. England and Wales Delaware Number of Directors Under the Companies Act, a public limited co mpany must have at least two directors and the number of directors may be fixed by or in the manner pro vided in the company's articles of association. Under Delaware law, a corporation must have at least one director and the number of directors shall be fixed by or in the manner provided in the bylaws, unless the certificate of incorporation fixes the number of directors, in which

case a change in the number of directors may be made only by amendment of the certificate of incorporati on. Removal of Directors Under the Companies Act, shareholders may remove a director without cause by an ordinary resolution (which is passed by a simple majority of those voting in person or by proxy at a general meeting) irrespective of any provisions of

any service contract the director has with the company, provided 28 clear days' notice of the resolution has been given to the company and its shareholders. On receipt of notice of an intended resolution to remove a director, the company must

forthwith send a copy of the notice to the director concerned. Certain other procedural requirements under the Companies Act must also be followed, such as allowing the director to make representations against his or her removal either at the

meeting or in writing. Under Delaware law, any director or the entire board of directors may be removed, with or without cause, by the holders of a majority of the shares then entitled to vote at an election of directors, except (a) unless the

certificate of incorporation provides otherwise, in the case of a corporation whose board of directors is cla ssified, stockholders may effect such removal only for cause; or (b) in the case of a corporation having cu mulative voting, if less

than the entire board of directors is to be removed, no director may be removed without cause if the votes cast against his or her removal would be sufficient to elect him or her if then cumulatively voted at an election of the entire board of

directors, or, if there are classes of directors, at an election of the class of directors of which he or she is a part. Vacancies on the Board of Directors The procedure by which directors, other than a company's initial directors, are appointed is generally set out in a company's articles of association, provided that where t

wo or more persons are appointed as directors of a

public limited company by resolution of the shareholders, resolutions appointing each director must be vot ed on individually. Under Delaware law, vacancies and newly created directorships may be filled by a maj ority of the directors then in office (even though less than a quorum) or by a sole remaining director unless (a) otherwise provided in the

certificate of incorporation or bylaws of the corporation; or (b) the certificate of incorporation directs that a particular class of stock or series thereof is to elect such director, in which case a majority of the other directors elected by

such class or series, or a sole remaining director elected by such class or series, will fill such vacancy. An nual General Meeting Under the Companies Act, a public limited company must hold an annual general meeting in each six-month period following its annual accounting reference date. Under Delaware law, the a nnual meeting of stockholders shall be held at such place, on such date and at such time as may be designated from time to time by the board of directors or as provided in the certificate of incorporation or by the bylaws. 185 Table of Contents England and Wales Delaware General Meeting Under the Companies Act, a general meeting of the shareholders of a public limited company may be called by the directors. Shareholders holding at least 5% of the paid-up capital of the company carrying voting rights at general meetings (excluding any paid up capital held as treasury shares) can require the directors to call a general meeting and, if the directors fail to do so within a certain period, may themselves

(or any of them representing more than one half of the total voting rights of all of them) convene a general meeting. Under Delaware law, special meetings of the stockholders may be called by the board of directors or by such person or persons as may be authorized by the certificate of incorporation or by the bylaws. Notice of General Meetings Subject to a company's articles of association providing for a longer period, under the Companies Act, at least 21 clear days' notice must be given for an annual general meeting and a ny resolutions to be proposed at the

meeting. Subject to a company's articles of association providing for a longer period, at least 14 clear day s' notice is required for any other general meeting. In addition, certain matters, such as the removal of dire ctors or

auditors, require special notice, which is 28 clear days' notice. The shareholders of a company may in all cases consent to a shorter notice period, the proportion of shareholders' consent required being 100% of t hose entitled to attend

and vote in the case of an annual general meeting and, in the case of any other general meeting, a majority in number of the members having a right to attend and vote at the meeting, being a majority who togeth er hold not less than 95% in nominal

value of the shares giving a right to attend and vote at the meeting. Under Delaware law, unless otherwise provided in the certificate of incorporation or bylaws, written notice of any meeting of the stockholders must be given to each stockholder entitled to vote at the meeting not less than 10 days

nor more than 60 days before the date of the meeting and shall specify the place, date, hour, the means of remote communications by which stockholders and proxy holders may be deemed present and may vote at the meeting, the record date for

determining stockholders entitled to vote at the meeting (if different than the record date for determining st ockholders entitled to notice) and, if the meeting is a special meeting, the purpose or purposes of the mee ting. Quorum Subject to the provisions of a company's articles of association, the Companies Act provides that two shareholders present at a meeting (in person, by proxy or authorized representative under the C ompanies Act) shall constitute

a quorum for companies with more than one member. The certificate of incorporation or bylaws may speci fy the number of shares, the holders of which shall be present or represented by proxy at any meeting in o rder to constitute a quorum, but in no event shall a quorum consist of

less than one third of the shares entitled to vote at the meeting. In the absence of such specification in the certificate of incorporation or bylaws, a majority of the shares entitled to vote, present in person

or 186 Table of Contents England and Wales Delaware represented by proxy, shall constitute a quorum a t a meeting of stockholders. Proxy Under the Companies Act, at any meeting of shareholders, a sharehold er may designate another person to attend, speak and vote at the meeting on their behalf by proxy. Under Delaware law, at any meeting of stockholders, a stockholder may designate another person to act for such stockholder by proxy, but no such proxy shall be voted or acted upon after three years from its date, unless the proxy

provides for a longer period. A director of a Delaware corporation may not issue a proxy representing the director's voting rights as a director. Preemptive Rights Under the Companies Act, "equity securities," bein g (a) shares in the company other than shares that, with respect to dividends and capital, carry a right to p articipate only up to a specified amount in a

distribution, referred to as "ordinary shares," or (b) rights to subscribe for, or to convert securities into, ordinary shares, proposed to be allotted for cash must be offered first to the existing holders of equity shares in the

company in proportion to the respective nominal value of their holdings, unless an exception applies or a special resolution to the contrary has been passed by shareholders in a general meeting or the articles of association provide otherwise in

each case in accordance with the provisions of the Companies Act. Under Delaware law, stockholders have no preemptive rights to subscribe to additional issues of stock or to any security convertible into such stock unless, and except to the extent that, such rights are expressly provided for in

the certificate of incorporation. Authority to Allot Under the Companies Act, the directors of a company mu st not allot shares or grant rights to subscribe for or to convert any security into shares unless an exceptio n applies or an ordinary resolution to the contrary has been passed

by shareholders in a general meeting or the articles of association provide otherwise in each case in accordance with the provisions of the Companies Act. Under Delaware law, the board of directors or, if the cert ificate of incorporation so provides, the stockholders have the power to authorize the issuance of stock. It may authorize capital stock to be issued for consideration

consisting of cash, any tangible or intangible property or any benefit to the corporation or any combination thereof. It may determine the amount of such consideration by approving a formula. In the absence of act ual fraud in the transaction, the

judgment of the directors as to the value of such consideration is conclusive. Liability of Directors and Officers Under the Companies Act, any provision, whether contained in a company's articles of association or any contract or otherwise, that purports to exempt a director of a company, to any extent, from any liability that Under Delaware law, a corporation's certificate of incorporation may include a provision eliminating or limiting the personal liability of a director to the corporation and its stockholders for monetary

damages 187 Table of Contents England and Wales Delaware would otherwise attach to him or her in connection with any negligence, default, breach of duty or breach of trust in relation to the company

is void. Any provision by which a company directly or indirectly provides an

indemnity, to any extent, for a director of the company or of an associated company against any liability at taching to him or her in connection with any negligence, default, breach of duty or breach of trust in relation to the company of which he or

she is a director is also void except as permitted by the Companies Act, which provides exceptions for the company to (a) purchase and maintain insurance against such liability; (b) provide a "qualifying third party indemnity"

(being an indemnity against liability incurred by the director to a person other than the company or an ass ociated company or criminal proceedings in which he or she is convicted); and (c) provide a "qualifying pension scheme"

indemnity" (being an indemnity against liability incurred in connection with activities as trustee of an occup ational pension plan). arising from a breach of fiduciary duty as a director. However, no provision can limit the liability of a director for: • any breach of the

director's duty of loyalty to the corporation or its stockholders; • acts or omissions not in good faith or that involve intentional misconduct or a knowing violation

of law: • intentional or

negligent payment of unlawful dividends or stock purchases or redemptions; or • any transaction from whi ch the director derives an improper personal benefit. Voting Rights Unless a poll is demanded by the shar eholders of a company or is required by the chairman of the meeting or the company's articles of associat ion, shareholders shall vote on all resolutions on a show of hands. Under the

Companies Act, a poll may be demanded by (a) not fewer than five shareholders having the right to vote on the resolution; (b) any shareholder(s) representing not less than 10% of the total voting rights of all the shareholders having the

right to vote on the resolution (excluding any voting rights attaching to treasury shares); or (c) any shareh older(s) holding shares in the company conferring a right to vote on the resolution (excluding any voting right).

ghts attaching to treasury

shares) being shares on which an aggregate sum has been paid up equal to not less than 10% of the tota I sum paid up on all the shares conferring that right. A company's articles of association may provide more extensive rights for shareholders

to call a poll. Delaware law provides that, unless otherwise provided in the certificate of incorporation, each stockholder is entitled to one vote for each share of capital stock held by such

stockholder. 188 Table of Contents England and Wales Delaware Under the laws of England and Wales, an ordinary resolution is passed

on a show of hands if it is approved by a simple majority (more than 50%) of the votes cast by shareholde rs present (in person or by proxy) and entitled to vote. If a poll is demanded, an ordinary resolution is pass ed if it is approved by holders

representing a simple majority of the total voting rights of shareholders present, in person or by proxy, who, being entitled to vote, vote on the resolution. On a show of hands, special resolutions require the affirm ative vote of not less than 75% of the votes cast by shareholders present, in person or by proxy, at the meeting. If a poll is demanded, a special resolution is passed if it is approved by holders representing not less than 75% of the total voting rights of shareholders present in person or by proxy who, being entitled to vote, vote on the

resolution. Shareholder Vote on Certain Transactions The Companies Act provides for schemes of arrang ement, which are arrangements or compromises between a company and any class of shareholders or creditors and used in certain types of reconstructions, amalgamations, capital reorganizations, or takeo vers. These arrangements require: • the approval at a shareholders' or creditors' meeting convened by or der of the court, of

a majority in number of shareholders or creditors or a class thereof representing 75% in value of the capit al held by, or debt owed to, the class of shareholders or creditors, or class thereof, respectively, present a nd voting, either in person or

by proxy; and • the

approval of the court. Generally, under Delaware law, unless the certificate of incorporation provides for the vote of a larger portion of the stock, completion of

a merger, consolidation, sale, lease or exchange of all or substantially all of a corporation's assets or dissolution requires: • the approval of the board of directors; and • approval by the vote of the

holders of a majority of the outstanding stock or, if the certificate of incorporation provides for more or less than one vote per share, a majority of the votes of the outstanding stock of a corporation entitled to vote on the matter. Standard of Conduct for Directors Under the laws of England and Wales, a director owes v arious statutory and fiduciary duties to a company, including: • to act in the way he or she

considers, in good faith, would be most likely to promote the success Delaware law does not contain spec ific provisions setting forth the standard of conduct of a director. The scope of the fiduciary duties of direct ors is generally determined by the courts of the State of Delaware. In general,

directors have a duty to act without self-interest, on a well-informed basis 189 Table of Contents England and Wales Delaware of the company for the benefit of its members as a whole, and in doing so have regard (amongst other matters) to:

(a) the likely consequences of any decision in the long-term, (b) the interests of the company's employees, (c) the need to foster the company's business relationships with suppliers, customers and others, (d) the impact of the company's operations on the community and the environment, (e) the desirability to maintain a reputation for high standards of business conduct, and (f) the need to act fairly as between members of the company; • to avoid a situation in which

he or she has, or can have, a direct or indirect interest that conflicts, or possibly conflicts, with the interest s of the company; • to act in accordance with our constitution and only exercise his or her powers for the purposes

for which they are conferred; • to exercise independent judgment; • to exercise reasonable care, skill, and diligence; • not

to accept benefits from a third party conferred by reason of his or her being a director or doing, or not doin g, anything as a director; and • a duty to declare any interest that he or she has, whether directly or indirectly, in a proposed

or existing transaction or arrangement with the company. and in a manner they reasonably believe to be in the best interest of the stockholders. Directors of a Delaware corporation owe fiduciary duties of care an

d loyalty to the

corporation and to its stockholders. The duty of care generally requires that a director act in good faith, with the care that an ordinarily prudent person would exercise under similar circumstances. Under this duty, a director must inform himself

or herself of all material information reasonably available regarding a significant transaction. The duty of I oyalty requires that a director act in a manner he or she reasonably believes to be in the best interests of the corporation. He or she must not

use his or her corporate position for personal gain or advantage. In general, but subject to certain excepti ons, actions of a director are presumed to have been made on an informed basis, in good faith and in the honest belief that the action taken

was in the best interests of the corporation. However, this presumption may be rebutted by evidence of a breach of one of the fiduciary duties. Delaware courts have also imposed a heightened standard of conduct upon directors of a Delaware

corporation who take any action designed to defeat a threatened change in control of the corporation. In a ddition, under Delaware law, when the board of directors of a Delaware corporation approves the sale or break-up of

a corporation, the board of directors may, in certain circumstances, have a duty to obtain the highest value reasonably available to the stockholders. Shareholder Litigation Under the laws of England and Wales, generally, the company, rather than its shareholders, is the proper claimant in an action in respect of a wrong done to the company or where there is an irregularity in the company's internal management. Not withstanding this general position, the Companies Act provides that (a) a court may allow a shareholder to bring a derivative claim (that is, an action

in Under Delaware law, a stockholder may initiate a derivative action to enforce a right of a corporation if t he corporation fails to enforce

the right itself. The complaint must: • state that the plaintiff was a stockholder at the time of the transaction of which the plaintiff

complains or that the plaintiff's shares thereafter devolved on the plaintiff by operation of law; and 190 Ta ble of Contents England and Wales Delaware respect of and on behalf of the company) in respect of a ca use of action arising from a director's negligence, default, breach of duty or breach of trust; and (b) a shar eholder may bring a claim for a court order where the

company's affairs have been or are being conducted in a manner that is unfairly prejudicial to some of its shareholders. • allege with

particularity the efforts made by the plaintiff to obtain the action the plaintiff desires from the directors and the reasons for the plaintiff's failure to obtain the action; or • state the reasons for not

making the effort. Additionally, the plaintiff must remain a stockholder through the

duration of the derivative suit. The action will not be dismissed or compromised without the approval of the Delaware Court of Chancery. 191 Table of Contents DESCRIPTION OF AMERICAN DEPOSITARY SHARES American Depositary Shares Citibank has

agreed to act as the depositary for the ADSs. Citibank's depositary offices are located at 388 Greenwich Street, New York, New York 10013. ADSs represent ownership interests in securities that are on deposit with the depositary. ADSs may be

represented by certificates that are commonly known as American Depositary Receipts. The depositary ty pically appoints a custodian to safe keep the securities on deposit. In this case, the custodian is Citibank, N.A., London Branch, located at

Citigroup Centre, Canada Square, Canary Wharf, London, E14 5LB, United Kingdom. We have appointed Citibank as depositary pursuant to a

deposit agreement. A copy of the deposit agreement will be on file with the SEC under cover of a registrat ion statement on Form F-6. You may obtain an electronic copy of the deposit agreement from the

SEC's website (www.sec.gov). We are providing you with a summary description of the material terms of the ADSs and of your material

rights as an owner of ADSs. Please remember that summaries by their nature lack the precision of the information summarized and that the rights and obligations of an owner of ADSs will be determined by reference to the terms of the deposit agreement

and not by this summary. We urge you to review the deposit agreement in its entirety. The portions of this summary description that are italicized describe matters that may be relevant to the ownership of ADSs b

ut that may not be contained in the

deposit agreement. Each ADS represents the right to receive, and to exercise the beneficial ownership int erests in, one ordinary share

that is on deposit with the depositary and/or custodian. An ADS also represents the right to receive, and t o exercise the beneficial interests in, any other property received by the depositary or the custodian on be half of the owner of the ADS but

that has not been distributed to the owners of ADSs because of legal restrictions or practical considerations. We and the depositary may agree to change the ADS-to-ordinary share ratio by amending the deposit agreement. This amendment may give rise to, or change, the depositary fees payable by ADS owners. The custodian, the

depositary and their respective nominees will hold all deposited property for the benefit of the holders and beneficial owners of ADSs. The deposited property does not constitute the proprietary assets of the depositary, the custodian or their

nominees. Beneficial ownership in the deposited property will, under the terms of the deposit agreement, be vested in the beneficial owners of the ADSs. The depositary, the custodian and their respective nomin ees will be the record holders of the

deposited property represented by the ADSs for the benefit of the holders and beneficial owners of the co rresponding ADSs. A beneficial owner of ADSs may or may not be the holder of ADSs. Beneficial owners of ADSs will be able to receive, and to

exercise beneficial ownership interests in, the deposited property only through the registered holders of the ADSs, the registered holders of the ADSs (on behalf of the applicable ADS owners) only through the depositary, and the depositary (on

behalf of the owners of the corresponding ADSs) directly, or indirectly, through the custodian or their resp ective nominees, in each case upon the terms of the deposit agreement. If you become an owner of ADS s, you will become a party to the deposit agreement and therefore will be bound to its terms and to the terms of

any ADR that represents your ADSs. The deposit agreement and the ADR specify our rights and obligations as well as your rights and obligations as an owner of ADSs and those of the depositary. As an ADS holder, you appoint the depositary to act on

your behalf in certain circumstances. The deposit agreement and the ADRs are governed by New York la w. However, our obligations to the holders of ordinary shares will continue to be governed by the laws of England and Wales, which may be different

from the laws of the U.S. In addition, applicable laws and regulations may require you to satisfy reporting requirements and obtain

regulatory approvals in certain circumstances. You are solely responsible for complying with such reportin g requirements and obtaining such approvals. Neither the depositary, the custodian, us or any of their or o ur respective agents or affiliates

shall be required to take any actions whatsoever on your behalf to satisfy such reporting requirements or obtain such regulatory approvals under applicable laws and regulations. 192 Table of Contents As an own er of ADSs, we will not treat you as one of our shareholders and you will not

have direct shareholder rights. The depositary will hold on your behalf the shareholder rights attached to the ordinary shares underlying your ADSs. As an owner of ADSs you will be able to exercise the shareholders rights for the ordinary shares

represented by your ADSs through the depositary only to the extent contemplated in the deposit agreeme nt. To exercise any shareholder rights not contemplated in the deposit agreement you will, as an ADS ow ner, need to arrange for the cancellation of

your ADSs and become a direct shareholder. The manner in which you own the ADSs (e.g., in a brokerag e account vs. as registered holder, or as holder of certificated vs. uncertificated ADSs) may affect your rig hts and obligations, and the manner in

which, and the extent to which, the depositary's services are made available to you. As an owner of ADSs, you may hold your ADSs

either by means of an ADR registered in your name, through a brokerage or safekeeping account, or thro ugh an account established by the depositary in your name reflecting the registration of uncertificated AD Ss directly on the books of the

depositary (commonly referred to as the direct registration system or DRS). The direct registration system

reflects the uncertificated (book-entry) registration of ownership of ADSs by the depositary. Under the dir ect registration system, ownership

of ADSs is evidenced by periodic statements issued by the depositary to the holders of the ADSs. The dir ect registration system includes automated transfers between the depositary and DTC, the central bookentry clearing and settlement system for

equity securities in the U.S. If you decide to hold your ADSs through your brokerage or safekeeping account, you must rely on the procedures of your broker or bank to assert your rights as an ADS owner. Banks and brokers typically hold securities

such as the ADSs through clearing and settlement systems such as DTC. The procedures of such clearing and settlement systems may limit your ability to exercise your rights as an owner of ADSs. Please consult with your broker or bank if you have any

questions concerning these limitations and procedures. All ADSs held through DTC will be registered in the e name of a nominee of DTC. This summary description assumes you have opted to own the ADSs directly by means of an ADS registered in your name

and, as such, we will refer to you as the "holder." When we refer to "you," we assume the reader owns AD Ss and will own ADSs at the relevant time. The registration of the ordinary shares in the name of the depo sitary or the custodian shall, to the maximum extent permitted by applicable

law, vest in the depositary or the custodian the record ownership in the applicable ordinary shares with the beneficial ownership rights and interests in such ordinary shares being at all times vested with the beneficial owners of the ADSs

representing the ordinary shares. The depositary or the custodian shall at all times be entitled to exercise the beneficial ownership rights in all deposited property, in each case only on behalf of the holders and be neficial owners of the ADSs

representing the deposited property. Dividends and Other Distributions As a holder of ADSs, you generall y have the right to receive the distributions we make on the securities deposited with the custodian. Your receipt of these distributions may be limited, however, by practical considerations and legal limitations. Ho lders of ADSs will receive such distributions under the terms of the deposit agreement in proportion to the number of ADSs held as of the

specified record date, after deduction of the applicable fees, taxes and expenses. Distributions of Cash W henever we make a cash distribution for the securities on deposit with the custodian, we will deposit the funds with the custodian. Upon

receipt of confirmation of the deposit of the requisite funds, the depositary will arrange for the funds receiv ed in a currency other than U.S. dollars to be converted into U.S. dollars and for the distribution of the U.S. dollars to the holders,

subject to the laws and regulations of England and Wales. The conversion into U.S. dollars will take place only if practicable and if the

U.S. dollars are transferable to the U.S. The depositary will apply the same method for distributing the pro ceeds of the sale of any property (such as undistributed rights) held by the custodian in respect of securiti es on deposit. 193 Table of Contents The distribution of cash will be made net of the fees, expenses, taxe s and governmental

charges payable by holders under the terms of the deposit agreement. The depositary will hold any cash amounts it is unable to distribute in a non-interest bearing account for the benefit of the applicable holders and beneficial owners of ADSs until the distribution can be effected or the funds that the depositar y holds must be escheated as unclaimed property in accordance with the laws of the relevant states of the U.S. Distributions of Shares Whenever

we make a free distribution of ordinary shares for the securities on deposit with the custodian, we will deposit the applicable number of ordinary shares with the custodian. Upon receipt of confirmation of such deposit, the depositary will either

distribute to holders new ADSs representing the ordinary shares deposited or modify the ADS-to-ordinary shares ratio, in which case each ADS you hold will represent

rights and interests in the additional ordinary shares so deposited. Only whole new ADSs will be distribute d. Fractional entitlements will be sold and the proceeds of such sale will be distributed as in the case of a cash distribution. The distribution of new ADSs or the modification of the ADS-to-ordinary share ratio upon a distribution of ordinary shares will be made net of the fees, expenses, taxes and governmental charge s payable by holders under the

terms of the deposit agreement. In order to pay such taxes or governmental charges, the depositary may sell all or a portion of the new ordinary shares so distributed. No such distribution of new ADSs will be ma de if it would violate a law (e.g., the U.S. securities laws) or if it is not

operationally practicable. If the depositary does not distribute new ADSs as described above, it may sell the ordinary shares received upon the terms described in the deposit agreement and will distribute the proceeds of the sale as in the case of a

distribution of cash. Distributions of Rights Whenever we intend to distribute rights to purchase additional ordinary shares, we will give prior notice to the depositary and we will assist

the depositary in determining whether it is lawful and reasonably practicable to distribute rights to purchas e additional ADSs to holders. The depositary will establish procedures to distribute rights to purchase additional ADSs to holders and to enable such holders to exercise

such rights if it is lawful and reasonably practicable to make the rights available to holders of ADSs, and if we provide to the depositary all of the documentation contemplated in the deposit agreement (such as opinions to address the lawfulness of

the transaction). You may have to pay fees, expenses, taxes and other governmental charges to subscribe for the new ADSs upon the exercise of your rights. The depositary is not obligated to establish procedures to facilitate the distribution and

exercise by holders of rights to purchase new ordinary shares other than in the form of ADSs. The deposit ary will not distribute the

rights to you if: • we do not timely request that the rights be distributed to you or we request that the rights not be distributed

to you; • we fail to deliver satisfactory documents to the depositary; or • it is not reasonably practicable to distribute the rights. The depositary will sell the rights that are not exercised or not distributed if such sale is lawful and reasonably practicable. The proceeds

of such sale will be distributed to holders as in the case of a cash distribution. If the depositary is unable to sell the rights, it will allow the rights to lapse. Elective Distributions Whenever

we intend to distribute a dividend payable at the election of shareholders either in cash or in additional sh ares, we will give prior notice thereof to the depositary and will indicate whether we wish the 194 Table of Contents elective distribution to be made available to you. In such case, we will assist the depositary in de termining whether such distribution is lawful and reasonably practicable. The depositary will make the election available to you only if it is reasonably practicable and if we have provided all of the documentation contemplated in the deposit agreement. In such case, the depositary will establish procedures to enable y ou to elect to receive either cash or additional ADSs, in each case as described in the deposit agreement. If the election is not made available to you, you will receive either cash or additional ADSs, depending on what a shareholder in England and

Wales would receive upon failing to make an election, as more fully described in the deposit agreement. Other Distributions Whenever we intend to distribute property other than cash, ordinary shares or rights to purchase additional ordinary shares, we will notify the

depositary in advance and will indicate whether we wish such distribution to be made to you. If so, we will assist the depositary in determining whether such distribution to holders is lawful and reasonably practica ble. If it is reasonably practicable to distribute such property to you and if we provide to the depositary all of the documentation contemplated

in the deposit agreement, the depositary will distribute the property to the holders in a manner it deems pr acticable. The distribution

will be made net of fees, expenses, taxes and governmental charges payable by holders under the terms of the deposit agreement. In order to pay such taxes and governmental charges, the depositary may sell all or a portion of the property received. The depositary will not distribute the property to you and will sell the property if: • we do not request that the property be distributed to you or if we ask that the property not be distributed to

you; • we do not deliver satisfactory documents to the depositary; or • the depositary determines that all or a portion of the distribution to you is not reasonably practicable. The proceeds of such a sale will be distributed to holders as in the case of a cash distribution. Redemption Whenever we decide to

redeem any of the securities on deposit with the custodian, we will notify the depositary in advance. If it is practicable and if we provide to the depositary all of the documentation contemplated in the deposit agree ment, the depositary will

provide notice of the redemption to the holders. The custodian will be instructed to surrender the ordinary shares being redeemed against

payment of the applicable redemption price. The depositary will convert the redemption funds received int o U.S. dollars, if received in a currency other than U.S. dollars, upon the terms of the deposit agreement a nd will establish procedures to

enable holders to receive the net proceeds from the redemption upon surrender of their ADSs to the depo sitary. You may have to pay fees, expenses, taxes and other governmental charges upon the redemption of your ADSs. If less than all ADSs are being

redeemed, the ADSs to be retired will be selected by lot or on a pro rata basis, as the depositary may det ermine. Changes Affecting Ordinary Shares The ordinary shares held on deposit for your ADSs may chan ge from time to time. For example, there may be a change in nominal or par

value, subdivision, cancellation, consolidation or any other reclassification of such ordinary shares or a re capitalization, reorganization, merger, scheme of arrangement, consolidation or sale of assets of the Company. 195 Table of Contents If any such change were to occur, your ADSs would, to the extent permitted by law and the

deposit agreement, represent the right to receive the property received or exchanged in respect of the ord inary shares held on deposit. The depositary may in such circumstances deliver new ADSs to you, amend the deposit agreement, the ADRs and the

applicable Registration Statement(s) on Form F-6, call for the exchange of your existing ADSs for new AD Ss and take any other actions that are appropriate to reflect as to the ADSs the change affecting the ordinary shares. If the depositary may not lawfully distribute such property to you, the depositary may sell such property and distribute the net proceeds to you as in the case of a cash distribution. Issuance of AD Ss upon Deposit of Ordinary Shares Upon completion of this offering, the ordinary shares being offered p ursuant to this prospectus will be deposited by the selling shareholder

with the custodian. Upon receipt of confirmation of such deposit, the depositary will issue ADSs to the und erwriters named in this prospectus. After the closing of this offering, the depositary may create ADSs on y our behalf if you or your broker deposit ordinary shares with the

custodian. The depositary will deliver these ADSs to the person you indicate only after you pay any applic able issuance fees and any charges and taxes payable for the transfer of the ordinary shares to the custo dian. Your ability to deposit ordinary

shares and receive ADSs may be limited by the legal considerations in the U.S. and in England and Wale s applicable at the time of deposit. The issuance of ADSs may be delayed until the depositary or the custo dian receives confirmation that all required approvals have been given

and that the ordinary shares have been duly transferred to the custodian. The depositary will only issue A DSs in whole numbers. When you

make a deposit of ordinary shares, you will be responsible for transferring good and valid title to the depositary. As such, you will be deemed to represent and warrant that: • the ordinary shares are duly authorize d, validly issued, fully paid, non-assessable and legally obtained; • all preemptive (and similar) rights, if an y, with respect to such ordinary shares have been validly waived or

exercised; • you are duly authorized to deposit the ordinary shares; • the ordinary shares presented for de posit are free and clear of any lien, encumbrance, security interest, charge,

mortgage or adverse claim, and are not, and the ADSs issuable upon such deposit will not be, "restricted securities" (as defined in the deposit agreement); • the ordinary shares presented for deposit have not be en stripped of any rights or entitlements; and • the deposit of shares does not violate any applicable provis ion of English law. If any of the representations or warranties are incorrect in any way, we and the deposit ary may, at your cost and expense, take any and all

actions necessary to correct the consequences of the misrepresentations. Transfer, Combination and Split Up of ADRs As an ADR holder, you will be entitled to transfer, combine or split up your ADRs and the ADSs evidenced thereby. For transfers of ADRs, you

will have to surrender the ADRs to be transferred to the depositary and also must: • ensure that the surren dered ADR is properly endorsed or otherwise in proper form for transfer; • provide such proof of identity a nd genuineness of signatures as the depositary deems appropriate; • provide any transfer stamps require d by the State of New York or the U.S.; and • pay all applicable fees, charges, expenses, taxes and other government charges payable by ADR holders pursuant to

the terms of the deposit agreement, upon the transfer of ADSs. 196 Table of Contents To have your ADR

s either combined or split up, you must surrender the ADRs in question to

the depositary with your request to have them combined or split up, and you must pay all applicable fees, charges, expenses, taxes and governmental charges payable by ADR holders, pursuant to the terms of the deposit agreement, upon a combination or

split up of ADRs. Withdrawal of Ordinary Shares Upon Cancellation of ADSs As a holder, you will be entitl ed to present your ADSs to the depositary for cancellation and then receive the corresponding number of underlying ordinary shares at the custodian's offices. Your ability to withdraw the ordinary shares held in r espect of the ADSs may be limited by the legal considerations in the U.S. and in England and Wales appli cable at the time of

withdrawal. In order to withdraw the ordinary shares represented by your ADSs, you will be required to pay to the depositary the fees for cancellation of ADSs and any charges and taxes payable upon the transfer of the ordinary shares. You assume the

risk for delivery of all funds and securities upon withdrawal. Once canceled, the ADSs will not have any rights under the deposit agreement. If you hold ADSs registered in your name, the depositary may ask you to provide proof of identity and genuineness of any signature and such

other documents as the depositary may deem appropriate before it will cancel your ADSs. The withdrawal of the ordinary shares represented by your ADSs may be delayed until the depositary receives satisfactor y evidence of compliance with all

applicable laws and regulations. Please keep in mind that the depositary will only accept ADSs for cancell ation that represent a whole number of securities on deposit. You will have the right to withdraw the securities represented by your ADSs at any time except as a result of: • temporary delays that may arise because (i) the transfer books for the ordinary shares or ADSs are closed,

or (ii) ordinary shares are immobilized on account of a shareholders' meeting or a payment of dividends; • obligations to pay fees, taxes and similar charges; • restrictions imposed because of laws or regulations a pplicable to ADSs or the withdrawal of securities on

deposit; and/or • other circumstances specifically contemplated by Section I.A.(I) of the General Instructions to Form F-6 (as such General Instructions may be amended from time to time). The deposit

agreement may not be modified to impair your right to withdraw the securities represented by your ADSs except to comply with mandatory provisions of law. Voting Rights As a holder, you generally

have the right under the deposit agreement to instruct the depositary to exercise the voting rights for the o rdinary shares represented by your ADSs. The voting rights of holders of ordinary shares are described in "Description of Share Capital"

and Articles of Association—Articles of Association" in this prospectus. At our request, the depositary will distribute to you

any notice of shareholders' meeting received from us together with information explaining how to instruct the depositary to exercise the voting rights of the ordinary shares represented by ADSs. In lieu of distributing such materials, the

depositary may distribute to holders of ADSs instructions on how to retrieve such materials upon request. If the depositary timely

receives voting instructions from a holder of ADSs, it will endeavor to vote (or cause the custodian to vote) the securities (in person or by proxy) represented by the holder's ADSs in accordance with the voting ins tructions received from such

holder. 197 Table of Contents Securities for which no voting instructions have been received will not be voted (except as

otherwise contemplated in the deposit agreement). If the depositary timely receives voting instructions from a holder of ADSs which fail to specify the manner in which the depositary is to vote the ordinary shares represented by such holder's

ADSs, the depositary will deem such holder (unless otherwise specified in the notice distributed to holders) to have instructed the depositary to vote in favor of the items set forth in such voting instructions. Please note that the ability of the

depositary to carry out voting instructions may be limited by practical and legal limitations and the terms of the securities on deposit. We cannot assure you that you will receive voting materials in time to enable you to return voting instructions

to the depositary in a timely manner. Fees and Charges As an ADS holder, you will be required to pay the following fees (some of which may be cumulative) under the terms of the deposit agreement: Service Fee

Issuance of ADSs (e.g., an issuance of ADS upon a deposit of ordinary shares or upon a change in the ADS(s)-to-ordinary shares ratio or for any other

reason), excluding ADS issuances as a result of distributions of ordinary shares Up to U.S. \$5.00 per 100 ADSs (or fraction thereof) issued. Cancellation of ADSs (e.g., a cancellation of ADSs for delivery of depos ited property or upon a change in the ADS(s)-to-ordinary shares ratio, or for

any other reason) Up to U.S. \$5.00 per 100 ADSs (or fraction thereof) cancelled. Distribution of cash divid ends or other cash distributions (e.g., upon a sale of rights and other entitlements) Up to U.S. \$5.00 per 1 00 ADSs (or fraction thereof) held. Distribution of ADSs pursuant to (i) share dividends or other free share distributions, or (ii) an exercise of rights to purchase additional ADSs Up to U.S. \$5.00 per 100 ADSs (or fraction thereof) held. Distribution of financial instruments, including, without limitation, securities, other than ADSs or rights to purchase additional ADSs (e.g., spin-off shares and contingent value rights) Up to U.S. \$5.00 per 100 ADSs (or fraction thereof) held. ADS Services Up to U.S. \$5.00 per 100 ADSs (or fraction thereof) held on the applicable record date(s) established by the depositary. Registration of ADS Transfer s (e.g., upon a registration of the transfer of registered ownership of ADSs, upon a transfer of ADSs into D TC and vice versa, or for any other reason) Up to U.S. \$5.00 per 100 ADSs (or fraction thereof) transferred. Conversion of ADSs of one series for ADSs of another series (e.g., upon conversion of Partial Entitlem ent ADSs for Full Entitlement ADSs, or upon conversion of Restricted ADSs (each as defined in the deposit agreement) into freely

transferable ADSs, and vice versa) or conversion of ADSs for unsponsored American Depositary Shares (e.g., upon termination of the deposit agreement) Up to U.S. \$5.00 per 100 ADSs (or fraction thereof) converted. 198 Table of Contents As an ADS holder, you will also be responsible to pay certain charges such as: • taxes (including applicable interest and penalties) and other governmental charges; • the registration fees as may from time to time be in effect for the registration of ordinary shares on the

register of members and applicable to transfers of ordinary shares to or from the name of the custodian, the depositary or any nominees upon the making of deposits and withdrawals, respectively; • certain cable, telex and facsimile transmission and delivery expenses; • the fees, expenses, spreads, taxes and other charges of the depositary and/or service providers (which may be a

division, branch or affiliate of the depositary) in the conversion of foreign currency; • the reasonable and c ustomary out-of-pocket expenses incurred by the depositary in connection with compliance with

exchange control regulations and other regulatory requirements applicable to ordinary shares, ADSs and ADRs; and • the fees, charges, costs and expenses incurred by the depositary, the custodian or any nominee in connection with

the servicing of the ADR program. ADS fees and charges for (i) the issuance of ADSs and (ii) the cancella tion

of ADSs are charged to the person for whom the ADSs are issued (in the case of ADS issuances) and to the person for whom ADSs are cancelled (in the case of ADS cancellations). In the case of ADSs issued by the depositary into DTC, the ADS issuance

and cancellation fees and charges may be deducted from distributions made through DTC, and may be c harged to the DTC participant(s) receiving the ADSs being issued or the DTC participant(s) holding the ADSs being cancelled, as the case may be, on

behalf of the beneficial owner(s) and will be charged by the DTC participant(s) to the account of the applic able beneficial owner(s) in accordance with the procedures and practices of the DTC participants as in eff ect at the time. ADS fees and

charges in respect of distributions and the ADS service fee are charged to the holders as of the applicable ADS record date. In the case of distributions of cash, the amount of the applicable ADS fees and charges is deducted from the funds being

distributed. In the case of (i) distributions other than cash and (ii) the ADS service fee, holders as of the ADS record date will be invoiced for the amount of the ADS fees and charges and such ADS fees and charges may be deducted from

distributions made to holders of ADSs. For ADSs held through DTC, the ADS fees and charges for distributions other than cash and the ADS service fee may be deducted from distributions made through DTC, a nd may be charged to the DTC participants in

accordance with the procedures and practices prescribed by DTC and the DTC participants in turn charge the amount of such ADS fees and charges to the beneficial owners for whom they hold ADSs. In the cas e of (i) registration of ADS transfers, the ADS transfer fee will be payable by the ADS holder whose ADSs are being transferred or by the perso n to whom the ADSs are transferred, and (ii) conversion of ADSs of one series for ADSs of another series , the ADS conversion fee will be

payable by the holder whose ADSs are converted or by the person to whom the converted ADSs are delivered. In the event of refusal to pay

the depositary fees, the depositary may, under the terms of the deposit agreement, refuse the requested service until payment is received or may set off the amount of the depositary fees from any distribution to be made to the ADS holder. Certain of

the depositary fees and charges (such as the ADS services fee) may become payable shortly after the clo sing of the ADS offering. Note that the fees and charges you may be required to pay may vary over time a nd may be changed by us and by the

depositary. You will receive prior notice of such changes. The depositary may reimburse us for certain ex penses incurred by us in respect of the ADR program, by making available a portion of the ADS fees char ged in respect of the ADR program or

otherwise, upon such terms and conditions as we and the depositary agree from time to time. Amendmen ts and Termination We may agree with the depositary to modify the deposit agreement at any time withou t your consent. We undertake to give holders 30 days'

prior notice of any modifications that would materially prejudice any of their substantial rights under the de posit agreement. We will not consider to be materially prejudicial to your substantial rights any modifications or supplements that are

reasonably necessary for the ADSs to be registered under the 199 Table of Contents Securities Act or to be eligible for book-entry settlement, in each case without imposing or increasing the fees and charges yo u are required to pay. In addition, we may not be able to provide

you with prior notice of any modifications or supplements that are required to accommodate compliance w ith applicable provisions of law. You will be bound by the modifications to the deposit agreement if you continue to hold your ADSs after the modifications to the deposit

agreement become effective. The deposit agreement cannot be amended to prevent you from withdrawin g the ordinary shares represented by your ADSs (except as permitted by law). We have the right to direct the depositary to terminate the deposit agreement. Similarly, the depositary may in certain circumstances on its

own initiative terminate the deposit agreement. In either case, the depositary must give notice to the holde rs at least 30 days before termination. Until termination, your rights under the deposit agreement will be u naffected. Termination After termination, the

depositary will continue to collect distributions received (but will not distribute any such property until you r equest the cancellation of your ADSs) and may sell the securities held on deposit. After the sale, the depositary will hold the proceeds

from such sale and any other funds then held for the holders of ADSs in a non-interest bearing account. A t that point, the depositary will have no further obligations to holders other than to account for the

funds then held for the holders of ADSs still outstanding (after deduction of applicable fees, taxes and expenses). In connection with

any termination of the deposit agreement, the depositary may, with our consent, and shall, at our instruction, distribute to owners of ADSs the deposited property in a mandatory exchange for, and upon a mandatory cancellation of, the ADSs. The

ability to receive the deposited property upon termination of the deposit agreement would be subject, in e ach case, to receipt by the depositary of (i) confirmation of satisfaction of certain U.S. regulatory requirem ents and (ii) payment of

applicable depositary fees. The depositary will give notice to owners of ADSs at least 30 calendar days be fore termination of the deposit agreement. Owners of ADSs would be required to surrender ADSs to the depositary for cancellation in exchange

for the deposited property. Books of Depositary The depositary will maintain ADS holder records at its de positary office. You may inspect such records at such office during regular business

hours but solely for the purpose of communicating with other holders in the interest of business matters re lating to the ADSs and the deposit agreement. The depositary will maintain in New York facilities to record and process the issuance, cancellation, combination, split-up and transfer of ADSs. These facilities may be closed from time to time, to the extent not prohibited by law. Transmission of Notices, Reports and Pro

xy Soliciting Material The depositary will make available for your inspection at its office all communication s that it receives from us as a holder of deposited

securities that we make generally available to holders of deposited securities. Subject to the terms of the deposit agreement, the depositary will send you copies of those communications or otherwise make those communications available to you if we

ask it to. Limitations on Obligations and Liabilities The deposit agreement limits our obligations and the de positary's obligations to you. Please note the following: • We and the depositary are obligated only to take the actions specifically stated in the deposit agreement without

negligence or bad faith. 200 Table of Contents • The depositary disclaims any liability for any failure to carry out voting instructions, for any manner in which

a vote is cast or for the effect of any vote, provided it acts in good faith and without negligence and in acc ordance with the terms of the deposit agreement. • The depositary disclaims any liability for any failure to determine the lawfulness or practicality of any action,

for the content of any document forwarded to you on our behalf or for the accuracy of any translation of su ch a document, for the investment risks associated with investing in ordinary shares, for the validity or wor th of the ordinary shares, for

any tax consequences that result from the ownership of ADSs, for the creditworthiness of any third party, f or allowing any rights to lapse under the terms of the deposit agreement, for the timeliness of any of our n otices or for our failure to give

notice. • We and the depositary will not be obligated to perform any act that is inconsistent with the terms of the deposit

agreement. • We and the depositary disclaim any liability if we or the depositary are prevented or forbidde n from or subject

to any civil or criminal penalty or restraint on account of, or delayed in, doing or performing any act or thin g required by the terms of the deposit agreement, by reason of any provision, present or future of any law or regulation, or by reason of

present or future provision of any provision of the Articles, or any provision of or governing the securities on deposit, or by reason of any act of God or war or other circumstances beyond our control. • We and the depositary disclaim any liability by reason of any exercise of, or failure to exercise, any discretion provided for in the deposit agreement or in the Articles or in any provisions of or governing the securities on deposit. • We and the depositary further disclaim any liability for any action or inaction in reliance on the

information received from legal counsel, accountants, any person presenting ordinary shares for deposit, any holder of ADSs or authorized representatives thereof, or any other person believed by either of us in good faith to be competent to give

e advice or

such advice or information. • We and the depositary also disclaim liability for the inability by a holder to be nefit from any distribution.

offering, right or other benefit that is made available to holders of ordinary shares but is not, under the ter ms of the deposit agreement, made available to you. • We and the depositary also disclaim any liability for any action or inaction of any clearing or settlement system

(and any participant thereof). • We and the depositary may rely without any liability upon any written notic e, request or other document believed

to be genuine and to have been signed or presented by the proper parties. • We and the depositary also d isclaim liability for any consequential or punitive damages for any breach of the

terms of the deposit agreement. • No disclaimer of any Securities Act liability is intended by any provision of the deposit agreement. Nothing in the deposit agreement gives rise to a partnership or joint venture, or establishes a fiduciary relationship,

among us, the depositary and you as ADS holder. Nothing in the deposit agreement precludes the depositary (or its affiliates) from

engaging in transactions in which parties adverse to us or the ADS owners have interests, and nothing in the deposit agreement obligates the depositary to disclose those transactions, or any information obtaine d in the course of those transactions,

to us or to the ADS owners, or to account for any payment received as part of those transactions. As the above limitations relate to

our obligations and the depositary's obligations to you under the deposit agreement, we believe that, as a

matter of construction of the deposit agreement, such limitations would likely continue to apply to ADS hol ders who withdraw the ordinary

shares from the ADS facility with respect to obligations or liabilities incurred under the deposit agreement before the cancellation of the ADSs and the 201 Table of Contents withdrawal of the ordinary shares, and such limitations would most likely not apply to ADS holders who withdraw the ordinary shares from the ADS facility with respect to obligations or

liabilities incurred after the cancellation of the ADSs and the withdrawal of the ordinary shares and not un der the deposit agreement. In any event, you will not be deemed, by agreeing to the terms of the deposit agreement, to have waived our or the depositary's

compliance with U.S. federal securities laws and the rules and regulations promulgated thereunder. In fact, you cannot waive our or the depositary's compliance with U.S. federal securities laws and the rules and regulations promulgated

thereunder. Taxes You will be

responsible for the taxes and other governmental charges payable on the ADSs, ADRs and the securities represented by the ADSs. We, the depositary and the custodian may deduct from any distribution the taxe s and governmental charges payable by

holders and may sell any and all property on deposit to pay the taxes and governmental charges payable by holders. You will be liable for any deficiency if the sale proceeds do not cover the taxes that are due. The depositary may refuse to issue ADSs, to deliver, transfer, split and combine ADRs or to release securities on deposit until all taxes and

charges are paid. The depositary and the custodian may take reasonable administrative actions to obtain tax refunds and reduced tax withholding for any distributions on your behalf. However, you may be required to provide to the depositary and to

the custodian proof of taxpayer status and residence and such other information as the depositary and the custodian may require to fulfill legal obligations. You are required to indemnify us, the depositary and the custodian for any claims with

respect to taxes based on any tax benefit obtained for you. Foreign Currency Conversion The depositary will arrange for the conversion of all foreign currency received into U.S. dollars if such conversion is practical, and it will

distribute the U.S. dollars in accordance with the terms of the deposit agreement. You may have to pay fe es and expenses incurred in converting foreign currency, such as fees and expenses incurred in complyin g with currency exchange controls and

other governmental requirements. If the conversion of foreign currency is not practical or lawful, or if any required approvals are

denied or not obtainable at a reasonable cost or within a reasonable period, the depositary may take the f ollowing actions in its discretion: • Convert the foreign currency to the extent practical and lawful and distribute the U.S. dollars to the holders

for whom the conversion and distribution is lawful and practical. • Distribute the foreign currency to holder s for whom the distribution is lawful and practical. • Hold the foreign currency (without liability for interest) f or the applicable holders. Governing Law/Waiver of Jury Trial The

deposit agreement, the ADRs and the ADSs will be interpreted in accordance with the laws of the State of New York. The rights of holders of ordinary shares (including ordinary shares represented by ADSs) are governed by the laws of England and

Wales. AS A PARTY TO THE DEPOSIT AGREEMENT, YOU IRREVOCABLY WAIVE, TO THE FULLES T EXTENT PERMITTED BY APPLICABLE LAW, YOUR RIGHT TO TRIAL

BY JURY IN ANY LEGAL PROCEEDING ARISING OUT OF THE DEPOSIT AGREEMENT, THE ADRS A ND ADSs AGAINST US AND/OR THE DEPOSITARY. 202 Table of Contents The deposit agreement provides that, to the extent permitted by law, ADS holders waive

the right to a jury trial of any claim they may have against us or the depositary arising out of or relating to our ordinary shares, the ADSs or the deposit agreement, including any claim under U.S. federal securities laws. If we or the depositary

opposed a jury trial demand based on the waiver, the court would determine whether the waiver was enfo rceable in the facts and circumstances of that case in accordance with applicable case law. However, you will not be deemed by agreeing to the

terms of the deposit agreement to have waived our or the depositary's compliance with U.S. federal secur

ities laws and the rules and regulations promulgated thereunder. Listing We have applied to list our ADSs on the Nasdaq Global Select Market under the symbol "ARM". 203 Table of Contents ORDINARY SHAR ES AND ADSs ELIGIBLE FOR FUTURE SALE Prior to this offering, there has been no public market for our ordinary shares or ADSs. Future sales of ordinary shares and ADSs in the public market after this offering, and the availability of ordinary shares and ADSs for future

sale, could adversely affect the market price of the ordinary shares and ADSs prevailing from time to time. As described below, a significant number of currently outstanding ordinary shares will not be available for sale shortly after this offering

due to contractual restrictions on transfers. There may be sales of substantial amounts of our ADSs in the public market after such restrictions lapse. Sales of substantial amounts of our ADSs, or the perception t hat these sales could occur, could

adversely affect prevailing market prices for our ADSs and could impair our ability to raise equity capital in the future. Based on the

number of ordinary shares outstanding as of , 2023, we will have outstanding an aggregate of ordinary shares, including ordinary shares represented by ADSs, following this offering. All o f the ADSs to be sold in this

offering, including any ADSs sold upon exercise of the underwriters' option to purchase additional ADSs, will be freely tradable in the U.S. public market without restriction or further registration under the Securiti es Act, unless the ADSs are

held by any of our "affiliates" as such term is defined in Rule 144 of the Securities Act, subject, in each ca se, to the terms of the lock-up agreements referred to below or the resale

restrictions provided for in Rule 144 of the Securities Act, as applicable. The number of ADSs available for sale immediately after this offering will be the number sold in this offering less any ADSs held by our directors, officers and the

selling shareholder that are subject to lock-up agreements through 180 days after the date of this prospec tus. Lock-up Agreements We, our directors and executive officers and the selling shareholder have agree d that, without the prior written consent of any two of the four

representatives of the underwriters, we and they will not, subject to certain exceptions, for a period of 180 days after the date of this prospectus, offer, pledge, sell, contract to sell, sell any option or contract to pur chase, purchase any

option or contract to sell, grant any option, right or warrant to purchase, lend or otherwise transfer or dispose of, directly or indirectly, any ordinary shares or ADSs or any securities convertible into or exercisable or exchangeable for our

ordinary shares or ADSs. Any two of the four representatives of the underwriters may release the securiti es subject to any of the lock-up agreements with the underwriters described above, in whole or in part at any time. The exceptions to the lock-up agreement signed by the selling shareholder will include, amon g other things, any action necessary or appropriate for the purposes of pledging, charging or granting any lien, mortgage or other security

interest with respect to the ordinary shares for the benefit of lenders or finance counterparties (as well as any security agent, securities intermediary and/or custodian) (together, the "Pledgees") in connection with a bona fide loan

(including any margin loan) or other financing transaction provided to the selling shareholder or its affiliate s (which includes the New SoftBank Group Facility), and any action to permit the Pledgees to enforce their security interest under such a

transaction by selling, transferring, appropriating or otherwise disposing of the pledged securities by the P ledgees; provided that any buyer upon such foreclosure or enforcement will be obligated to sign the lock-up agreement for the remaining term

of the lock-up. See "Underwriting" for detailed descriptions of the lock-up agreements, including the exclusions and exceptions thereto. Rule 144 In general, persons who

have beneficially owned restricted ordinary shares for at least six months, and any affiliate of the Compan y who owns either restricted or unrestricted ordinary shares, are entitled to sell their securities without registration with the SEC

under an exemption from registration provided by Rule 144 under the Securities Act. 204 Table of Conten ts Affiliates In general, under Rule 144, as currently in effect, our affiliates or persons selling shares on be half of our affiliates are entitled to sell

upon expiration of the lock-up agreements described above, within any three-month period, a number of s hares that does not exceed the greater of: • 1% of the number of ordinary shares then outstanding, being represented by ADSs or otherwise, which will equal

approximately ordinary shares immediately after the closing of this offering based on the number of ordinary shares outstanding

as of , 2023; or • the average weekly trading volume of our ADSs during the four calendar weeks p receding the filing of a notice on

Form 144 with respect to that sale. Sales under Rule 144 by our affiliates or persons selling ordinary shar es on behalf

of our affiliates also are subject to certain manner of sale provisions and notice requirements and to the a vailability of current public information about us. Rule 701 Rule 701 generally allows

a shareholder who was issued our ordinary shares pursuant to a written compensatory plan or contract an d who is not deemed to have been an affiliate of our company during the immediately preceding 90 days to sell these shares in reliance upon Rule

144, but without being required to comply with the public information, holding period, volume limitation, or notice provisions of Rule 144. Rule 701 also permits affiliates of our company to sell their Rule 701 share s under Rule 144 without

complying with the holding period requirements of Rule 144. All holders of Rule 701 shares, however, are required by that rule to wait until 90 days after the date of this prospectus before selling those shares purs uant to Rule 701. Moreover,

certain Rule 701 shares are subject to lock-up agreements as described above and under the section title d "Underwriting" and will not become eligible for sale until the expiration of those

agreements. Registration Statements We intend to file with the SEC one or more registration statements on Form S-8 under the Securities Act

to register the offer and sale of our ordinary shares and ADSs reserved for issuance under our equity ince ntive plans. These registration statements will become effective immediately upon filing. ADSs covered by these registration statements will

then be eligible for sale in the open market, subject to vesting restrictions, any applicable lock-up agreem ents described below and Rule 144 limitations applicable to affiliates. In addition, we have granted SoftBa nk Group certain customary registration rights pursuant to the Shareholder Governance Agreement. See "Related Party Transactions—Transactions with SoftBank Group—Shareholder Governance Agreement—Registration Rights." As a result of the registration of the resale of ADSs owned by SoftBank Group, AD Ss representing ordinary

shares owned by SoftBank Group will become freely tradable without restriction under the Securities Act upon effectiveness of such registration. See "Risk Factors—Risks Relating to Our Status as a Controlled Company and Foreign Private

Issuer—The future exercise of registration rights by SoftBank Group may adversely affect the market price of the ADSs." Regulation S Regulation S under the Securities Act ("Regulation S") provides that ADSs and ordinary shares owned by any person

may be sold without registration in the U.S., provided that the sale is effected in an offshore transaction a nd no directed selling efforts are made in the U.S. (as these terms are defined in Regulation S), subject to certain other conditions.

In general, this means that our ADSs and ordinary shares may be sold outside the U.S. without registration in the U.S. being required. 205 Table of Contents MATERIAL TAX CONSIDERATIONS Material U.S. F ederal Income Tax Considerations for U.S. Holders The following is a description of the material U.S. federal income tax consequences to U.S. Holders (as defined below) of owning and disposing

of our ordinary shares or ADSs acquired pursuant to this offering. This discussion is not a comprehensive description of all tax considerations that may be relevant to a particular person's decision to acquire our or dinary shares or ADSs. The

discussion is based on the Code, administrative pronouncements, judicial decisions, final, temporary and proposed Treasury Regulations and the income tax treaty between the U.K. and the U.S. (the "Treaty"), all as of the date hereof,

changes to any of which may affect the tax consequences described herein—possibly with retroactive eff ect. The following discussion is not binding on the IRS or any court. Thus, we cannot provide any assurance that the U.S. federal income tax

consequences discussed below will not be challenged by the IRS or will be sustained by a court if challen ged by the IRS. This discussion

applies only to a U.S. Holder that will hold our ordinary shares or ADSs as a capital asset for tax purposes (generally, property held for investment). In addition, it does not describe all of the tax consequences that may be relevant in light of a

U.S. Holder's particular circumstances, including state, local and non-U.S. tax consequences, estate and gift tax consequences, alternative minimum tax consequences, special accounting rules under

Section 451(b) of the Code, the potential application of the Medicare contribution tax, and tax consequenc es applicable to U.S. Holders subject to special rules, such as: • banks, insurance companies and certain other financial institutions; • pension plans; • U.S. expatriates and certain former citizens or long-term resi dents of the U.S.; • dealers or traders in securities who use a mark-to-market method of tax accounting; • persons holding ordinary shares or ADSs as part of a hedging transaction, "straddle," wash sale,

conversion transaction or integrated transaction or persons entering into a constructive sale with respect t o ordinary shares or ADSs; • persons whose "functional currency" for U.S. federal income tax purposes is not the U.S. dollar; • brokers, dealers or traders in securities, commodities or currencies; • tax-exempt entities (including private foundations) or government

organizations; • S corporations, partnerships or other entities or arrangements classified as partnerships f or U.S. federal income

tax purposes (and investors therein); • regulated investment companies or real estate investment trusts; • persons who acquired our ordinary shares or ADSs pursuant to the exercise of any employee stock option or

otherwise as compensation; • persons that own or are deemed to own 10% or more of our shares (by vot e or value); and • persons holding our ordinary shares or ADSs in connection with a trade or business, per manent establishment or

fixed base outside the U.S. If an entity that is classified as a partnership for U.S. federal income tax purpo ses holds

ordinary shares or ADSs, the U.S. federal income tax treatment of a partner will generally depend on the status of the partner and the activities of the partnership. Partnerships holding ordinary shares or ADSs a nd partners in such partnerships are

encouraged to consult their tax advisors as to the particular U.S. federal income tax consequences of hol ding and disposing of ordinary shares or ADSs. 206 Table of Contents A "U.S. Holder" is a holder who, for U.S. federal income tax purposes, is a

beneficial owner of ordinary shares or ADSs who is: • an individual who is a citizen or resident of the U.S.; • a corporation (or other entity taxable as a corporation for U.S. federal income tax purposes) created or organized in or under the laws of the U.S., any state therein or the District of Columbia; • an estate the inc ome of which is subject to U.S. federal income taxation regardless of its source; or • a trust if (1) a U.S. co urt is able to exercise primary supervision over the administration of the trust and

one or more U.S. persons have authority to control all substantial decisions of the trust or (2) the trust has a valid election to be treated as a U.S. person under applicable U.S. Treasury Regulations. If you are considering the purchase of our ADSs or ordinary shares, you should consult your own tax advisors concerning the particular

U.S. federal income tax consequences to you of the purchase, ownership and disposition of our ADSs or ordinary shares in light of your own particular circumstances, as well as the consequences to you arising under other U.S. federal, state and local

tax laws and the laws of any other taxing jurisdiction. ADSs The discussion below assumes that the repre sentations contained in the deposit agreement are true and that the obligations in the deposit

agreement and any related agreement will be complied with in accordance with their terms. Generally, a holder of an ADS is treated for U.S. federal income tax purposes as holding the ordinary shares represented by the ADS. Accordingly, no gain or

loss will generally be recognized upon an exchange of ADSs for ordinary shares. Taxation of Distributions Subject to the discussion below under "—Passive Foreign Investment Company Rules," distributions paid on ordinary shares or

ADSs, other than certain distributions of ordinary shares or ADSs, will generally be treated as dividends to the extent paid out of our current or accumulated earnings and profits (as determined under U.S. federal i ncome tax principles). Because we

may not calculate our earnings and profits under U.S. federal income tax principles, we expect that distributions generally will be reported to U.S. Holders as dividends. Subject to applicable limitations, including conditions relating to holding

period and the absence of certain risk reduction transactions, dividends paid to certain non-corporate U.S. Holders may be taxable at preferential rates applicable to "qualified dividend income"

received from a "qualified foreign corporation." A non-U.S. corporation will generally be considered a qualified foreign corporation (i) if it is eligible for the benefits of a comprehensive tax

treaty with the U.S. which the Secretary of Treasury of the United States determines is satisfactory for pur poses of these rules and which includes an exchange of information provision (which includes the Treaty) or (ii) with respect to any

dividend it pays on ordinary shares or ADSs which are readily tradable on an established securities marke t in the U.S. Our ADSs (but not ordinary shares) will be listed on Nasdaq, which is a qualified exchange fo r these purposes. Consequently, if

our ADSs remain listed on Nasdaq and are regularly traded, we expect to be a qualified foreign corporation for purposes of dividends paid by us constituting qualified dividend income. However, the qualified dividend income treatment will not apply

if we are treated as a PFIC with respect to the U.S. Holder for our taxable year of the distribution or the pr eceding taxable year. The amount of the dividend will be treated as foreign-source dividend income to U. S. Holders and will not be eliqible

for the dividends-received deduction generally available to U.S. corporations under the Code. Dividends will generally be included in a U.S. Holder's income on the date of the U.S. Holder's actual or constructive receipt of the dividend.

The amount of any dividend income paid in foreign currency will be the U.S. dollar amount calculated by r eference to the exchange rate in effect on the date of actual or constructive receipt, regardless of whether the payment is in fact converted

into U.S. dollars. If the dividend is converted into U.S. dollars on the date of receipt, a U.S. Holder should not be required to recognize foreign currency gain or loss in respect of the dividend income. A U.S. 207 T able of Contents Holder may have foreign currency gain or loss if the dividend is converted into U.S. dollars after the date of receipt. Such gain or loss would generally be treated as U.S.-source ordinary income or loss. The amount of any distribution of property other than cash (and other than certain pro rata distributions of ordinary shares or ADSs or rights to acquire ordinary shares or ADSs) will be the fair market value of such property on the date of

distribution. For foreign tax credit purposes, our dividends will generally be treated as passive category in come. Sale or Other Taxable

Disposition of Ordinary Shares and ADSs Subject to the discussion below under "—Passive Foreign Investment Company

Rules," gain or loss realized on the sale or other taxable disposition of ordinary shares or ADSs will be capital gain or loss, and will be long-term capital gain or loss if the U.S. Holder held the

ordinary shares or ADSs for more than one year. The amount of the gain or loss will equal the difference between the U.S. Holder's tax basis in the ordinary shares or ADSs disposed of and the amount realized on the disposition, in each case as

determined in U.S. dollars. Such gain or loss will generally be U.S.-source gain or loss for foreign tax cred it purposes. The deductibility of capital losses is subject to limitations. If the consideration received by a U.S. Holder is not paid in U.S. dollars, the amount realized will be the U.S. dollar value of the payment received determined by reference to the spot rate of exchange on the date of the sale or other disposition. However, if the ordinary shares or ADSs are treated as traded on an "established securities market" and the U.S. Holder is either a

cash basis taxpayer or an accrual basis taxpayer that has made a special election (which must be applied consistently from year to year and cannot be changed without the consent of the IRS), the U.S. Holder will determine the U.S. dollar value of

the amount realized in a non-U.S. dollar currency by translating the amount received at the spot rate of ex change on the settlement date of the sale. If the U.S. Holder is an accrual basis taxpayer that is not eligible to or does not elect to determine the amount realized using the spot rate on the settlement date, t he U.S. Holder will recognize foreign currency gain or loss to the extent of any difference between the U.S. dollar amount realized on the

date of sale or disposition and the U.S. dollar value of the currency received at the spot rate on the settle ment date. Gain or loss, if any, realized by a U.S. Holder on the sale or other disposition of our ordinary s hares generally will be treated

as U.S. source gain or loss for U.S. foreign tax credit limitation purposes. Passive Foreign Investment Company Rules We will be a PFIC for any taxable year in which (1) 75% or more of our gross income consists of passive income or (2) 50% or more of the value

of our assets (generally determined on the basis of a weighted quarterly average) consists of assets that produce, or are held for the production of, passive income. For purposes of these tests, passive income g enerally includes dividends, interest,

certain gains from the sale or exchange of investment property and certain rents and royalties, and cash a nd cash-equivalents are generally passive assets for these purposes. In addition, for purposes of the above calculations, a non-U.S. corporation that directly or indirectly owns at least 25% by value of the shares of another corporation is treated as holding and receiving directly its proportionate share of assets and income.

respectively, of such other corporation. If we are a PFIC for any taxable year during which a U.S. Holder holds our ordinary shares or ADSs, the U.S. Holder may be subject to adverse tax consequences regardle ss of whether we continue to qualify as a

PFIC, including ineligibility for any preferential tax rates on capital gains or on actual or deemed dividends, interest charges on certain taxes treated as deferred and additional reporting requirements. Based on our analysis of our activities and current estimates (and not fully audited financials) of our income and asset s, we believe that we

were not a PFIC for our most recently completed taxable year. However, the determination of whether we are a PFIC is a fact-intensive determination made on an annual basis by applying principles and methodol ogies that in some circumstances are

unclear and subject to varying interpretation. For instance, for our current and future taxable years, the tot al value of our assets for PFIC testing purposes (including goodwill) may be determined in part by reference to the market price of our

ordinary shares or ADSs from time to time, which may fluctuate considerably. If our market capitalization declines while we hold a 208 Table of Contents substantial amount of cash and cash-equivalents for any t axable year, we may be a PFIC for that taxable year. Furthermore, under the income test, our status as a PFIC depends on the composition

of our income for the relevant taxable year, which will depend on the transactions we enter into in the futu re and our corporate structure. The composition of our income and assets is also affected by how we spe nd the cash we raise in any offering.

Even if we determine that we are not a PFIC for a taxable year, there can be no assurance that the IRS will agree with our conclusion and that the IRS would not successfully challenge our position. Accordingly, we cannot provide any assurances that

we will not be a PFIC for the current or any future taxable year, and our U.S. counsel expresses no opinion with respect to our PFIC status. If we are classified as a PFIC in any taxable year with respect to which a U.S. Holder owns our ordinary shares or ADSs, we will continue to

be treated as a PFIC with respect to such U.S. Holder in all succeeding taxable years during which such U.S. Holder owns our ordinary shares or ADSs, regardless of whether we continue to meet the tests described above, unless we cease to be a PFIC

and such U.S. Holder has made a "deemed sale" election under the PFIC rules. If such a deemed sale el ection is made, a U.S. Holder will be deemed to have sold the ordinary shares or ADSs the U.S. Holder holds at their fair market value and

any gain from such deemed sale would be subject to the rules described below. After the deemed sale el ection, so long as we do not become a PFIC in a subsequent taxable year, the U.S. Holder's ordinary sha res or ADSs with respect to which such

election was made will not be treated as shares in a PFIC and the U.S. Holder will not be subject to the ru les described below with respect to any "excess distribution" the U.S. Holder receives from us or any gain from an actual sale or

other disposition of our ordinary shares or ADSs. U.S. Holders should consult their tax advisors as to the possibility and consequences of making a deemed sale election if we are a PFIC and cease to be a PFIC and such election becomes available. For each taxable year that we are treated as a PFIC with respect to

a U.S. Holder, such U.S. Holder will be subject to special tax rules

with respect to any "excess distribution" such U.S. Holder receives from us and any gain such U.S. Holder recognizes from a sale or other disposition (including a pledge) of our ordinary shares or ADSs, unless (i) such U.S. Holder

makes a "qualified electing fund" election (a "QEF Election"), as discussed below, with respect to all taxab le years during such U.S. Holder's holding period in which we are a PFIC or (ii) our ordinary shares or AD Ss

constitute "marketable stock" and such U.S. Holder makes a mark-to-market election (as discussed below). Distributions a U.S. Holder receives in a taxable year

that are greater than 125% of the average annual distributions a U.S. Holder received during the shorter of the three preceding taxable years or the U.S. Holder's holding period for the ordinary shares or ADSs will be treated as an excess

distribution. Under these special tax rules: • the excess distribution or gain will be allocated ratably over a U.S. Holder's holding period for the

ordinary shares or ADSs; • the amount allocated to the current taxable year, and any taxable year prior to the first taxable year in which

we became a PFIC, will be treated as ordinary income; and • the amount allocated to each other taxable y ear will be subject to the highest tax rate in effect for that year

and the interest charge generally applicable to underpayments of tax will be imposed on the resulting tax attributable to each such year. The tax liability for amounts allocated to taxable years prior to the taxable year of disposition or "excess distribution" cannot be

offset by any net operating losses for such years, and gains (but not losses) realized on the sale of the or dinary shares or ADSs cannot be treated as capital gains, even if a U.S. Holder holds the ordinary shares or ADSs as capital assets. If we are a PFIC, a U.S. Holder will generally be subject to similar rules with re spect to distributions we receive from, and our dispositions

of the stock of, any of our direct or indirect subsidiaries or any other entities in which we hold equity intere sts that also are PFICs ("lower-tier PFICs") as if such distributions were indirectly received by, and/or disp ositions were

indirectly carried out by, such U.S. Holder. U.S. Holders should consult their tax advisors regarding the ap plication of the PFIC rules to lower-tier PFICs. 209 Table of Contents We do not currently expect to provid e information that would allow a U.S. Holder to make a

QEF Election in the event that we or any of our subsidiaries are classified as a PFIC and, therefore, U.S. Holders should assume such election will not be available if we or any of our subsidiaries are a PFIC. U.S. Holders can avoid the interest charge on excess distributions or gain relating to the ordinary shares or A DSs by making a mark-to-market election with respect to the ordinary shares or ADSs, provided that the ordinary shares or ADSs are "marketable stock." Ordinary shares or ADSs will

be marketable stock if they are "regularly traded" on certain U.S. stock exchanges or on a non-U.S. stock exchange that meets certain conditions. For these purposes, the ordinary shares or ADSs will

be considered regularly traded during any calendar year during which they are traded, other than in de mi nimis quantities, on at least 15 days during each calendar quarter. Any trades that have as one of their pri ncipal purposes meeting this

requirement will be disregarded. Our ADSs (but not ordinary shares) will be listed on Nasdaq, which is a qualified exchange for these purposes. Consequently, if our ADSs remain listed on Nasdaq and are regular ly traded, we expect the mark-to-market election would be available to U.S. Holders of our ADSs if we are a PFIC. Each U.S. Holder should consult its tax advisor as to whether a mark-to-market election is available or advisable with respect to our ordinary shares or ADSs. A U.S. Holder that makes a mark-to-market election must

include in ordinary income for each year an amount equal to the excess, if any, of the fair market value of the ordinary shares or ADSs at the close of the taxable year over the U.S. Holder's adjusted tax basis in t he ordinary shares or ADSs.

An electing U.S. Holder may also claim an ordinary loss deduction for the excess, if any, of the U.S. Hold er's adjusted basis in the ordinary shares or ADSs over the fair market value of the ordinary shares or ADSs at the close of the taxable

year, but this deduction is allowable only to the extent of any net mark-to-market gains for prior years. Gains from an actual sale or other disposition of the ordinary

shares or ADSs in any year in which we are a PFIC will be treated as ordinary income, and any losses inc urred on a sale or other disposition of the ordinary shares or ADSs will be treated as an ordinary loss to the extent of any net mark-to-market gains for prior years. Once made, the election cannot be revoked with out the consent of the IRS unless the ordinary shares or ADSs cease to be marketable stock. A mark-to-market election generally cannot be made for

equity interests in any lower-tier PFICs that we own, unless shares of such lower-tier PFIC are themselve s "marketable stock." As a result, even if a U.S. Holder validly makes a mark-to-market election with respect to our ordinary shares or ADSs, the U.S. Holder may continue to be subject to the PFIC rules (describe d above) with respect to its indirect interest in any of our

investments that are treated as an equity interest in a PFIC for U.S. federal income tax purposes. U.S. Ho lders should consult their tax advisors as to the availability and desirability of a mark-to-market election, a s well as the impact of such election on interests in any lower-tier PFICs. Unless otherwise provided by th e U.S. Treasury, each U.S. shareholder of a PFIC is required to file an annual report containing such information as the U.S. Treasury may require. A U.S. Holder's failure to file the annual report may result in substantial penalties and extend the statute of limitations with respect to the U.S. Holder's U.S. federal in come tax return.

U.S. Holders should consult their tax advisors regarding the requirements of filing such information return s under these rules. Information

Reporting and Backup Withholding Payments of dividends and sales proceeds that are made within the U .S. or through certain

U.S.-related financial intermediaries generally are subject to information reporting and may be subject to b ackup withholding, unless (i) the U.S. Holder is a corporation or other exempt recipient or (ii) in the case of backup withholding,

the U.S. Holder provides a correct taxpayer identification number and certifies that it is not subject to back up withholding. Backup

withholding is not an additional tax. The amount of any backup withholding from a payment to a U.S. Hold er will be allowed as a credit against the U.S. Holder's U.S. federal income tax liability and may entitle it to a refund, provided that the

required information is timely furnished to the IRS. 210 Table of Contents Information with Respect to For eign Financial Assets Certain U.S. Holders who are individuals (and, under U.S. Treasury Regulations, ce rtain entities) may be required to report information

relating to our ordinary shares or ADSs, subject to certain exceptions (including an exception for ordinary shares or ADSs held in accounts maintained by certain U.S. financial institutions), by filing IRS Form 8938 (Statement of Specified Foreign

Financial Assets) with their federal income tax return. Such U.S. Holders who fail to timely furnish the required information may be subject to a penalty. Additionally, if a U.S. Holder does not file the required information, the statute of

limitations with respect to tax returns of the U.S. Holder to which the information relates may not close unt il three years after such information is filed. U.S. Holders should consult their tax advisors regarding their reporting obligations with

respect to their ownership and disposition of our ordinary shares or ADSs and with respect to their possible obligation to file IRS Forms 926 and/or 8938. U.K. Taxation The following section

contains a description of certain U.K. tax consequences of the acquisition, ownership and disposal of AD Ss (and/or ADRs) and ordinary shares. It is intended only as a general guide to current U.K. tax law and the published practice of HMRC (which is

not a statement of law and which may not be binding on HMRC), applying as at the date of this prospectu s (both of which are subject to change at any time, possibly with retrospective effect). It does not constitut e legal or tax advice and does not

purport to be a complete analysis of all U.K. tax considerations relating to the acquisition, ownership or di sposal of ADSs (and/or ADRs) and ordinary shares, or all of the circumstances in which holders of ADSs (and/or ADRs) and ordinary shares may

benefit from an exemption or relief from U.K. taxation. It is written on the basis that the Company does not (and will not) directly or indirectly derive 75% or more of its qualifying asset value from U.K. land, and that the Company is and remains

solely resident in the U.K. for tax purposes and will therefore be subject to the U.K. tax regime and not the

U.S. tax regime except as set out above under "U.S. Federal Income Taxation." This section does not cover: • your chargeable gains position if you are resident in the U.K. for U.K. tax purposes, you are an individual and

hold the ADSs and/or ADRs for the purposes of a trade, profession or vocation that you carry on in the U. K. through a branch or agency, or you are a corporation and hold the ADSs and/or ADRs for the purposes of a trade carried on in the U.K. through

a permanent establishment in the U.K.; and • your inheritance tax position if you are domiciled in the U.K. for inheritance tax purposes. The section below may not relate to certain classes of persons, such as (but not limited to): • persons who are connected with the Company; • financial institutions; • insurance companies; • charities or tax-exempt organizations; • collective investment schemes; • pension schemes; • mark et makers, intermediaries, brokers or dealers in securities or persons who hold ADSs and/or ADRs otherwise

than as an investment; • persons who have (or are deemed to have) acquired their ADSs and/or ADRs by virtue of an office or employment or

who are or have been officers or employees of the Company or any of its affiliates; and • individuals who are subject to U.K. taxation on a remittance basis. 211 Table of Contents Based on published HMRC guid ance, we would expect that HMRC will regard a holder of ADSs as

holding the beneficial interest in the underlying shares and therefore these paragraphs assume that a hol der of ADSs and/or ADRs is the beneficial owner of the underlying ordinary shares and any dividends paid in respect of the underlying ordinary

shares (where the dividends are regarded for U.K. purposes as that person's own income) for U.K. direct t ax purposes. THESE PARAGRAPHS ARE A

SUMMARY OF CERTAIN U.K. TAX CONSIDERATIONS AND ARE INTENDED AS A GENERAL GUIDE ONLY. IT IS RECOMMENDED THAT ALL HOLDERS OF ADSs AND/OR ADRS OBTAIN ADVICE AS TO THE CONSEQUENCES OF THE ACQUISITION, OWNERSHIP AND DISPOSAL OF THE ADSs AND/O R ADRS IN

THEIR OWN SPECIFIC CIRCUMSTANCES FROM THEIR OWN TAX ADVISORS. IN PARTICULAR, NO N-U.K. RESIDENT OR DOMICILED PERSONS ARE ADVISED TO CONSIDER THE POTENTIAL IMPA CT OF ANY RELEVANT DOUBLE TAXATION AGREEMENTS. Taxation of Dividends Dividends paid by the Company in respect of our ordinary shares will not be subject to any withholding or deduction at source for or on account

of U.K. tax. Taxation of Chargeable Gains A holder of ADSs and/or ADRs which is not resident for tax pur poses in the U.K. should not normally be liable to U.K. capital gains tax or

corporation tax on chargeable gains on a disposal (or deemed disposal) of ADSs and/or ADRs unless the person is carrying on (whether solely or in partnership) a trade, profession or vocation in the U.K. through a branch or agency (or, in the case of

a corporate holder of ADSs and/or ADRs, through a permanent establishment) to which the ADSs and/or ADRs are attributable. However, an individual holder of ADSs and/or ADRs who has ceased to be residen t for tax purposes in the U.K. for a period of

less than five years and who disposes of ADSs and/or ADRs during that period may be liable on his or he r return to the U.K. to U.K. tax on any capital gain realized (subject to any available exemption or relief). In heritance Tax Subject to

certain provisions relating to trusts or settlements, an ADS and/or ADR held by an individual shareholder who is domiciled in the U.S. for the purposes of the convention between the U.S. and the U.K. relating to estate and gift taxes (the

"Convention") and who is neither domiciled in the U.K. nor (where certain conditions are met) a U.K. natio nal (as defined in the Convention), will generally not be subject to U.K. inheritance tax on the individual's death (whether

held on the date of death or gifted during the individual's lifetime) except where the ADS and/or ADR is part of the business property of a U.K. permanent establishment of the individual or pertains to a U.K. fixed base of an individual who

performs independent personal services. In a case where an ADS and/or ADR is subject both to U.K. inhe ritance tax and to U.S. federal gift or estate tax, the Convention generally provides for inheritance tax paid in the U.K. to be credited against

federal gift or estate tax payable in the U.S., or for federal gift or estate tax paid in the U.S. to be credited

against any inheritance tax payable in the U.K., based on priority rules set forth in the Convention. Stamp Duty and Stamp Duty Reserve Tax The discussion below is intended as a general and non-exhaustive gui de to the current U.K. stamp duty and SDRT position and applies to the

holders and acquirers of ADSs and/or ADRs (representing our ordinary shares) wherever resident; however, it should be noted that special rules may apply to certain persons such as market makers, brokers, de alers or intermediaries, and persons

connected with clearance services and depositary receipt systems. Such persons may not be liable to U. K. stamp duty or SDRT or may be so liable at a higher rate. Furthermore, such persons may, although not primarily liable for the tax, be required

to notify and account for it under the Stamp Duty Reserve Tax Regulations 1986. 212 Table of Contents A cquisitions and Subsequent Transfers of ADSs and/or ADRs Based on HMRC's published practice, no U. K. stamp duty will be payable on the acquisition or transfer of ADSs and/or ADRs. Furthermore, an agreement to transfer ADSs and/or ADRs will not give rise to a liability to SDRT. Withdrawals and Subseq uent Transfers of ordinary

shares A transfer of ordinary shares (as opposed to ADSs and/or ADRs) will generally be subject to U.K. stamp duty (if the ordinary

shares are held in certificated form) or SDRT (if the ordinary shares are held in uncertificated form), in eith er case at the rate of 0.5% (or potentially 1.5% in certain circumstances) of the amount or value of the con sideration paid for the

ordinary shares (for example in respect of transfer of ordinary shares or a redeposit of ordinary shares int o the ADR program). Further,

SDRT will generally be payable on an unconditional agreement to transfer ordinary shares in certificated f orm at 0.5% (or potentially 1.5% in certain circumstances) of the amount or value of the consideration for t he transfer, but is repayable if,

within six years of the date of the agreement, an instrument transferring the ordinary shares is executed. Therefore, you are strongly

encouraged to hold your ADSs (representing ordinary shares) in book-entry form through the facilities of the Depositary Trust Company. 213 Table of Contents UNDERWRITING The selling shareholder is offering the ADSs described in this prospectus through a number of underwriters. Barclays Capital Inc., Goldman

Sachs & Co. LLC, J.P. Morgan Securities LLC and Mizuho Securities USA LLC are acting as joint book-ru nning managers of the offering and as representatives of the underwriters. We and the selling shareholder have entered into an underwriting agreement with the underwriters. Subject to the terms and conditions of the underwriting agreement, the selling shareholder has agreed to sell to the underwriters, a nd each underwriter has severally

agreed to purchase, at the public offering price less the underwriting discounts and commissions set forth on the cover page of this prospectus, the number of ADSs listed next to its name in the following table: Na me Number of ADSs Barclays Capital Inc. Goldman Sachs & Co. LLC J.P. Morgan Securities LLC Mizuho Securities USA LLC BofA Securities, Inc. Citigroup Global Markets Inc. Deutsche Bank Securities Inc. Jef feries LLC BNP Paribas Securities Corp. Credit Agricole Securities (USA) Inc. MUFG Securities Americas Inc. Natixis Securities Americas LLC Santander US Capital Markets LLC SMBC Nikko Securities America, Inc. BMO Capital Markets Corp. Daiwa Capital Markets America Inc. Evercore Group L.L.C. Guggenhei m Securities, LLC HSBC Securities (USA) Inc. Intesa Sanpaolo S.p.A. Independence Point Securities LL C KeyBanc Capital Markets Inc. Loop Capital Markets LLC Samuel A. Ramirez & Company, Inc. Rosenbl att Securities Inc. SG Americas Securities, LLC Cowen and Company, LLC Nomura Securities Internation al, Inc. WR Securities, LLC Total "Wolfe | Nomura Alliance" is the marketing name used by Wolfe Researc h Securities and Nomura

Securities International, Inc. in connection with certain equity capital markets activities conducted jointly by the firms. Both Nomura Securities International, Inc. and WR Securities, LLC are serving as underwriters in the offering described

herein. In addition, WR Securities, LLC and certain of its affiliates may provide sales support services, investor feedback, investor education, and/or other independent equity research services in connection with this offering. The underwriters are committed to purchase all of the ADSs offered by the selling shareholde r if they purchase any ADSs. However, the

underwriters are not required to purchase the ADSs covered by the underwriters' option to purchase addit

ional ADSs described below. The underwriting agreement also provides 214 Table of Contents that if an underwriter defaults, the purchase commitments of non-defaulting underwriters may also be increased or the offering may be terminated. To the

extent any underwriter that is not a U.S. registered broker-dealer intends to effect any offers or sales of an y securities in the United States, it will do so through one or more U.S. registered broker-dealers in accord ance with the applicable U.S.

securities laws and regulations. We and the selling shareholder have agreed to indemnify the underwriter s and certain of their

controlling persons against certain liabilities, including liabilities under the Securities Act, and to contribute to payments that the underwriters may be required to make in respect of those liabilities. The underwriter s propose to offer the ADSs directly to the public at the initial public offering price set forth on the cover page of this

prospectus and to certain dealers at that price less a concession not in excess of \$ per ADS. Any su ch dealers may resell ADSs to certain other brokers or dealers at a discount of up to

\$ per ADS from the initial public offering price. After the initial offering of the ADSs to the public, if all of the ADSs are not sold at the initial public offering price, the underwriters may change

the offering price and the other selling terms. Sales of any ADSs made outside of the U.S. may be made by affiliates of the underwriters. The underwriters may offer and sell the ADSs to the public through one or more of their respective affiliates

or other registered broker-dealers or selling agents. The underwriters have an option to buy up

to additional ADSs from the selling shareholder to cover sales of ADSs by the underwriters which exceed the number of ADSs specified in the table above.

The underwriters have 30 days from the date of this prospectus to exercise this option to purchase additional ADSs. If any ADSs are purchased with this option to purchase additional ADSs, the underwriters will purchase ADSs in approximately the same

proportion as shown in the table above. If any additional ADSs are purchased, the underwriters will offer the additional ADSs on the same terms as those on which the ADSs are being offered. The underwriting fee is equal to the public offering price per ADS less the amount paid by the underwriters to the selling shar eholder per

ADS. The underwriting fee is \$ per ADS. The following table shows the per ADS and total underwriting discounts and commissions to be paid to the underwriters assuming both no

exercise and full exercise of the underwriters' option to purchase additional ADSs. Without exercise of option to purchase additional ADSs With full exercise of option to purchase additional ADSs Per ADS \$ Tot al \$ \$ We estimate that the total expenses of this offering payable by us, including registration, filing and li sting

fees, printing fees and legal and accounting expenses, but excluding the underwriting discounts and com missions, will be approximately \$. A prospectus in electronic format may be made available on the w eb sites maintained by one or more underwriters, or selling group members, if

any, participating in the offering. The underwriters may agree to allocate a number of ADSs to underwriter s and selling group members for sale to their online brokerage account holders. Internet distributions will be allocated by the representatives

to underwriters and selling group members that may make internet distributions on the same basis as oth er allocations. We have agreed to

reimburse the underwriters for expenses relating to clearance of this offering with FINRA for up to \$50,00 0. We have agreed that, for a

period of 180 days after the date of this prospectus (the "Lock-Up Period") we will not (1) offer, pledge, sel I, contract to sell, sell any option or contract to purchase, purchase any option or 215 Table of Contents c ontract to sell, grant any option, right or warrant to purchase, lend, or otherwise transfer or dispose of, dire ctly or indirectly, or submit to, or file with, the SEC a registration statement

under the Securities Act relating to, ordinary shares or ADSs or any securities convertible into or exercisa ble or exchangeable for ordinary shares or ADSs, or publicly disclose the intention to undertake any of the foregoing, or (2) enter into

any swap or other agreement that transfers, in whole or in part, any of the economic consequences of ow nership of the ordinary shares or ADSs or any such other securities, whether any such transaction describ ed in clause (1) or (2) above is to be settled by delivery of ordinary shares or ADSs or such other securities, in cash or otherwise, without the prior written consent of any two of the four representatives of the underwriters, other than the ADSs to be sold hereunder. The restrictions described in the paragraph above relating to the Company do not apply to: • the issuance of ordinary shares or securities convertible into or exercisable for ordinary shares pursuant to the

conversion or exchange of convertible or exchangeable securities or the exercise of warrants or options (i ncluding net exercise) or the settlement of RSUs (including net settlement), in each case outstanding on the date of this prospectus and

described herein; • grants of stock options, stock awards, restricted stock, RSUs, or other equity awards a nd the issuance of

ordinary shares or securities convertible into or exercisable or exchangeable for ordinary shares (whether upon the exercise of stock options or otherwise) to the Company's employees, officers, directors, advisors, or consultants pursuant to

the terms of any equity compensation plan described herein, provided that such recipients either enter int o a lock-up agreement with the underwriters or are otherwise bound by a "lock-up" or similar provision un der such equity compensation plan for the duration of the Lock-Up Period that the Company will not relea se or otherwise waive

during the Lock-Up Period without the prior written consent of any two of the four representatives of the u nderwriters; • the issuance of up to 10% of the ordinary shares, or securities convertible into, exercisable f or, or which are

otherwise exchangeable for, ordinary shares, outstanding immediately following the completion of this off ering, in acquisitions or other similar strategic transactions, provided that such recipients enter into a lock-up agreement with the underwriters covering the remainder of the Lock-Up Period; • the filing of any regist ration statement on Form S-8 relating to

securities granted or to be granted pursuant to any plan described herein or any assumed benefit plan pur suant to an acquisition or similar strategic transaction; or • facilitating the establishment of a trading plan on behalf of a shareholder, officer, employee or director of the

Company pursuant to Rule 10b5-1 under the Exchange Act for the transfer of ordinary shares, or securities convertible into, exercisable for or which are otherwise exchangeable for ordinary shares,

provided that (i) such trading plan does not provide for the transfer of ordinary shares, or securities conver tible into, exercisable for or which are otherwise exchangeable for ordinary shares during the Lock-Up Per iod and (ii) to the extent a public announcement under the Exchange Act, if any, is required of or voluntarily made by the Company regarding the establishment of such trading plan, such

announcement or filing shall include a statement to the effect that no transfer of ordinary shares, or securi ties convertible into, exercisable for or which are otherwise exchangeable for ordinary shares may be mad e under such plan during the Lock-Up Period. Our directors and executive officers and the selling shareholder

(such persons, the "lock-up parties") have entered into lock-up agreements with the representatives of the underwriters prior to the commencement of this

offering pursuant to which each lock-up party, for the duration of the Lock-up Period, may not (and may not cause any of their direct or indirect affiliates to), without the prior written consent of any two of

the four representatives of the underwriters, (1) offer, pledge, sell, contract to sell, sell any option or contract to purchase, purchase any option or contract to sell, grant any option, right or warrant to purchase, len d, or otherwise

transfer or dispose of, directly or indirectly, any ADSs or ordinary shares ("Equity Securities") or any secur ities convertible into or exercisable or exchangeable for Equity Securities (including without, limitation, Equity 216 Table of Contents Securities or such other securities which may be deemed to be beneficially ow ned by the lock-up party in accordance with the rules and regulations of the

SEC (collectively, the "Lock-Up Securities"), (2) enter into any hedging, swap or other agreement or trans action that transfers, in whole or in part, any of the economic consequences of

ownership of the Lock-Up Securities, whether any such transaction described in clause (1) or (2) above is to be settled by delivery of Lock-Up Securities, in cash

or otherwise, (3) except for in the case of the selling shareholder, make any demand for, or exercise any r ight with respect to, the registration of any Lock-Up Securities, or (4) publicly disclose

the intention to do any of the foregoing. Each lock-up party has further acknowledged that the foregoing p

recludes the lock-up party from engaging in any hedging or

other transactions or arrangements (including, without limitation, any short sale or the purchase or sale of, or entry into, any put or call option, or combination thereof, forward, swap or any other derivative transact ion or instrument, however

described or defined) designed or intended, or which could reasonably be expected to lead to or result in, a sale or disposition or transfer (whether by the lock-up party or any other person) of any economic consequences of ownership, in whole or in part, directly or indirectly, of any Lock-Up Securities, whether any such transaction or arrangement (or instrument provided for thereunder) would be settled by delivery of Lock-Up Securities, in cash or otherwise. For the avoidance of doubt, nothing contained in any of the lock-up agreements will be construed to prohibit the relevant lock-up party from causing any direct or indirect affiliate thereof to take any action permitted under any lock-up letter such affiliate ha s delivered to the representatives of the underwriters. The restrictions described in the paragraph above r elating to our directors and executive officers and the selling shareholder do not apply

to: (a) transfers or dispositions of the lock-up party's Lock-Up Securities: (i) as a bona fide gift or gifts, cha ritable contribution or contributions or for bona fide estate planning

purposes, (ii) by will, other testamentary document or intestate succession, (iii) to any member or member s of the lock-up party's immediate family

or to any trust or limited family partnership for the direct or indirect benefit of the lock-up party or the imme diate family of the lock-up party, or if the lock-up party is a trust, to a trustor or beneficiary of the trust or to the estate of a beneficiary of such trust, (iv) by operation of law, such as pursuant to a qualified domestic order, divorce settlement, divorce decree,

separation agreement or other final order of a court or regulatory agency, or to comply with any regulation s related to the lock-up party's ownership of the Lock-Up Securities, (v) to a partnership, limited liability company or other entity of which the lock-up party and the immediate family of the lock-up party are the legal and beneficial owner of all of the outstanding equity securities or similar interests, (vi) to a nominee or custodian of a person or entity to whom a disposition or transfer would be permissible under clauses (i) through (v) above, (vii) if the lock-up party is a corporation, partnership, limited liability

company, trust or other business entity, (A) to another corporation, partnership, limited liability company, t rust or other business entity that is an affiliate (as defined in Rule 405 promulgated under the Securities A ct) of the lock-up party, or to any investment fund or other entity controlling, controlled by, managing or m anaged by or under common control with the lock-up party or affiliates of the lock-up party (including, for t he avoidance of doubt, where the lock-up party is a partnership, to its general partner or a successor part nership or fund, or any other

funds managed by such partnership), or (B) as part of a distribution to any direct or indirect members, part ners or stockholder of the lock-up party, (viii) to the Company pursuant to any contractual arrangement th at provides for the forfeiture of the lock-up party's securities in connection with death or disability, or the te rmination of the 217 Table of Contents lock-up party's employment or other service relationship with the C ompany or an affiliated entity, or the lock-up party's failure to meet certain conditions set out upon receipt of such securities, (ix) as part of transactions relating to the lock-up party's Lock-Up Securities acquired (A) from the underwriters in this offering (except, in the case of officers or directors, for any issuer-directed ADSs) or (B) in open market transactions after the completion

of this offering, (x) to the Company in connection with the vesting, settlement, or exercise of RSUs, option s, warrants or other

rights to purchase shares of Equity Securities (including, in each case, by way of "net" or "cashless" exerc ise), including for the payment of exercise price and tax and remittance payments due as a result of the v esting,

settlement, or exercise of such RSUs, options, warrants or rights, provided that any such Equity Securitie s received upon such exercise, vesting or settlement shall be subject to the terms of the lock-up agreement, and provided further that any such RSUs, options, warrants or rights are held by the lock-up party purs uant to an agreement or equity awards granted under a stock incentive plan or other equity

award plan, each such agreement or plan which is described in this prospectus, the registration statement of which this prospectus forms a part, and the Pricing Disclosure Package (as defined in the underwriting agreement), or (xi) pursuant to a bona fide third-party tender offer, merger, consolidation or other similar t ransaction that is

approved by the Board of Directors of the Company and made to all holders of the Company's share capit

al involving a change of control; provided that in the event that such tender offer, merger, consolidation or other similar transaction is not

completed, the lock-up party's Lock-Up Securities shall remain subject to the provisions of the lock-up agr eement; provided that, with respect to the immediately preceding paragraph, (A) in the case of any transfe r or distribution pursuant to paragraph (a)(i), (ii), (iii), (v) and (vi), such

transfer shall not involve a disposition for value and, in each such case and in the case of any transfer or distribution pursuant to clause (a)(iv) and (vii), each donee, devisee, transferee or distributee shall execut e and deliver a lock-up agreement, unless such donee, devisee, transferee or distributee has already sign ed and delivered a lock-up agreement to the representatives of the underwriters, (B) in the case of any transfer or distribution pursuant to paragraph (a) (i), (ii), (iii), (v) and (vi), no filing

by any party (donor, donee, devisee, transferor, transferee, distributer or distributee) under the Exchange Act, or other public announcement shall be required or shall be made voluntarily in connection with such t ransfer or distribution, and (C) in the case of any transfer or distribution pursuant to paragraph (a)(iv), (vii), (viii), (ix) and (x), it

shall be a condition to such transfer that no public filing, report or announcement not otherwise required u nder applicable law shall be voluntarily made and if any filing under the equivalent of Section 16(a) of the Exchange Act in non-U.S. jurisdictions, or other public filing, report or announcement reporting a reduction in beneficial ownership of shares of Equity Securities in connection with such transfer or distribution shall be legally

required during the Lock-Up Period, such filing, report or announcement shall clearly indicate in the footno tes thereto or otherwise the nature and conditions of such transfer; (b) exercise of outstanding options, se ttlement of RSUs or other equity awards or exercise of warrants pursuant to

plans described in this prospectus, the registration statement of which this prospectus forms a part, and the Pricing Disclosure Package (as defined in the underwriting agreement); provided that any Lock-Up Securities received upon such exercise, vesting or settlement shall be subject to the terms of the lock-up agreement; 218 Table of Contents (c) conversion of outstanding preferred stock, warrants to acquire preferred stock or convertible securities into

Equity Securities or warrants to acquire Equity Securities; provided that any such Equity Securities or war rants received upon such conversion shall be subject to the terms of the lock-up agreement; and (d) estab lishment of trading plans pursuant to Rule 10b5-1 under the

Exchange Act for the transfer of Lock-Up Securities; provided that (1) such plans do not provide for the transfer of Lock-Up Securities during the Lock-Up Period

and (2) no filing by any party under the Exchange Act (or the equivalent thereof in non-U.S. jurisdictions) or other public announcement shall be required or made voluntarily in connection with such

trading plan; In addition, with respect to the selling shareholder only, the restrictions in the lock-up agreem ent do not apply to: (a) sales of the Equity Securities to be sold pursuant to the terms of the underwriting a greement; (b) any actions that are necessary or appropriate for the purposes of pledging, charging or granting any lien,

mortgage or other security interest (the "Pledge") in respect of any of the lock-up party's Lock-Up Securiti es to or for the benefit of lenders or finance

counterparties (as well as any security agent, securities intermediary and/or custodian) (collectively, the "Pledgees") in connection with a bona fide loan (including any margin loan) or other financing transaction provided to the selling

shareholder and/or its affiliates (a "Financing Transaction"); provided that the terms of such Pledge requir e that, to the extent the Pledgees enforce their security interest during the term of the Lock-Up Period by way of sale, transfer,

appropriation or other disposition, each purchaser or transferee (the "Purchaser") shall execute and delive r to the representatives of the underwriters (prior to or substantially contemporaneously with such sale, transfer, appropriation or

other disposition) a lock-up agreement in respect of the remainder of the Lock-Up Period (which, for the a voidance of doubt, shall contain exceptions substantially similar to the exceptions contained in paragraph s (b) and (c)); and (c) any actions to permit the Pledgees to enforce their security interest under a Financi ng Transaction by selling,

transferring, appropriating or otherwise disposing of the Lock-Up Securities; provided, that in the case of any such sale, transfer, appropriation or other disposition each purchaser or transferee (the

"Purchaser") shall execute and deliver to the representatives of the underwriters (prior to or substantially c ontemporaneously with such sale, transfer, appropriation or other disposition) a lock-up agreement for the remainder of the Lock-Up Period (which, for the avoidance of doubt, shall contain exceptions substantiall y similar to the exceptions contained in paragraph (b) and (c)). In addition, for the duration of the Lock-Up Period, the Company has agreed (A) to enforce all existing agreements between the Company and any of its securityholders that prohibit the sale, transfer, assignment, pledge or hypothecation of any of the Company's securities until the expiration of the restricted period; (B) to direct the transfer agent to place stop transfer restrictions

upon any such securities of the Company that are bound by such existing "lock-up," "market stand off," "holdback" or similar provisions of such agreements for the duration of the Lock-Up Period; and (C) not to release

or otherwise grant any waiver of such provisions in such agreements during the Lock-Up Period without the prior written consent of any two of the four representatives of the underwriters. Any two of the four representatives of the underwriters may, in their sole discretion and at any time or from time to time before the termination of the Lock-Up Period release all or any portion of the Lock-Up Securities; provided that if such waiver is with respect to one of our officers or directors, subject to compliance with the notification requirements under FINRA Rule 5131,

the representatives will notify us of the impending release or waiver at least three business days before the release or waiver, and as required by FINRA Rule 5131, we have agreed to announce the impending release or waiver at least two business

days before the release or waiver. 219 Table of Contents We have applied to list our ADSs on the Nasda q Global Select Market under the symbol

"ARM". In connection with this offering, the underwriters may engage in stabilizing transactions, which involves making bids

for, purchasing and selling ADSs in the open market for the purpose of preventing or retarding a decline in the market price of the ADSs while this offering is in progress. These stabilizing transactions may include making short sales of ADSs, which

involves the sale by the underwriters of a greater number of ADSs than they are required to purchase in t his offering, and purchasing ADSs on the open market to cover positions created by short sales. Short sal es may be "covered" shorts,

which are short positions in an amount not greater than the underwriters' option to purchase additional AD Ss referred to above, or may be "naked" shorts, which are short positions in excess of that amount. The underwriters may close

out any covered short position either by exercising their option to purchase additional ADSs, in whole or in part, or by purchasing ADSs in the open market. In making this determination, the underwriters will consi der, among other things, the price

of ADSs available for purchase in the open market compared to the price at which the underwriters may p urchase ADSs through the option to purchase additional ADSs. A naked short position is more likely to be created if the underwriters are concerned

that there may be downward pressure on the price of the ADSs in the open market that could adversely af fect investors who purchase in this offering. To the extent that the underwriters create a naked short position, they will purchase ADSs in the

open market to cover the position. The underwriters have advised us that, pursuant to Regulation M of the Securities Act, they may

also engage in other activities that stabilize, maintain or otherwise affect the price of the ADSs, including t he imposition of penalty bids. This means that if the representatives of the underwriters purchase ADSs in the open market in stabilizing

transactions or to cover short sales, the representatives can require the underwriters that sold those ADS s as part of this offering to repay the underwriting discount received by them. These activities may have the effect of raising or maintaining the market price of the ADSs or preventing or retarding a decline in the market

price of the ADSs and, as a result, the price of the ADSs may be higher than the price that otherwise migh t exist in the open market. If the underwriters commence these activities, they may discontinue them at an y time. The underwriters may carry

out these transactions on Nasdaq, in the over-the-counter market or otherwise. Prior to this offering, there

has been no public market for our ADSs. The initial public offering price will be determined by negotiation s

among us, the selling shareholder and the representatives of the underwriters. In determining the initial public offering price, we, the selling shareholder and the representatives of the underwriters expect to consider a number of factors,

including: • the information set forth in this prospectus and otherwise available to the representatives; • our prospects and the history and prospects for the industry in which we compete; • an assessment of our management; • our prospects for future earnings; • the general condition of the securities markets at the time of this offering; • the recent market prices of, and demand for, publicly traded common stock of generally comparable companies; and • other factors deemed relevant by the underwriters, the selling shareholder and us. We, the selling shareholder and the underwriters cannot assure investors that an active trading market will develop for our ADSs, or that the

ADSs will trade in the public market at or above the initial public offering price. Other than in the U.S., no action has been taken by

us, the selling shareholder or the underwriters that would permit a public offering of the securities offered by this prospectus in any jurisdiction where action for that 220 Table of Contents purpose is required. The securities offered by this prospectus may not be offered or sold, directly or indirectly, nor may this prospectus or any other offering material or advertisements in

connection with the offer and sale of any such securities be distributed or published in any jurisdiction, ex cept under circumstances that will result in compliance with the applicable rules and regulations of that jur isdiction. Persons into whose

possession this prospectus comes are advised to inform themselves about and to observe any restriction s relating to the offering and the distribution of this prospectus. This prospectus does not constitute an off er to sell or a solicitation of an

offer to buy any securities offered by this prospectus in any jurisdiction in which such an offer or a solicitat ion is unlawful. Certain

of the underwriters and their affiliates have provided in the past, and may provide from time to time in the f uture, certain commercial banking, financial advisory, investment banking and other services to us, the sel ling shareholder and our and its

respective affiliates in the ordinary course of their business, for which they have received and may continu e to receive customary fees and commissions. In addition, from time to time, certain of the underwriters a nd their affiliates may effect

transactions for their own account or the account of customers, and hold on behalf of themselves or their customers, long or short positions in our debt or equity securities or loans, and may do so in the future. In particular, certain of the underwriters or their affiliates, including Barclays Capital Inc., BNP Paribas Secur ities Corp., Citigroup

Global Markets Inc., Credit Agricole Securities (USA) Inc., Daiwa Capital Markets America Inc., Deutsche Bank Securities Inc., Goldman Sachs & Co. LLC, HSBC Securities (USA) Inc., Intesa Sanpaolo S.p.A., J. P. Morgan Securities LLC, Mizuho

Securities USA LLC, MUFG Securities Americas Inc., Natixis Securities Americas LLC, Santander US Ca pital Markets LLC and SMBC Nikko Securities America, Inc., are lenders under the Existing SoftBank Gro up Facility and/or have entered into the New

SoftBank Group Facility as lenders and/or agents thereunder, in respect of which they have received and/or expect to receive various fees and interest on the loans. A subsidiary of SoftBank Group has granted a security interest with respect to

substantially all of our share capital to secure the Existing SoftBank Group Facility and will initially grant a security interest with respect to 769,029,000 of our ordinary shares, representing a 75.01% equity interest in us (before giving effect

to the issuance of ordinary shares issuable upon the completion of this offering in connection with the vest ing of RSUs and Executive Awards), to secure the New SoftBank Group Facility. SoftBank Group has advised us that the Existing SoftBank Group

Facility is expected to be repaid prior to, or concurrently with, the pricing of this offering, and the New Soft Bank Group Facility is expected to be funded following, or concurrently with, the closing of this offering. The repayment of the Existing

SoftBank Group Facility and the release of our obligations thereunder is a condition to the closing of this o

ffering. In case of an event of default under the New SoftBank Group Facility, the lenders would be in a position to enforce their security

interest with respect to our ordinary shares, which may therefore result in a disposal or sale of our ADSs by the lenders and could cause the trading price of our ADSs to decline. In addition, the lenders might carry out hedging transactions in

order to cover financial risk relating to the pledged securities. Notice to Prospective Investors in the Europ ean Economic Area In relation to each Member State of the EEA (each a "Relevant State"), no ADSs hav e been offered or will be offered pursuant to this

offering to the public in that Relevant State prior to the publication of a prospectus in relation to the ADSs which has been approved by the competent authority in that Relevant State or, where appropriate, approved in another Relevant State and

notified to the competent authority in that Relevant State, all in accordance with the EU Prospectus Regul ation, except that offers of ADSs may be made to the public in that Relevant State at any time under the f ollowing exemptions under the EU

Prospectus Regulation: a) to any legal entity which is a qualified investor as defined under Article 2 of the EU Prospectus Regulation; b) to fewer than 150 natural or legal persons (other than qualified investors as defined under Article 2 of the EU

Prospectus Regulation), subject to obtaining the prior consent of the representatives for any such offer; or 221 Table of Contents c) in any other circumstances falling within Article 1(4) of the EU Prospectus Regulation, provided that no such offer of ADSs shall require us, the selling shareholder or any underwriter to publish a prospectus pursuant to

Article 3 of the EU Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the EU Pr ospectus Regulation. Each person who initially acquires any ADSs or to whom any offer is made will be d eemed to have represented,

acknowledged and agreed to and with each of the underwriters and their affiliates and us and the selling s hareholder that it is a "qualified investor" within the meaning of Article 2 of the EU Prospectus Regulation. In the case of any

ADSs being offered to a financial intermediary as that term is used in Article 5 of the EU Prospectus Regulation, each such financial intermediary will be deemed to have represented, acknowledged and agreed that the ADSs acquired by it in this

offering have not been acquired on a non-discretionary basis on behalf of, nor have they been acquired with a view to their offer or resale to, persons in circumstances which may give rise to an offer of any

ADSs to the public other than their offer or resale in a Relevant State to qualified investors as so defined or in circumstances in which the prior consent of the representatives have been obtained to each such proposed offer or resale. For the purposes of this provision, the expression an "offer to the public" in relation to the ADSs in any Relevant State means the

communication in any form and by any means of sufficient information on the terms of the offer and any A DSs to be offered so as to enable an investor to decide to purchase or subscribe for any ADSs, and the e xpression "EU Prospectus

Regulation" means Regulation (EU) 2017/1129. Notice to Prospective Investors in the U.K. No ADSs hav e been offered or will be offered pursuant to the offering to the public in the U.K. prior to the publication of a prospectus in

relation to the ADSs which has been approved by the Financial Conduct Authority in accordance with the U.K. Prospectus Regulation (as defined below), except that the ADSs may be offered to the public in the U.K. at any time: a) to any legal entity which is a qualified investor as defined under Article 2 of the U.K. P rospectus Regulation; b) to fewer than 150 natural or legal persons (other than qualified investors as defined under Article 2 of the

U.K. Prospectus Regulation), subject to obtaining the prior consent of the representatives for any such off er; or c) in any other circumstances falling within Section 86 of the FSMA; provided that no such offer of the ADSs shall require us, the selling shareholder or any underwriter to publish a prospectus pursuant to Section 85 of the FSMA or supplement a prospectus pursuant to Article 23 of the U.K. Prospectus Regulation. For the purposes of this provision, the expression an "offer to the public" in relation to the ADSs in the U.K. means the

communication in any form and by any means of sufficient information on the terms of the offer and any A DSs to be offered so as to enable an investor to decide to purchase or subscribe for any ADSs, and the e

xpression "U.K. Prospectus

Regulation" means Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018. In addition, in the U.K., this prospectus is being distributed only to, and is directed only at, and any offer subsequently made may only be

directed at persons who are "qualified investors" (as defined in the U.K. Prospectus Regulation) (i) who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and

Markets Act 2000 (Financial Promotion) Order 2005, as amended, or the Order, and/or (ii) who are high n et worth companies (or persons to whom it may otherwise be lawfully communicated) falling within Article 49(2)(a) to (d) of the Order,

all such persons together being referred to as "relevant persons," or otherwise in circumstances which ha ve not resulted and will not result in an offer to the public of the ADSs in the U.K. within the meaning of the FSMA. 222 Table of Contents Any person in the U.K. that is not a relevant person should not act or rely on the

information included in this document or use it as basis for taking any action. In the U.K., any investment or investment activity that this prospectus relates to may be made or taken exclusively by relevant person s. Notice to Prospective Investors in Canada The ADSs may be sold only to purchasers purchasing, or de emed to be purchasing, as principal that are accredited investors, as defined in

National Instrument 45-106 Prospectus Exemptions or subsection 73.3(1) of the Securities Act (Ontario), and are permitted clients, as defined in National Instrument 31-103 Registration Requirements, Exemptions and Ongoing Registrant Obligations. Any resale of the ADSs must be made in accordance with an exemption from, or in a transaction not subject to, the prospectus

requirements of applicable securities laws. Securities legislation in certain provinces or territories of Cana da may provide a purchaser

with remedies for rescission or damages if this prospectus (including any amendment thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the

securities legislation of the purchaser's province or territory. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser's province or territory for particulars of these rights or consult with

a legal advisor. Pursuant to section 3A.3 of National Instrument 33-105 Underwriting Conflicts

(NI 33-105), the underwriters are not required to comply with the disclosure requirements of NI 33-105 reg arding underwriter conflicts of interest in connection with

this offering. Notice to Prospective Investors in Switzerland The ADSs may not be publicly offered in Switzerland and will not be listed on the SIX Swiss Exchange ("SIX") or on any other stock

exchange or regulated trading facility in Switzerland. This prospectus does not constitute a prospectus wit hin the meaning of, and has been prepared without regard to the disclosure standards for issuance prospectuses under art. 652a or art. 1156 of

the Swiss Code of Obligations or the disclosure standards for listing prospectuses under art. 27 ff. of the SIX Listing Rules or the listing rules of any other stock exchange or regulated trading facility in Switzerlan d. Neither this prospectus nor

any other offering or marketing material relating to the ADSs or the offering may be publicly distributed or otherwise made publicly available in Switzerland. Neither this prospectus nor any other offering or marketing material relating to the offering, the Company, the ADSs have been or will be

filed with or approved by any Swiss regulatory authority. In particular, this prospectus will not be filed with, and the offer of ADSs will not be supervised by, the Swiss Financial Market Supervisory Authority FINMA (FINMA), and the offer of ADSs

has not been and will not be authorized under the Swiss Federal Act on Collective Investment Schemes (the "CISA"). The investor protection afforded to acquirers of interests in collective investment schemes under the CISA does not extend

to acquirers of ADSs. Notice to Prospective Investors in the Dubai International Financial Centre (DIFC) T his prospectus relates to an Exempt Offer in accordance with the Markets Rules 2012 of the Dubai Financial Services Authority (the

"DFSA"). This prospectus is intended for distribution only to persons of a type specified in the Markets Rul es 2012 of the DFSA. It must not be delivered to, or relied on by, any other person. The DFSA has no res

ponsibility for reviewing

or verifying any documents in connection with Exempt Offers. The DFSA has not approved this prospectus s nor taken steps to verify the information set forth herein and has no responsibility for the prospectus. The ADSs to which this prospectus relates

may be illiquid and/or subject to restrictions on their resale. Prospective purchasers of the ADSs offered s hould conduct their own due diligence on the ADSs. If you do not understand the contents of this prospect us you should consult an authorized

financial advisor. 223 Table of Contents In relation to its use in the DIFC, this prospectus is strictly private and confidential and

is being distributed to a limited number of investors and must not be provided to any person other than the original recipient, and may not be reproduced or used for any other purpose. The interests in the securities may not be offered or sold

directly or indirectly to the public in the DIFC. Notice to Prospective Investors in Australia This prospectus:

• does not constitute a disclosure document or a prospectus under Chapter 6D.2 of the Corporations Act 2001 (Cth)

(the "Corporations Act"); • has not been, and will not be, lodged with the Australian Securities and Investments Commission

("ASIC") as a disclosure document for the purposes of the Corporations Act and does not purport to includ e the information required of a disclosure document for the purposes of the Corporations Act; and • may o nly be provided in Australia to select investors who are able to demonstrate that they fall within one or more of the categories of investors, available under section 708 of the Corporations Act ("Exempt Investors"). The ADSs may not be directly or indirectly offered for subscription or purchased or sold, and no invitations to subscribe for or buy the ADSs

may be issued, and no draft or definitive offering memorandum, advertisement or other offering material r elating to any ADSs may be distributed in Australia, except where disclosure to investors is not required u nder Chapter 6D of the Corporations

Act or is otherwise in compliance with all applicable Australian laws and regulations. By submitting an application for the ADSs, you represent and warrant to us and the selling shareholder that you are an Exempt Investor. As any offer of ADSs under this document will be made without disclosure in Australia under Ch apter 6D.2 of the Corporations Act, the offer of

those securities for resale in Australia within 12 months may, under section 707 of the Corporations Act, r equire disclosure to investors under Chapter 6D.2 if none of the exemptions in section 708 applies to that resale. By applying for the ADSs

you undertake to us and the selling shareholder that you will not, for a period of 12 months from the date of issue of the ADSs, offer, transfer, assign or otherwise alienate those ADSs to investors in Australia exc ept in circumstances where

disclosure to investors is not required under Chapter 6D.2 of the Corporations Act or where a compliant di sclosure document is prepared and lodged with ASIC. Notice to Prospective Investors in Hong Kong The ADSs have not been offered or sold and will not be offered or sold in Hong Kong, by means of any document, other than (a) to

"professional investors" as defined in the Securities and Futures Ordinance (Cap. 571 of the Laws of Hong Kong) of Hong Kong (the "SFO") and any rules made thereunder; or (b) in other circumstances which do not result in the

document being a "prospectus" as defined in the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Cap. 32) of Hong Kong (the "CO") or which do not constitute an offer to the public within the meaning of the CO. No

advertisement, invitation or document relating to the ADSs has been or may be issued or has been or may be in the possession of any person for the purposes of issue, whether in Hong Kong or elsewhere, which is directed at, or the contents of which

are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the secur ities laws of Hong Kong) other than with respect to ADSs which are or are intended to be disposed of only to persons outside Hong Kong or only

to "professional investors" as defined in the SFO and any rules made thereunder. Notice to Prospective In vestors in Japan The ADSs have not been and will not be registered pursuant to Article 4, Paragraph 1 of the Financial Instruments and Exchange Act.

Accordingly, none of the ADSs nor any interest therein may be offered or sold, 224 Table of Contents dire ctly or indirectly, in Japan or to, or for the benefit of, any "resident" of Japan (which term as used herein means any person resident in Japan, including any corporation or other

entity organized under the laws of Japan), or to others for re-offering or resale, directly or indirectly in Japan or to or for the benefit of a resident of Japan, except pursuant to an exemption from the

registration requirements of, and otherwise in compliance with, the Financial Instruments and Exchange A ct and any other applicable laws, regulations and ministerial guidelines of Japan in effect at the relevant ti me. Notice to Prospective Investors in Singapore Each representative has acknowledged that this prospe ctus has not been registered as a prospectus with the Monetary Authority of Singapore.

Accordingly, each representative has represented and agreed that it has not offered or sold any ADSs or caused the ADSs to be made the subject of an invitation for subscription or purchase and will not offer or sell any ADSs or cause the ADSs to be

made the subject of an invitation for subscription or purchase, and has not circulated or distributed, nor will it circulate or distribute, this prospectus or any other document or material in connection with the offer or sale, or invitation for

subscription or purchase, of the ADSs, whether directly or indirectly, to any person in Singapore other than (i) to an institutional investor (as defined in Section 4A of the Securities and Futures Act (Chapter 289) of Singapore, as

modified or amended from time to time (the "SFA")) pursuant to Section 274 of the SFA; (ii) to a relevant p erson (as defined in Section 275(2) of the SFA) pursuant to Section 275(1) of the SFA, or any person pur suant to

Section 275(1A) of the SFA, and in accordance with the conditions specified in Section 275 of the SFA; or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA. Where the ADSs are subscribed or purchased under Section 275 of the SFA by a relevant person w hich is: • a corporation (which is not an accredited investor (as defined in Section 4A of the SFA)) the sole business

of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or • a trust (where the trustee is not an accredited investor) whos e sole purpose is to hold investments and each

beneficiary of the trust is an individual who is an accredited investor, securities or securities-based derivat ives contracts (each

term as defined in Section 2(1) of the SFA) of that corporation or the beneficiaries' rights and interest (ho wsoever described) in that trust shall not be transferred within six months after that corporation or that trust has acquired the

securities pursuant to an offer made under Section 275 of the SFA except: a) to an institutional investor or to a relevant person, or to any person arising from an offer referred to in

Section 275(1A) or Section 276(4)(i)(B) of the SFA; b) where no consideration is or will be given for the transfer; c) where the transfer is by operation of law; d) as specified in Section 276(7) of the SFA; or e) as specified in Regulation 37A of the Securities and Futures (Offers of Investments) (Securities and

Securities-based Derivatives Contracts) Regulations 2018. 225 Table of Contents EXPENSES RELATED TO THE OFFERING Set forth below is an itemization of the total expenses, excluding the underwriting di scounts and commissions, which are expected to be

incurred in connection with the sale of ADSs in this offering. With the exception of the registration fee pay able to the SEC, the Nasdaq listing fee and the filing fee payable to FINRA, all amounts are estimates. Ex pense Amount SEC registration fee \$ * Nasdaq initial listing fee * FINRA filing fee * Printing expenses * L egal fees and expenses * Accounting fees and expenses * Miscellaneous fees and expenses * Total \$ * * To be filed by amendment. 226 Table of Contents LEGAL MATTERS The validity of the ADSs being offer ed by this prospectus and certain other matters of English law will be passed upon for us by

Morrison & Foerster (UK) LLP and certain other matters of U.S. federal law will be passed upon for us by Morrison & Foerster LLP. SoftBank Group has been advised as to certain legal matters by Sullivan & Cro mwell LLP. Certain

legal matters related to this offering will be passed upon for the underwriters by Davis Polk

& Wardwell LLP. EXPERTS The financial statements of Arm Limited as of March 31, 2023 and 2022, and for each of the three years in the period ended March 31,

2023, included in this prospectus have been audited by Deloitte & Touche LLP, an independent registere

d public accounting firm, as stated in their report. Such financial statements are included in reliance upon the report of such firm given

their authority as experts in accounting and auditing. The registered business address of Deloitte & Touch e LLP is 225 West Santa

Clara Street, Suite 600, San Jose, CA 95113-1728, USA. 227 Table of Contents ENFORCEMENT OF CI VIL LIABILITIES We are incorporated and currently existing under the laws of England and Wales. Uncert ainty exists as to whether the courts of England and Wales would: • recognize or enforce judgments of U. S. courts obtained against us or our directors or officers predicated upon

the civil liabilities provisions of the securities laws of the U.S. or any state in the U.S.; or • entertain original actions brought in England and Wales against us or our directors or officers predicated upon

the securities laws of the U.S. or any state in the U.S. We have been advised by Morrison & Foerster (UK) LLP

and Morrison & Foerster LLP that there is currently no treaty between (i) the U.S. and (ii) England and Wa les providing for reciprocal recognition and enforcement of judgments of U.S. courts in civil and commercial matters

(although the U.S. and the U.K. are both parties to the New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards) and that a final judgment for the payment of money rendered by any general or state court in the U.S. based on

civil liability, whether or not predicated solely upon U.S. securities laws, would not be automatically enforc eable in England and Wales. We have also been advised by Morrison & Foerster (UK) LLP and Morrison & Foerster LLP that

any final and conclusive monetary judgment for a definite sum obtained against us in the U.S. courts would be treated by the courts of England and Wales as a cause of action in itself and sued upon as a debt at common law so that no retrial of the

issues would be necessary, provided that certain preconditions are met, including, but not limited to, that the relevant U.S. court had jurisdiction over the original proceeding according to English conflicts of laws principles and that the U.S.

judgment was final and not procured by fraud. Whether the preconditions are met in respect of a judgmen t based upon the civil liability

provisions of the United States securities laws, including whether the award of monetary damages under such laws would constitute a penalty, is an issue for the court making such decision. Subject to the foregoing, investors may be able to enforce in England and Wales judgments in civil and commercial matters that have been

obtained from U.S. federal or state courts. Nevertheless, we cannot assure you that those judgments will be recognized or enforceable in England and Wales. If an English court gives judgment for the sum payable under a U.S. judgment, the English judgment will be enforceable by methods generally

available for this purpose. These methods generally permit the English court discretion to prescribe the m anner of enforcement. In addition, it may not be possible to obtain an English judgment or to enforce that j udgment if the judgment debtor is

or becomes subject to any insolvency or similar proceedings, or if the judgment debtor has any set-off or counterclaim against the judgment creditor. Also note that, in any enforcement proceedings, the

judgment debtor may raise any counterclaim that could have been brought if the action had been originall y brought in England unless the subject of the counterclaim was in issue and denied in the U.S. proceedings. It should also be noted that in the

courts of England and Wales the usual rule is that the losing party is ordered to pay the legal costs of the I itigation that were incurred by the successful party. These costs are assessed by the courts of England and Wales at the conclusion of the

litigation. 228 Table of Contents WHERE YOU CAN FIND ADDITIONAL INFORMATION We have filed with the SEC a registration statement (including amendments and exhibits to the registration statement) on Form F-1 under the Securities Act. A related registration statement on Form F-6 will be filed with the SEC to register the ADSs. This prospectus, which forms a part of the

registration statement on Form F-1, does not contain all of the information included in the registration stat ement on Form F-1 and the exhibits and schedules to the

registration statement on Form F-1. Certain information is omitted and you should refer to the registration statement on Form F-1 and its exhibits and schedules for that

information. If a document has been filed as an exhibit to the registration statement on Form F-1, we refer you to the copy of the document that has been filed. Each statement in this prospectus relating to a document filed as an exhibit is qualified in all respects by the filed exhibit. Upon completion of this offering , we will be subject to

the information reporting requirements of the Exchange Act applicable to foreign private issuers. Accordingly, we will be required to file reports and other information with the SEC, including annual reports on Form 20-F and current reports on Form 6-K. You can read our SEC filings, including the registration statement on Form F-1, at the

SEC's website at www.sec.gov. We also maintain a corporate website at www.arm.com and, upon the clo sing of this offering, you may access, free of charge, our annual reports on Form 20-F and current reports on Form 6-K and any amendments to those reports, as soon as reasonably practicable after such material is electronically filed with, or furnished to, the SEC. We have included our website address in this prospectus solely as an inactive textual reference. As a foreign private issuer, we will be exempt from the rules under the Exchange

Act related to the furnishing and content of proxy statements, and our officers, directors and principal shar eholders will be exempt from the reporting and short-swing profit recovery provisions contained in Section 16 of the Exchange Act. In

addition, we will not be required under the Exchange Act to file periodic reports and financial statements with the SEC as frequently or as promptly as U.S. companies whose securities are registered under the Exchange Act. As a foreign private issuer, we are also exempt from the requirements of Regulation FD (Fair Disclosure) which, generally, are meant to ensure

that select groups of investors are not privy to specific information about an issuer before other investors. We are, however, still subject to the anti-fraud and anti-manipulation rules of the SEC, such as Rule 10b-5 under the Exchange Act. Since many of the disclosure obligations required of us as a foreign private issuer are different than those required of U.S. domestic reporting companies, our shareholders,

potential shareholders and the investing public in general should not expect to receive information about u s in the same amount, or at the same time, as information is received from, or provided by, U.S. domestic reporting companies. We are only

liable for violations of the rules and regulations of the SEC that apply to us as a foreign private issuer. We will send the depositary a

copy of all notices of shareholders meetings and other reports, communications and information that are made generally available to shareholders. The depositary has agreed to mail to all holders of ADSs a notice containing the information (or a

summary of the information) contained in any notice of a meeting of our shareholders received by the dep ositary and will make available to all holders of ADSs such notices and all such other reports and communications received by the depositary. 229 Table of Contents INDEX TO FINANCIAL STATEMENTS Page Audited Consolidated Financial Statements Report of Independent Registered Public Accounting Firm F-2 Consolidated Income Statements for the fiscal years ended March 31, 2023, 2022

ING FIRM To the shareholders and the Board of Directors of Arm Limited Opinion on the Financial State ments We have audited the

accompanying consolidated balance sheets of Arm Limited and subsidiaries (the "Company") as of March 31, 2023 and 2022, the related consolidated statements of income, comprehensive income, shareholders 'equity, and cash flows,

for each of the three years in the period ended March 31, 2023, and the related notes (collectively referre d to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the

financial position of the Company as of March 31, 2023 and 2022, and the results of its operations and its cash flows for each of the three years in the period ended March 31, 2023, in conformity with accounting principles generally

accepted in the United States of America. Basis for Opinion These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal

securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audits in accordance

with the standards of the PCAOB and in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable a ssurance about whether the financial

statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to

obtain an understanding of internal control over financial reporting but not for the purpose of expressing a n opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. Our audits included performing procedures to assess the risks of material misst atement of the financial statements, whether due to error or fraud, and

performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used

and significant estimates made by management, as well as evaluating the overall presentation of the fina notial statements. We believe that our audits provide a reasonable basis for our opinion. Critical Audit Matter The critical audit matter

communicated below is a matter arising from the current-period audit of the financial statements that was communicated or required to be communicated to the audit committee and that (1) relates to accounts or disclosures that are material to

the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are

not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates. Revenue Recognition – License and Other Revenue – Refer to Notes 1, 3 and 22 to the Consolidated Financial Statements Critical Audit Matter Description Many of the

Company's revenue arrangements involve multiple performance obligations consisting of products and se rvices such as intellectual property licenses, software licenses, support, training, and professional and F-2 Table of Contents design services. New arrangements with existing customers can be based on either a new contract or modification of prior contracts. Determining the appropriate revenue recognition for the Company's contracts and modifications may involve significant judgments by management, including determining whether the Company's contracts represent new contracts or the modification of pre-existing contracts, whether certain performance obligations are separate or should be combined and the portion of the transaction price that should be allocated to performance obligations, which may impact

the amount and timing of revenue recognition. Given that the evaluation of whether contracts represent n ew contracts or the modification of pre-existing contracts, whether certain performance obligations are se parate or should be combined and the portion of the transaction price that should be allocated to performa

nce obligations in accordance with

revenue recognition guidance was complex and required significant management judgment, performing a udit procedures required a high degree of auditor judgment and an increased extent of effort, including the need to involve professionals in our firm

having expertise in revenue recognition. How the Critical Audit Matter Was Addressed in the Audit Our au dit procedures related to management's evaluation of whether contracts represent new contracts or the m odification of pre-existing contracts, whether certain performance obligations are separate or should be combined and the portion of the transaction price that should be allocated to performance obligations included the

following, among others: • For a sample of contracts with customers, we performed the following, among others: • Obtained and read the contract, including master agreements, amendments, purchase and sales order agreements, and

related contracts. • We evaluated whether management properly determined whether the contract should be treated as a new contract or a

modification of a pre-existing contract, including evaluating multiple contracts entered into with the same c ustomer and whether those contracts were entered into at, or near, the same time and were

interrelated. • Requested and obtained responses to confirmations of contracts directly from the Company 's customers. If a

response was not received, we performed alternative procedures including obtaining sales certifications to ensure no additional agreements existed. • We evaluated management's identification of performance obligations by assessing whether the underlying

products and services were separate performance obligations by performing the following: • Comparing the products and services identified in the contract to the performance obligations identified by

management. • Evaluating additional or combined performance obligations by: • Obtaining an understanding of the Company's products and services, including product roadmaps and other

marketing materials. • Inquiring of the Company's operational personnel to understand the nature of the contract, its business

purpose, and identified performance obligations. • For certain of these selections, we evaluated managem ent's conclusions about whether identified performance

obligations should be separate or combined with the assistance of professionals in our firm having experti se in revenue recognition. • We assessed the allocation of the transaction price to performance obligation s by performing the following: • Compared the transaction price determined by management to the transaction price in the customer contracts. F-3 Table of Contents • Compared the stand-alone selling price associated with each performance obligation to the Company's

estimated stand-alone selling price. • Evaluated the reasonableness of the Company's methodology and inputs used to estimate stand-alone selling

price by obtaining an understanding of the nature of the products and services, the pricing framework and testing the accuracy and completeness of inputs. • Tested the mathematical accuracy of management's a llocation of transaction price to the performance

obligations. /s/ Deloitte & Touche LLP San Jose, California July 31, 2023 We have served as the Compan y's auditor since 2022. Company") is a global leader in the semiconductor industry. The Company's principal operations are the li censing, marketing, research and development of microprocessors, systems intellectual property ("IP"), gr aphics processing

units, physical IP and associated systems IP, software, tools and other related services. Principles of Con solidation The accompanying consolidated financial statements have been prepared in conformity with ac counting principles generally accepted in the U.S.

("GAAP") and pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC"). The Company's fiscal year ends on March 31 st. The accompanying

consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation. The financial stateme nts consolidate all of the Company's affiliates, and the entities where the Company holds a controlling financial interest, because

the Company holds a majority voting interest. The Company reevaluates whether there is a controlling fin ancial interest in all entities when rights and interests change. Foreign Currency The accompanying consolidated

financial statements are presented in U.S. dollar ("USD"), which is the Company's functional and reporting currency. For most of the Company's international operations, the local currency has been determined to be the functional

currency of the respective entity. For transactions entered into in a currency other than its functional currency, monetary assets and liabilities are

remeasured into the functional currency at end-of-period exchange rates. Non-monetary assets and liabilit ies, along with equity

are remeasured at historical exchange rates. Income and expenses are remeasured at exchange rates in effect during each period, except for those expenses related to non-monetary balance sheet amounts, whi ch

are remeasured at historical exchange rates. Gains or losses from foreign currency remeasurement are in cluded in other non-operating income (loss), net on the Consolidated Income Statements. The Company t ranslates functional currency assets and liabilities to their USD equivalents at exchange rates in effect as of the balance sheet date and income

and expense amounts at average exchange rates for the period. The USD effects that arise from changin g translation rates are recorded in foreign currency translation adjustments on the Consolidated Statements of Comprehensive Income. Use of Estimates The preparation of financial

statements in conformity with GAAP requires management to make estimates and assumptions that affec t reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements

and the reported amounts of revenues and expenses during the reporting periods. Significant items subject to such estimates include, but are not limited to, revenue recognition, allowance for doubtful accounts, income taxes, share-based

compensation, impairment considerations for long-lived assets, fair value estimates and impairment for in vestments. The Company evaluates these estimates on an ongoing basis and revises estimates as circu mstances change. The Company bases its

estimates on historical experience, anticipated results, trends, and other various assumptions that it believ es are reasonable. Inputs used in judgments and estimates consider the economic implications of COVID-19. The impact of COVID-19 related estimates were not material to the consolidated financial statements . F-10 Table of Contents Arm Limited Notes to Consolidated Financial Statements Concentrations of Cred it Risk Credit risk is the risk of an unexpected loss if a customer or third-party to a financial instrument fail s to meet its contractual obligations. Financial

instruments that potentially subject the Company to concentrations of credit risk consist principally of cash and cash equivalents, bank deposits, short-term investments, derivative financial instruments and accounts receivable. The Company's

maximum exposure to credit risk is limited to the carrying amount of these assets. The credit risk on liquid funds and derivative financial instruments is limited because the counterparties are banks with high credit ratings assigned by

international credit rating agencies. The Company further manages its credit risk on liquid funds and deriv ative financial instruments through diversification of investment type and credit exposures. For accounts r eceivable, the credit risk is

managed through the use of mitigating controls, including the use of credit checks and credit limits on cus tomers. For financial assets (other than accounts receivable), the Company holds positions with an approved list of investment-grade rated

counterparties and monitors the exposures and counterparty credit risk on a regular basis. Additionally, in March 2022, the Company entered into a

Guarantee (as defined below) as discussed more fully in Note 19, Commitments and Contingencies, relating to the payment obligations under the Facility Agreement owed by Kronos (as defined below), an entity under common control of SoftBank

Group Corp. ("SoftBank Group"). Under the terms of the arrangements, a subsidiary of Kronos secured the obligations under the Facility Agreement (as defined below) by pledging its 75.01% interest in the Company and upon an Arm Guarantee

Trigger Event (as defined below) as discussed in Note 19, Commitments and Contingencies, the Compa ny may become exposed to the credit risk of Kronos failing to pay its obligations, monetize the share colla teral to settle the obligations

directly, or otherwise restructure the Facility Agreement before obligations are due. Upon default, the lend ers can satisfy their claim either through foreclosing on the pledged 75.01% interest in the Company or thr ough enforcing the Company's

obligations pursuant to the Guarantee. Cash and Cash Equivalents Cash and cash equivalents include ca sh on hand, short-term deposits and money market funds with original maturities of three months or less t hat are readily

convertible into known amounts of cash and are subject to insignificant risk of changes in value. Cash and cash equivalents are stated at cost, which approximates fair value because the short-term maturity of tho se instruments. Short-term Investments Short-term investments

represent term deposits with banks with a maturity between three and 12 months. These investments are classified as held-to-maturity as the Company has the intent and

ability to hold the investments to maturity. These investments are recorded at amortized cost, net of expected credit losses. Amortization of premiums or accretion of discounts are included in interest income (expense), net on the Consolidated

Income Statements. Equity Investments The

Company regularly invests in equity securities of public and private companies to promote business and s trategic objectives. Equity investments are measured and recorded as follows: • Marketable equity securiti

es are equity securities with readily determinable fair values that are measured and

recorded at fair value on a recurring basis with changes in fair value, whether realized or unrealized, recorded on the income statement. Fair value is determined based on quoted market rates when observable or by utilizing data points that are

observable, such as quoted prices, interest rates or yield curves. During the fiscal year ended March 31, 2 021, the Company disposed of its only marketable security. Accordingly, the Company did not have any marketable equity securities as of

March 31, 2023 and 2022. F-11 Table of Contents Arm Limited Notes to Consolidated Financial Statemen ts • Non-marketable equity securities are equity securities without readily

determinable fair values and for which the Company does not have the ability to exercise significant influe nce. Non-marketable equity securities are recorded on the income statement either at fair value on a recurring basis with changes in fair value, whether realized or unrealized; or by election, measured and re corded using a measurement alternative that measures the securities at cost minus impairment, if any, pl us or minus changes resulting from

qualifying observable price changes. • Equity method investments are equity securities in investees in whi ch the Company does not control but has

the ability to exercise significant influence. Investments in limited partnerships or certain limited liability co mpanies that maintain a specific ownership account for each investor are accounted for using the equity method when the Company has

more than virtually no influence (i.e., at least 3% to 5% ownership). The Company has elected to account for certain equity method investments under the fair value option. These investments are recorded at fair value with changes in fair value

recorded on the income statement. Where the Company has not elected the fair value option, equity meth od investments are recorded at cost minus impairment, if any, plus or minus the Company's share of the equity method investees' income or

loss recorded on the income statement. For certain non-marketable equity securities and equity method investments, the Company has elected to apply the net asset value ("NAV") practical expedient, where NAV is the estimated fair value of the investments. For these securities estimated fair values are determined based on the

indicated market values of the underlying assets or investment portfolios. Income statement activity for all equity investments is recorded in income from equity investments, net on the Consolidated Income State ments. The carrying values of non-marketable equity securities under the measurement alternative are adjusted for qualifying

observable price changes resulting from the issuance of similar or identical securities in an orderly transaction by the same issuer. Determining whether an observed transaction is similar to a security within the Company's portfolio requires

judgment based on the rights and preferences of the securities. Recording upward and downward adjust ments to the carrying values of equity securities as a result of observable price changes requires quantitat ive assessments of the fair values of the

Company's equity securities using various valuation methodologies and involves the use of estimates. No n-marketable equity securities under the measurement alternative and equity method investments not me asured under

the fair value option (collectively referred to as "non-marketable equity securities") are also subject to peri odic impairment analysis. The quarterly impairment analysis considers both qualitative

and quantitative factors that may have a significant impact on the investee's fair value. Qualitative factors considered include the investee's financial condition and business outlook, industry and sector performance, market for

technology, operational and financing cash flow activities, and other relevant events and factors affecting t he investee. When indicators of impairment exist, the Company prepares quantitative assessments of the fair value of the non-marketable equity securities using both the market and income approaches, which re quire judgment and the use of estimates, including discount rates, investee revenue and costs, and comp arable market data of

private and public companies, among others. Non-marketable equity securities under the measurement al ternative

are tested for impairment using a qualitative model similar to the model used to test goodwill and other lon

g-lived assets for impairment. Upon determining an impairment may exist, the security's fair value is calculated and compared to its

carrying value and an impairment is recognized immediately if the carrying value exceeds fair value. Equit y method investments not measured under the

fair value option are subject to periodic impairment reviews using the other-than-temporary impairment m odel, which considers the severity and duration of a decline in fair value below cost and the Company's a bility and intent to hold the

investment for a sufficient period of time to allow for recovery. F-12 Table of Contents Arm Limited Notes to Consolidated Financial Statements Loans Receivable Loans receivable consist of term loans to a relate diparty and other entities. The term loans are recorded at amortized cost, net of allowances for loan losses.

The Company maintains an allowance for current expected credit losses to reserve for potentially uncolle ctible loans receivable. The Company measures interest income for all loans receivable using the interest method, which is based on the effective

yield of the loans rather than the stated coupon rate. The Company classifies loans receivable in other no n-currents assets on the Consolidated Balance Sheets. Convertible Loans Receivable Convertible loans receivable consist of convertible loans to certain entities. The Company has elected to apply the fair value option to account for such convertible loans receivable. Under the fair value option, such convertible loans receivable are measured

initially and subsequently at fair value with changes in fair value recorded in other non-operating income (I oss), net on the Consolidated Income Statements. Convertible loans receivable are included in other non-current assets on the Consolidated Balance Sheets. Fair Value Measurement The Company measures ce rtain assets and liabilities at fair value, either upon initial recognition or for subsequent accounting or reporting. Fair value is

defined as the price that would be received to sell an asset or be paid to transfer a liability in an orderly tra nsaction between market participants at the measurement date (exit price). When determining fair value, t he Company considers the

principal or most advantageous market in which the Company would transact, as well as assumptions tha t market participants would use when pricing the asset or liability. When estimating fair value, depending on the nature and complexity of the asset

or liability, the Company may use one or all of the following techniques: • Income approach, which is base d on the present value of a future stream of net cash flows. • Market approach, which is based on market prices and other information from market transactions involving

identical or comparable assets or liabilities. • Cost approach, which is based on the cost to acquire or con struct comparable assets, less an allowance for

functional and/or economic obsolescence. Fair value disclosures are classified based on the fair value hie rarchy, which prioritizes the

inputs used in the valuation methodologies in measuring fair value: • Level 1 - Unadjusted quoted prices in active markets that are accessible at the measurement date for identical,

unrestricted assets or liabilities. • Level 2 - Observable inputs other than quoted prices included within Level 1 that are observable for the

asset or liability, either directly or indirectly, including quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in markets that are not active, or other inputs that are

observable or can be corroborated by observable market data by correlation or other means. • Level 3 - P rices or valuation techniques requiring inputs that are both significant to the fair value measurement and unobservable. Please refer to Note 13, Fair Value, for further discussion on the Company's fair value measurements. F-13 Table of Contents Arm Limited Notes to Consolidated Financial Statements Busine ss Combinations The Company uses the acquisition method of accounting for business combinations, whi ch requires separate recognition of assets acquired and liabilities assumed

from goodwill, based on their estimated fair values at the time of acquisition. Goodwill as of the acquisition date is measured as the excess of consideration transferred and the fair value of any non-controlling inter ests in the acquiree over the net of the estimated acquisition date fair values of the assets acquired and li abilities assumed. The estimates and assumptions used in valuing intangible

assets include, but are not limited to, the amount and timing of projected future cash flows, discount rate u

sed to determine the present value of these cash flows and the useful lives of the assets. Although the Co mpany's fair value estimates

are based upon assumptions believed to be reasonable, these estimates and assumptions are inherently uncertain and subject to refinement. As a result,

during the measurement period up to one year from the acquisition date, the Company may record adjust ments to the assets acquired and liabilities assumed with the corresponding offset to goodwill. Upon conclusion of the measurement period or final

determination of fair values of the purchase price of an acquisition, whichever comes first, any subsequen t adjustments are recorded in earnings on the Consolidated Income Statements. Acquisition-related expenses are recognized separately from the

business combination and expensed as incurred. Goodwill Goodwill represents the excess of cost over the fair value of net assets acquired in a business combination. Goodwill is tested for impairment annually during

the fourth fiscal quarter or during interim periods whenever events and circumstances indicate an impairm ent may have occurred. The identification and measurement of goodwill impairment involves the estimation of fair value at the Company's

reporting unit level, which is the same or one level below the operating segment level. The Company determined it has one reporting unit. The Company has

the option to assess qualitative factors first to determine whether it is necessary to perform the two-step te st. If the Company believes, as a result of the qualitative assessment, that it is more-likely-than-not that th e fair value of the reporting unit is less than its carrying amount, the two-step quantitative impairment test i s required. Otherwise, no further

testing is required. In the qualitative assessment, the Company considers primary factors such as industry and market considerations, overall financial performance of the reporting unit, and other specific informati on related to the operations. The Company completed its annual goodwill impairment test in the fourth fisc all quarter of the fiscal year ended March 31, 2023. It was determined, after

performing a qualitative review, it was not more-likely-than-not that the fair value of the Company's single reporting unit was less than its carrying amount. Accordingly, there was no indication of

impairment. Intangible Assets, Net Intangible assets primarily represent acquired intangible assets including those acquired separately, such as computer software and purchased patents and

licenses to use technology, as well as those acquired through business combination such as in-process r esearch and development ("IPR&D"), developed technology, and customer relationship assets. The Company initially records intangible assets acquired in a business combination at their estimated fair value. Intangible assets are reported net of

accumulated amortization and are amortized over their estimated useful lives at amortization rates that ar e proportionate to each asset's estimated economic benefit. The Company initially F-14 Table of Contents Arm Limited Notes to Consolidated Financial Statements capitalizes the fair value of IPR&D as an intangi ble asset with an indefinite life. When IPR&D projects are ready for use, they are treated as an amortizable intangible asset and

amortized over the asset's estimated useful life, which is usually between one and five years. Amortization of intangible assets is recorded in

either cost of sales, research & development or selling, general and administrative expenses on the Cons olidated Income Statements depending on the nature of the underlying asset and uses by the Company. The cost of intangible assets is amortized and recorded on the income statement on a straight-line basis over the estimated useful lives of the underlying

assets. Useful lives are reviewed each year and adjustments are made, where applicable, on a prospective basis. The estimated useful lives of the Company's intangible assets are as follows: Patents and license s 3 – 11 years Computer software 3 – 5 years Developed technology 1 – 8 years Customer relationships 1 – 6 years Trade names 4 years Software Development Costs and Acquired Intangible Software The Company has not historically capitalized software development costs for software to be sold, leased or other wise marketed as the time and cost incurred

between technological feasibility and product release has been determined to be immaterial. As such, the se development costs are generally recognized as incurred in research and development expenses on the Consolidated Income Statements. The Company capitalizes certain development costs related to software acquired, developed or modified for internal use, along with certain costs incurred in

connection with the implementation of internal use software. Costs related to certain application developm ent activities are subject to capitalization. Costs related to preliminary project and post implementation act ivities are expensed as incurred.

Amortization begins once the software is ready for its intended use, and amortization expense is generally recognized on a straight-line basis over the software's estimated useful life between three and five years. Capitalized costs related to internal use software, net of accumulated amortization, are included in intangi ble assets, net on the Consolidated Balance Sheets

and amortization expense is recognized in selling, general & administrative expenses on the Consolidated Income Statements. Property and

Equipment, Net Property and equipment are stated at cost net of accumulated depreciation and impairme nt losses. Cost comprises expenditures

directly attributable to the purchase of the asset. Assets are depreciated to their estimated residual value, on a straight-line basis, over the estimated useful life of the underlying asset. Estimated useful lives and r esidual values are reviewed

at each reporting date. Depreciation on property and equipment is recorded in cost of sales, research and development or selling, general & administrative expenses on the Consolidated Income Statements depending on the nature of the

underlying asset and uses by the Company. F-15 Table of Contents Arm Limited Notes to Consolidated Fi nancial Statements Estimated useful lives of the Company's property and equipment are as follows: Buildi ngs 25 years Leasehold improvements Shorter of 5 – 10 years or the remaining lease term Equipment 3 – 5 years Fixtures and motor vehicles 3 – 5 years An item of property or equipment is written off either upon disposal or when there is no expected future economic benefit from

its continued use. Gain or loss on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying value of the asset) is included in the income statement in the year the asset is derecognized. Impairment of Long-lived Assets Other than Goodwill The Company reviews long-lived assets other than goodwill for impairment when facts or circumstances indicate the carrying amount of an asset or asset group

may not be recoverable. If impairment indicators are present and the estimated future undiscounted cash flows are less than the carrying value of the assets, the carrying values are reduced to the estimated fair v alue. Fair value is determined based

on quoted market values, discounted cash flows, or external appraisals, as applicable. Impairment losses are recorded in impairment of long-lived assets on the Consolidated Income Statements. Leases The Company determines if an arrangement

is or contains a lease at inception or modification of the arrangement. An arrangement is or contains a lea se if there are identified assets and the right to control the use of an identified asset is conveyed for a peri od in exchange for

consideration. Control over the use of the identified assets means the lessee has both the right to obtain s ubstantially all of the economic benefits from the use of the asset and the right to direct the use of the ass et. The Company recognizes right-of-use assets and operating lease liabilities for lessee operating leases other than those with a term of 12 months or less as the Company has elected to apply the

short-term lease recognition exemption. Right-of-use assets represent the right to use an underlying asset for the lease term and lease liabilities represent an

obligation to make lease payments over the lease term. Operating lease right-of-use assets and lease liab ilities are measured at the lease commencement date based on the present value of the remaining lease payments over the lease term,

discounted using the Company's incremental borrowing rate, which approximates the interest rate at which the Company could borrow on a collateralized basis with similar terms and payments and in similar economic environments. Operating lease right-of-use assets also include initial direct costs incurred and prepaid lease payments, minus any lease incentives. Lease terms include options to extend or terminate the lease when it is reasonably certain that the option will be exercised. All lease and non-lease components, principally common area maintenance costs, are combined in determining operating lease right-of-use as sets and lease liabilities. For operating leases, lease expense is recognized on a straight-line basis over the lease term. Asset Retirement Obligations An asset retirement

obligation ("ARO") is recorded as appropriate on assets for which the Company has a legal obligation to r etire. The Company records a liability for an ARO and the associated asset retirement cost at the time the

underlying asset is

acquired and put into service. Subsequent to the initial measurement of the ARO, the obligation is adjuste d at the end of each period to reflect the passage of time and changes in the estimated future F-16 Table of Contents Arm Limited Notes to Consolidated Financial Statements cash flows underlying the obligation, if any. Over time, the liability is accreted to its present value and the capitalized cost is depreciated over t he estimated useful life of the asset. The

Company has recognized AROs for contractually mandated removal of leasehold improvements. Derivati ve Financial Instruments and Hedge Activities The Company uses derivative financial instruments, specifically foreign currency forward contracts, to mitigate exposure from certain foreign

currency risk. Certain forecasted transactions, specifically British pound sterling ("GBP") denominated cas h flows in the form of payroll and selling, general and administrative expenses are exposed to foreign curr ency risk. The

Company monitors foreign currency exposures on a monthly basis to maximize the economic effectivenes s of foreign currency hedge positions. No derivatives

were designated hedges prior to July 2022. All derivatives are recorded at fair value as either an asset or I iability. For derivatives not designated as hedges, adjustments to reflect changes in the fair value of the d erivatives are included in

earnings in other non-operating income (loss), net on the Consolidated Income Statements. In July 2022, all

foreign currency forward contracts were designated as cash flow hedges in designated hedging relationsh ips with the forecasted foreign denominated cash flows as the hedged transactions. The maximum length of time over which the Company is hedging

its exposure to the variability in future foreign denominated cash flows is one year. For cash flow hedges t hat qualify and are designated for hedge accounting, the change in fair value of the derivative is recorded in the net change in fair value

of the effective portion of designated cash flow hedges on the Consolidated Statements of Comprehensiv e Income, and subsequently recognized in research and development and selling, general and administra tive expenses on the Consolidated Income

Statements when the hedged transaction affects earnings. The Company classifies all derivative assets a nd liabilities for designated and non-designated derivatives in prepaid expenses and other current assets and other current liabilities on the Consolidated Balance Sheets. The Company classifies cash flows from the settlement of effective cash flow

hedges for designated and non-designated derivatives in the same category as the cash flows from the re lated hedged items in operating activities on the Consolidated Statements of Cash Flows. The foreign currency forward contracts are classified under Level 2 of the fair value hierarchy. See Note 13, Fair Value. Revenue Recognition The Company recognizes revenues for the transfer of products or services to cu stomers in an amount that reflects the consideration to which the

Company expects to be entitled in exchange for those products or services. The principle is achieved thro ugh the following five-step approach: • Identification of the contract with the customer • Identification of the performance obligations • Determination of the transaction price • Allocation of the transaction price to the performance obligations in the contract • Recognition of revenue when, or as, the Company satisfies a performance obligation F-17 Table of Contents Arm Limited Notes to Consolidated Financial Statements Revenue for the Company's major product offerings consists of the following: License and Other Revenue • Intellectual property license — The Company generally licenses IP under non-exclusive license agreements that provide usage rights for specific applications for a finite or perpetual term. These licenses are made available electronically to address the customer-specific business

requirements. These arrangements generally have distinct performance obligations that consist of transfe rring the licensed IPs, version extensions of architecture IP or releases of IPs, and support services. Support services consist of a stand-ready

obligation to provide technical support, patches, and bug fixes over the support term. Revenue allocated to the IP license is recognized at a point in time upon the delivery or beginning of license term, whichever is later. Revenue allocated to

distinct version extensions of architecture IP or releases of IP, excluding when-and-if-available minor upd ates over support

term, are recognized at a point in time upon the delivery or beginning of license term, whichever is later. •

Software sales, including development systems — Sales of software, including development systems, which are not specifically designed for a given license (such as off-the-shelf software), are recognized up on delivery when control has been transferred and customer can

begin to use and benefit from the license. • Professional services — Services (such as training and profes sional and design services) that the

Company provides, which are not essential to the functionality of the IP, are separately stated and priced in the contract and accounted for separately. Training revenue is recognized as services are performed. Revenue from professional and design

services are recognized over time using the input method based on engineering labor hours expended to date relative to the estimated total effort required. For such professional and design services, the Company has an enforceable right to payment

for performance completed to date, which includes a reasonable profit margin and the performance of suc h services do not create an asset with an alternative use. • Support and maintenance — Support and maintenance is a stand-ready obligation to the customer that is

both provided and consumed simultaneously. Revenue is recognized on a straight-line basis over the peri od for which support and maintenance is contractually agreed pursuant to the license. Royalty Revenue F or certain IP license agreements,

royalties are collected on products that incorporate the Company's IP. Royalties are recognized on an acc rual basis in the quarter in which the customer ships their products, based on the Company's technology t hat it contains. The accrual

is estimated using trend analysis based on market and sales data as well as customer specific financial in formation. As a result of estimating the amount of royalty revenue accrual in the period in which the customer sales occur using estimates

based on sales trends and judgment for several key attributes, including industry estimates of expected s hipments, the percentage of markets using our products, and average selling price. Adjustments to reven ues are required in subsequent periods to

reflect changes in estimates as new information becomes available, primarily resulting from actual amounts subsequently reported by the licensees. Significant Judgments Identification of the Contract

with the Customer The Company accounts for a contract as a revenue contract when all of the following c riteria are met: • The contract has been approved (either in writing, orally or in accordance with other cust omary business

practices) by the parties to the contract, and the parties are committed to perform their respective obligations. F-18 Table of Contents Arm Limited Notes to Consolidated Financial Statements • The Company can identify each party's rights regarding goods or services to be transferred. • The Company can identify the payment terms for the goods or services to be transferred; • Contracts have commercial substance; and • It is probable that the Company will collect the consideration to which it will be entitled to, in exchange for the goods or services to be transferred to the customer. The Company sometimes enters into multiple con tracts with the same customer

that are treated, for accounting purposes, as one contract if the contracts are entered into at, or near, the same time and are interrelated. Judgment is required in evaluating whether various contracts are interrelated, which includes

considerations as to whether they were negotiated as a package with a single commercial objective, whet her the amount of consideration on one contract is dependent on the performance of the other contract, or if some, or all, obligations in the

contracts constitute a single performance obligation. New arrangements with existing customers can be b ased on either a new contract or the modification

of prior contracts. The Company's judgment in making this determination considers whether there is a con nection between the new arrangement and the pre-existing contracts, whether the services under the new arrangement are highly interrelated with the products and services provided under prior contracts, and how the products and services under the new arrangement are priced. The Company sometimes enters into non-cancellable and non-refundable committed

funds arrangement from customers, where the parties have ongoing negotiations. Judgment is required in evaluating whether all rights and obligations of the arrangement are determined and enforceable. Judgment is also required in determining whether collectability of substantially all of the consideration is probable. The Company assesses this through

credit checks, past payment history or based on upfront payment prior to performance of the obligation(s). Identification of the Performance

Obligations Customer contracts often include various products and services as outlined in the summary of major product groups above. Typically, these

products and services qualify as separate performance obligations, and a portion of the contractual value is allocated to them. Judgment is required, however, in determining whether a good or service is consider ed a separate performance obligation. When selling licenses or services, the Company frequently grants customers the choice to acquire additional rights, goods or services (for example,

renewals of offerings, version extensions through term renewals, additional future products, or additional volumes of purchased license). The Company also utilizes forward looking information such as product ro admaps and other marketing materials in

identifying performance obligations for Ips or version extensions of architecture IP under development or f uture products, and in determining if implicit promises or material right exist in certain long-term contracts. In a typical licensing arrangement involving architecture license, the Company licenses the available architecture license and promises to provide the future version extensions of the architecture license, over the license term. A long-term architecture licensing

arrangement could range from 3 years to 15 years. These version extensions typically have both specifie d upgrade rights and implicit rights to extensions as follows: • Specified upgrade rights to version extensions that are expected to be released over 2-3 years are typically covered in the Company's product roadm aps. F-19 Table of Contents Arm Limited Notes to Consolidated Financial Statements • Implicit rights to v ersion extensions that extend beyond the roadmap period are promised by the Company, as and when they are released. These version extensions represent promises to deliver distinct products with a d iscernable release pattern at

specific points in time every year over the license term. When version extensions of architecture licenses are promised along with available licenses, a portion of the overall license consideration is allocated to the available architecture

licenses, and the remaining portion relating to future extensions is deferred until the time those are deliver ed and become available for use. In some

licensing arrangements involving an implementation license, the customer licenses a right to use an avail able implementation license and also licenses the right to use next generation products to be developed o ver the license term which are released

to the customers as soon as they are commercially available. The next generation products are considere d distinct performance obligations. Revenue

allocated to the IP license including version extensions of an architecture license or releases of an implem entation license are each recognized at a point in time upon the delivery or beginning of license term, whi chever is later. Determination of Transaction Price The Company applies

judgment when determining the amount of consideration, it expects to be entitled to in exchange for transf erring promised goods or services to a customer. This includes estimates as to whether, and to what exte nt, subsequent concessions or payments

may be granted to customers, which release customers from their obligations to pay contractual fees. In t his judgment, historical trends are considered with respect to both the specific customer and broader Company trends. The Company estimates the

transaction price based on the amount expected to be received for transferring the promised goods or ser vices in the contract. Consideration payable to a customer is accounted for as a reduction of the transacti on price and, therefore, of revenue

unless the payment to the customer is in exchange for a distinct good or service that the customer transfe rs to the Company. The transaction price also excludes amounts collected on behalf of third parties such as sales taxes. The Company's

revenue arrangements may include variable consideration, including royalties. Where minimum royalties are agreed with customers and there is no uncertainty of their receipt, the amount is allocated to performance obligations as a part of the

transaction price. The Company considers relevant facts and circumstances in assessing whether a contract contains a significant financing component. The

Company has not identified significant financing components in its material revenue arrangements execut ed during the financial year. Allocation of

Transaction Price Judgment is required when estimating standalone selling prices ("SSPs"). There is also judgment involved in determining

whether the pricing of certain performance obligations is highly variable or uncertain. Other than support a nd maintenance, SSPs are usually not directly

observable for the Company's products and services because the Company generally does not sell its products or services on a standalone basis. The Company estimates the SSPs so that the Company allocate s the transaction price to each

performance obligation in an amount that depicts the amount of consideration to which the Company exp ects to be entitled in exchange for transferring the promised goods or services to the customer. The Company allocates royalties entirely to the

licenses that give rise to them. When estimating a SSP, the Company considers available information and maximizes the use of observable inputs such as renewal pricing history for the Company's standardized support and professional service

offerings. F-20 Table of Contents Arm Limited Notes to Consolidated Financial Statements For offerings that have highly variable or uncertain pricing and lack substantial direct costs to estimate

based on a cost-plus margin approach, the transaction price is allocated by applying a residual approach. This is on the basis that the Company has identified SSP for other performance obligations in the same ar rangement. If two or more goods or

services in a contract have highly variable or uncertain pricing, then the Company applies a combination of methods to allocate transaction price, including utilizing list prices, contract prices, and effort estimates of future IPs, for initial

allocation of residual amount of transaction price within such products. For customer agreements related to long-term licensing of architecture IP, the

Company allocates the contract value to each of the performance obligations based on an estimate of the engineering efforts required to deliver the initial version of the IP as well as related future versions, including enhancements and upgrades. The SSPs of material rights depends on the probability of option exercise. In estimating these probabilities, judgment is utilized when considering

historical exercise patterns. The SSPs are reviewed periodically or whenever facts and circumstances sig nificantly change. These changes are applied prospectively. Revenue from Arm China Arm Technology (China) Co.

Limited ("Arm China") acts as the Company's exclusive IP distributor in the People's Republic of China, w hich, or the purposes of these financial statements, includes the Hong Kong Special Administrative Regio n and the Macau

Special Administrative Region, but excludes Taiwan (collectively referred to as the "PRC"), under the intell ectual property licensing arrangement ("IPLA"). Arm China directly contracts with end customers with disc retion in

establishing pricing to sublicense specified IP. The Company's responsibility under the IPLA is to facilitate delivery of a good or service to the end customer in accordance with detailed instructions and other specifications from Arm China. In

these cases, Arm China is the customer for the Company. As such, revenue presented by the Company is the net amount calculated as a percentage of license and royalty fees earned by Arm China from sub-license arrangements entered into with end customers. The Company applies the royalty exception, under which revenue is recognized when the subsequent sale or usage occurs, assuming control of the license to which the royalty relates has transferred to the

customer. Where the revenue is derived as a percentage of the license fee of Arm China, the Company c ategorizes that portion as license revenue while the other portion, which represents the Company's share of Arm China's royalties, is

categorized as royalties. Contract Balances and Receivables The Company recognizes accounts receivable in full when it has the contractual right to invoice the customer and begins satisfying the performance obligation

over the term of the contract. Judgment is required to determine whether a right to consideration is uncon ditional and thus qualifies as a receivable. Contract assets are recognized as the performance obligations are satisfied and the Company does

not have the contractual right to invoice. Accrued royalties are presented as accrued income in accounts r eceivable, net on the Consolidated Balance Sheets. Contract liabilities primarily reflect invoices due, or pa

yments received in advance of revenue recognition. Typically, the Company invoices either all or a substantial portion of the fees for IP licenses upfront on the effective date of the contract. Periodic fixed fe es for software support services, and other multi-period agreements are typically invoiced in advance. Cu stomer deposits primarily relate to payments received from customers which could be refundable pursuant to the terms of the contract and are in other

current liabilities on the Consolidated Balance Sheets. F-21 Table of Contents Arm Limited Notes to Consolidated Financial Statements Payment terms and conditions vary by contract type, although terms generally include a requirement of payment

within 60 days. In instances where the timing of revenue recognition differs from the timing of invoicing, the Company has determined that its contracts generally do not include a significant financing component. The primary purpose of the

Company's invoicing terms is to provide customers with simplified and predictable ways of purchasing pro ducts and services, such as invoicing at the beginning of a license term with revenue recognized over the contract period, and not to

receive financing from customers. Any potential financing fees are considered insignificant in the context of the Company's contracts. Allowance

for Current Expected Credit Losses Trade receivables are stated at their net realizable value. The allowan ce for credit losses reflects the

Company's best estimate of expected credit losses of the receivable portfolio determined on the basis of historical experience, current information, and forecasts of future economic conditions. In developing the estimate for expected credit

losses, accounts receivable is segmented into pools of assets depending on market (China versus interna tional) and delinquency status, and fixed reserve percentages are established for each pool of accounts r eceivables. To determine the reserve

percentages for each pool of accounts receivables, the Company considers its historical experience with certain customers and customer types, regulatory and legal environments, country and political risk, and o ther relevant current and future

forecasted macroeconomic factors. These credit risk indicators are monitored on a quarterly basis to dete rmine whether there are any changes in the economic environment that would indicate the established re serve percentages should be adjusted and

are considered on a regional basis to reflect more geographic-specific metrics. Please refer to Note 3, Re venue, for the summary of the movement in the allowance for current expected credit losses. Additionally, write-offs and recoveries of customer receivables are tracked against collections on a quarterly basis to determine whether the reserve

percentages remain appropriate. When management becomes aware of certain customer-specific factors that impact credit risk, specific allowances for these known troubled accounts are recorded. Accounts rec eivables are written off after all reasonable

means to collect the full amount (including litigation, where appropriate) are exhausted. For the years end ed March 31, 2023, 2022 and 2021, write-offs and recoveries of customer receivables were immaterial to the consolidated financial

statements. The Company recognizes an allowance for losses on contract assets based on a similar approach used for receivables under the current expected

credit loss model. As of March 31, 2023 and 2022, the loss allowance for contract assets was immaterial. Share-based Compensation Restricted share units ("RSU") were granted to employees, certain of our exe cutive officers, and non-executive directors of the Company and require continuous service through the v esting date. Phantom shares ("Phantom Shares") were only granted to certain of our executive officers. M ajority of

RSUs are granted by tranches either with a fixed number of awards or with fixed monetary amounts know n at inception. Depending on the type of award, RSUs may require the achievement of certain performanc e conditions, market-conditions and for

certain awards, vesting occurs on the earliest of the following: (1) the occurrence of one of various events comprising a change in control of the Company, (2) an initial public offering of the Company's ordinary sh ares, and

(3) the passage of time. The number of RSUs that vest is determined by the achievement of market, performance and service conditions. The market condition target is tied to the valuation of the Company upon v

esting. At the discretion of the

Company's remuneration committee, each RSU is settled in cash or converts into ordinary shares on the vesting date. The Company expenses share-based

compensation over the requisite service period of the awards, which is generally equivalent to the vesting term. Compensation cost is recorded only for those awards expected to vest. F-22 Table of Contents Arm Limited Notes to Consolidated Financial Statements The fair value of RSUs is determined on the date of grant for equity-classified awards, and at the end of each reporting period for liability-classified awards, us ing Monte Carlo simulations or

the discounted cash flow approach. The fair value of Phantom Shares is determined on the date of grant and at the end of each reporting period based on the share price of the Company's ultimate parent, SoftB ank Group. The Company classifies those awards in which the Company has the option, pursuant to the p lan terms, and intends to settle in cash or equity, as

liability-classified or equity-classified awards, respectively. Phantom Shares and certain RSUs are liability-classified and are remeasured at the end of each reporting period through the date of settlement so that the expense recognized for each

award is equivalent to the amount to be paid in cash. Changes in the fair value of liability-classified RSUs are recorded in the income statement over the vesting period of the award. Equity-classified RSUs are recognized using the straight-line

method over the service period adjusted for estimated forfeitures. A change in control or an initial public of fering is generally not considered probable

until it has occurred. Accordingly, as of the balance sheet date, those RSUs that are subject to vesting on the earliest of (1) change of control, (2) initial public offering, or (3) passage of time, are expected to vest and be

settled in cash upon the passage of time. For liability-classified awards, the weighted average fair value of the RSUs was measured at each reporting date using the Monte Carlo simulation model or a discounted cash flow approach. Similarly, the fair

value for equity-classified awards was measured at the grant date using the discounted cash flow approach. For the fiscal year ended March 31, 2021,

the Company used the discounted cash flow approach based on the expected value of the Company as a result of a business combination which was considered likely. For fiscal years ended March 31, 2023 and 2022, the Company used the Monte Carlo

simulation model, the income approach and/or market-calibration approach based on comparable publicly traded companies in similar lines of businesses to measure the RSUs. The Monte Carlo simulation model simulates the Company's equity value at

an assumed listing exit event in order to determine the RSU vesting percentage. The model simulates the RSU vesting percentage over numerous iterations, and the average of all iterations is determined to be the fair value of an RSU. The model then

discounts the future value of the RSU at the assumed listing exit event date back to the valuation date ba sed on the relevant risk-free interest rate. The Monte Carlo simulation model incorporates various assump tions such as expected stock price

volatility until a liquidity event, expected dividend yield, risk-free interest rate, and expected time to complete an initial public offering. The

Company granted Phantom Shares and executive RSUs to certain of our executive officers and are subject to continuous service and vest upon meeting certain strategic performance conditions of the Company. Phantom Shares and executive RSUs are

liability-classified and are expensed when the performance targets are considered probable of being achi eved. Executive RSUs primarily are based on fixed monetary amounts that could be converted into a vari able number of shares based on the closing

share price of the Company upon an initial public offering. Any obligations that are based predominantly on fixed monetary amounts that are known at inception and are to be settled with a variable number of the Company's shares, are

liability-classified with compensation cost recognized ratably over the requisite service period. At the grant date of the RSUs, the Company was private

and its ordinary shares were not listed on a public stock exchange. Therefore, the Company's Board of Di rectors exercised its reasonable judgment and considered numerous objective and subjective factors to d

etermine the best estimate of fair

value of the Company's ordinary shares underlying share-based compensation awards, including: • conte mporaneous independent third-party valuations of ordinary shares; • financial condition, results of operations, and capital resources; F-23 Table of Contents Arm Limited Notes to Consolidated Financial Statements • the likelihood and timing of achieving a liquidity event, such as an initial public offering or sale of the company, given prevailing market conditions; • the lack of marketability of ordinary shares; • estimates of future financial performance; • market performance and valuations of comparable companies; • the hiring or loss of key personnel; • the status of the Company's development, product introduction, and sales efforts; • industry outlook and other information, such as market growth and volume and macro-economic events; and • additional objective and subjective factors relating to the Company's business. To determine the fair value of ordinary shares, the Company first estimated the enterprise value and then allocated that enter prise value to ordinary shares and ordinary share equivalents. The Company's enterprise value was estimated using the income and market-calibration approaches. The income approach estimates enterprise value based on the estimated present value of future cash flows the business is expected to generate over it

remaining life. The estimated present value is calculated using a discount rate reflective of the risks assoc iated with an investment in a similar company in a similar industry or having a similar history of revenue gr owth. For each valuation, the

Company prepared a financial forecast to be used in the computation of the value of invested capital for b oth the income approach and market-calibration approach. The financial forecast considered the Compan y's past results and expected future

financial performance. The risk associated with achieving this forecast was assessed in selecting the appr opriate discount rate. There is inherent uncertainty in these estimates as the assumptions used are highly subjective and subject to changes as

a result of new operating data and economic and other conditions that impact the business. The market-c alibration approach analyzes the percent change in

the enterprise values of peer companies between the prior valuation date and the current valuation date. Based on the observed market movement in the enterprise values of peer companies, a market movement factor is selected to represent the

potential shift in enterprise value between the prior valuation date and the current valuation date. The sele cted market movement factor is applied to the indicated value as of the prior valuation date. Monte Carlo simulations incorporate highly subjective assumptions, such as stock price volatility and expected volatility until a liquidity event. Changes in

highly subjective assumptions could significantly impact share-based compensation cost. Since the Comp any's ordinary shares were not publicly traded, the computation of expected volatility was based on the av erage of historical and implied

volatilities over the expected term of the awards of a representative peer group of publicly traded entities. Other assumptions included expected term, risk-free interest rate and dividend yield. The risk-free interest rate was based on zero-coupon U.S. Treasury bond rates corresponding to the expected term of the awa rds. Dividend assumptions were based on historical experience. The Company estimates forfeitures base d on employee level, economic conditions, time remaining to vest and historical forfeiture experience. F-2 4 Table of Contents Arm Limited Notes to Consolidated Financial Statements Cost of Sales Cost of sales expenses consist primarily of employee-related expenses and project costs associated with professional s ervices and the provision of support and

maintenance to customers, along with expenses related to license development services revenue, amorti zation of developed technology, and allocated overhead. Employee-related expenses include salaries, bo nuses, share-based compensation and associated

benefits. Research and Development Research

and development expenses consist primarily of employee-related expenses, including salaries, bonuses, share-based compensation, and benefits associated with employees in research and development functions, along with project materials costs,

third-party fees paid to consultants, depreciation and amortization, allocated overhead, and other develop ment expenses. Selling, General and

Administrative Selling, general and administrative expenses consist primarily of employee-related expenses, including salaries, bonuses,

share-based compensation, and benefits associated with employees in sales and marketing, along with c orporate and administrative functions, including accounting and legal professional services fees, depreciat ion and amortization, advertising

expenses, allocated overhead, and other corporate-related expenses. Disposal, Restructuring and Other Operating Expenses, Net Disposal expenses consist primarily of transaction costs, such as legal and prof essional fees, relating to various disposal activities. Restructuring and other operating expenses consist p rimarily of employee termination benefits. Recognition of costs for employee termination benefits depends on whether employees are required to render service beyond a minimum retention period in order to receive the termination

benefits, costs are recognized ratably over the applicable future service period. Otherwise, costs are recognized when the Company has committed to a restructuring plan and has communicated those actions to employees. Employee termination benefits

covered by existing benefit arrangements are recognized when the Company has committed to a restruct uring plan and the termination benefits are probable and estimable. Government Grants The Company re ceives government

grants to compensate for its research activities. GAAP does not contain authoritative guidance for incentives and grants provided by governmental entities to a for-profit entity. Absent authoritative guidance,

interpretative guidance issued and commonly applied by financial statement preparers allows for the sele ction of accounting policies amongst acceptable alternatives. Based on facts and circumstances, the Com pany determined it most appropriate to

account for the government grants received by analogy to International Accounting Standards 20, Accounting for Government Grants and Disclosure of Government Assistance ("IAS 20"). Under the provisions of IAS 20, a government grant is recognized when there is reasonable assurance the Company will meet the terms for receiving and

realizing the benefit of the grant. IAS 20 does not define "reasonable assurance," however, based on cert ain interpretations, it is analogous to "probable" as defined under GAAP, which is the definition the Comp any has applied to

its government grants received. Under IAS 20, government grants are recognized in earnings on a syste matic basis over the periods in which the Company F-25 Table of Contents Arm Limited Notes to Consoli dated Financial Statements recognizes costs for which the grant is intended to compensate (i.e. qualified expenses). Further, IAS 20 permits for the recognition in earnings either separately under a general heading such as

other income, or as a reduction of the related expenses. The Company has elected to recognize the bene fit as a reduction of the related expenses included in either research and development expenses or income tax expense on the Consolidated Income

Statements. For the fiscal years ended March 31, 2023, 2022 and 2021, the government grant benefit rec ognized was \$83.0 million, \$84.3 million and \$94.4 million, respectively. The government grant benefit rec eived includes a grant from Innovate U.K. for work connected to the creation of a new centrally secured te chnology platform

prototype. For the years ended March 31, 2023, 2022 and 2021, the Company recorded a reduction to re search and development expenses from this grant of \$2.6 million, \$15.3 million and \$23.8 million, respectively. The maximum total

value of the Innovate U.K. contract is \$44.9 million. The Company benefits in the U.K. from His Majesty's Revenue & Customs

("HMRC") research and development expenditure ("RDEC"), which provides relief against U.K. corporatio n tax. Based on criteria established by HMRC a portion of the Company's expenditures incurred on resear ch and development

activities are eligible for RDEC relief. For the years ended March 31, 2023, 2022 and 2021 the Company r ecorded a relief of \$64.0 million, \$54.4 million and \$54.6 million, respectively. Income Taxes The Company computes the provision

for income taxes using the asset and liability method, under which deferred tax assets and liabilities are re cognized for the expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and

liabilities, and for operating losses and tax credit carryforwards. Deferred tax assets and liabilities are mea

sured using currently enacted tax rates that apply to taxable income in effect for the years in which those t ax assets are expected to be

realized or settled. If the Company determines it is more likely than not that it will not generate sufficient ta xable income to realize the value of

some or all deferred tax assets (net of deferred tax liabilities), the Company will establish a valuation allo wance offsetting the amount it does not expect to realize. The Company performs this analysis each reporting period and reduces the

measurement of deferred taxes if the likelihood the Company will realize them becomes uncertain. Deferr ed tax assets the Company records each period

depend primarily on the ability to generate future taxable income. Each period, the Company evaluates the need for a valuation allowance against the deferred tax assets and, if necessary, adjusts the valuation a llowance so that net deferred tax

assets are recorded only to the extent the Company concludes it is more likely than not that these deferre d tax assets will be realized. If the outlook for future taxable income changes significantly, the Company's assessment of the need for.

and the amount of, a valuation allowance may also change. The Company is also required to evaluate an d quantify other sources of taxable income, such as

the possible reversal of future deferred tax liabilities and the implementation of tax planning strategies. Ev aluating and quantifying these amounts is difficult and involves significant judgment, based on all of the av ailable evidence and

assumptions about future activities. Tax benefits from uncertain tax positions are recognized only if (base d on the technical merits of the position) it

is more likely than not that the tax positions will be sustained on examination by the tax authority. The tax benefits recognized in the financial statements from such positions are measured based on the largest a mount that is more than 50% likely

to be realized upon ultimate settlement. Interest and penalties related to unrecognized tax benefits are recognized within income tax (expense) benefit on the Consolidated Income Statements. F-26 Table of Contents Arm Limited Notes to Consolidated Financial Statements Net Income (Loss) Per Share Attributable to Ordinary Shareholders Basic income (loss) per ordinary share is computed by dividing net income attributable to ordinary shareholders by the weighted average number of ordinary

shares outstanding during the period. Diluted earnings per share is computed by dividing net income (loss) attributable to ordinary shareholders by the weighted average number of ordinary shares and potentially dilutive ordinary shares outstanding

during the period. Potentially dilutive ordinary shares whose effect would have been antidilutive are exclu ded from the computation of diluted earnings per ordinary share. Discontinued Operations A disposal is c ategorized

as a discontinued operation if the disposal group is a component of an entity or group of components that meets the held for sale criteria, is disposed of by sale or other than by sale, and represents a strategic shi ft that has or will have a major

effect on an entity's operations and financial results. The results of disposals that qualify as a discontinue d operation are presented as such for all reporting periods presented. Results of discontinued operations i nclude all revenues and

expenses directly derived from such disposal group; general corporate overhead is not allocated to a disc ontinued operation. For disposals other than by sale such as a distribution to shareholders of the Compan y, results of operations of a business

would not be recorded as a discontinued operation until the period in which the business is actually disposed of other than by sale. Following a

strategic decision to place greater focus on the Company's core technology licensing business, a decision was made to distribute or sell certain components of the Company's Internet of Things business. As a result, in June 2021, the

Company completed a pro rata distribution of its controlling stake in Treasure Data, Inc. and its subsidiari es ("Treasure Data") to the immediate shareholders of the Company. In November 2021, the Company so ld 100% of its ownership in

Pelion IOT Limited and its subsidiaries ("IoTP") to SoftBank Group Capital Limited in exchange for \$12.0 million in cash consideration. The distribution of Treasure Data and sale of IoTP were accounted for as di

scontinued operations. Revenue from IoTP and Treasure Data reported in loss on discontinued operation s before income taxes on the Consolidated Income Statements relates to

certain IP available through cloud-based infrastructure where the customer does not have the right to ter minate the hosting contract. Under such arrangements, customers do not have the right to take possession of the software to run on their own IT

infrastructure, nor do they have the right to engage a third-party provider to host and manage the software . Revenue for these arrangements is recognized over time as the services are performed. Unless specifie d otherwise, the accompanying notes to the consolidated financial statements exclude financial results of discontinued operations. Revision to Previously Issued Financial Statements The Company has identified certain immaterial errors in the consolidated statements of cash flows and a footnote to the consolidated financial statements. The corrections to the consolidated statements of cash flows include: • the presentation of cash flows for the purchase and the proceeds from maturity of short-term investments should be presented on a gross basis rather than the net basis in investing activities • the presentation of cash flows for a portion of the payments to purchase intangible assets was determined to be

presented as financing cash outflow rather than investing activities F-27 Table of Contents Arm Limited N otes to Consolidated Financial Statements The following table presents the impact of the corrections to the consolidated statements of cash flows for

the fiscal years ended March 31, 2022 and 2021: Consolidated Statements of Cash Flows (Amounts in U SD, millions) Fiscal Year Ended March 31, 2022 Fiscal Year Ended March 31, 2021 As reported Adjustment As revised As revised As reported Adjustment As revised Purchase of short-term investments \$ (505) \$ (245) \$ (750) \$ (110) \$ (235) Proceeds from maturity of short-term investments — 245 245 — 110 110 Purchases of intangible assets (78) 37 (41) (99) 38 (61) Net cash used for investing activities \$ (656) \$ 37 \$ (619) \$ (378) \$ 38 \$ (340) Payment of intangible asset obligations — (37) (37) — (38) (38) Net cash (used for) provided by financing activities \$ 5 \$ (37) \$ (32) \$ (751) \$ (38) \$ (789) In addition, within the disaggregation of revenue in footnote 3, the Company identified an overstatement of over time revenue

and corresponding understatement of point in time revenue. The Company revised the disclosure to decrease over time revenue and increase point in time revenue by \$184 million and \$50 million for fiscal year ended March 31, 2022, and 2021

respectively. These errors had no impact on the amounts previously reported in the Company's consolidat ed income statements, consolidated statements

of comprehensive income, consolidated balance sheets and consolidated statements of shareholders' equity. Management has evaluated the materiality of these errors quantitatively and qualitatively, including the impact of the errors on cash flow

activities, and has concluded that the corrections of these errors are immaterial to the consolidated financial statements as a whole. 2. Recent Accounting Pronouncements Recently Adopted Accounting Guidance Derivatives and Hedging (Topic 815), Targeted Improvements to Accounting for Hedging: In August 2017, the Financial Accounting Standards Board

("FASB") issued ASU 2017-12 which requires expanded hedge accounting for both non-financial and fina ncial risk components and refines the measurement of hedge

results to better reflect an entity's hedging strategies. The updated standard also amends presentation and disclosure requirements and changes how entities assess hedge effectiveness. The Company adopted ASU 2017-12 utilizing the modified retrospective transition method beginning April 1, 2020. Adoption had no material impact on the Company's consolidated financial statements. Intangibles—Goodwill and Other—Internal-Use Software (Subtopic 350-40), Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract: In August 2018, FASB issued ASU 2018-15 which aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to

develop or obtain internal-use software. The new standard requires capitalized costs to be amortized on a straight-line basis generally over the term of the arrangement, and the financial statement

presentation for these capitalized costs would be the same as that of the fees related to the hosting arran gements. The Company adopted this ASU beginning April 1, 2020. Adoption had no material impact on the Company's consolidated

financial statements. Reference Rate Reform (Topic 848), Facilitation of the Effects of Reference Rate Reform on Financial Reporting: In March

2020, FASB issued ASU 2020-04 which provides temporary optional expedients and exceptions to F-28 T able of Contents Arm Limited Notes to Consolidated Financial Statements GAAP guidance on contract m odifications to ease the financial reporting burdens related to the expected market transition from the Lon don Interbank Offered Rate to alternative reference rates.

Subsequently, in January 2021, FASB issued ASU 2021-01, Reference Rate Reform (Topic 848): Scope, which refines the scope of Topic 848 and clarifies some of its guidance. The Company adopted this ASU beginning

April 1, 2020 and may be applied through March 31, 2022. Adoption had no material impact on the Company's consolidated financial statements. Debt—Debt with Conversion and Other Options (Subtopic 470-2 0) and Derivatives and Hedging— Contracts in

Entity's Own Equity (Subtopic 815-40), Accounting for Convertible Instruments and Contracts in an Entity's Own Equity: In August 2020, FASB issued ASU 2020-06 which reduces the number of accounting mode is for convertible debt instruments and convertible preferred stock. For convertible instruments with conversion features that are not required to be

accounted for as derivatives under Topic 815 or that do not result in substantial premiums accounted for a s paid-in capital, the embedded conversion features no longer are separated from the host contract. ASU 2020-06 also removes certain conditions that should be considered in the derivatives scope exception ev aluation under Subtopic 815-40, Derivatives and

Hedging—Contracts in Entity's Own Equity, and clarify the scope and certain requirements under Subtopi c 815-40. In addition, ASU 2020-06 improves the guidance

related to the disclosures and earnings per share for convertible instruments and contracts in entity's own equity. The Company adopted this ASU beginning April 1, 2020. Adoption had no material impact on the Company's consolidated

financial statements. Business Combinations (Topic 805), Accounting for Contract Assets and Contract Li abilities from Contracts with Customers: In

October 2021, FASB issued ASU 2021-08, which improves the accounting for contract assets and contract liabilities from revenue contracts with customers in a business combination (Topic 805). The ASU improves

comparability for both the recognition and measurement of acquired revenue contracts with customers at t he date of and after a business combination. The Company adopted this ASU beginning April 1, 2022. Ad option had no material impact on the

Company's consolidated financial statements. Government Assistance (Topic 832), Disclosures by Busin ess Entities about Government Assistance :

In November 2021, FASB issued ASU 2021-10, which created ASC 832. ASC 832 requires certain disclo sures about transactions with a government that are accounted for by analogizing to a grant or contribution

accounting model. The amendments will require disclosure of information about the nature of the transacti ons and the related accounting policy used to account for the transactions, information regarding the line i tems within the consolidated

financial statements that are affected by the transactions, and significant terms and conditions of the transactions. The Company adopted this ASU beginning April 1, 2022. Adoption had no material impact on the Company's consolidated

financial statements. 3. Revenue Disaggregation of Revenue A summary of the

Company's disaggregated revenues are as follows: Fiscal Year Ended March 31, External Customers Rel ated Parties Total (in millions) 2023 2022 2021 2023 2022 2021 2023 2022 2021 License and Other Reve nue (1) \$ 569 \$ 902 \$ 574 \$ 435 \$ 239 \$ 140 \$ 1,004 \$ 1,141 \$ 714 Royalty Revenue 1,456 1,317 1,005 219 245 308 1,675 1,562 1,313 \$2,025 \$2,219 \$1,579 \$654 \$484 \$448 \$2,679 \$2,703 \$2,027 (1) Include s over-time revenues of \$100 million, \$102 million, and \$197 million and point-in-time revenues of \$904 m illion, \$1,039 million, and \$517 million for the fiscal years ended March 31, 2023, 2022, and 2021, respectively. F-29 Table of Contents Arm Limited Notes to Consolidated Financial Statements Receivables A summary of the components of accounts receivable, net is as follows: As of March 31, (in millions) 2023 2022 Trade receivables \$ 625 \$ 733 Royalty receivables 377 431 Total gross receivables 1,002 1,164 Allowance for current expected credit losses (3) (40) Total accounts receivables, net \$ 999 \$ 1,124 A summary of the movement in the allowance for current expected credit losses is as follows: (in millions) Total Balance as of April 1, 2020 \$ 3 Additional provision 13 Amounts written off during the year as uncollectible (3) Am

ounts reclassified to assets related to discontinued operations (1) Balance as of April 1, 2021 12 Addition all provision 28 Balance as of April 1, 2022 \$ 40 Reversal of provision (34) Amounts written off during the year as uncollectible (3) Balance as of March 31, 2023 \$ 3 Contract Assets The timing of revenue recogn ition may differ from the timing of invoicing to customers. Contract assets are created when invoicing occurs subsequent to revenue

recognition. Contract assets are transferred to accounts receivable when the right to invoice becomes unc onditional. Contract assets increased by \$254 million and \$490 million due to the timing of billings to custo mers, which fell into

subsequent periods, in the fiscal years ended March 31, 2023 and 2022, respectively, offset by \$250 milli on and \$331 million of contract assets transferred to accounts receivable, in the fiscal years ended March 31, 2023 and

2022, respectively. The balance and activity for loss allowances related to contract assets was immaterial for all periods presented. Contract

Liabilities A reconciliation of the movement in contract liabilities is as follows: (in millions) Total Balance a s of April 1, 2021 \$ 1,178 Customer prepayment and billing in advance of performance 317 Revenue recognized in the period that was included in the contract liability balance at the

beginning of the period (170) Revenue recognized in the period that was included in the contract liability balance during the

period (199) F-30 Table of Contents Arm Limited Notes to Consolidated Financial Statements (in millions) Total Balance as of March 31, 2022 \$ 1,126 Current portion of contract liabilities \$ 334 Non-current portion of contract liabilities \$ 792 Balance as of April 1, 2022 \$ 1,126 Customer prepayment and billing in advance of performance 209 Revenue recognized in the period that was included in the contract liability balance at the

beginning of the period (128) Revenue recognized in the period that was included in the contract liability balance during the

period (105) Effect of disposal (see Note 21) (2) Balance as of March 31, 2023 \$ 1,100 Current portion of contract liabilities \$ 293 Non-current portion of contract liabilities \$ 807 Satisfied Performance Obligation s Revenue recognized from previously satisfied performance obligations in prior reporting periods was \$1,705 million, \$1,562 million, and

\$1,313 million for the fiscal years ended March 31, 2023, 2022, and 2021, respectively. These amounts pr imarily represent royalties earned during the period. Remaining Performance Obligations Remaining performance obligations represent the transaction price allocated to performance obligations that are uns atisfied, or partially unsatisfied, which includes unearned revenue and amounts that will be invoiced and r ecognized as revenue in future

periods. The Company has elected to exclude potential future royalty receipts from the disclosure of remaining performance obligations. In certain

arrangements, the Company's right to consideration may not correspond directly with the performance of obligations. Revenue recognition occurs upon delivery or beginning of license term, whichever is later. Ac cordingly, the analysis between

time bands below has been estimated, but the final timing may differ from these estimates. In the absence of sufficient information, where the timing of satisfaction of the remaining performance obligations is dependent on a customer's action,

the transaction price allocated to such performance obligation is included in the outer-year time band unle ss contract or option expiration aligns with an earlier period or category. As of March 31, 2023, the aggreg ate transaction price allocated to remaining performance obligations was \$1,712.1 million, which includes \$743.9 million of non-cancellable and non-refundable committed funds received from certain customers, where the parties are in negotiations regarding the enforceable rights and obligations of the arrangement. The Company expects to recognize approximately 23% of remaining performance obligations as revenue over the next 12 months, 11% over the subsequent 13-to 24-month period, and the remainder thereafter. 4. Discontinued Operations The Company decided to distribute Treasure Data to the immediate sharehol ders of the Company and sell IoTP to SoftBank Group Capital Limited. The distribution

and sale of Treasure Data and IoTP, respectively represented a strategic shift that has or will have a majo r effect on the Company's operations and financial F-31 Table of Contents Arm Limited Notes to Consolid ated Financial Statements results. In the course of the Company's evaluation, it considered examples provided in ASC 205-20 of what may constitute a strategic shift that will

have a major effect on operations and financial results. The following metrics were analyzed among other s: total revenues of Treasure Data and IoTP when compared to those of the Company, total assets, losse s and profits before and after taxes,

respectively. As a result of this analysis, the Company determined the distribution and sale of the busines ses qualified for classification as discontinued operations. Because Treasure Data was distributed to the i mmediate shareholders of the

Company and IoTP was sold to SoftBank Group Capital Limited, the results of operations were not record ed as discontinued operations until the period in which the businesses were actually disposed of other than by sale. Treasure Data In June 2021, the Company completed

a pro rata distribution of its controlling stake in Treasure Data to SoftBank Group Capital Limited. The dist ribution was recorded as a reduction to retained earnings at the carrying amount of Treasure Data's net a ssets of \$44.2 million

and did not result in the recognition of gain or losses. Upon the distribution, the Company and Treasure D ata entered into a transition services

agreement pursuant to which the Company provided enabling functions support services to the owners of Treasure Data on an interim transitional basis for up to three months after disposition. The revenue and c ash flows associated with this transition

services agreement were not significant to the operations of the Company. The Company completed its transition services for Treasure Data during the fiscal year ended March 31, 2022. The Company provided no transition services in the fiscal

year ended March 31, 2023. IoTP In

November 2021, the Company sold 100% of its ownership in IoTP. The IoTP business was sold to the Company's immediate shareholders for \$12.0 million in cash consideration. Consideration with respect to the sale was unpaid as of

March 31, 2023 and recorded as an other receivable in prepaid expenses and other current assets on the Consolidated Balance Sheets. Upon the sale, the carrying value of the net assets of IoTP equaled total consideration and no gain or loss was

recognized. The Company provided no transition services to IoTP post-distribution in the fiscal years end ed March 31, 2023 and 2022. Summarized Financial Information Operating

results of Treasure Data and IoTP are reflected in discontinued operations in the consolidated financial st atements for all periods presented through the dates of distribution and sale, respectively. A summary of the major components of revenues and expenses from discontinued operations is as follows: Fiscal Year Ended March 31, (in millions) 2022 2021 Revenue from external customers \$ 41 \$ 118 Cost of sales (20) (42) Research and development (44) (143) Selling, general and administrative (53) (120) Restructuring and related costs — (7) Impairment of long-lived assets (23) — Loss from discontinued operations before income taxes (99) (194) Income tax (expense) benefit (28) 38 Net loss from discontinued operations \$ (127) \$ (156) F-32 Table of Contents Arm Limited Notes to Consolidated Financial Statements Prior to the sale of IoTP, in November 2021, an impairment loss of \$23.5 million was recognized on

long-lived intangible and property and equipment assets of IoTP. The impairment was primarily a result of lower than anticipated operating results and a deterioration in projected results. For purposes of determining the impairment, the Company

relied on the income approach utilizing discounted cash flows to arrive at fair value. A summary of signific ant non-cash items and capital expenditures from discontinued operations is as follows: Fiscal Year Ende d March 31, (in millions) 2022 2021 Amortization and depreciation expense \$ 8 \$ 21 Other non-cash item s \$ 3 \$ 11 Other non-cash items include operating lease expense, stock-based compensation cost and purchase of property and equipment for the fiscal years presented. 5. Goodwill As of March 31, 2023, 2022, and 2021, the Company had a goodwill balance of \$1,620 million, \$1,636 million, and \$1,651 million.

respectively. The period-over-period change in goodwill for the fiscal years ended March 31, 2023 and 20 22 was due to foreign currency translation adjustments. The Company did not record any goodwill impair ment for the fiscal years ended

March 31, 2023, 2022, and 2021. 6. Intangible Assets, Net Information related to intangible assets is as fo llows: Fiscal Year Ended March 31, Gross Carrying Amount Accumulated Amortization Net Carrying Value Weighted Average Remaining Life (in years) (in millions) 2023 2022 2023 2022 2023 2022 2023 2022 Patents & licenses \$ 178 \$ 178 \$ 169 \$ 157 \$ 9 \$ 21 1.5 2.1 Developed technology 155 165 151 156 4 9 1.

\$22.5 million, \$26.5 million and \$22.2 million in development costs associated with internal use software in the fiscal years ended March 31, 2023, 2022 and 2021, respectively. Impairment of intangible assets for fiscal year

ended March 31, 2022 was \$5.0 million. There was no impairment of intangible assets recognized in othe r periods presented. Capitalized costs related to internal use software, net of accumulated amortization w as \$46.8 million and

\$34.5 million as of March 31, 2023 and 2022, respectively. Estimated future amortization of intangible ass ets is as follows: (in millions) As of March 31, 2023 2024 71 2025 40 2026 15 2027 9 2028 3 Total future amortization expense \$ 138 7. Property and Equipment, Net Information regarding property and equipment, net is as follows: As of March 31, (in millions) 2023 2022 Buildings \$ 75 \$ 75 Leasehold improvements 162 182 Equipment 368 319 Fixtures, fittings and motor vehicles 53 53 Total property and equipment, gross 658 629 Less: Accumulated depreciation (473) (441) Total property and equipment, net \$ 185 \$ 188 Depreciation expense for the fiscal years ended March 31, 2023, 2022 and 2021 was \$77.2 million, \$82.5 million,

and \$78.8 million, respectively. Impairment of property and equipment for the fiscal years ended March 31, 2023, 2022, and 2021 was zero, \$13.6 million and \$2.5 million, respectively. As of March 31, 2023 and 2022, the Company had ARO liabilities of \$10.0 million and \$11.5 million related to leasehold improvement s, recorded

in other current and other non-current liabilities on the Consolidated Balance Sheets. In the fiscal year en ded March 31, 2023, ARO liabilities decreased by \$1.5 million, which consisted of

\$1.0 million and \$0.7 million related to settlement and revision of certain obligation estimates and foreign currency translation adjustments, respectively, partially offset by accretion \$0.2 million. In the fiscal year ended

March 31, 2022, ARO liabilities decreased by \$1.7 million, which consisted of \$1.0 million and \$0.9 million related to settlement and revision of certain obligation estimates and foreign currency translation adjustm ents,

respectively, partially offset by accretion \$0.2 million. As of March 31, 2023 and 2022, the Company had \$5.4 million and

\$5.9 million, respectively of retirement assets recorded in property and equipment, net on the Consolidate d Balance Sheets. F-34 Table of Contents Arm Limited Notes to Consolidated Financial Statements 8. Ot her current liabilities Other current liabilities are as follows: As of March 31, (in millions) 2023 2022 Vendo r accruals \$ 102 \$ 98 Accounts payable 65 57 Payables to related parties 17 28 Restructuring liabilities — 26 Other current liabilities 109 50 Total other current liabilities \$ 293 \$ 259 9. Leases The Company's lea se obligations primarily consist of operating leases for property, IT and automobiles with lease terms expir ing between calendar years

2023 and 2044. The Company's lease agreements do not contain residual value guarantees, material variable payment provisions or material restrictive covenants. The Company did not have material finance or short-term leases and did not incur any material variable lease expenses for all periods presented. For the

fiscal years ended March 31, 2023, 2022 and 2021, operating lease expense was \$34.3 million, \$40.0 mill ion, and \$40.7 million, respectively. For the year ended March 31, 2023, the Company recognized a loss on early

termination of certain operating leases of \$4.4 million. No material gains or losses were recognized on lea se terminations in other periods presented. Supplemental disclosures of cash flow information related to o perating leases are as follows: As of March 31, (in millions) 2023 2022 2021 Cash flows used for operating leases \$ (47) \$ (42) \$ (35) Operating lease right-of-use assets obtained in exchange for lease obligations \$ 16 \$ 3 \$ 54 The Company's weighted average remaining lease term and discount rate for operating

leases are as follows: As of March 31, 2023 2022 2021 Weighted average discount rate 2.58 % 2.42 % 2 .43 % Weighted average remaining lease term (in years) 15.21 15.20 14.57 F-35 Table of Contents Arm L imited Notes to Consolidated Financial Statements Maturity of operating lease liabilities as of March 31, 2 023 is as follows (in millions): (in millions) Total 2024 \$ 31 2025 26 2026 23 2027 17 Thereafter 163 Total minimum lease payments 260 Less imputed interest (41) Total operating lease liabilities 219 Less: current portion of operating lease liabilities 26 Non-current portion of operating lease

liabilities \$ 193 The Company had no material leases due to commence subsequent to March 31, 2023. 1 0. Equity Investments A summary of the components of equity investments is as follows: As of March 31, (in millions) 2023 2022 Equity method investments under fair value option \$ 592 \$ 631 Equity method investments under equity method 9 8 Non-marketable equity securities 122 97 Total equity investments \$ 72 3 \$ 736 Income (loss) from equity investments, net is as follows: Fiscal Year Ended March 31, (in millions) 2023 2022 2021 Equity method investments (1) \$ (41) \$ 112 \$ 482 Non-marketable equity securities (in cludes NAV) (4) 29 (6) Total income (loss) from equity investments, net \$ (45) \$ 141 \$ 476 (1) Includes equity method investments where the Company elected the fair value option, including those under the NAV practical expedient, along with investments accounted for under the equity method. Equity Method In vestments Details of the Company's equity method investments as of March 31, 2023 are as follows: Investments under equity method of

accounting Name Ownership Interest % Arm IOT Fund LP (Taiwan) 25.8 % Accelerator Advisory Limited 27.9 % HOPU-ARM Holding Company Limited (1) 10.0 % DeepTech Labs Fund 1 LP 42.9 % F-36 Table of Contents Arm Limited Notes to Consolidated Financial Statements (1) The Company's investment in H OPU-ARM Holding Company Limited

entitles the Company to a 10% equity interest in HOPU-ARM Holding Company Limited and representation on the board of directors by virtue of the right to appoint one of three members of the board of directors. Accordingly, the Company has the ability to exercise significant influence over the operating and financial policies of HOPU-ARM Holding Company Limited. Investments where fair value option elected (including those under the NAV practical expedient): Acetone Limited 10.0 % Ampere Computing Holdings LLC ("Ampere") 6.8 % China Walden Ventures Investments II, L.P.—NAV 7.5 % China Walden Ventures Investments III, L.P.—NAV 5.1 % Catapult Ventures I, L.P.—NAV 18.1 % Investee summarized financial data for the Company's equity method investments is as follows: Balance Sheet 2023 2022 (in millions) Total Investments Total Investments Current assets \$ 1,410 \$ 2,15 8 Non-current assets 2,365 1,882 Current liabilities 163 864 Non-current liabilities 602 901 Income State ment 2023 2022 2021 (in millions) Total Investments Total Investments Total Investments Revenue or income. \$ 141 \$ 1,610 941 Gross profit 86 1,018 443 Fair value (losses) on equity method investments (160) — Net income (loss) (367) 521 75 Investments in a limited liability company that maintains a specific ownership or limited partnerships which the Company has

more than virtually no influence (i.e., at least 3% to 5% ownership) over the investee are accounted for usi ng the equity method. The Company elected the

fair value option to account for certain equity method investments. See the discussion below regarding Ar m China, Acetone Limited, and Ampere, along with Note 13, Fair Value, for further information. For the fis cal years ended March 31, 2023, 2022 and 2021, income (losses) from equity method investments not ac counted under the fair value option or the

NAV practical expedient was immaterial. The Company holds equity method investments in funds accounted for under the fair value option that apply the NAV

practical expedient. The estimated fair values of the Company's equity securities at fair value that qualify f or the NAV practical expedient were provided by the partnerships based on the indicated market values of the underlying assets or

investment portfolios. As of March 31, 2023 and 2022, the carrying value of equity method investments un der the fair value option measured at NAV was \$109.4 million and \$106.9 million, respectively. F-37 Table of Contents Arm Limited Notes to Consolidated Financial Statements For the fiscal years ended March 3 1, 2023, 2022 and 2021, the Company recognized gains from changes in fair value of \$1.7 million, \$40.0 million and \$8.3 million,

respectively, for equity method investments accounted for under the NAV practical expedient. Changes in fair value are recorded through income from equity investments, net on the Consolidated Income Statem ents. Arm China and Acetone Limited Prior to

restructuring its investment in March 2022, the Company held an equity method investment in Arm China.

Factors resulting in significant influence included: (a) the Company held a 48.18% equity holding in Arm China with associated rights;

(b) the Company was party to the IPLA and has service share transactions with Arm China, along with cer tain leases; and (c) the Company had the ability to nominate a representative to Arm China's board of dire ctors. The Company

elected to apply the fair value option to this equity method investment. Pursuant to the IPLA, a substantial portion of customer contracts previously

held by the Company's former PRC subsidiary were novated to Arm China; under such contracts the Company is entitled to a share of revenue earned by Arm China. Where contracts were not novated from the Company's former PRC subsidiary to Arm

China, the Company has an obligation to pay a reseller fee on the revenue derived from those entities wit hin the PRC geography. In March 2022, the

Company transferred its interest in Arm China to Acetone Limited, a newly created company. Immediately thereafter, the Company transferred 67% of its interest in Acetone Limited, to SoftBank Group Capital Li mited ("SBGC"), and 23% of

its interest in SVF Holdco Limited ("SVF") for a note receivable of \$930.3 million (the "Note Receivable"). The Note Receivable was immediately distributed proportionally to SBGC and SVF (the Company's only shareholders), both entities under common control of SoftBank Group, free of cost and accordingly, treate d similar to a dividend or distribution to the immediate shareholders of the Company as a reduction to retained earnings. The Company retained a 10% non-voting shareholding interest in Acetone Limited. The Company concluded it did not

control Acetone Limited, as its 10% shareholding interest is a non-voting interest, and the Company did n ot have any rights to nominate a director to Acetone Limited's board of directors. However, the

Company did conclude that it has significant influence in Acetone Limited, as (a) Acetone Limited's sole a sset is its 48.18% equity holding in Arm China, (b) the Company is party to the IPLA with Arm China, (c) the Company has

significant inter-entity transactions with Arm China, including leased assets; and (d) the Company's Chief Executive Officer has been appointed to Arm China's board of directors by SoftBank Group. The Company elected to apply the fair

value option to this retained equity method investment. As a result of these transactions, in March 2022, the Company removed the carrying value of its

equity investment in Arm China of \$1,084.1 million and recognized its investment in Acetone Limited at \$1 08.4 million, with net distribution to immediate shareholders of the Company recognized as a reduction to retained earnings of

\$975.7 million. As of March 31, 2023 and 2022, the carrying value of the Company's equity method invest ment in Acetone Limited was \$92.4 million and \$108.4 million, respectively For the fiscal years ended Mar ch 31, 2022, and 2021, the Company recognized fair value gains of \$72.3 million, and \$132.5 million, respectively

in connection with equity method investment in Arm China, and immaterial amounts associated with its ret ained interest in Acetone Limited. For the fiscal year ended March 31, 2023, the Company recognized fair value losses of \$16.0 million

in connection with equity method investment in Acetone Limited. Ampere As of March 31, 2023 and 2022, the carrying value of the Company's equity method investment in Ampere was \$389.8 million and \$416.2 million, respectively. The Company elected to apply the fair value option to this F-38 Table of Cont ents Arm Limited Notes to Consolidated Financial Statements equity method investment. For the fiscal ye ars ended March 31, 2023, and 2021, the Company recognized a fair value (loss) and a gain of \$(26.3) million and \$341.2 million,

respectively. Fair value gains and losses for this investment were immaterial for the fiscal year ended Mar ch 31, 2022. In December 2021, the

Company acquired a \$29.0 million convertible promissory note in Ampere, which is included in other non-current assets on the Consolidated Balance Sheets. As of March 31, 2023, the outstanding balance of the convertible promissory note was \$30.9 million. The Company's maximum exposure to loss are the amounts invested in, and advanced to, Ampere as of March 31, 2023. Non-marketable Equity Securities Non-marketable securities are those for which the Company does not have significant influence or control . These

represent either direct or indirect, through a capital fund, investments in unlisted early-stage development enterprises which are generating value for shareholders through research and development activities. The Company holds equity interests in

certain funds which are accounted for under the NAV practical expedient. As of March 31, 2023 and 2022, the carrying value of assets measured at NAV was \$18.0 million and \$28.5 million, respectively. For the f iscal years ended

March 31, 2023, the Company recognized a loss from changes in fair value of \$10.5 million for non-marke table securities accounted for under the NAV practical expedient. Accordingly, the Company recognized g ains from changes in fair value of

\$7.9 million, and \$10.1 million for fiscal years ended March 31, 2022 and 2021, respectively. Historically, the Company had an unrecognized

trade receivable with a customer given the collectability of substantially all of the consideration was not probable. In March 2023, the Company invested in non-marketable preferred stock from the customer in exchange for the conversion of the trade receivables for \$12.7 million. The Company also acquired additional non-marketable preferred stock in exchange for a cash payment of \$10.7 million. Currently,

the Company does not recognize any revenue and receivables due to not meeting the collectability criteri on under ASC 606, Revenue from Contracts with Customers . The Company does not have significant influence or control over the customer and

elected to apply the measurement alternative for this investment. The Company elected to apply the measurement alternative to all other non-marketable equity securities. Under the measurement alternative, the ese equity securities are recorded at cost minus impairment, if any, plus or minus changes resulting from qualifying observable price changes in

orderly transactions. The components of gains (losses) which primarily include unrealized gains and losse s on non-marketable securities inclusive of those measured under the NAV practical expedient are as foll ows: Fiscal Year Ended March 31, (in millions) 2023 2022 2021 Observable price adjustments on non-marketable equity

securities (includes NAV) \$ 4 \$ 31 \$ 15 Impairment of non-marketable equity securities (8) (3) (21) Sale of non-marketable equity securities — 1 — Total gains (losses) on non-marketable securities \$ (4) \$ 29 \$ (6) All investments held by the Company are considered long-term to enable ecosystem growth and are non-current assets. For the fiscal years ended March 31, 2023, 2022, and 2021, the Company received \$ 1.0 million, \$2.4 million and \$3.2 million, respectively, in dividends from equity

investments measured using the NAV practical expedient. The total amount of financial commitments to e xisting investees of the Company not provided for in the consolidated financial statements was \$22.1 milli on, \$25.0 million and \$

23.6 million as of March 31, 2023, 2022 and 2021, respectively. F-39 Table of Contents Arm Limited Note s to Consolidated Financial Statements 11. Financial Instruments Loans and Other Receivables Loans and other

receivables carried at amortized cost is as follows: As of March 31, (in millions) 2023 2022 Loans and oth er receivables carried at amortized cost Loans receivable \$ 25 \$ 29 Other receivables 18 17 Allowance for current expected credit losses (22) (23) Loans and other receivables carried at amortized cost, net \$ 21 \$ 23 The allowance for current expected credit losses reflects the Company's best estimate of expected credit losses of the

receivables portfolio determined on the basis of historical experience, current information, and forecasts o f future economic conditions. Loans

receivable The Company issued a four-year loan of \$25.0 million to Arduino SA ("Arduino") in July 2017. In March 2020, the Company

amended the terms of the loan receivable by reducing the annual interest rate from 6% to 3% and in conjunction with the amendment, the Company received Series A preferred stock of Arduino to partially settle the loan receivable. In April 2022, the

Company received Series B preferred stock in Arduino of \$5.1 million to partially settle the loan receivable . The Company accounts for this investment using the measurement alternative because such security is not publicly traded and does not

have a readily determinable fair value. For the fiscal year ended March 31, 2021, the Company recognize d an impairment loss of \$11.0 million related to such investment. For the fiscal years ended March 31, 20 23 and 2022, the Company

did not record any impairment related to such investment. In July 2021, the Company further amended the terms of the loan receivable by extending the

maturity date from July 2021 to April 2027. These amendments were accounted for as a troubled debt restructuring. Under the troubled debt restructuring, unamortized fees and costs are carried forward and cont inue to be included in the amortized cost

basis of the loan receivable. Other direct third-party costs incurred were expensed as incurred and were i ncluded in other non-operating income (loss), net on the Consolidated Income Statements. The Company did not receive any fees in connection with these troubled debt restructurings. There were no payment def aults as the accrued interest and the principal amount of the loan receivable was only required to be repaid at maturity. For the fiscal year ended March 31, 2021, the loan receivable of \$23.0 million from Arduino was impaired in full as the balance was not expected to

be recovered, resulting in the recognition of an expected credit loss of \$23.0 million. The expected credit loss was recorded in other non-operating income (loss), net on the Consolidated Income

Statements. For the fiscal year ended March 31, 2023, the Company reduced the allowance for expected credit losses given the change in collectability with a corresponding reversal expense for the portion of the loan receivable that was repaid

in exchange for Series B preferred stock in Arduino. In addition to the aforementioned Arduino loan receiv able, the remaining balance for the fiscal year

ended March 31, 2023 and 2022 comprised a four-year loan of \$3.0 million issued to Cerfe Labs, Inc., included in other loans receivable. The loan is at an interest rate comparable to market interest rates, with repayment due upon maturity.

In F-40 Table of Contents Arm Limited Notes to Consolidated Financial Statements year ended March 31, 2023, the Company fully impaired the loan and the expected credit loss was recorded in other non-operat ing income (loss), net on the Consolidated Income Statements. See Note 21, Related Party Transactions, for further information on loans to related parties. Other receivables In November 2021, the Company so Id

100% of its ownership in IoTP to SoftBank Group Capital Limited for \$12.0 million in cash consideration. Balances included in other receivables comprised mainly of the \$12.0 million receivable from SoftBank Group Capital Limited recorded in prepaid and other current assets on the Consolidated Balance Sheets as of

March 31, 2023. See Note 4, Discontinued Operations, for further information about the sale of IoTP to S oftBank Group Capital Limited. Convertible Loans Receivable In June 2020, the

Company acquired a \$2.9 million principal balance convertible loan in PragmatIC Semiconductor Limited ("PragmatIC"). The entire convertible loan was converted to equity of PragmatIC Semiconductor Limited in October 2021. As of

March 31, 2023 and 2022, the carrying value of the Company's non-marketable equity security in Pragma tIC was \$39.0 million, respectively. The Company accounts for the investment using the

measurement alternative because the securities are not publicly traded and do not have a readily determinable fair value. In December 2021, the Company

acquired a \$29.0 million principal balance convertible loan in Ampere. The Company elected the fair value option to measure this convertible loan receivable for which changes in fair value are recorded in other n on-operating income (loss), net on the Consolidated Income Statements. For the fiscal year ended March 31, 2023, the Company recognized a gain of \$2.0 million for this loan receivable. No material

gains or losses were recognized for the fiscal year ended March 31, 2022. 12. Derivatives As of March 31, 2023, the notional value of outstanding foreign currency forward contracts was £340.0 million and the fair value was

\$9.3 million. As of March 31, 2022, the notional value of outstanding foreign currency forward contracts w as £320.0 million and the fair value was \$(9.4) million. The following table presents the notional amounts of the Company's outstanding derivative instruments: As of March 31, (in millions) 2023 2022 Designated as cash flow hedges Foreign currency forward contracts \$ 411 \$ — Non-designated hedges Foreign currency forward contracts \$ — \$ 430 The following table presents the fair value of the Company's outstanding derivative instruments: Derivative Assets As of March 31, Derivative Liabilities As of March 31, (in million s) 2023 2022 2023 2022 Designated as cash flow hedges Foreign currency forward contracts \$ 10 \$ — \$ 1 \$ — Non-designated hedges Foreign currency forward contracts \$ — \$ — \$ 9 F-41 Table of Contents Arm Limited Notes to Consolidated Financial Statements Cash Flow Hedge Gains (Losses) The follow

Gains (Losses) The following table presents net gains (losses) on derivatives not designated as hedging i nstruments recorded in non-operating income (loss), net on the Consolidated Income Statements: Fiscal Year ended March 31, (in millions) 2023 2022 2021 Foreign currency forward contracts \$ (30) \$ (17) \$ 2 1 The Company classifies foreign currency forward contracts as Level 2 fair value measurements pursuant to the fair value

hierarchy. See Note 13, Fair Value for further details. 13. Fair Value To provide an indication about the rel iability of the inputs used in determining fair value, the Company classifies its fair value financial instrume nts into

the three levels prescribed under GAAP. An explanation of each level follows the tables and qualitative di sclosures below. There were no transfers between fair measurement levels for any periods presented. The following table presents the Company's fair value hierarchy for the liability measured and recognized at fair value as of March 31, 2023 and

2022 on a recurring basis: As of March 31, 2023 2022 (in millions) Level 1 Level 2 Level 3 Total Level 1 Level 2 Level 3 Total Financial liabilities Foreign currency forward contracts \$ — \$ 1 \$ — \$ 9 \$ — \$ 9 Total financial liabilities \$ — \$ 1 \$ — \$ 1 \$ — \$ 9 \$ — \$ 9 F-42 Table of Contents Arm Limited Notes to Consolidated Financial Statements The following tables present the Company's fair value hierarchy for assets measured and recognized at

the fair value, along with other activity associated with the Company's Level 3 financial assets and liabiliti es: Equity Method

Investments As of March 31, (in millions) 2023 2022 Fair value of financial assets at the beginning of the year \$ 524 \$ 1,428 Additions, net of contributions from shareholders of the Company — Fair value gain s (losses) recognized in the income statement (42) 72 Distributions to shareholders of the Company — (9 76) Fair value at the end of the year \$ 482 \$ 524 Convertible Loans Receivable As of March 31, (in millions) 2023 2022 Fair value of financial assets at the beginning of the year \$ 29 \$ 3 Additions — 29 Convert ed into equity — (3) Fair value gains recognized in the income statement 2 — Fair value at the end of the year \$ 31 \$ 29 See below for a description of the valuation techniques and inputs used in the fair value measurement of Level 3

investments including equity method investments, convertible loans receivable, and currency exchange c ontracts. F-43 Table of Contents Arm Limited Notes to Consolidated Financial Statements Equity Method Investments The Company elected the fair value option in accordance with the guidance in ASC 825, Fin ancial Instruments ("ASC 825") for its investments in

Arm China, Acetone Limited, and Ampere. The Company initially computed the fair value for its investmen ts consistent with the methodology and assumptions that market participants would use in their estimates of fair value with the assistance of a

third-party valuation specialist or based on inputs from the investee. The fair value computation is update d on a quarterly basis. The investments are classified within Level 3 in the fair value hierarchy because the Company estimates the fair

value of the investments using (i) the market-calibration approach based on the guideline public company method and/or (ii) subject to availability of sufficient information, the income approach based on the disco unted cash flow method and

iii) the probability-weighted, expected return ("PWER") approach. The market-calibration approach considers valuation multiples that are

calibrated to the valuation as of the prior valuation date (i.e., quarterly) based on: (a) changes in the broad er market or industry; (b) changes in the guideline public companies; and (c) changes in the company's operating and

financial performance. The fair value computation under this approach includes a key assumption for the r ange of valuation multiples (i.e., enterprise value or revenue), which requires significant professional judg ment by the valuation specialist

and is based on observable inputs (e.g., market data) and unobservable inputs (e.g., market participant a ssumptions). Prior to March 31, 2022, the

income approach was used to measure the fair value of Ampere. For the fiscal year ended March 31, 202 3, the PWERM approach was used for the fair value measurement. The PWER approach is based on discrete future exit scenarios to determine the

value of various equity securities. Under the PWER approach, the share value today is based on the prob ability-weighted, present value of expected future distributions, taking into account the rights and preferences of each debt and equity class.

The Company considers an initial public offering scenario, a sale scenario, and a scenario assuming continued operation as a private entity for future exit scenarios. The fair value computation under this approach includes key assumptions for time

to liquidity outcomes, discounted rate, and present value factors. The following table provides quantitative information related to certain key

assumptions utilized in the valuation of equity method investments accounted for under the fair value opti on: As of March 31, 2023 (in millions) Fair value Valuation Technique Unobservable Inputs Range of Esti mates Equity Method Investments \$482 Acetone – Market-Calibration or discounted cash flow LTM Reve nue Multiple 2.1x – 2.3x Ampere- PWER Probability of success IPO, time to future exit scenario, discount rate Probability weighted – 100%, Time to future exit scenario – 1.3 years, discount rate – 18.61% As of March 31, 2022 (in millions) Fair value Valuation Technique Unobservable Inputs Range of Estimates Equity Method Investments \$524 Market-Calibration or discounted cash flow LTM Revenue Multiple or projected cash flows 2.6x – 3.1x or probability weighted cash flows F-44 Table of Contents Arm Limited Notes to Consolidated Financial Statements Convertible Loans Receivable—Ampere In December 2021, the Company acquired a \$29.0 million convertible promissory note in Ampere, which is included in other non-current assets on the Consolidated Balance Sheets. As of March 31, 2023, the Company's maximum exposure to loss are the amounts invested in, and advanced to, Ampere. As of March 31, 2023 and

2022, the Company has not converted any of its convertible promissory note into equity. The fair value of the Ampere convertible loan is based upon

significant unobservable inputs, including the use of a probability weighted discounted cash flows model, r equiring the Company to develop its own assumptions. Therefore, the Company has categorized this ass et as a Level 3 financial asset. Some of the more significant unobservable inputs used in the fair value me asurement of the convertible loan include applicable discount rates, the likelihood

and projected timing of repayment or conversion, and projected cash flows in support of the estimated ent erprise value of Ampere. Changes in these assumptions, while holding other inputs constant, could result in a significant change in the fair

value of the convertible loan. If the amortized cost of the convertible loan exceeds its estimated fair value, the security is deemed to be impaired, and

must be evaluated for the recognition of credit losses. Impairment resulting from credit losses is recognize d within earnings, while impairment resulting from other factors is recognized in other comprehensive income (loss). As of March 31,

2023 and 2022, the Company has not recognized any credit losses related to this convertible loan. The fair value calculated using significant

unobservable inputs did not differ materially from the amortized cost basis for the fiscal year ended March 31, 2023 and 2022. Currency

Exchange Contracts For currency exchange contracts, these contracts are valued at the present value of

future cash flows based on forward exchange

rates at the balance sheet date. 14. Shareholder's Equity Cash Dividends In February 2021, a cash divide nd

of \$750.0 million (\$0.73 per ordinary share) was declared and paid to ordinary shareholders. No other dividends were declared or paid in the reporting periods presented in the consolidated financial statements. Other Shareholder Distributions In June 2021, the

Company distributed its ownership in Treasure Data to the immediate shareholders of the Company at a v alue of \$44.2 million. See Note 4, Discontinued Operations for further information. In March 2022, the Company distributed its ownership in Arm China to the immediate shareholders of the Company, which represented a non-cash distribution of \$975.7 million. See Note 10, Equity Investments for further information.

15. Restructuring and Other In March 2022, the Company announced a restructuring plan to align its wor kforce with strategic business activities and to improve efficiencies in its

operations. As a result of the restructuring plan, the Company F-45 Table of Contents Arm Limited Notes to Consolidated Financial Statements recognized a liability of \$25.8 million as of March 31, 2022. The liability of \$25.8 million is included in other current liabilities on the Consolidated Balance Sheets, of which \$17.4 million related to estimated one-time employee termination benefit costs and \$8.4 million related to costs associated with existing benefit arrangements. For the fiscal years ended

March 31, 2023 and 2022, the Company recognized restructuring expenses of \$1.5 million and \$25.8 million in restructuring and related costs on the Consolidated Income Statements in connection with these activities. Restructuring

activities were completed and the outstanding restructuring liability settled in the fiscal year ended March 31, 2023. 16. Share-based Compensation The Company had the following share-based payment arrange ments during the periods presented: Restricted Share Units—The Arm Limited All Employee Plan 2019 (" 2019 AEP") In December 2019, an RSU plan was established for all employees of the Company. Vesting of these RSUs under the 2019 AEP requires the continuous service of the

employees through the vesting date, is subject to the achievement of a market condition target, and vestin g occurs on the earliest of the following: (1) the occurrence of one of various events comprising a change in control of the Company,

(2) an initial public offering, or (3) the passage of time with the date being March 9, 2026. The market con dition target is tied to the valuation of the Company upon vesting. The plan allows for either share or cash settlement of the

RSUs at the discretion of the Company's remuneration committee. Upon the occurrence of a change in control or an initial public offering, and at the discretion of the Company's remuneration committee, each RS U converts into one ordinary

share on the vesting date. Conversely, upon the passage of time, each RSU is settled in cash at the vesting date. For all periods presented, a change in

control or an initial public offering is generally not considered probable until it has occurred. Accordingly, t he RSUs will only be settled in cash upon the passage of time and are accounted as liability-classified aw ards. The Company also

maintains a subplan for employees of its subsidiary, Arm Technology Israel Ltd. ("Arm Israel"), in which R SUs will be settled in cash at the vesting date upon the occurrence of a change in control, initial public off ering or the passage of

time with a long-stop date of March 9, 2026. Vesting requires continuous service until the passage of time and employees may elect not to

participate in the plan. RSUs are settled in cash at the vesting date and neither carry rights to dividends n or voting rights. Awards are forfeited if an employee leaves the Company before the RSUs vest. For all periods presented, the aggregate

nominal amount of shares over which the Company's remuneration committee may grant awards under the 2019 AEP will be limited so that it does not exceed at any time an amount equal to 2.2 percent of the aggregate nominal amount of the

Company's fully diluted equity share capital. As of March 31, 2023, 2022 and 2021, 11,601,185, 13,507,3 60 and 14,817,424 RSUs were outstanding, respectively. For the fiscal years ended March 31, 2023, 202 2, and 2021, \$56.0 million, 30.8 million and \$37.5 million of share-based compensation cost respectively, and \$11.6 million, \$5.4 million and \$3.2 million of tax benefit, respectively, was recognized.

As of March 31, 2023 and 2022, \$114.2 million and \$74.0 million was recognized as a liability for the

liability-classified RSUs under the 2019 AEP in the non-current portion of accrued compensation and shar e-based compensation on the Consolidated Balance Sheets, respectively. As of March 31, 2023, there was \$156.5 million of total unrecognized compensation cost related to awards issued under the 2019 AEP expected to be recognized over a weighted-average period of 2.94 years. During the period starting from May 2022 through June 2022, the Company's remuneration committee modified the terms of the 2019 AEP to accelerate the

vesting for approximately 435 employees affected by restructuring F-46 Table of Contents Arm Limited N otes to Consolidated Financial Statements activities initiated in the year ended March 31, 2022. The affect ed participants of the plan were provided the option to i) settle all unvested RSUs for a cash payment equi valent to the

product of (a) a fixed amount as determined by the Company's remuneration committee (b) 50% of the number of RSUs held by the participant, or ii) retain the RSUs until they become vested pursuant to the original vesting terms. The Company

accounted for this acceleration as a modification of vesting in connection with a settlement which resulted in the recognition of incremental share-based compensation cost. For the year ended March 31, 2023, the Company recognized incremental

share-based compensation cost of \$11.8 million related to the cash receipt option and \$2.2 million related to the RSUs retention option. The

table below identifies the RSU activity under the 2019 AEP for all periods presented: (in millions, except p er RSU amounts) Number of RSUs Weighted Average Fair Value Per RSU Total Fair Value Outstanding as of March 31, 2020 14,187,295 \$ 15.48 \$ 220 Granted 1,473,851 Vested — Cancelled and forfeited 84 3,722 Outstanding as of March 31, 2021 14,817,424 \$ 19.02 \$ 282 Granted 567,315 Vested — Cancelled and forfeited 1,877,379 Outstanding as of March 31, 2022 13,507,360 \$ 20.02 \$ 270 Granted 198,081 V ested 426,685 Cancelled and forfeited 1,677,572 Outstanding as of March 31, 2023 11,601,185 Expected to vest as of March 31, 2023 11,601,185 \$ 23.33 \$ 271 For the fiscal year ended March 31, 2023, liability classified share-based awards paid totaled \$15.9 million related

to the RSUs that had vesting conditions accelerated pursuant to restructuring activities, of which \$11.8 mil lion of share-based compensation cost was recognized in the current year. The Company did not have an y payments arising from normal

course vesting events for liability-classified share-based awards for the years ended March 31, 2023, 202 2 and 2021. The fair value of RSUs vested for the fiscal year ended March 31, 2023 was \$16.2 million. As of March 31, 2022,

none of the RSUs under the 2019 AEP had vested. For the fiscal year ended March 31, 2021, fair value of the RSUs was estimated using a discounted

cash flow approach based on the expected value for the Company as a result of a business combination, which was considered likely as of March 31, 2021. The expected payment was discounted using a risk-fre e rate of return based on the spot yield

on U.S. Treasury Bonds with a tenor equal to six months. The following table presents the assumptions u sed for the RSUs under the 2019 AEP for the fiscal

year ended March 31, 2021: Risk free interest rate 0.05 % Time to liquidity event (in years) 0.5 Discount F actor 0.9998 F-47 Table of Contents Arm Limited Notes to Consolidated Financial Statements For the fisc al year ended March 31, 2023 and 2022, the weighted average fair value of the RSUs was

measured using the Monte Carlo simulation model. The Monte Carlo methodology incorporates into the v aluation all possible outcomes that could result in the vesting of the awards. Where relevant, the expected term used in the model has been adjusted

based on the Company's best estimate for the effects of non-transferability and exercise restrictions (including the probability of meeting market conditions attached to the RSUs). The following table presents the assumptions used for the RSUs under the 2019 AEP for the relevant periods: Fiscal Year Ended March 3 1, 2019 AEP RSUs 2023 2022 Average share price \$ 41.51 \$ 39.27 Expected volatility until liquidity event 40 % 35 % Time to liquidity event (in years) 0.5 1.0 Dividend yield 0.00 % 0.00 % Risk free interest rate 4 .94 % 1.60 % Restricted Share Units—Executive IPO Plan ("2019 EIP") In April 2020, a RSU plan was put in place for certain of our executive officers. The vesting of these RSUs under the 2019 EIP requires the continuous service

of the employees through the vesting date, was originally subjected to the achievement of a market-condit ion target, and vesting occurs on the earliest of the following: (1) the occurrence of one of various events

comprising a change in control

of the Company, (2) an initial public offering, or (3) the passage of time with the date being March 9, 2026. At inception of the plan, the market condition target was tied to the valuation of the Company upon vesting. In September

2022, the Company modified the 2019 EIP to remove the market conditions. The 2019 EIP allows for eith er share or cash settlement of the RSUs at the

discretion of the Company's remuneration committee. Upon the occurrence of a change in control or an in itial public offering, and at the discretion of the Company's remuneration committee, each RSU converts into one ordinary share on the

vesting date. Conversely, upon the passage of time, each RSU is settled in cash at the vesting date. For all periods presented, a change in control or an initial public offering is generally not considered probable until it has occurred.

Accordingly, the RSUs would only be settled in cash upon the passage of time and were accounted as lia bility-classified awards. Employees require continuous service until the passage of time and may elect not to participate in the 2019 EIP. RSUs are

settled in cash at the vesting date and neither carry rights to dividends nor voting rights. Awards are forfeit ed if an employee leaves the Company before the RSUs vest. For all periods presented, the aggregate no minal amount of shares over which

the Company's remuneration committee may grant awards under the 2019 EIP will be limited so that it do es not exceed at any time an amount equal to 0.3 percent of the aggregate nominal amount of the Compa ny's fully diluted equity share

capital. As of March 31, 2023, 2022 and 2021, 192,999, 903,925 and 2,214,568 RSUs were outstanding, respectively. In September 2022, the Company

modified the 2019 EIP to remove the market conditions which were tied to the valuation of the Company u pon the vesting of the RSUs. All other terms under the 2019 EIP remained unchanged as a result of this modification and the RSUs remained as

liability-classified awards. The incremental share-based compensation cost was measured as the excess of the fair value of the modified RSUs over the fair value of the original RSUs immediately before their terms were modified at modification. As of

the modification date, incremental share-based compensation cost recognized was \$4.5 million. In December 2022, the Company's remuneration

committee approved the cancellation of 355,463 outstanding RSUs issued to an executive participant und er the 2019 EIP in exchange for a fixed monetary \$20.0 million F-48 Table of Contents Arm Limited Notes to Consolidated Financial Statements special RSU award ("Special RSU Award") issued under the 2022 Arm Limited RSU Award Plan. The incremental compensation cost of both the 2019 EIP and the Special RSU Award combined was

measured by comparing the fair value of the award immediately before and after the modification. The Co mpany accounted for this acceleration for the modification as a cumulative adjustment to the liability. As o f the modification date, the net

incremental compensation cost for the modified award was \$4.1 million. For the fiscal year ended March 3 1, 2023, 2022 and 2021,

\$0.1 million, \$(0.5) million and \$4.1 million, of share-based compensation cost (credit) was recognized in connection with awards issued under the 2019 EIP. The share-based compensation cost decrease and credit for the fiscal years ended

March 31, 2023 and 2022 were attributable to the replacement awards issued in December 2022 and exe cutive departures, respectively. There were no tax impacts related to the 2019 EIP RSUs for the fiscal years ended March 31, 2022. For the

fiscal year ended March 31, 2023 and 2021, the tax expense and benefit recorded was \$0.4 million and \$0.7 million, respectively. As of March 31, 2023 and 2022, \$3.6 million and \$3.5 million, was recognized in the non-current portion of accrued compensation and share-based compensation on the Consolidated Bal ance Sheets, respectively. As of March 31, 2023, there was \$3.6 million of total unrecognized compensation

cost related to liability-classified RSUs under the 2019 EIP expected to be recognized over a weighted-av erage period of 2.94 years. The table

below identifies the RSU activity under the 2019 EIP for the relevant periods presented: (in millions, exce

pt per RSU amounts) Number of RSUs Weighted Average Fair Value Per RSU Total Fair Value Outstanding as of March 31, 2020 — \$ — \$ — Granted 2,592,286 Vested — Cancelled and forfeited 377,718 Outst anding as of March 31, 2021 2,214,568 \$ 11.17 \$ 25 Granted — Vested — Cancelled and forfeited 1,310, 643 Outstanding as of March 31, 2022 903,925 \$ 11.77 \$ 11 Granted — Vested — Cancelled and forfeite d 710,926 Outstanding as of March 31, 2023 192,999 Expected to vest as of March 31, 2023 192,999 \$ 3 7.43 \$ 7 The Company did not have any payments for the liability-classified share-based awards for all periods presented. As of

March 31, 2023, 2022 and 2021, none of the RSUs under the 2019 EIP have vested. For the fiscal year ended March 31, 2021, fair value of the

RSUs was estimated using a discounted cash flow approach based on the expected value for the Compa ny as a result of a business combination, which was considered likely as of March 31, 2021. The expecte d payment was discounted using a risk-free

rate of return based on the spot yield on U.S. Treasury Bonds with tenor equal to six months. F-49 Table of Contents Arm Limited Notes to Consolidated Financial Statements The following table presents the ass umptions used for the RSUs under the 2019 EIP for the fiscal year ended March 31, 2021: Risk free inter est rate 0.05 % Time to transaction (in years) 0.5 Discount Factor 0.9998 For the fiscal year ended March 31, 2022, the weighted average fair value of the RSUs was measured using the Monte Carlo

simulation model. The Monte Carlo methodology incorporates into the valuation all possible outcomes that could result in the vesting of the awards. Where relevant, the expected term used in the model has been adjusted based on Company's best

estimate for the effects of non-transferability and exercise restrictions (including the probability of meeting market conditions attached to the RSUs). The following table presents the assumptions used for the RSUs under the 2019 EIP for the fiscal year ended March 31, 2022: Weighted average share price \$ 39.27 Expected volatility until liquidity event 35 % Time to liquidity event 1 Dividend yield 0.00 % Risk free interest rate 1.60 % The inputs used for both the discounted cash flow approach and the Monte Carlo simulation model are the same as those used for

the 2019 AEP for years ended March 31, 2021 and 2022, respectively. The fair value of the RSUs is adjusted for the different market conditions for each share-based plan for years ended March 31, 2021 and 20 22. For the fiscal year ended March 31, 2023, the Company used the income approach and market-calibration approach based on comparable publicly traded

companies in similar lines of businesses. Cash flow assumptions used in income approach considers hist orical and forecasted revenue, earnings before interest, taxes, depreciation and amortization (EBITDA) and other relevant factors. The following table presents the assumptions used for the RSUs under the 2019 EIP for the fiscal year ended March 31, 2023: 2019 EIP RSUs Average share price \$ 41.51 Transaction c osts 2.50 % Time to liquidity event (in years) 0.5 Discount for lack of marketability 7.50 % Phantom Share Scheme (Cash-Settled) In April 2017, a cash-settled share-based payment plan was put in place for cert ain of our executive officers. Under this plan, the employees are granted a

cash award annually on April 1, which vests over a three-year service period subject to continuous servic e and satisfaction of certain Company performance conditions. The cash amount which the employee is e ntitled to receive if employed at the

end of the three-year period is directly F-50 Table of Contents Arm Limited Notes to Consolidated Financi al Statements linked to the share price of the Company's ultimate parent, SoftBank Group. The number of Phantom Shares that vest is also linked to certain Company strategic performance conditions. The strategic performance conditions are non-market based vesting conditions and, as a result, the conditions do not affect the fair value of Phantom Shares at each reporting date. The strategic performance conditions are operational in nature and measure performance in areas such as product development, customer design wins and market

share across different technologies and markets. The conditions are linked directly to the Company's strat egic objectives, rather than any financial or other measures. As of March 31, 2023, there were no Phanto m Shares outstanding. As of March 31, 2022 and 2021, 64,862 and 224,268 Phantom Shares were outst anding,

respectively. The Company recognized a (credit) for share-based compensation cost of \$(0.5) million and \$(3.1) million in connection with the Phantom Shares for the fiscal years ended March 31, 2023, and 2022, respectively. The share-based

compensation credit for the fiscal year ended March 31, 2023 and 2022 was attributable to executive dep

artures. For the fiscal year ended March 31, 2021, the Company recognized share-based compensation c ost of \$11.1 million. The tax

expense recorded for the Phantom Shares was \$0.5 million and tax benefit was \$2.3 million for the fiscal years ended March 31, 2022 and 2021, respectively. There was no tax expense or benefit recorded for the year ended March 31,

2023. As of March 31, 2023, the total outstanding liability of \$1.1 million was recognized in accrued compensation and benefits on the

Consolidated Balance Sheets. As of March 31, 2022, the Company recognized a liability of \$3.0 million in accrued compensation and benefits and non-current portion of accrued compensation and

share-based compensation on the Consolidated Balance Sheets, respectively. As of March 31, 2023, ther e was no unrecognized compensation cost as all of the outstanding Phantom Shares have vested. The ta ble below identifies the Phantom Shares activity for all periods presented: (in millions, except per share a mounts) Number of Shares Weighted Average Fair Value Per Share Total Fair Value Outstanding as of M arch 31, 2020 211,075 \$ 19.59 \$ 4 Granted 134,076 Vested 84,618 Cancelled and forfeited 36,265 Outst anding as of March 31, 2021 224,268 \$ 58.41 \$ 13 Granted 17,844 Vested 32,198 Cancelled and forfeite d 145,052 Outstanding as of March 31, 2022 64,862 \$ 39.83 \$ 3 Granted — Vested 27,503 Cancelled and forfeited 37,359 Outstanding as of March 31, 2023 — \$ — \$ — Expected to vest as of March 31, 2023 — \$ — \$ — The Phantom Shares are required to be settled in cash and therefore are recorded on the Consolidated Balance Sheets as a

liability until settled. For the fiscal years ended March 31, 2023, 2022 and 2021, liability-classified share-b ased awards paid totaled \$1.5 million, \$7.1 million and \$2.6 million, respectively. For the fiscal years ended

March 31, 2023, 2022 and 2021, the total number of Phantom Shares vested were 27,503, 32,198 and F-51 Table of Contents Arm Limited Notes to Consolidated Financial Statements 84,618, respectively. The f air value of the Phantom Shares vested were \$1.1 million, \$1.5 million and \$7.1 million for fiscal years en ded March 31, 2023, 2022 and 2021,

respectively. As of March 31, 2023, the total amount vested but unpaid was \$1.1 million. The fair value of Phantom Shares measured at each reporting date was \$38.84, \$39.83 and \$58.41 for the fiscal years end ed March 31, 2023, 2022

and 2021, respectively. Restricted Share Units—2022 Arm Limited RSU Award Plan ("2022 RSU Plan") In June 2022, the 2022 RSU Plan was established to grant RSUs to all employees of the Company ("All Employee Awards"). Employees may elect not to

participate in the plan. The RSUs vest in tranches, require continuous service through the vesting date an d are subject to graded vesting over time. The 2022 RSU Plan provides vesting schedules applicable prior to and after an initial public

offering. For all periods, an initial public offering is generally not considered probable until it has occurred. Accordingly, the RSUs are currently probable of vesting based on the vesting schedule applicable prior to an initial public offering

over a three-year period and will vest by tranche through March 2025. The 2022 RSU Plan allows for eith er cash or share settlement of the RSUs by tranche

at the discretion of the Company's remuneration committee. At the time of issuance, the Company intend ed to settle the RSUs in shares at the vesting date and such RSUs are accounted for as equity-classified awards. The Company recognizes share

based compensation cost using the straight-line method over the service period of the award except for p erformance grants with specific performance criteria, net of estimated forfeitures. These RSUs neither car ry rights to dividends nor voting

rights until the shares are issued or transferred to the recipient. Awards are forfeited if an employee leave s the Company before the RSUs vest. For all periods presented, the aggregate nominal amount of shares over which the Company's

remuneration committee may grant awards under the 2022 RSU Plan will be limited so that it does not ex ceed at any time an amount equal to 4.0 percent of the aggregate nominal amount of the Company's fully diluted equity share capital. The Company granted additional awards under the 2022 RSU Plan to new hir es, starting in September 2022 ("New Starter Awards"). The New Starter

Awards share substantially the same terms as the existing RSUs for All Employee Awards with changes li mited to the vesting schedules. The New Starter Awards require continuous service through each vesting

date. The Company also granted additional RSUs to all employees and new hires of its subsidiary, Arm Is rael, starting in February 2023 (the "Israel

Awards"). The Israel Awards share substantially have the same terms as the existing RSUs for All Employ ee Awards and New Starter Awards with changes limited to the vesting schedules. The Israel Awards require continuous service through the

vesting date. In November 2022, the Company determined that it would settle the first tranche of the RSU s outstanding that vest in March and May 2023 by

paying cash instead of issuing equity. Other than the change in intent regarding form of settlement, no oth er terms or conditions regarding the RSUs were changed. The Company accounted for this change as a modification in accordance with ASC 718, Compensation—Stock Compensation, and reclassified the affected portion of the award from equity to liability and will remeasure the award at fair value at each reporting period through the date of settlement with consideration that total

compensation cost cannot be less than the grant-date fair-value-based measure of the original award. As a result of the modification, the Company recognized \$2.1 million of incremental share-based compensation cost at the time of the

modification and recorded \$31.7 million as a reclassification from equity to liability upon modification. 5,53 9 of employees were affected by this modification. F-52 Table of Contents Arm Limited Notes to Consolid ated Financial Statements The table below identifies the RSU activity under the 2022 RSU Plan for all per iods presented: (in millions, except per RSU amounts) Number of RSUs Weighted Average Grant Date F air Value per Share Outstanding as of March 31, 2022 — \$ — Granted 18,011,664 35.03 Vested 5,500,3 61 33.37 Cancelled and forfeited 1,381,569 34.88 Outstanding as of March 31, 2023 11,129,734 \$ 35.87 Expected to vest as of March 31, 2023 11,129,734 \$ 35.87 The number of RSUs reclassified from equity to liability was 5,226,149 which had a weighted average grant date fair value per

RSU of \$33.10. As of March 31, 2023, the total outstanding shares related to liability-classified and expect ed to vest awards was 284,036 with the weighted average fair value per RSU of \$40.47. For the fiscal year ended March 31, 2023,

\$234.8 million and \$1.9 million of share-based compensation cost was recognized in connection with the I iability-classified and equity-classified awards issued under the 2022 RSU Plan, respectively. The tax ben efit recorded for the fiscal

year ended March 31, 2023 was \$30.4 million. As of March 31, 2023, \$234.8 million, was recognized as c urrent liability in accrued compensation and benefits on the Consolidated Balance Sheets. As of March 31, 2023, the total

amount vested related to liability-classified awards but unpaid was \$228.3 million. No equity-classified RS Us vested under the 2022 RSU Plan during the fiscal year ended March 31, 2023. As of March 31, 2023, there was

\$392.7 million of total unrecognized compensation cost expected to be recognized over a weighted-avera ge period of 2.0 years. For the fiscal year

ended March 31, 2023, the Company used the income approach and market-calibration approach based on comparable publicly traded companies in similar lines of businesses. Cash flow assumptions used in the income approach considers historical and

forecasted revenue, earnings before interest, taxes, depreciation and amortization (EBITDA) and other rel evant factors. The following table presents the

assumptions used for the RSUs under the 2022 RSU Plan for the fiscal year ended March 31, 2023: 2022 RSU Plan Average share price \$35.16 – \$39.67 Transaction costs 2.50% Present value per RSU \$33.13 – \$39.67 Time to liquidity event (in years) 0.5 – 0.9 Discount for lack of marketability 0.00% – 7.50% Exec utive Awards Granted under the 2022 RSU Plan—Executive Awards In November 2022, the Company iss ued two types of executive awards (the "Annual Awards" and "Launch Awards") under the 2022 RSU Plan to

certain of our executive officers (collectively, the "Executive Awards"). These Executive Awards under the 2022 RSU Plan have total award values based on fixed monetary amounts known at inception and do not carry rights to dividends nor

voting rights. The Executive Awards entitle participants to a fixed amount of cash or, upon the occurrence of a change in control or an initial public offering, ordinary shares of the Company at the discretion of the Company's remuneration

committee. F-53 Table of Contents Arm Limited Notes to Consolidated Financial Statements Launch Awa

rds vest in tranches and require continuous service through the vesting dates and are subject to graded vesting over a period of three years. The Company also granted Launch Awards with customized vesting schedules to certain members of the Executive Committee with a potential fixed monetary amount of \$55.0 million at the grant date. These

customized awards vest upon (1) the occurrence of one of various events comprising a change in control of the Company, (2) an initial public offering, and (3) March 9, 2026. Annual Awards include a portion that vests over a three-year continuous service period and another portion that is subject to continuous service and

satisfaction of certain Company performance conditions. The time-based portion of the Annual Awards ve st over a three-year period. The Annual Awards that are subject to continuous service and satisfaction of certain Company performance conditions

vest upon the satisfaction of performance metrics as established for each one-year performance period a nd have the potential to vest between 0% and 200% of original fixed monetary amount of the award depending

on the achievement of annual performance metrics. Upon an initial public offering, and at the discretion of the Company's remuneration committee,

each Executive Award could be converted into a variable number of shares based on the closing share pri ce of the Company at the initial public offering date. As of March 31, 2023, awards are expected to settle in cash at the vesting date.

Awards are forfeited if an employee leaves the Company before the awards vest. For the fiscal year ende d March 31, 2023, \$32.2 million in

share-based compensation cost and \$6.2 million of tax benefit, was recognized in connection with the Ex ecutive Awards granted under the 2022 RSU Plan. As of March 31, 2023, \$32.2 million was recognized a s a liability comprising

\$18.4 million and \$13.8 million in the current portion and non-current liability, respectively for the liability-cl assified Executive Awards granted under the 2022 RSU Plan on the Consolidated

Balance Sheets. As of March 31, 2023, there was \$62.8 million of total unrecognized compensation cost r elated to liability-classified Executive Awards expected to be recognized over a weighted-average period of 2.6 years The Company did not have any payments arising from normal course vesting events for liability-classified awards for the fiscal year ended March 31, 2023.

As of March 31, 2023, none of the Executive Awards granted under the 2022 RSU Plan have vested. The table below shows the Company's commitment for potential payments and the liability recognized as of March 31, 2023: Type of Executive Award (in millions) Potential Fixed Monetary Amount Accrued Liability (1) Launch Awards \$ 80 \$ 23 Annual Awards 15 9 Total \$ 95 \$ 32 (1) Includes the amount recorded for p erformance-based awards that probable of achievement. The Arm Non-Executive Directors RSU Award P lan ("NED Plan") In September 2022, the Company established the NED Plan for non-executive directors. The RSU awards issued under the

NED Plan (the "NED Awards") are subject to time-based vesting and continued service of the non-executive directors. The NED Plan allows for either cash or share settlement of the awards at the

discretion of the Company's remuneration committee. As of March 31, 2023, the Company accounted for the NED Awards as liability-classified awards. The number of RSUs granted and outstanding for the fiscal year ended March 31, 2023 was 13,340. All RSUs have vested and unpaid as of fiscal year

March 31, 2023, and are expected to be settled in cash. For the year F-54 Table of Contents Arm Limited Notes to Consolidated Financial Statements ended and as of March 31, 2023, the share-based compensa tion cost and liability recognized was immaterial to the Company's Consolidated Income Statement and C onsolidated Balance Sheets,

respectively. Share-based Compensation Cost A summary of share-based compensation cost recognized on the Consolidated Income Statements was as follows: Fiscal Year Ended March 31, (in millions) 2023 2022 2021 Cost of sales \$ 12 \$ 1 \$ 2 Selling, general and administrative 102 7 29 Research and develop ment 212 18 23 Total \$ 326 \$ 26 \$ 54 No share-based compensation cost was capitalized during the fiscal years ended March 31, 2023, 2022 and 2021. 17. Income Taxes The components of income before provision for income taxes are as follows: (in millions) Fiscal Year Ended March 31, 2023 2022 2021 United Kingdom \$ 427 \$ 608 \$ 468 Foreign 244 178 229 Income from continuing operations before income taxes \$ 671 \$ 786 \$ 697 The expense (benefit) for income taxes consists of the following: (in millions) Fiscal Year Ended March 31, 2023 2022 2021 Current: United Kingdom \$ 87 \$ 44 \$ 30 Foreign 94 146 143 Total cur

rent tax expense \$ 181 \$ 190 \$ 173 Deferred: United Kingdom \$ (25) \$ 53 \$ 63 Foreign (9) (133) (83) T otal deferred tax benefit \$ (34) \$ (80) \$ (20) Total income tax expense \$ 147 \$ 110 \$ 153 F-55 Table of Contents Arm Limited Notes to Consolidated Financial Statements A reconciliation of the United Kingdom statutory income tax rate to the effective tax rate is as follows: (in millions) Fiscal Year Ended March 31, 2023 2022 2021 Income tax expense (benefit) at statutory rate \$ 127 \$ 149 \$ 132 Foreign tax rate differe ntial 2 (8) 23 Research and development tax credits (37) (25) (25) Change in valuation allowances 5 (2 2) (85) Non-deductible/non-taxable items 3 (3) 15 Patent box benefit (25) (69) (33) Impact of UK rate change 2 64 13 Withholding tax 72 32 107 Gains exempt from UK tax (2) (8) 6 Income tax expense (ben efit) \$ 147 \$ 110 \$ 153 Income tax expense reported in the statement of profit and loss 147 110 153 Income tax expense/(credit) attributable to discontinued operations — 28 (38) The reconciliation of the statutory rate to the effective tax rate is performed at the UK current year statutory rate of 19%.

In June 2021, legislation was enacted in the U.K. to increase the corporation tax rate to 25% with effect fr om April 2023. Income tax expense was

\$147 million, \$110 million and \$153 million for the fiscal years ended March 31, 2023, 2022 and 2021, res pectively. Arm's effective tax rate for the fiscal years ended March 31, 2023, 2022 and 2021 was 22%, 14% and 22%,

respectively. The Company's effective tax rate increased by 8% primarily due to significant irrecoverable withholding taxes in the fiscal year ended March 31, 2023. F-56 Table of Contents Arm Limited Notes to Consolidated Financial Statements The significant components of deferred tax assets and liabilities is as f ollows: As of March 31, (in millions) 2023 2022 Lease liability \$ 13 \$ 14 Fixed assets 23 15 Tax losses and R&D tax credits 147 145 Equity investments 7 5 Share-based compensation 30 10 Reserves and other I iabilities 27 45 Total gross deferred tax assets 247 234 Less: valuation allowance (21) (16) Total deferred tax assets, net of valuation allowance 226 218 Right of use assets (12) (16) Acquired intangibles (6) (6) Outside basis differences (110) (116) Hedging reserve (3) — Contract liabilities (218) (224) Total deferred tax liabilities (349) (362) Net deferred tax liabilities \$ (123) \$ (144) As of March 31, 2023, the Company had a United Kingdom corporate tax loss carryforward of \$42 million

(\$10 million tax effected) and U.K. R&D Expenditure Credits of \$37 million. These tax losses have no expiration date. The Company has U.S. federal net operating loss carryforwards of approximately \$14 million (\$3 million tax

effected) of which \$1 million has no expiration date and \$13 million (\$3 million tax effected) will expire bet ween fiscal years 2033 and 2038 if not utilized. The Company also has a tax asset in respect of state net operating losses

of \$46 million (\$3 million net of federal benefit) which will expire between fiscal years 2025 and 2043 if not utilized. The Company has U.S. Federal tax credit carryforwards of \$72 million which will expire between 2035 and 2043. In

addition, the Company has state tax credits of \$37 million (\$29 million net of federal benefit) of which \$22 million has no expiration date and \$15 million will expire between 2037 and 2043. As of March 31, 2023, the Company has provided a valuation allowance on certain U.K. tax losses and US State R&D tax credits. This is based on an

analysis of historical taxable income, the projected reversal of deferred tax liabilities, projected taxable income and tax planning strategies. The Company believes, more likely than not, that it will have sufficient taxable income to utilize its

remaining deferred tax assets. Utilization of the U.S. federal net operating loss and tax credit carryforward s may be subject to annual limitations due

to the ownership change limitations provided by the U.S. Internal Revenue Code of 1986, as amended, a nd similar state provisions. Such annual limitations could result in the expiration of the net operating loss and tax credit carryforwards before

their utilization. The events that may cause ownership changes include, but are not limited to, a cumulative stock ownership change of greater than 50% over a three-year period. As of March 31, 2023, the Company intends to indefinitely reinvest approximately \$154 million of cumulative undistributed earnings of its U.S.

subsidiaries and no deferred tax liability was recorded for these undistributed earnings. F-57 Table of Contents Arm Limited Notes to Consolidated Financial Statements The following table reflects changes in gross unrecognized tax benefits: Fiscal Year Ended March 31, (in millions) 2023 2022 2021 Gross unrecognized tax benefits — April 1 \$ 54 \$ 75 \$ 68 Gross increases — tax positions in prior period 6 2 16 Gross de

creases — tax positions in prior period — — (1) Gross increases — tax positions in current period 7 6 4 Settlements (1) (28) (9) Lapse of statute of limitations (1) — (3) Foreign exchange (3) (1) — Gross un recognized tax benefits — March 31 \$ 62 \$ 54 \$ 75 Included in the balance of unrecognized tax benefits as of March 31, 2023, 2022 and 2021 are \$56 million,

\$44 million and \$65 million, respectively, of tax benefits that, if recognized, would affect the effective tax r ate. The Company recognizes

interest accrued related to unrecognized tax benefits and penalties as income tax expense. The Company recognized expense of \$0.8 million, \$0.7 million and \$8.0 million for interest and penalties associated to income tax liabilities

as of March 31, 2023, 2022 and 2021, respectively. As of March 31, 2023, 2022 and 2021, the Company had total accrued interest and penalties of \$14.2 million, \$15.8 million and \$15.5 million, respectively, whi ch is included

in other non-current liabilities on the Consolidated Balance Sheets. While the Company believes it has ad equately

provided for all tax positions, amounts asserted by tax authorities could be greater or less than the positio n. Accordingly, provisions on federal, state and foreign tax-related matters to be recorded in the

future may change as revised estimates are made or the underlying matters are settled or otherwise resol ved. As of March 31, 2023, the Company has not identified any positions for which it is reasonably possible that the total amounts of

unrecognized tax benefits will significantly increase or decrease within the next twelve months. The Company is subject to taxation in the United Kingdom

and various states and foreign jurisdictions. As of March 31, 2023, the Company is no longer subject to ex amination by the United Kingdom tax authorities for the fiscal years ended March 31, 2018 or earlier. U.S. Federal returns for the

calendar year ended December 31, 2003 and later periods are subject to audit with the exception of the c alendar years ended December 31, 2011 to December 31, 2012. F-58 Table of Contents Arm Limited Not es to Consolidated Financial Statements 18. Net Income (Loss) Per Share The following tables present a reconciliation of basic and diluted earnings per share computations for all periods presented: Fiscal Year Ended March 31, (in millions, except per share amounts) 2023 2022 2021 Income (loss) attributable to or dinary shareholders — basic and diluted Net income from continuing operations \$ 524 \$ 676 \$ 544 Net lo ss from discontinued operations — (127) (156) Net income (loss) \$ 524 \$ 549 \$ 388 Weighted average o rdinary shares used to calculate income (loss) per share —

basic 1,025,234,000 1,025,234,000 1,025,234,000 Equity-classified shared-based awards 2,271,008 — Weighted average ordinary shares used to calculate income (loss) per share —

diluted 1,027,505,008 1,025,234,000 1,025,234,000 Income (loss) per share attributable to ordinary share holders — basic Net income from continuing operations \$ 0.51 \$ 0.66 \$ 0.53 Net loss from discontinued o perations — (0.12) (0.15) Net income (loss) \$ 0.51 \$ 0.54 \$ 0.38 Income (loss) per share attributable to ordinary shareholders — diluted Net income from continuing operations \$0.51 \$ 0.66 \$ 0.53 Net loss from discontinued operations — (0.12) (0.15) Net income (loss) \$ 0.51 \$ 0.54 \$ 0.38 F-59 Table of Contents Arm Limited Notes to Consolidated Financial Statements Securities that would have been anti-dilutive were excluded from the computation of diluted earnings per

share for all periods presented. The following securities were not included in the computation of diluted sh ares outstanding primarily because for all reporting periods a change in control or an initial public offering was not probable to occur

under GAAP, and therefore, settlement of securities is expected in cash upon the passage of time. Fiscal Year Ended March 31, 2023 2022 2021 Restricted stock units (1) 16,870,903 14,230,025 17,612,777 Exe cutive Awards (2) 546,262 — Total 17,417,165 14,230,025 17,612,777 (1) Total RSUs include amount s associated with discontinued operations where applicable, but exclude certain awards

which require cash settlement and do not allow for share settlement. (2) Executive Awards include amounts associated with the Annual Awards and Launch Awards. As these awards require

settlement based on a fixed monetary amount, the quantity of securities was calculated based on the total fixed monetary amount divided by the closing average market price of ordinary shares. 19. Commitments and contingencies Litigation From time to time, the Company is party

to litigation and other legal proceedings in the ordinary course of business. While the results of any litigati on or other legal proceedings are uncertain, management does not believe the ultimate resolution of any

pending legal matters is likely to

have a material adverse effect on the Company's financial position, results of operations or cash flows. The Company accrues for loss contingencies when it is both probable that it will incur the loss and when the Company can reasonably

estimate the amount of the loss or range of loss. In the fiscal year ended March 31, 2023, the Company r ecorded a \$40.0 million loss contingency related to an offer made by the Company in respect of an ongoing contract dispute between the

Company and a non-top five customer. That particular customer's claims arise from a contract dating to a very early period in the Company's history and that contract is both non-standard and significantly dissimil ar from other customers' contracts. The Company took into consideration advice received from experts in the specific matter and current status of settlement negotiations,

which may be ongoing. A complaint has not been filed by either party, and the Company and the custome r are involved in ongoing negotiations to resolve the dispute outside of court. The Company can provide n o assurances as to the ultimate resolution

of this dispute or whether it will ultimately be litigated or to the ultimate costs that will be associated with a resolution. The liability of \$40.0 million is included in other current liabilities on the Consolidated Balance Sheets. No other

material amounts related to litigation settlements were recognized in the fiscal years ended March 31, 202 3, 2022 and 2021. Kronos Guarantee In March 2022, a wholly owned United Kingdom subsidiary of SoftB ank Group, Kronos I (UK) Limited ("Kronos"), was created for the purpose

of SoftBank Group arranging a facility agreement (the "Facility Agreement") with J.P. Morgan SE as Facility Agent to be secured by its 75.01% equity interest in the Company. SoftBank Group pledged its ownership interest in the Company by

transferring such interest to an entity that sits between Kronos and the Company, and SoftBank Group has no further obligation under the Facility Agreement. The Company is in compliance with all applicable operating and financial covenants pursuant

to the Facility Agreement for the fiscal years presented. Under the Facility Agreement, the lenders initially were committed to make up to

\$8.0 billion of funds available to Kronos under a "Bridge Facility" and "Term Facility" (together with the Bridge Facility, the "Facility"). In March 2022, the Term Facility was funded for \$7.1 billion and the

Bridge Facility was funded for \$0.9 billion. F-60 Table of Contents Arm Limited Notes to Consolidated Fin ancial Statements In June 2022, an amendment was executed which expanded the total commitment of the Term Facility to

\$8.5 billion via an additional term facility of \$1.4 billion, \$0.9 billion of which was used to repay the Bridge Facility in full with the remaining \$0.5 billion representing incremental debt. The Term Facility matures on the

earlier of two years after Kronos draws upon the facility or three months after the effective date of a public listing of the Company's ordinary shares. Beyond the pledge of the 75.01% interest in the Company as c ollateral for the Facility, in March 2022, the Company entered into the Arm Undertaking (the

"Undertaking") to confirm and agree to comply with certain terms of the Facility Agreement (including oper ational restrictions) and a springing guarantee and indemnity agreement (the "Guarantee") with J.P. Morg an SE. The

Guarantee commences upon an "Arm Guarantee Trigger Event," which includes a public listing of the Company's ordinary shares not occurring within 18 months of the closing date of the Facility or any public an nouncement or notice to

lenders that a listing will not be undertaken and failure by the Company or its subsidiaries to comply with the obligations under the Undertaking. Until an Arm Guarantee Trigger Event occurs, the Company is not obligated to perform or make payment

on the obligations of Kronos. Once an Arm Guarantee Trigger Event has occurred, the Company guarant ees all overdue payments under the Facility Agreement.

The total commitment is \$8.5 billion and would only become a potential obligation to the Company if Kron os were to default on any such obligation, as Kronos remains the primary obligor under the Facility Agree ment even after an Arm Guarantee

Trigger Event. Upon default, the lenders can satisfy their claim either through the collateral of 75.01% interest in the Company or through the Company servicing the debt and meeting payment obligations pursua

nt to the Guarantee. SoftBank Group as

the owner of Kronos may avoid default by restructuring the Facility Agreement, or otherwise monetizing the collateral for the necessary liquidity to meet payment obligations under the Facility Agreement. The Company believes that the likelihood of

assuming the debt obligations under the Guarantee is remote due to Kronos' significant collateralization of the obligations under the Facility Agreement and that SoftBank Group will avoid a default by Kronos for which the obligations would

become enforceable against the Company. As the Company's potential obligation is an issued Guarantee to the lenders for obligations of Kronos, an

entity under common control, the Company is not required to recognize the Guarantee. Arduino Guarante e The Company is guarantor for a \$5.4 million credit facility available to Arduino SA. The guaranty expires in January 2024. As of March 31, 2023 and

2022, no claims have been made against the guaranty. 20. Retirement Benefits Plans The Company cont ributes to defined contribution plans substantially covering all employees in Europe and the U.S., and to g overnment pension plans for

employees in Japan, South Korea, Taiwan, Peoples Republic of China, Israel and India. The Company contributes to these plans based upon various fixed percentages of employee compensation, and such contributions are expensed as incurred. For the fiscal years ended March 31, 2023, 2022, and 2021, \$78.4 million, \$77.0 million, and \$67.6 million, respectively was recorded in

the Consolidated Income Statements related to contributions payable to these plans by the Company at r ates specified in the rules of the plans. As of March 31, 2023 and 2022, \$9.6 million and \$9.3 million, respectively, of

contributions due had not been paid over to the plans and were recorded in accrued compensation and b enefits on the Consolidated Balance Sheets. F-61 Table of Contents Arm Limited Notes to Consolidated F inancial Statements 21. Related Party Transactions Arm China and Acetone Limited Subsequent to the restructuring of its direct investment in Arm China, the Company has a 10% non-voting ownership interest in Acetone Limited, whose primary asset is a 48.18% interest in Arm China. The Company has no direct material transactions with Acetone Limited. For the fiscal years ended March 31, 2023, 2022 and 2021, the Company recognized revenue of

\$649 million, \$474.2 million and \$413.1 million, respectively under the terms of the IPLA and recognized e xpenses of \$64.1 million, \$63.5 million and \$52.7 million, respectively from Arm China under a service sh are

arrangement with Arm China. The Company leases certain assets to Arm China. For the fiscal years ende d March 31, 2023, 2022 and 2021, the Company recognized rental income of \$2.0 million, \$1.6 million and \$1.0 million, respectively, from this lease arrangement. As of March 31, 2023, the Company had a net r eceivable of \$386.9 million (\$400.7 million receivable less \$13.9 million payable) from Arm

China. As of March 31, 2023, the Company had contract liabilities of \$103.4 million. As of March 31, 2022, the Company had a net receivable of \$574.3 million (\$602.2 million receivable less \$27.9 million payable) from

Arm China. As of March 31, 2022, the Company had contract liabilities of \$122.4 million relating to Arm C hina. See Note 10, Equity

Investments, for discussion of the impact of Arm China and Acetone Limited on the Company's results, a nd the distribution of the Company's shareholding in Arm China to the owners of the Company in the fisca I year ended March 31,

2022. Other Entities Related by Virtue of Common Control in SoftBank Group The Company also had oth er revenue and expense transactions, along with receivable and balances with other entities by virtue of common control in SoftBank

Group. For the fiscal years ended March 31, 2023, 2022 and 2021, the Company recognized revenue of \$ 1.3 million, \$1.5 million and zero, respectively, and expenses of \$0.3 million, \$1.7 million and \$0.2 million, respectively. As of March 31, 2023, the Company had accounts receivable, other receivables and contract liabilities of \$0.5 million, \$12 million and \$1.6 million, respectively. As of March 31, 2022, the Company had accounts

receivable and other receivables of \$2.1 million and \$12.0 million, respectively. The Company also had im material lessee leases with a certain related party by virtue of common control in SoftBank Group. For the fiscal years ended March 31, 2022 and 2021, from discontinued operations, the Company recognized rev

enue of \$3.6 million and

\$8.3 million and expenses of \$0.2 million and \$5.4 million, respectively. Prior to the distribution of Treasur e Data in June 2021, a loan

of \$50.0 million was issued by SoftBank Vision Fund II, a member of SoftBank Group to Treasure Data. In terest on this loan balance was charged at 2.0% per annum. The loan balance, including accrued interest, was included in the distribution to

shareholders of the Company. Refer to Note 4, Discontinued Operations, for discussion regarding the distribution of Treasure Data and the sale of

IoTP by the Company to SoftBank Group Capital Limited in the fiscal year ended March 31, 2022. SoftBank Group Facility In March 2022, Kronos entered into the Facility Agreement which is secured by its 75.01 % interest in the Company. The Company also entered into the Undertaking

to confirm and agree to comply with the terms of the F-62 Table of Contents Arm Limited Notes to Consoli dated Financial Statements Facility Agreement and a Guarantee of the obligations under the Facility Agreement owed by Kronos, an entity under common control of SoftBank Group. Under the terms of the Guarantee, upon an Arm

Guarantee Trigger Event, the Guarantee springs into effect, such that any future payment default by Kron os following such date may require performance by the Company if not settled by use of the share collater all or otherwise restructured. Refer to

Note 19, Commitments and Contingencies for further details on this Guarantee. The Guarantee does not spring into effect if a public listing has become effective, and if a public listing takes place after the Guarantee has become effective,

the Guarantee terminates. Other Equity Investments The Company has revenue transactions, along with r eceivable and contract liability balances for certain other equity investees, for which the Company has significant influence or, for investments in limited partnerships or certain limited liability companies that m aintain a specific ownership account for each investor, has more than virtually no influence (i.e., at least 3 % to 5% ownership). For the

fiscal years ended March 31, 2023, 2022 and 2021, the Company recognized revenue of \$3.5 million, \$8.5 million and \$34.8 million, respectively. As of March 31, 2023, the Company had accounts receivable, contract assets and contract liabilities of \$0.5 million, \$8.7 million and

\$30.2 million, respectively. As of March 31, 2022, the Company had accounts receivable, contract assets and contract liabilities of \$7.4 million, \$0.5 million and \$15.5 million, respectively. For the fiscal years ende d March 31, 2023, 2022 and 2021, the Company recognized aggregate distributions and dividends from c ertain equity investments of

zero, \$1.9 million and \$5.0 million, respectively. Linaro Limited Linaro Limited ("Linaro") is a not-for-profit entity for which the

Company is a member and exhibits significant influence. For the fiscal years ended March 31, 2023, 2022 and 2021, the Company incurred subscription costs of \$8.9 million, \$7.9 million and \$8.4 million, respectively, from Linaro.

As of March 31, 2023 and 2022, \$0.3 million and zero was owed to Linaro. In the fiscal year ended March 31, 2021, the Company earned fees

of \$1.3 million for providing consulting and other services to Linaro. All fees have been charged in accord ance with the terms of the agreement. As of March 31, 2023, no amount was owed to the Company. In Fe bruary 2023, the Company entered into an agreement with Linaro to sell certain net assets of the Company that meets the definition of a business in

exchange for cash consideration of \$4.0 million to be paid in equal annual installments over five years. As of March 31, 2023 total purchase consideration remained unpaid. As a result of the transaction, in the year ended March 31,

2023, the Company derecognized associated net asset and recognized a gain of \$3.7 million in other non -operating income (loss), net on the Consolidated Income Statement. Loans to Related Parties The Company's

equity investment in Trustonic Limited was written down to zero carrying value due to recognition of the C ompany's share of losses. Accordingly, the Company's subsequent share of losses has been written off a gainst the loan balance due

from Trustonic Limited. For the fiscal year ended March 31, 2022, the loan balance was written down to z ero, through a combination of impairment and losses recognized. As of March 31, 2023 and 2022, the Co

mpany had a loan receivable of \$19.2 million and \$23.0 million, respectively with Arduino, a related party, which was subject to impairment considerations. As of March 31, 2022, the Company also had an o utstanding loan receivable of \$3.0 million with Cerfe Labs, Inc., a related party. For the fiscal year ended March 31, 2023, the Company

fully impaired the loan receivable from Cerfe Labs. Refer to Note 11, Financial Instruments, for further information regarding these loans. F-63 Table of Contents Arm Limited Notes to Consolidated Financial Statements As of March 31, 2023 and 2022, the Company also had a convertible loan receivable from Amper e. a related

party, of \$30.9 million \$29.0 million, respectively. Refer to Note 13, Fair Value, for further information reg arding this loan. Other relationships In the year ended

March 31, 2023, the Company entered into an agreement with Raine Securities LLC, a related party, for c ertain advisory services. For the year ended March 31, 2023, the Company incurred \$2.5 million in fees w hich remain unpaid as of

the fiscal year end. 22. Segment and Geographic Information The Company has determined its Chief Exe cutive Officer is its chief operating decision maker. The Company's Chief Executive Officer reviews financial

information presented on a consolidated basis for purposes of assessing performance and making resour ce allocation decisions. Accordingly, the Company has determined that it operates as a single operating a nd reportable segment. Revenue by geographic region is allocated to individual countries based on the principal headquarters of customers. The geographical locations are not

necessarily indicative of the country in which the customer sells products containing the Company's techn ology IP. The following table summarizes information pertaining to revenue from customers based on the principal headquarter address by

geographic regions: (in millions) Fiscal Year Ended March 31, 2023 2022 2021 United States \$ 1,088 \$ 1, 243 \$ 843 PRC 657 476 428 Taiwan 359 431 306 Republic of Korea 241 226 213 Other Countries 334 32 7 237 Total \$ 2,679 \$ 2,703 \$ 2,027 For the fiscal year ended March 31, 2023, the Company had three cu stomers that collectively represented 44% of total

revenue (42% for the fiscal years ended March 31, 2022 and 2021), with the single largest customer accounting for 24% of total revenue (18% and 20% for the fiscal years ended March 31, 2022 and 2021, respectively), the second largest

customer accounting for 11 % of total revenue (12% for the fiscal years ended March 31, 2022 and 2021) and the third largest customer accounting for 9% of total revenue (12% and 10% for the fiscal years ended March 31, 2022 and 2021,

respectively). No other customer represented 10% or more of total revenue for all periods presented. Arm China, represented 40% of total receivables as

of March 31, 2023 (54% of total receivables as of March 31, 2022). No other customer represented more t han 10% of receivables for the period presented. Long-lived assets by geographic area based on physical location of the assets are as follows: As of March 31, (in millions) 2023 2022 United Kingdom \$ 281 \$ 28 3 United States 78 103 Other Countries 32 31 Total \$ 391 \$ 417 F-64 Table of Contents Arm Limited Not es to Consolidated Financial Statements 23. F-70 Ta ble of Contents 1. Description of Business and Summary of Significant Accounting Policies Description of Business Arm Limited ("the

Company") is a global leader in the semiconductor industry. The Company's principal operations are the li censing, marketing, research and development of microprocessors, systems intellectual property ("IP"), gr aphics processing

units, physical IP and associated systems IP, software, tools and other related services. Basis of Present ation The accompanying unaudited condensed consolidated financial statements have been prepared in c onformity with accounting principles generally accepted in the

U.S. ("GAAP") and pursuant to the rules and regulations of the Securities and Exchange Commission ("S EC") regarding interim financial information. Certain information and note disclosures normally included in the consolidated

financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations. As such, the information included in the accompanying unaudited condensed consolidated financial statements should be read

in conjunction with the audited consolidated financial statements and the related notes thereto as of and f or the fiscal year ended March 31, 2023, included elsewhere in the Form F-1. In the opinion of manageme nt, the accompanying unaudited condensed consolidated financial statements reflect all adjustments, con sisting of normal recurring

adjustments, which are necessary for the fair statement of the condensed consolidated balance sheets, in come statements and cash flows for these interim periods. The results for the interim periods are not necessarily indicative of results for the

full fiscal year. Principles of Consolidation The accompanying financial statements include the accounts of the Company and its wholly owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation. The financial statements consolidate all of the Company's affiliates, and the entities where the Company holds a

controlling financial interest, because the Company holds a majority voting interest. The Company reevalu ates whether there is a controlling financial interest in all entities when rights and interests change. Use of Estimates The preparation of financial

statements in conformity with GAAP requires management to make estimates and assumptions that affect reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements

and the reported amounts of revenues and expenses during the reporting periods. Significant items subject to such estimates include, but are not limited to, revenue recognition, allowance for doubtful accounts, income taxes, share-based

compensation, impairment considerations for long-lived assets, fair value estimates and impairment for in vestments. The Company evaluates these estimates on an ongoing basis and revises estimates as circu mstances change. The Company bases its

estimates on historical experience, anticipated results, trends, and other various assumptions that it believ es are reasonable. Inputs used in judgments and estimates consider the economic implications of COVID -19. The impact of COVID-19 related estimates were not material to the unaudited condensed consolidate d financial statements. Derivative Financial Instruments and Hedge Activities The Company uses derivative financial instruments, specifically foreign currency forward contracts, to mitigate exposure from certain foreign currency risk.

Certain forecasted transactions, specifically British Pound Sterling ("GBP") denominated cash flows in the form of payroll and selling, general and administrative expenses are exposed to foreign currency risk. The Company monitors

foreign currency exposures on a monthly basis to maximize the economic effectiveness of foreign currency hedge positions. F-71 Table of Contents No derivatives were designated hedges prior to July 2022. All d

erivatives are recorded at fair value as

either an asset or liability. For derivatives not designated as hedges, adjustments to reflect changes in the fair value of the derivatives are included in earnings in other non-operating income (loss), net on

the Condensed Consolidated Income Statements. In July 2022, all foreign currency forward contracts wer e designated as cash flow hedges in designated

hedging relationships with the forecasted foreign denominated cash flows as the hedged transactions. The maximum length of time over which the Company is hedging its exposure to the variability in future foreign denominated cash flows is one year.

For cash flow hedges that qualify and are designated for hedge accounting, the change in fair value of the derivative is recorded in the net change in fair value of the effective portion of designated cash flow hedges on the Condensed Consolidated

Statements of Comprehensive Income, and subsequently recognized in research and development and s elling, general and administrative expenses on the Condensed Consolidated Income Statements when the hedged transaction affects earnings. The Company classifies all derivative assets and liabilities for designated and non-designated derivatives in prepaid

expenses and other current assets and other current liabilities on the Condensed Consolidated Balance S heets. The Company classifies cash flows from the settlement of effective cash flow hedges for designate d and non-designated derivatives in the same category as the cash flows from the related hedged items in operating activities on the Condensed Consolidated Statements of Cash Flows. The foreign currency for ward

contracts are classified under Level 2 of the fair value hierarchy. See Note 6, Fair Value. The Company classifies cash flows from the settlement of

effective cash flow hedges in the same category as the cash flows from the related hedged items, general ly in operating activities on the Condensed Consolidated Statements of Cash Flows. The Company classif ies cash flows from settlement of non-designated derivatives in investing activities on the Condensed Consolidated Statements of Cash Flows. Recent

Accounting Pronouncements There have been no recent accounting standard updates that are material or potentially material to the Company. 2. Revenue Revenue Recognition License and Other Revenue • Intellectual property license — The Company generally licenses IP under non-exclusive license agreements that provide usage rights for specific applications for a finite or perpetual term. These licenses are made available electronically to address the customer-specific business requirements. These arrangements generally have distinct

performance obligations that consist of transferring the licensed IPs, version extensions of architecture IP or releases of IPs, and support services. Support services consist of a stand-ready obligation to provide te chnical support, patches, and

bug fixes over the support term. Revenue allocated to the IP license is recognized at a point in time upon the delivery or beginning of license term, whichever is later. Revenue allocated to distinct version extensions of architecture IP or releases

of IP, excluding when-and-if-available minor updates over support term, are recognized at a point in time upon the delivery or beginning of license term, whichever is later. Certain license agreements provide cus tomers with the right to access a library of current and future IPs on an unlimited basis over the contractual period depending on the terms of the applicable contract. These licensing arrangements repre sent stand-ready obligations in that the delivery of the underlying IPs is within the control of the customer and the extent of use in any given

period does not diminish the remaining performance obligations. The contract consideration related to the se arrangements is recognized ratably over the term of the contract in line with when the control of the per formance obligations is transferred. F-72 Table of Contents • Software sales, including development systems — Sales of software, including development systems,

which are not specifically designed for a given license (such as off-the-shelf software), are recognized up on delivery when control has been transferred and customer can begin to use and benefit from the license

. • Professional services — Services (such as training and professional and design services) that the Company provides, which are not essential to the functionality of the IP, are separately stated and priced in the contract and accounted for separately. Training revenue is recognized as services are performed. Revenue from professional and design

services are recognized over time using the input method based on engineering labor hours expended to

date relative to the estimated total effort required. For such professional and design services, the Company has an enforceable right to payment

for performance completed to date, which includes a reasonable profit margin and the performance of suc h services do not create an asset with an alternative use. • Support and maintenance — Support and maintenance is a stand-ready obligation to the customer that is

both provided and consumed simultaneously. Revenue is recognized on a straight-line basis over the peri od for which support and maintenance is contractually agreed pursuant to the license. Royalty Revenue F or certain IP license agreements,

royalties are collected on products that incorporate the Company's IP. Royalties are recognized on an acc rual basis in the quarter in which the customer ships their products, based on the Company's technology t hat it contains. The accrual

is estimated using trend analysis based on market and sales data as well as customer specific financial in formation. As a result of estimating the amount of royalty revenue accrual in the period in which the customer sales occur using estimates

based on sales trends and judgment for several key attributes, including industry estimates of expected s hipments, the percentage of markets using our products, and average selling price. Adjustments to reven ues are required in subsequent periods to

reflect changes in estimates as new information becomes available, primarily resulting from actual amounts subsequently reported by the licensees. Disaggregation of Revenue A summary of the

Company's disaggregated revenues are as follows: Fiscal Quarter Ended June 30, External Customers R elated Parties Total (in millions) 2023 2022 2023 2022 2023 2022 License and Other Revenue (1) \$ 180 \$ 147 \$ 95 \$ 111 \$ 275 \$ 258 Royalty Revenue 355 377 45 57 400 434 \$ 535 \$ 524 \$ 140 \$ 168 \$ 675 \$ 6 92 (1) Includes over-time revenues of \$17 million and \$24 million and point-in-time revenues of \$258 million and \$234 million for the fiscal quarters ended June 30, 2023 and 2022, respectively. F-73 Table of Contents Revenue by geographic region is allocated to individual countries based on the principal headquart ers of the

customers. The geographical locations are not necessarily indicative of the country in which the customer sells products containing the Company's technology IP. The following table summarizes information pertaining to revenue from customers

based on the principal headquarter address by geographic regions: Fiscal Quarter Ended June 30, (in mill ions) 2023 2022 United States \$ 292 \$ 265 PRC 141 167 Taiwan 115 100 Republic of Korea 45 61 Other countries 82 99 Total \$ 675 \$ 692 For the fiscal quarter ended June 30, 2023, the Company had three cu stomers that collectively represented 41% of total

revenue, with the single largest customer accounting for 21% of total revenue (24% for the fiscal quarter e nded June 30, 2022), the second largest customer accounting for 10% of total revenue (12% for the fiscal quarter ended June 30, 2022) and the

third largest customer accounting for 10% of total revenue (11% for the fiscal quarter ended June 30, 202 2). No other customer represented 10% or more of total revenue for all periods presented. Receivables A summary of the components of

accounts receivable, net is as follows: (in millions) As of June 30, 2023 As of March 31, 2023 Trade receivables \$ 491 \$ 625 Royalty receivables 409 377 Total gross receivables 900 1,002 Allowance for current expected credit losses (3) (3) Total accounts receivables, net \$ 897 \$ 999 A summary of the movement in the allowance for current expected credit losses is as follows: (in millions) Total Balance as of March 31, 2023 \$ 3 Additional provision — Amounts written off during the quarter as uncollectible — Balance as of June 30, 2023 \$ 3 The largest customer represented 33% of total receivables as of June 30, 2023 (40% of total receivables as of

March 31, 2023). The second largest customer represented 13% of total receivables as of June 30, 2023 (Less than 10% of total receivables as of March 31, 2023). No other customer represented 10% or more of receivables for the period

presented. Contract Assets The timing of

revenue recognition may differ from the timing of invoicing to customers. Contract assets are created whe n invoicing occurs subsequent to revenue recognition. Contract assets are transferred to accounts F-74 T able of Contents receivable when the right to invoice becomes unconditional. Contract assets increased by \$115 million and \$254 million due to the timing of billings to customers, which fell into

subsequent periods, as of June 30, 2023 and March 31, 2023, respectively, offset by \$83 million and \$25

0 million of contract assets transferred to accounts receivable, as of June 30, 2023 and March 31, 2023, respectively. The balance and activity for loss allowances related to contract assets was immaterial for all periods presented. Contract

Liabilities A reconciliation of the movement in contract liabilities is as follows: (in millions) Total Current Contract Liabilities Opening balance \$ 293 Non- Current Contract Liabilities Opening

balance 807 Balance as of April 01, 2023 \$ 1,100 Customer prepayment and billing in advance of perform ance 87 Revenue recognized in the period that was included in the contract liability balance at the

beginning of the period (37) Revenue recognized in the period that was included in the contract liability be alance during the

period (25) Balance as of June 30, 2023 \$ 1,125 Current portion of contract liabilities \$ 342 Non-current p ortion of contract liabilities \$ 783 Satisfied Performance Obligations Revenue recognized from previously satisfied performance obligations in prior reporting periods was \$401 million and \$448 million for the fiscal quarters ended June 30, 2023 and 2022, respectively. These amounts primarily represent royalties earned during the period. Remaining

Performance Obligations Remaining performance obligations represent the transaction price allocated to performance obligations that are

unsatisfied, or partially unsatisfied, which includes unearned revenue and amounts that will be invoiced a nd recognized as revenue in future periods. The

Company has elected to exclude potential future royalty receipts from the disclosure of remaining perform ance obligations. In certain arrangements, the Company's right to consideration may not correspond directly with the performance of

obligations. Revenue recognition occurs upon delivery or beginning of license term, whichever is later. Ac cordingly, the analysis between time bands below has been estimated, but the final timing may differ from these estimates. In the absence of

sufficient information, where the timing of satisfaction of the remaining performance obligations is depend ent on a customer's action, the transaction price allocated to such performance obligation is included in the e outer-year time band unless

contract or option expiration aligns with an earlier period or category. As of June 30, 2023, the aggregate t ransaction price allocated to remaining

performance obligations was \$1,681.0 million, which includes \$18.3 million of non-cancellable and non-ref undable committed funds received from certain

customers, where the parties are in negotiations regarding the enforceable rights and obligations of the ar rangement. The Company expects to recognize

approximately 23% of remaining performance obligations as revenue over the next 12 months, 14% over the subsequent 13-to 24-month period, and the remainder thereafter. F-75 Table of Contents 3. Equity Investments A summary of the components of equity investments is as follows: (in millions) As of June 30, 2023 As of March 31, 2023 Equity method investments under fair value option \$582 \$592 Equity method investments under equity method 9 9 Non-marketable equity securities 136 122 Total equity investments \$727 \$723 Income (loss) from equity investments, net is as follows: Fiscal Quarter Ended June 30, (in millions) 2023 2022 Equity method investments (1) \$ (10) \$ (23) Non-marketable equity securities (includes NAV) 3 9 Total loss from equity investments, net \$ (7) \$ (14) (1) Includes equity method investments where the Company elected the fair value option, including those under the

NAV practical expedient, along with investments accounted for under the equity method. The Company el ected the fair value option to

account for certain equity method investments in Acetone Limited and Ampere Computing Holdings LLC ("Ampere"). See discussion below, along with Note 6, Fair Value, for further information. For the fiscal quar ters ended June 30, 2023 and 2022, income (losses) from equity method investments not accounted und er the fair value option or the NAV

practical expedient was immaterial. The Company holds equity method investments in funds accounted for under the fair value option that apply the NAV

practical expedient. The estimated fair values of the Company's equity securities at fair value that qualify f or the NAV practical expedient were provided by the partnerships based on the indicated market values of the underlying assets or

investment portfolios. As of June 30, 2023 and March 31, 2023, the carrying value of equity method invest ments under the fair value option measured at NAV was \$109.5 million and \$109.4 million, respectively. F

or the fiscal quarter ended June 30, 2023 and 2022, the Company recognized losses from changes in fair value of \$0.4 million and \$0.2 million,

for equity method investments accounted for under the NAV practical expedient. Changes in fair value are recorded through income from equity investments, net on the Condensed Consolidated Income Stateme nts. Acetone Limited As of June 30, 2023 and

March 31, 2023, the carrying value of the Company's equity method investment in Acetone Limited was \$ 82.8 million and \$92.4 million, respectively. For the fiscal quarter ended June 30, 2023 and 2022, the Company recognized

fair value losses of \$9.6 million and \$22.0 million, respectively in connection with the equity method invest ment in Acetone Limited. F-76 Table of Contents Ampere As of June 30, 2023 and March 31, 2023, the c arrying value of the Company's equity method investment in Ampere was \$389.8 million and

\$389.8 million, respectively. For the fiscal quarters ended June 30, 2023, and 2022, the Company did not recognize any changes in fair value in Ampere, respectively. As of June 30, 2023 and March 31, 2023, the outstanding balance of the convertible promissory note with Ampere was \$31.3 million and

\$30.9 million, respectively. The Company's maximum exposure to loss are the amounts invested in, and a dvanced to, Ampere as of June 30, 2023. Non-marketable Equity Securities Non-marketable securities are those for which the Company does not have significant influence or control. These

represent either direct or indirect, through a capital fund, investments in unlisted early-stage development enterprises which are generating value for shareholders through research and development activities. The Company holds equity interests in

certain funds which are accounted for under the NAV practical expedient. As of June 30, 2023 and March 31, 2023, the carrying value of assets measured at NAV was \$20.6 million and \$18.0 million, respectively. For the fiscal

quarters ended June 30, 2023 and 2022, the Company recognized gains and losses from changes in fair value of \$2.5 million and \$3.7 million, respectively, for non-marketable securities accounted for under the NAV practical expedient. Historically, the Company had an unrecognized trade receivable with a customer given the collectability of

substantially all of the consideration was not probable. In March 2023, the Company invested in non-mark etable preferred stock from the customer in exchange for the conversion of the trade receivables for \$12.7 million. The Company also acquired additional non-marketable preferred stock in exchange for a cash payment of \$10.7 million. Currently, the Company does not recognize any revenue and receivables due to not meeting the collectability criterion under ASC 606, Revenue from Contracts with C ustomers. The Company does not have significant influence or control over the customer and elected to a pply the measurement alternative for this

investment. In the fiscal quarter ended June 30, 2023, the Company entered into a subscription letter with a subsidiary of SoftBank Vision Fund and

Kigen (UK) Limited ("Kigen"), an entity of which SoftBank Vision Fund indirectly owned 85% of the share c apital on a fully diluted basis with the remainder comprising management incentives. Pursuant to the subscription letter, the Company

and this subsidiary of SoftBank Vision Fund each invested \$10 million paid in cash in exchange for prefer ence shares of Kigen. The preference shares are convertible into common shares of Kigen and are entitle d to full dividends, distribution

and voting rights. The Company does not have significant influence or control over Kigen and elected to a pply the measurement alternative for this investment. The Company elected to apply the measurement alternative to all other non-marketable equity securities. Under the

measurement alternative, these equity securities are recorded at cost minus impairment, if any, plus or minus changes resulting from qualifying observable price changes in orderly transactions. The components of gains (losses) which primarily include unrealized gains and losses on non-marketable securities

inclusive of those measured under the NAV practical expedient are as follows: Fiscal Quarter Ended June 30, (in millions) 2023 2022 Observable price adjustments on non-marketable equity

securities (includes NAV) \$ 3 \$ 11 Impairment of non-marketable equity securities — (1) Sale of non-marketable equity securities — Total income from equity investments, net \$ 3 \$ 10 F-77 Table of Contents The total amount of financial commitments to existing investees of the Company not provided for in the condensed consolidated financial statements was \$21.4 million and \$22.1 million as of June 30, 2023, and March 31, 2023, respectively. 4. Financial Instruments Loans and Other Receivables Loans and other

receivables carried at amortized cost is as follows: (in millions) As of June 30, 2023 As of March 31, 2023 Loan and other receivables carried at amortized cost Loans receivable \$ 26 \$ 25 Other receivables 18 18 Allowance for current expected credit losses (22) (22) Loans and other receivables carried at amortized cost, net \$ 22 \$ 21 The allowance for current expected credit losses reflects the Company's best estimate of expected credit losses of the

receivables portfolio determined on the basis of historical experience, current information, and forecasts of future economic conditions. Loans

receivable For the fiscal year ended March 31, 2021, the loan receivable of \$23.0 million from Arduino SA ("Arduino") was impaired

in full as the balance was not expected to be recovered, resulting in the recognition of an expected credit I oss of \$23.0 million. For the fiscal quarter ended June 30, 2022, the Company reduced the allowance for expected credit losses

given the change in collectability with a corresponding reversal of expense for the portion of the loan receivable that was repaid in exchange for Series B preferred stock in Arduino. The remaining balance of loan receivables as of June 30, 2023 and March 31, 2023 comprised a four-year loan of \$3.0 million issued to Cerfe

Labs, Inc. The loan was fully impaired in the fiscal year ended March 31, 2023, subsequent to June 30, 2 022. Other receivables Balances included in other receivables comprised mainly of the \$12.0 million receivable from SoftBank Group Capital Limited recorded in prepaid and other

current assets on the Condensed Consolidated Balance Sheets as of June 30, 2023 and March 31, 2023 related to the Company's November 2021 sale of Pelion IOT Limited and its subsidiaries ("IoTP"). Convert ible Loans Receivable In June 2020, the

Company acquired a \$2.9 million principal balance convertible loan in PragmatIC Semiconductor Limited ("PragmatIC"). The entire convertible loan was converted to equity of PragmatIC Semiconductor Limited in October 2021. As of

June 30, 2023 and March 31, 2023 the carrying value of the Company's non-marketable equity security in PragmatIC was \$39.0 million, respectively. The Company accounts for the investment

using the measurement alternative because the securities are not publicly traded and do not have a readil y determinable fair value. F-78 Table of Contents In December 2021, the Company acquired a \$29.0 milli on principal balance convertible loan in Ampere.

The Company elected the fair value option to measure this convertible loan receivable for which changes in fair value are recorded in other non-operating income (loss), net on the Condensed Consolidated Income

Statements. For the fiscal quarters ended June 30, 2023 and 2022, there were no material gains recogniz ed. 5. Derivatives As of June 30, 2023, the notional value of outstanding foreign currency forward contract s was £215.0 million and the fair value was

\$9.7 million. As of March 31, 2023, the notional value of outstanding foreign currency forward contracts w as £340.0 million and the fair value was \$9.3 million. The following table presents the notional amounts of the Company's outstanding derivative instruments: (in millions) As of June 30, 2023 As of March 31, 2023 Designated as cash flow hedges Foreign currency forward contracts \$ 264 \$ 411 Non-designated hedge s Foreign currency forward contracts \$ — \$ — The following table presents the fair value of the Company's outstanding derivative instruments: Derivative Assets Derivative Liabilities (in millions) As of June 30, 20 23 As of March 31, 2023 As of June 30, 2023 As of March 31, 2023 Designated as cash flow hedges For eign currency forward contracts \$ 10 \$ 10 \$ — \$ 1 Non-designated hedges Foreign currency forward contracts \$ — \$ — \$ — Cash Flow Hedge Gains (Losses) The following table presents net gains (losses) on foreign currency forward contracts designated as cash flow hedges for the fiscal quarter ended June 3 0.

2023. The Company did not have currency forward contracts designed as cash flow hedges for the fiscal quarter ended June 30, 2022: (in millions) Fiscal Quarter Ended June 30, 2023 Consolidated Statements of Comprehensive Income: Gains recognized in Accumulated other comprehensive income on cash flow hedge derivatives \$ 10 (Gain) loss reclassified from Accumulated other comprehensive income into income (10) Tax expense on cash flow hedges \$ — Net change in fair value of the effective portion of designated cash flow hedges, net of

tax \$ — Consolidated Income Statements, before tax: Research and development \$ 5 Selling, general and administrative expenses \$ 5 (1) All amounts reported in accumulated other comprehensive income at the

e reporting date are expected to be

reclassified into earnings within the next 12 months. F-79 Table of Contents As of June 30, 2023, the Company's cash flow hedges were highly effective with immaterial amounts

of ineffectiveness recorded in the Condensed Consolidated Income Statements for these designated cash flow hedges and all components of each derivative's gain or loss were included in the assessment of hed ge effectiveness. Non-designated Hedging Instrument Gains (Losses) The following table presents net ga ins (losses) on derivatives not designated as hedging instruments recorded in non-operating income (loss), net on the Condensed Consolidated Income Statements: Fiscal Quarter Ended June 30, (in millions) 20 23 2022 Foreign currency forward contracts \$ — \$ (30) The Company classifies foreign currency forward contracts as Level 2 fair value measurements pursuant to the fair value

hierarchy. See Note 6, Fair Value, for further details. 6. Fair Value To provide an indication about the reli ability of the inputs used in determining fair value, the Company classifies its fair value financial instruments into

the three levels prescribed under GAAP. An explanation of each level follows the tables and qualitative di sclosures below. There were no transfers between fair measurement levels for any periods presented. The following table presents the Company's fair value hierarchy for the liability measured and recognized at fair value as of June 30, 2023 and

March 31, 2023 on a recurring basis: As of June 30, 2023 As of March 31, 2023 (in millions) Level 1 Level 2 Level 3 Total Financial liabilities Foreign currency forward contracts \$—\$—\$—\$—\$—\$1\$—\$1 Total financial liabilities \$—\$—\$—\$—\$1\$—\$1 The following table presents the Company's fair value hierarchy for assets measured and recognized at fair value, excluding investments where the NAV practical expedient has been elected as of June 30, 2023 and Mar ch 31, 2023 on a recurring basis: As of June 30, 2023 As of March 31, 2023 (in millions) Level 1 Level 2 Level 3 Total Level 1 Level 2 Level 3 Total Financial assets Short-term investments (1) \$801\$—\$—\$8 01\$661\$—\$—\$661 Equity method investments (2) — 473 473 — 482 482 Convertible loans receivable — 31 31 — 31 31 Foreign currency forward contracts — — — 10 — 10 Total financia I assets \$801\$—\$504\$1,305\$661\$10\$513\$1,184(1) Short-term investments represent term deposits with banks with a maturity between three and 12 months. (2) In accordance with Subtopic 820-10, i nvestments that are measured at

fair value using the NAV practical expedient are not classified in the fair value hierarchy. F-80 Table of Contents The following tables summarize changes in the fair value, along with other activity associated with the

Company's Level 3 financial assets and liabilities: Equity Method Investments (in millions) As of June 30, 2023 As of March 31, 2023 Fair value of financial assets at the beginning of the period \$ 482 \$ 524 Additions, net of contributions from shareholders of the Company — Fair value losses recognized in the income statement (10) (42) Distributions to shareholders of the Company — Fair value at the end of the period \$ 472 \$ 482 Convertible Loans Receivable (in millions) As of June 30, 2023 As of March 31, 2023 Fair value of financial assets at the beginning of the period \$ 31 \$ 29 Additions — — Converted into equity — Fair value gains recognized in the income statement — 2 Fair value at the end of the period \$ 31 \$ 31 See below for a description of the valuation techniques and inputs used in the fair value measurement of Level 3

investments including equity method investments, convertible loans receivable, and currency exchange c ontracts. Equity Method Investments The Company elected the fair value option in accordance with the g uidance in ASC 825, Financial Instruments ("ASC 825") for its

investments in Acetone Limited, and Ampere. The Company initially computed the fair value for its invest ments consistent with the methodology and assumptions that market participants would use in their estim ates of fair value with the assistance of

a third-party valuation specialist or based on inputs from the investee. The fair value computation is updat ed on a quarterly basis. The investments are classified within Level 3 in the fair value hierarchy because the Company estimates the

fair value of the investments using the (i) the market-calibration approach based on the guideline public c ompany method and/or (ii) subject to availability of sufficient information, the income approach based on the discounted cash flow

method and iii) the probability-weighted, expected return ("PWER") approach. The market-calibration approach considers valuation multiples that

are calibrated to the valuation as of the prior valuation date (i.e., quarterly) based on: (a) changes in the b roader market or industry; (b) changes in the guideline public companies; and (c) changes in the company's operating

and financial performance. The fair value computation under this approach includes a key assumption for the range of valuation multiples (i.e., enterprise value or revenue), which requires significant professional j udgment by the valuation

specialist and is based on observable inputs (e.g., market data) and unobservable inputs (e.g., market par ticipant assumptions). For the fiscal quarters

ended June 30, 2023, the PWER approach was used to measure the fair value of Ampere. The PWER approach is based on discrete future exit scenarios to determine the value of various equity securities. F-81 Table of Contents Under the PWER approach, the share value today is based on the probability-weighted, present value of expected future distributions, taking into account the rights and preferences of each debt

and equity class. The Company considers an initial public offering scenario, a sale scenario, and a scenar io assuming continued operation as a private entity for future exit scenarios. The fair value computation under this approach includes key

assumptions for time to liquidity outcomes, discounted rate, and present value factors. The following table s provide quantitative information related to

certain key assumptions utilized in the valuation of equity method investments accounted for under the fair value option: As of June 30, 2023 and March 31,

2023 (in millions) Fair value as of June 30, 2023 Fair value as of March 31, 2023 Valuation Technique Un observable Inputs Range of Estimates Equity Method Investments \$ 473 \$ 482 Acetone – Market-Calibrat ion or discounted cash flow Ampere – PWER LTM Revenue Multiple Probability of success IPO, time to f uture exit scenario, discount rate 1.9x – 2.3x Probability weighted – 100%, discount rate – 18.61% Conver tible Loans Receivable—Ampere In December 2021, the Company acquired a \$29.0 million convertible pr omissory note in Ampere, which is included in other non-current assets on the Condensed Consolidated Balance Sheets. As of June 30, 2023 and March 31, 2023, the Company's maximum exposure to loss are the amounts invested in, and advanced to,

Ampere. As of June 30, 2023 and March 31, 2023, the Company has not converted any of its convertible promissory note into equity. The fair

value of the Ampere convertible loan is based upon significant unobservable inputs, including the use of a probability weighted discounted cash flows model, requiring the Company to develop its own assumption s. Therefore, the Company has categorized

this asset as a Level 3 financial asset. Some of the more significant unobservable inputs used in the fair v alue measurement of the convertible loan

include applicable discount rates, the likelihood and projected timing of repayment or conversion, and projected cash flows in support of the estimated enterprise value of Ampere. Changes in these assumptions, while holding other inputs constant,

could result in a significant change in the fair value of the convertible loan. If the amortized cost of the convertible loan exceeds its estimated fair

value, the security is deemed to be impaired, and must be evaluated for the recognition of credit losses. I mpairment resulting from credit losses is recognized within earnings, while impairment resulting from othe r factors is recognized in other

comprehensive income (loss). As of June 30, 2023 and March 31, 2023, the Company has not recognize d any credit losses related to this convertible loan. The fair value calculated using significant unobservable inputs did not differ materially from the amortized cost basis for the fiscal quarters ended

June 30, 2023 and 2022. Currency Exchange Contracts For currency exchange contracts, these contracts are valued at the present value of future cash flows based on forward exchange rates at the balance sheet

date. F-82 Table of Contents 7. Share-based Compensation The Company had the following share-based payment arrangements during the periods presented: Restricted Share Units—The Arm Limited All Employee Plan 2019 ("2019 AEP") With respect to the 2019 AEP, for the fiscal quarters ended June 30, 2023, and 2022, the Company recognized \$80.2 million and \$4.6 million of

share-based compensation cost, respectively, and \$14.5 million and \$0.8 million of tax benefit associated with these awards, respectively, As of June 30, 2023 and March 31, 2023, \$194.4 million and \$114.2 million

on was

recognized as a liability in the non-current portion of accrued compensation and share-based compensation on the Condensed Consolidated Balance Sheets, respectively. As of June 30, 2023, there was

\$225.5 million of total unrecognized compensation cost related to awards issued under the 2019 AEP expected to be recognized over a weighted-average period of 2.7 years. During the period starting from May 2022 through June 2022, the Company's remuneration committee modified the terms of the 2019 AEP to accelerate the

vesting for approximately 435 employees affected by restructuring activities initiated in the year ended Ma rch 31, 2022. The affected participants of the plan were provided the option to i) settle all unvested RSUs for a cash payment equivalent

to the product of (a) a fixed amount as determined by the remuneration committee (b) 50% of the number of RSUs held by the participant, or ii) retain the RSUs until they become vested pursuant to the original ve sting terms. The Company

accounted for this acceleration as a modification of vesting in connection with a settlement which resulted in the recognition of incremental share-based compensation cost. For the fiscal quarter ended June 30, 2 022, the Company recognized

incremental share-based compensation cost of \$11.8 million related to the cash receipt option and \$2.2 m illion related to the RSUs retention option, respectively. The table below identifies the RSU activity under the 2019 AEP for the fiscal quarter ended June 30, 2023: (in millions, except per RSU amounts) Number of RSUs Weighted Average Fair Value Per RSU Total Fair Value Outstanding as of March 31, 2023 11,601,185 \$23.33 \$271 Granted — Vested — Cancelled and forfeited 107,637 Outstanding as of June 30, 202 311,493,548 \$36.53 \$420 Expected to vest as of June 30, 2023 11,493,548 \$36.53 \$420 For the fiscal quarter ended June 30, 2022, liability-classified share-based awards paid totaled \$15.9 million

related to the RSUs that had vesting conditions accelerated pursuant to restructuring activities, of which \$ 11.8 million of share-based compensation was recognized in the fiscal quarter ended June 30, 2022. For the fiscal quarters

June 30, 2023 and 2022, the Company did not have any payments arising from normal course vesting events. Restricted Share Units—Executive

IPO Plan ("2019 EIP") For the fiscal quarters ended June 30, 2023 and 2022, \$0.8 million and \$(0.6) million of share-based

compensation cost (credit) was recognized in connection with awards issued under the 2019 EIP. The sh are-based compensation credit for the fiscal quarter ended June 30, 2022 was attributable to executive de partures. For the fiscal quarters

ended June 30, 2023 and 2022, the tax benefit and expense recorded was \$0.1 million and \$0.1 million, r espectively. As of June 30, 2023 and March 31, 2023, \$4.4 million and \$3.6 million, was recognized in the non-current portion of accrued compensation and share-based compensation on the Condensed Consoli dated F-83 Table of Contents Balance Sheets, respectively. As of June 30, 2023, there was \$3.7 million of total unrecognized compensation expense related to liability-classified RSUs under the 2019 EIP expect ed to

be recognized over a weighted average period of 2.7 years. The table below identifies the RSU activity un der the 2019 EIP for the fiscal quarter ended

June 30, 2023: (in millions, except per RSU amounts) Number of RSUs Weighted Average Fair Value Per RSU Total Fair Value Outstanding as of March 31, 2023 192,999 \$ 37.43 \$ 7 Granted — Vested — Canc elled and forfeited — Outstanding as of June 30, 2023 192,999 \$ 42.12 \$ 8 Expected to vest as of June 30, 2023 192,999 \$ 42.12 \$ 8 The Company did not have any payments for liability-classified share-based awards for the fiscal quarter ended June 30,

2023. As of June 30, 2023 and March 31, 2023, none of the RSUs under the 2019 EIP have vested. Phan tom Share Scheme (Cash-Settled) As of June 30, 2023 and March 31, 2023, there were no Phantom Shares outstanding. The Company recognized a credit for share-based

compensation cost of \$0.3 million in connection with the Phantom Shares for the fiscal quarter ended Jun e 30, 2022, which was attributable to executive departures. There was no tax benefit or expense recorded for the Phantom Shares for the

fiscal quarter ended June 30, 2022. As of March 31, 2023, \$1.1 million was recognized in accrued compensation and benefits on the Condensed Consolidated Balance Sheets. For the fiscal quarter ended June 30, 2023, the Company paid

\$0.9 million for the vested Phantom Shares. The variance between the amount accrued and paid of \$1.1 million and \$0.9 million, respectively, was driven by foreign exchange differences as participants were paid in foreign denominated

currencies. As of June 30, 2023, the Company did not have any unpaid amounts in relation to the vested awards. Restricted Share Units –

2022 Arm Limited RSU Award Plan ("2022 RSU Plan") In June 2022, the 2022 RSU Plan was established to grant RSUs to all employees of the

Company ("All Employee Awards"). The RSUs vest in tranches, require continuous service through the ve sting date and are subject to graded vesting over time. The 2022 RSU Plan allows for either cash or shar e settlement of the RSUs by

tranche at the discretion of the Company's remuneration committee. At the time of issuance, the Company intended to settle the RSUs in shares at the vesting date and such RSUs were accounted for as equity-classified awards. In November 2022, the Company determined that it would settle the first tranche of the RSUs outstanding that vested in March and May 2023 by paying cash

instead of issuing equity. Other than the change in intent regarding form of settlement, no other terms or c onditions regarding the RSUs were changed. The Company accounted for this change as a modification in accordance with ASC 718, Compensation—Stock Compensation, and reclassified the affected portion of the award from equity to liability and will remeasure the award at fair value at each reporting period through the date of settlement with consideration that total

compensation cost cannot be less than the grant-date fair-value-based measure of the original award. F-8 4 Table of Contents The table below identifies the RSU activity under the 2022 RSU Plan for the fiscal quarter ended

June 30, 2023: (in millions, except per RSU amounts) Number of RSUs Weighted Average Grant Date Fa ir Value Per RSU Outstanding as of March 31, 2023 11,129,734 \$ 35.87 Granted 16,274,852 43.33 Veste d 100,154 31.71 Cancelled and forfeited 239,083 39.64 Outstanding as of June 30, 2023 27,065,349 \$ 40.34 Expected to vest as of June 30, 2023 27,065,349 \$ 40.34 As of June 30, 2023 and March 31, 2023, the total outstanding shares related to liability-classified and expected to

vest was 183,882 and 284,036 with the weighted average fair value per RSUs of \$46.98 and \$40.47, respectively. For the fiscal quarter ended June 30, 2023, the Company paid \$232.5 million arising from the nor mal vesting of

liability-classified share-based awards. The remaining liability-classified awards will vest in August 2023. For the fiscal quarters ended June 30, 2023 and 2022, \$63.3 million and \$9.5 million of share-based compensation cost was

recognized in connection with RSUs, respectively. The tax benefits recorded for the fiscal quarters ended June 30, 2023 and 2022 were \$11.8 and \$1.3 million, respectively. As of June 30, 2023, \$60.7 million and \$6.8 million were

recognized in additional paid-in capital and accrued compensation and benefits on the Condensed Consol idated Balance Sheets, respectively. As of March 31, 2023, the Company recognized \$1.9 million and \$234.8 million in additional paid-in capital and accrued compensation and benefits on the Condensed

Consolidated Balance Sheets. As of June 30, 2023, there was a \$1,026.4 million for total

unrecognized compensation expense expected to be recognized over a weighted-average period of 2.5 y ears. Executive Awards Granted under the 2022

RSU Plan – Executive Awards In November 2022, the Company issued two types of executive awards (the "Annual Awards" and

"Launch Awards") under the 2022 RSU Plan to certain of our executive officers (collectively, the "Executive Awards"). The Executive Awards entitle participants to a fixed amount of cash or, upon the occurrence of a change in

control or an initial public offering, ordinary shares of the Company at the discretion of the remuneration c ommittee. As of June 30, 2023, awards are expected to settle in cash at the vesting date. For the fiscal qu arter ended June 30, 2023, \$13.4 million in share-based compensation cost and \$2.5 million of tax benefit, was recognized in

connection with the Executive Awards granted under the 2022 RSU Plan. As of June 30, 2023, \$20.6 milli on was recognized as a liability comprising \$3.3 million and \$17.3 million in accrued compensation and be nefits and non-current portion of accrued compensation and share-based compensation on the Condense d Consolidated Balance Sheet, respectively. As of March 31, 2023, \$32.2 million was recognized as a liab

ility

comprising \$18.4 million and \$13.8 million in accrued compensation and benefits and non-current portion of accrued compensation and share-based compensation on the Consolidated Balance Sheets. As of June 30, 2023, there was \$75.2 million of total unrecognized compensation cost related to liability-classified Executive Awards expected to be recognized over a weighted-average period of 2.2 years. F-85 Table of Contents As of June 30, 2023, Executive Awards vested and paid was \$25 million due to the normal course of

vesting for liability-classified awards. The table below shows the Company's commitment for potential pay ments and the liability recognized as of June 30, 2023: Type of Executive Award (in millions) Potential Fix ed Monetary Amount Accrued Liability (1) Launch Awards \$ 70 \$ 18 Annual Awards 25 2 Total \$ 95 \$ 20 (1) Includes the amount recorded for performance-based awards that probable of achievement. Share-based Compensation Cost A summary of

share-based compensation cost recognized on the Condensed Consolidated Income Statements is as foll ows: Fiscal Quarter Ended June 30, (in millions) 2023 2022 Cost of sales \$ 6 \$ 1 Selling, general and ad ministrative 49 6 Research and development 103 6 Total \$ 158 \$ 13 No share-based compensation cost was capitalized as of June 30, 2023 and March 31, 2023. 8. Income Taxes For the fiscal quarters ended J une 30, 2023 and 2022, income tax expense was \$22 million and \$61 million, respectively. The income tax expense as a

percentage of income before taxes was 17% and 21% for the fiscal quarters ended June 30, 2023 and 20 22, respectively. The effective tax rate

decreased compared to the same period last year primarily due to a reduction in irrecoverable overseas w ithholding tax. The effective tax rates for the

fiscal quarters ended June 30, 2023 and 2022 differed from the United Kingdom statutory rate of 25% and 19%, respectively, primarily due to patent box and research and development tax credits. The impact of the increase in the United Kingdom statutory rate was offset by an increase in patent box benefit. F-86 Table of Contents 9. Net Income (Loss) Per Share The following table presents a reconciliation of basic and diluted earnings per share computations for all periods presented: Fiscal Quarter Ended June 30, (in millions, except per share amounts) 2023 2022 Net income \$ 105 \$ 225 Weighted average ordinary shares used to calculate basic net income (loss) per share 1,025,234,000 1,025,234,000 Equity-classified awards 3,384,467 668,205 Weighted average ordinary shares used to calculate diluted net income (loss) per share 1,028,618,467 1,025,902,205 Net income per ordinary share - basic \$ 0.10 \$ 0.22 Net income per ordinary share - diluted \$ 0.10 \$ 0.22 Securities that would have been anti-dilutive were excluded from the computation of diluted earnings per share for all periods

presented. The following securities were not included in the computation of diluted shares outstanding pri marily because for all reporting periods a change in control or an initial public offering was not probable to occur, and therefore, settlement

of securities is expected in cash upon the passage of time. As of June 30, 2023 2022 Restricted stock units (1) 11,143,275 12,331,875 Executive awards (2) 441,457 — Total 11,584,732 12,331,875 (1) RSUs ex clude certain awards which require cash settlement and do not allow for share settlement. (2) Executive A wards include amounts associated with the Annual Awards and Launch Awards. As these awards require settlement based on a fixed monetary amount, the quantity of securities was calculated based on the total fixed monetary amount divided by the closing average market price of ordinary shares. 10. Commitments and Contingencies Litigation From time to time, the Company is party

to litigation and other legal proceedings in the ordinary course of business. While the results of any litigati on or other legal proceedings are uncertain, management does not believe the ultimate resolution of any pending legal matters is likely to

have a material adverse effect on the Company's financial position, results of operations or cash flows. The Company accrues for loss contingencies when it is both probable that it will incur the loss and when the Company can reasonably

estimate the amount of the loss or range of loss. In the fiscal year ended March 31, 2023, the Company r ecorded a \$40.0 million loss contingency related to an offer made by the Company in respect of an ongoing contract dispute between the

Company and a non-top five customer. That particular customer's claims arise from a contract dating to a very early period in the Company's history and that contract is both non-standard and significantly dissimilar from other customers' contracts. The Company took into consideration advice recei

ved from experts in the specific matter and current status of settlement negotiations, which may be ongoin g. A complaint has not been

filed by either party, and the Company and the customer are involved in ongoing negotiations to resolve the dispute outside of court. The Company can provide no assurances as to the ultimate resolution of this dispute or F-87 Table of Contents whether it will ultimately be litigated or to the ultimate costs that will be associated with a resolution. As of June 30, 2023, the loss contingency remained unsettled with no change in the

Company's estimate of the loss contingency. No other material amounts related to litigation settlements w ere recognized in the fiscal quarters ended June 30, 2023 and 2022. Kronos Guarantee In March 2022, a wholly owned

United Kingdom subsidiary of SoftBank Group, Kronos I (UK) Limited ("Kronos"), was created for the purp ose of SoftBank Group arranging a facility agreement (the "Facility Agreement") with J.P. Morgan SE as F acility Agent to be

secured by its equity interest in the Company. SoftBank Group pledged its ownership interest in the Company by transferring such interest to an entity that sits between Kronos and the Company, and SoftBank Group has no further obligation under the

Facility Agreement. The Company is in compliance with all applicable operating and financial covenants p ursuant to the Facility Agreement for the periods presented. Under the Facility Agreement, the lenders init ially were committed to make up to \$8.0 billion of funds available to Kronos under a "Bridge

Facility" and "Term Facility" (together with the Bridge Facility, the "Facility"). In March 2022, the Term Facility was funded for \$7.1 billion and the Bridge Facility was funded for \$0.9 billion. In June 2022, an amend ment was executed which expanded the total commitment of the Term Facility to \$8.5 billion via an additional term facility of

\$1.4 billion, \$0.9 billion of which was used to repay the Bridge Facility in full with the remaining \$0.5 billion representing incremental debt. The Term Facility matures on the earlier of two years after Kronos draws upon the

facility or three months after the effective date of a public listing of the Company's ordinary shares. Beyon d the pledge of the interest in the

Company as collateral for the Facility, in March 2022, the Company entered into the Arm Undertaking (the "Undertaking") to confirm and agree to comply with certain terms of the Facility Agreement (including ope rational restrictions) and a

springing guarantee and indemnity agreement (the "Guarantee") with J.P. Morgan SE. The Guarantee commences upon an "Arm Guarantee Trigger Event," which includes a public listing of the Company's ordinary shares not occurring

within 18 months of the closing date of the Facility or any public announcement or notice to lenders that a listing will not be undertaken and failure by the Company or its subsidiaries to comply with the obligations under the Undertaking. Until an

Arm Guarantee Trigger Event occurs, the Company is not obligated to perform or make payment on the o bligations of Kronos. Once an Arm Guarantee Trigger

Event has occurred, the Company guarantees all overdue payments under the Facility Agreement. The to tal commitment is \$8.5 billion and would only become a potential obligation to the Company if Kronos were to default on any such obligation, as

Kronos remains the primary obligor under the Facility Agreement even after an Arm Guarantee Trigger Ev ent. Upon default, the lenders can satisfy their claim either through the collateral of Kronos' interest in the Company or through the Company

servicing the debt and meeting payment obligations pursuant to the Guarantee. SoftBank Group as the o wner of Kronos may avoid default by restructuring the Facility Agreement, or otherwise monetizing the coll ateral for the necessary liquidity to meet

payment obligations under the Facility Agreement. The Company believes that the likelihood of assuming the debt obligations under the Guarantee is remote due to Kronos' significant collateralization of the oblig ations under the Facility

Agreement and that SoftBank Group will avoid a default by Kronos for which the obligations would become enforceable against the Company. As the

Company's potential obligation is an issued Guarantee to the lenders for obligations of Kronos, an entity under common control, the Company is not required to recognize the Guarantee. Arduino Guarantee The

Company is guarantor for a

\$5.4 million credit facility available to Arduino. The guaranty expires in January 2024. As of June 30, 2023 and March 31, 2023, no claims have been made against the guaranty. F-88 Table of Contents 11. Relate d Party Transactions Arm China and Acetone Limited Following the

restructuring of its direct investment in Arm Technology (China) Co. Limited ("Arm China") in the fiscal year ended March 31, 2022, the Company has a 10% non-voting ownership interest in Acetone

Limited, whose primary asset is a 48.18% interest in Arm China. The Company has no direct material tran sactions with Acetone Limited. For the fiscal

quarters ended June 30, 2023 and 2022, the Company recognized revenue of \$138.9 million and \$165.6 million, respectively recognized expenses of \$16.1 million and \$13.2 million, respectively under a service share arrangement

with Arm China. The Company leases certain assets to Arm China and rental income was immaterial for a II periods presented herein. As of June 30,

2023, the Company had a net receivable of \$280.3 million (\$298.0 million receivable less \$17.7 million pa yable) from Arm China. As of June 30, 2023, the Company had contract liabilities of \$136.6 million relating to Arm

China. As of March 31, 2023, the Company had a net receivable of \$386.9 million (\$400.7 million receivable less \$13.9 million payable) from Arm China. As of March 31, 2023, the Company had contract liabilities of

\$103.4 million. See Note 3, Equity Investments, for discussion of the impact of Acetone Limited on the Company's results. Other Entities Related by Virtue of Common Control in SoftBank Group The Company also had other revenue and expense transactions, along with receivable and balances with other entities by virtue of common control in SoftBank

Group. For the fiscal quarters ended June 30, 2023 and 2022, the Company recognized revenue of \$0.2 million and \$0.4 million, respectively. As of June 30, 2023, the Company had accounts receivable, other receivables and contract

liabilities of \$0.3 million, \$12.0 million and \$1.6 million, respectively. As of March 31, 2023, the Company had accounts receivable, other receivables and contract liabilities of \$0.5 million, \$12.0 million and \$1.6 million, respectively. The Company also had immaterial lessee leases with a certain related party by virtue of common control in SoftBank Group. SoftBank Group Facility In March 2022, Kronos entered into the Facility Agreement which is secured by its interest in the Company. The Company also e ntered into the Undertaking to confirm and agree to comply with the terms of the Facility Agreement and a Guarantee of the obligations under the

Facility Agreement owed by Kronos, an entity under common control of SoftBank Group. Under the terms of the Guarantee, upon an Arm Guarantee Trigger Event, the Guarantee springs into effect, such that any future payment default by Kronos following

such date may require performance by the Company if not settled by use of the share collateral or otherwise restructured. Refer to Note 10, Commitments and Contingencies for further details on this Guarantee. The Guarantee does not spring into

effect if a public listing has become effective, and if a public listing takes place after the Guarantee has be come effective, the Guarantee terminates. Other Equity Investments The Company has revenue transactions, along with receivable and contract liability balances for certain other equity investees, for wh

ich the Company has significant influence or, for investments in limited partnerships or certain limit liability companies that maintain a

specific ownership account for each investor, has more than virtually no influence (i.e., at least 3% to 5% ownership). For the fiscal quarters ended June 30, 2023 and 2022, the Company recognized revenue of \$ 1.0 million and

\$1.6 million, respectively. As of June 30, 2023, the Company had accounts receivable, contract assets an d contract liabilities of

\$6.7 million, \$2.7 million and \$32.3 million, respectively. As of March 31, 2023, the Company had account s receivable, contract assets and contract liabilities of \$0.5 million, \$8.7 million and \$30.2 million,

respectively. F-89 Table of Contents Linaro Limited Linaro Limited ("Linaro") is a not-for-profit entity for which the

Company is a member and exhibits significant influence. For the fiscal quarters ended June 30, 2023 and 2022, the Company incurred subscription costs of 2.4 million and \$0.0 million, respectively, from Linaro. A

s of June 30, 2023

and March 31, 2023, \$0.1 million and \$0.3 million was owed to Linaro. In February 2023, the Company entered into an agreement with Linaro

to sell certain net assets of the Company that meets the definition of a business in exchange for cash con sideration of \$4.0 million to be paid in equal annual installments over five years. As of June 30, 2023 and March 31, 2023,

total purchase consideration remained unpaid. Loans to Related Parties The Company's equity investmen t in Trustonic Limited was written down to zero carrying value due to recognition of the Company's share of losses.

Accordingly, the Company's subsequent share of losses has been written off against the loan balance due from Trustonic Limited. As of June 30,

2023 and March 31, 2023, the Company had a loan receivable of \$19.2 million and \$19.2 million, respectively with Arduino, a related party, which was subject to impairment considerations. The Company also has an outstanding loan

receivable of \$3.0 million with Cerfe Labs, Inc., a related party which was fully impaired in the fiscal year e nded March 31, 2023. Refer to Note 4, Financial Instruments, for further information regarding this loan. O ther relationships The Company has certain

advisory service agreements with Raine Securities LLC, a related party. For the fiscal quarters ended Jun e 30, 2023 and 2022, the Company incurred zero and \$0.6 million in expenses, respectively, for certain a dditional advisory services

provided by Raine Securities LLC. As of June 30, 2023 and March 31, 2023 the Company had payables of zero and \$2.5 million. 12. Subsequent Events Subsequent to June 30, 2023, the Company obtained board approval to commence corporate reorganization steps. This corporate reorganization is being effected solely for the purpose of reorganizing the Company's corporate structure, in which Arm Limited will become a wholly owned subsidiary of the holding company, Arm Holdings Limited. The Company has completed some of those steps, but the

corporate reorganization has not been completed. In August 2023, the Kronos Guarantee as described in Note 10, Commitments and Contingencies, was

amended to extend the Arm Guarantee Trigger Event period in relation to a public listing of the Company's ordinary shares not occurring, from 18 months to 21 months, of the closing date of the Facility or any public announcement or

notice to lenders that a listing will not be undertaken and failure by the Company or its subsidiaries to com ply with the obligations under the Undertaking. Indemnification of Directors and Officers. Subject to the provisions of the Companies Act, but without prejudice to any indemnity to which the person concerned may otherwise be entitled,

every director, former director and secretary of the Company (the "Relevant Officer") shall have the benefit of the following indemnification provisions in the Articles against any liability incurred by or attaching to them (and including

all costs, charges, losses, expenses and liabilities incurred by them in relation thereto), provided that the Articles shall be deemed not to provide for, or entitle any such person to, indemnification to the extent that it would cause the Articles,

or any element of them, to be treated as void under the Companies Act: • in connection with any negligen ce, default, breach of duty or breach of trust by them in relation to the Company

or any associated company (as defined in section 256 of the Companies Act) thereof, other than: (i) any li ability incurred to the Company or any associated company thereof; (ii) the payment of a fine imposed in any criminal proceeding or a

sum payable to a regulatory authority by way of a penalty in respect of non-compliance with any requirem ent of a regulatory nature (however arising); (iii) the defense of any criminal proceeding if the

Relevant Officer is convicted, (iv) the defense of any civil proceeding brought by the Company or its asso ciated company in which judgment is given against the Relevant Officer; and (v) any application for relief under sections 661(3),

661(4) or 1157 of the Companies Act in which the court refuses to grant relief to the Relevant Officer; and • in relation to or in connection with their duties, powers or office, including in connection with the activities

of the Company or an associated company thereof in their capacity as a trustee of an occupational pension scheme, other than: (i) the payment of a fine imposed in any criminal proceeding or a sum payable to a regulatory authority by way of a

penalty in respect of non-compliance with any requirement of a regulatory nature (however arising); and (i i) the defense of any criminal proceeding if the Relevant Officer is convicted. Subject to the provisions of the Companies Act, the Company may provide any Relevant Officer with funds to meet

expenditures incurred or to be incurred by them: (i) in defending any criminal or civil proceedings in connection with any negligence, default, breach of duty or breach of trust by them in relation to the Company or an associated company

thereof, or (ii) in connection with any application for relief under the provisions mentioned in section 205 of the Companies Act and otherwise may take any action to enable any such Relevant Officer to avoid incur ring such expenditure.

Relevant Officers who have received payment from the Company under the relevant indemnification provi sions must repay the amount they received in accordance with the Companies Act or in any other circums tances that the Company may prescribe or where

the Company has reserved the right to require repayment. The underwriting agreement that the Company will enter into in connection with

the offering of ADSs being registered hereby provides that the underwriters will indemnify, under certain c onditions, the Relevant Officers of the Company against certain liabilities arising in connection with this off ering. Item 7. Recent Sales of Unregistered Securities. We have issued and sold the following securities: Since April 1, 2020, we have granted certain employees an aggregate of 2,511,206 RSUs under the 2019 AEP, certain executive officers

an aggregate of 2,592,286 RSUs under the 2019 EIP, certain employees an aggregate of 34,285,187 RS Us under the 2022 RSU Plan and certain of our non-executive directors an aggregate of 39,845 RSUs under

the NED Plan. II-1 Table of Contents Unless otherwise stated, the issuances of the above securities were deemed to be exempt from

registration under the Securities Act in reliance upon (i) Section 4(a)(2) of the Securities Act or Regulation D promulgated thereunder as transactions by an issuer not involving any public offering, (ii) under Regula tion S

promulgated under the Securities Act as offers, sales and issuances were not made to persons in the U.S. and no directed selling efforts were made in the U.S., or (iii) under Rule 701 promulgated under the Securities Act as transactions

pursuant to benefit plans and contracts relating to compensation. None of the foregoing transactions involved any underwriters,

underwriting discounts or commissions or any public offering. Item 8. Financial State ment Schedules None. All schedules have been omitted because the information required to be set forth the herein is not applicable or has been included in the

consolidated financial statements and notes thereto. Item 9. Undertakings Insofar as indemnification for li abilities arising under the Securities Act may be permitted to directors, officers or persons controlling the registrant pursuant to the foregoing provisions, or otherwise, the registrant II-2 Table of Contents has bee n informed that in the opinion of the SEC such indemnification is against public policy as expressed in the Securities Act, and is, therefore, unenforceable. In the event that a claim for

indemnification against such liabilities (other than the payment by the registrant of expenses incurred or p aid by a director, officer or person controlling the registrant in the successful defense of any action, suit or proceeding) is asserted by

such director, officer or person controlling the registrant in connection with the securities being registered, the registrant will, unless in the opinion of its counsel the matter has been settled by controlling preceden t, submit to a court of

appropriate jurisdiction the question of whether such indemnification by it is against public policy as expre ssed in the Securities Act and will be governed by the final adjudication of such issue. The undersigned re gistrant hereby undertakes that: (1) For purposes of determining any liability under the Securities Act, the information omitted from the form of

prospectus filed as part of this registration statement in reliance upon Rule 430A and contained in a form of prospectus filed by the registrant pursuant to Rule 424(b)(1) or (4) or 497(h) under the Securities Act shall be deemed to be part of

this registration statement as of the time it was declared effective. (2) For the purpose of determining any I iability under the Securities Act, each post-effective amendment that

contains a form of prospectus shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof. II-3 Table of Contents SIGNATURES Pursuant to the requirements of the Securities Act of 1933, the registrant certifies that it has reasonable grounds to believe that it meets

all of the requirements for filing on Form F-1 and has duly caused this registration statement to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of Cambridge, United Kingdom on August 21, 2023.
